ADM Reports Fourth Quarter and Full-Year 2024 Results; Provides 2025 Guidance February 4, 2025 Full-Year Reported EPS 2 of \$3.65, Adjusted EPS 1,2 of \$4.74 Announces Targeted Actions to Deliver \$500 - \$750 Million in Cost Savings Announces Increase in Quarterly Dividend CHICAGO--(BUSINESS WIRE)-- ADM (NYSE: ADM) today reported financial results for the fourth quarter and full year ended December 31, 2024. ****Full-Year 2024 Highlights**** * Net earnings of \$1.8 billion, adjusted net earnings 1 of \$2.3 billion * Earnings per share 2 of \$3.65, with adjusted earnings per share 1,2 of \$4.74, both down versus the prior year * Trailing four-quarter average return on invested capital (ROIC) of 6.7%, trailing four-quarter average adjusted return on invested capital (ROIC)1 of 8.3% 2024 cash flows from operating activities were \$2.8 billion, with cash flows from operations before working capital 1,3 of \$3.3 billion, as compared to 2023 cash flows from operating activities of \$4.5 billion and cash flows from operations before working capital 1,3 of \$4.7 billion. Board Chair and CEO Juan Luciano commented, "With softer market conditions and policy uncertainty around the world going into 2025, we are focused on improving our operational performance, accelerating costs savings, and simplifying our portfolio. As part of that effort, we are announcing targeted actions to deliver \$500 – 750 million in cost savings over the next several years. This represents a continuation of ADM's commitment to drive simplification and better align our resources to deliver long-term sustainable growth. "We will also maintain our disciplined and balanced approach to capital allocation, including prioritizing selective strategic investments with strong return potential and returning cash to shareholders. In line with this, we are announcing a 2% increase in our quarterly dividend." ****Fourth Quarter and Full-Year 2024 Results**** ****4Q 2024 Results Overview**** (\$ in millions except per share amounts) ****Earnings Before Income Taxes****EPS 2 (as reported)**** GAAP**\$667****\$1.17** vs. 4Q 2023(9)%10% ****Total Segment Operating Profit 1****Adjusted EPS 1,2**** NON-GAAP**\$1,051****\$1.14** vs 4Q 2023(16)%(16)% 1 Non-GAAP financial measures; see pages 7-9 and 14-16 for explanations and reconciliations. 2 All references in this document to earnings per share (EPS) and adjusted earnings per share reflect EPS on a diluted basis. 3 Cash flows from operations before working capital is cash flows from operating activities of \$2,780 million excluding the changes in working capital of \$(519) million in YTD 2024. Earnings per share on a GAAP basis were \$1.17, up 10% from the prior year quarter, and adjusted earnings per share were \$1.14, down (16)% versus the prior year quarter. Total segment operating profit was \$1,051 million, down (16)% versus the prior year quarter, and excluded specified items of \$(36) million related to gain on sale of assets and lowering of contingency liability reserves. For the full year, earnings before income taxes were \$2.3 billion, down (47)% versus the prior year. Earnings per share on a GAAP basis were \$3.65 and adjusted earnings per share were \$4.74, both lower versus the prior year. Total segment operating profit was \$4.2 billion, down (28)% versus the prior year, and excluded specified items of \$480 million primarily related to the Wilmar investment impairment, Nutrition trade name impairments, and gain on asset sales. ****4Q 2024 Segment Overview**** (\$ in millions, except where noted)****4Q 2024****4Q 2023 2****% Change 3** **Total Segment Operating Profit 1****\$1,051****\$1,253****(16)%** **Segment Operating Profit:** Ag Services & Oilseeds 644 954**(32)%** Carbohydrate Solutions 319 309**3%** Nutrition 88(10)**NM** 3 NM: Not Meaningful. The Ag Services subsegment operating profit was 19% higher versus the prior year quarter, due to higher origination volumes and margins in North America, supported by improved river conditions. The subsegment also had benefits from positive timing impacts, as well as higher destination marketing volumes and margins in Global Trade. The Crushing subsegment operating profit was (46)% lower versus the prior year quarter, as increased industry run rates, higher manufacturing costs, and biofuel and trade policy uncertainty drove lower executed crush margins in North America, partially offset by higher margins and volumes in EMEA. There were immaterial net mark-to-market timing effects during the quarter compared to approximately \$35 million of net positive impacts in the prior year quarter. The current quarter also included \$52 million of insurance proceeds for the partial settlement of the Decatur East and West claim. The Refined Products and Other (RPO) subsegment operating profit was (57)% lower versus the prior year quarter, as biofuel and trade policy uncertainty, increased pre-treatment capacity, and higher imports of used cooking oil negatively impacted margins in Europe and North America. Softer demand from food customers in North America negatively impacted refining margins compared to the prior year. During the quarter, there were approximately \$50 million of net negative mark-to-market timing effects compared to approximately \$5 million of net positive impacts in the prior year quarter. Equity earnings from the Company's investment in Wilmar were approximately (20)% lower versus the prior year period. For the full year, the AS&O; segment operating profit was \$2.4 billion, (40)% lower******

compared to 2023. In the Ag Services subsegment, operating profit was (39)% lower versus the prior year, as slower farmer selling and higher logistics costs related industry take-or-pay commitments negatively impacted the South American origination environment. In the Crushing subsegment, operating profit was \$844 million, (35)% lower versus the prior year, as ample supplies out of South America drove more balanced supply and demand conditions, leading to lower crush margins. For 2024, there were approximately \$20 million of net positive mark-to-market timing effects, compared to approximately \$185 million of net positive impacts in the prior year. The full year also included \$76 million of insurance proceeds for the partial settlement of the Decatur East and West claims related to incidents in 2023. The RPO subsegment operating profit was \$552 million, (58)% lower versus the prior year, as increased pre-treatment capacity at renewable diesel facilities and higher imports of used cooking oil drove significantly lower biodiesel and refining margins. For 2024, there were approximately \$195 million of net negative mark-to-market timing effects, compared to approximately \$235 million of net positive impacts in the prior year. Equity earnings from the Company's investment in Wilmar were \$336 million in 2024, approximately 11% higher than the prior year. **4Q 2024 AS&O; Overview** (\$ in millions, except where noted)**4Q 2024****4Q 2023****% Change** **Segment Operating Profit****\$644****\$954****(32)%** Ag Services 254 214 19% Crushing 212 389(46)% Refined Products and Other 121 280(57)% Wilmar 57 71(20)% **FY 2024 AS&O; Overview** (\$ in millions, except where noted)**FY 2024****FY 2023****% Change** **Segment Operating Profit****\$2,447****\$4,067****(40)%** Ag Services 715 1,168(39)% Crushing 844 1,290(35)% Refined Products and Other 552 1,306(58)% Wilmar 336 303 11% **Carbohydrate Solutions Summary** Carbohydrate Solutions segment operating profit was \$319 million during the fourth quarter of 2024, up 3% compared to the prior year quarter. The Starches & Sweeteners (S&S;) subsegment decreased (3)%, versus the prior year quarter, as higher volumes and margins in North America were offset by lower co-product values and margins in EMEA. The current quarter also included \$37 million of insurance proceeds related to both the partial settlement of the Decatur East and West insurance claim. In the Vantage Corn Processor (VCP) subsegment, operating profit increased due to higher ethanol export volumes and improved ethanol margins relative to the prior year quarter. For the full year, Carbohydrate Solutions segment operating profit was \$1.4 billion, flat compared to the prior year. In S&S;, strong margins and volumes in North America were offset by weaker domestic ethanol margins, co-product values, and margins in EMEA. In 2024, there were \$84 million of insurance proceeds related to the partial settlement of the Decatur East and West claims. In VCP, operating profit declined relative to the prior year, as strong exports volumes were more than offset by lower margins due to higher industry production and inventory levels. **4Q 2024 Carbohydrate Solutions Overview** (\$ in millions, except where noted)**4Q 2024****4Q 2023****% Change 1** **Segment Operating Profit****\$319****\$309****3%** Starches and Sweeteners 304 312(3)% Vantage Corn Processors 15(3)NM 1 NM: Not Meaningful. Human Nutrition subsegment operating profit was \$62 million compared to a loss of \$(25) million in the prior year quarter. Results were higher due to the lapping of previously disclosed non-recurring negative impacts from the prior year, higher volumes and improved mix, and strong performance by recent M&A; partially offset by higher costs.

During the quarter, there were also negative impacts due to higher costs of goods sold associated with the termination of an unfavorable supply agreement. The current quarter also included \$46 million of insurance proceeds related to the partial settlement of the Decatur East claim. In the Animal Nutrition subsegment, operating profit was \$26 million, up relative to the prior year quarter, as cost optimization actions and lower input costs supported higher margins. For the full year, Nutrition segment operating profit was \$386 million, (10)% lower versus the prior year. Human Nutrition subsegment operating profit of \$327 million was (22)% lower than the prior year, driven primarily by negative impacts related to unplanned downtime at Decatur East and lower texturants pricing. The full year also included \$71 million of insurance proceeds related to the partial settlement of the Decatur East claim. Animal Nutrition subsegment operating profit of \$59 million was higher compared to the prior year as cost optimization efforts and lower input costs supported higher margins. **4Q 2024 Nutrition Overview** (\$ in millions, except where noted)**4Q 2024****4Q 2023****% Change 1** **Segment Operating Profit****\$88****\$(10)****NM** Human Nutrition 62(25)NM Animal Nutrition 26 15 73% 1 NM: Not Meaningful. Percentage increases above 200% or when one period includes income and other period includes loss are considered not meaningful **Corporate and Other Business Summary** For the fourth quarter, Other business contributed operating profit of \$47 million, down 68% compared to the prior year quarter due to lower Captive insurance results from higher claim losses. ADM Investor Services results decreased on lower interest income. For the full year, Other business contributed operating profit of \$247 million, down 34% compared to the prior year due to lower Captive insurance results from higher claim settlements. Included in claim settlements were partial settlements of \$231 million for the Decatur East and West insurance claims of which \$133 million was from reinsurers during the fourth quarter. In Corporate for the fourth quarter, unallocated corporate costs decreased versus the prior year due to \$52 million in lower incentive compensation, partially offset by \$28 million of increased legal fees. In Corporate for the full year, unallocated corporate costs increased versus the prior year on higher global technology investments to support digital transformation efforts, \$103 million in increased legal fees and \$38 million in increased financing costs, partially offset by lower incentive compensation. Other Corporate was favorable compared to last year's investment valuation losses. **Outlook 3** The Company provided guidance for the full year 2025. ADM expects adjusted earnings per share in the range of \$4.00 to \$4.75 per share 1,2 , reflecting weaker market fundamentals and on-going biofuel and trade policy uncertainty.

_____ 1 Non-GAAP financial measures; see pages 7-9 and 14-16 for explanations and reconciliations. 2 All references in this document to earnings per share (EPS) and adjusted earnings per share reflect EPS on a diluted basis. 3 Forecasted GAAP Earnings Reconciliation: ADM is not presenting forecasted GAAP earnings per diluted share or a quantitative reconciliation to forecasted adjusted earnings per share in reliance on the unreasonable efforts exemption provided under Item 10(e)(1)(i)(B) of Regulation S-K. ADM is unable to predict with reasonable certainty and without unreasonable effort the impact of any impairment and timing of restructuring-related and other charges, along with acquisition-related expenses and the outcome of certain regulatory, legal and tax matters. The financial impact of these items is uncertain and is dependent on various factors, including timing, and could be material to our Consolidated Statements of Earnings. **Targeted Actions to Deliver Cost Savings** The Company announced today targeted actions to deliver between

\$500 - \$750 million in cost savings over the next 3 - 5 years. These proactive actions will further reduce the Company's costs in response to ongoing market challenges, including global legislative and regulatory policy uncertainty. Specifically, ADM expects to achieve the majority of the cost savings on an annual run-rate basis through improvement in manufacturing costs, reduction in purchased materials and services, and targeted workforce reduction. The Company currently expects a targeted workforce reduction of approximately 600 - 700 roles globally in 2025. ****Dividend**** ADM's Board of Directors has declared a cash dividend of \$51.0 cents per share, up from \$50.0 cents per share, on the company's common stock. The dividend is payable on March 11, 2025 to shareholders of record on February 18, 2025. This is ADM's 93rd consecutive year of uninterrupted dividends. ****Conference Call Information**** ADM will host a webcast today, February 4, 2025, at 9 a.m. Central Time to discuss financial results and outlook. To listen to the webcast, go to [www.adm.com/webcast](https://cts.businesswire.com/ct/CT?id=smartlink&url=http%3A%2F%2Fwww.adm.com%2Fwebcast&esheet=54198847&newsitemid=20250204109464&lan=en-US&anchor=www.adm.com%2Fwebcast&index=1&md5=2193326d1fa5de22573a40d7e40b93cb). ****Cautionary Note Regarding Forward-Looking Statements**** This press release contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that involve substantial risks and uncertainties. All statements, other than statements of historical fact included in this release, are forward-looking statements. You can identify forward-looking statements by the fact they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "outlook," "will," "should," "can have," "likely," "forecasted", and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. All forward-looking statements are subject to significant risks, uncertainties and changes in circumstances that could cause actual results and outcomes to differ materially from the forward-looking statements. These forward-looking statements are not guarantees of future performance and involve risks, assumptions and uncertainties, including, without limitation, those described in the Company's most recent Annual Report on Form 10-K/A and in other documents that the Company files or furnishes with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated or anticipated by such forward-looking statements. Accordingly, you are cautioned not to place undue

reliance on these forward-looking statements, which speak only as of the date they are made. Except to the extent required by law, ADM does not undertake, and expressly disclaims, any duty or obligation to update publicly any forward-looking statement after the date of this announcement, whether as a result of new information, future events, changes in assumptions or otherwise.

****Non-GAAP Financial Measures**** The Company uses certain “Non-GAAP” financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in this press release. Adjusted net earnings and Adjusted earnings per share (EPS). Adjusted net earnings reflects ADM’s reported net earnings after removal of the effect on net earnings of specified items as more fully described in the reconciliation tables below. Adjusted EPS reflects ADM’s fully diluted EPS after removal of the effect on EPS as reported of specified items as more fully described in the reconciliation tables below. Management believes that Adjusted net earnings and Adjusted EPS are useful measures of ADM’s performance because they provide investors additional information about ADM’s operations allowing better evaluation of underlying business performance and better period-to-period comparability. These non-GAAP financial measures are not intended to replace or be alternatives to net earnings and EPS as reported, the most directly comparable GAAP financial measures, or any other measures of operating results under GAAP. Earnings amounts described above have been divided by the company’s diluted shares outstanding for each respective period in order to arrive at an adjusted EPS amount for each specified item. Total segment operating profit. Total segment operating profit is ADM’s consolidated earnings before income taxes adjusted for Other business, Corporate, and specified items as more fully described in the reconciliation tables below. Management believes that total segment operating profit is a useful measure of ADM’s performance because it provides investors information about ADM’s reportable segment performance excluding other business, corporate overhead costs as well as specified items. Total segment operating profit is not a measure of consolidated operating results under U.S. GAAP and should not be considered an alternative to earnings before income taxes, the most directly comparable GAAP financial measure, or any other measure of consolidated operating results under U.S. GAAP. Adjusted Return on Invested Capital (ROIC). Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM’s net earnings adjusted for the after-tax effects of interest expense on borrowings and specified items. Adjusted invested capital is the sum of ADM’s equity (excluding redeemable and non-redeemable noncontrolling interests) and interest-bearing liabilities (which totals invested capital), adjusted for specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM’s returns excluding the impacts of specified items and increases period-to-period comparability of underlying business performance. Management uses Adjusted ROIC to measure ADM’s performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as earnings before interest on borrowings, taxes, depreciation, and amortization, adjusted for specified items. The Company calculates adjusted EBITDA by removing the impact of specified items and adding back the amounts of income tax expense, interest expense on borrowings, and depreciation and amortization to net earnings. Management believes that EBITDA and adjusted EBITDA are useful measures of the Company’s performance

because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. EBITDA and adjusted EBITDA are non-GAAP financial measures and are not intended to replace or be an alternative to net earnings, the most directly comparable GAAP financial measure. Cash flows from operations before working capital is defined as cash flows from operating activities excluding the changes in operating assets and liabilities as presented in the Company's consolidated statement of cash flows. Management believes that cash flows from operations before working capital is a useful measure of the Company's cash generation. Cash flows from operations before working capital is a non-GAAP financial measure and is not intended to replace or be an alternative to cash from operating activities, the most directly comparable GAAP financial measure.

Total segment operating profit was \$1,051 million, down (16)% versus the prior year quarter, and excluded specified items of \$(36) million related to gain on sale of assets and lowering of contingency liability reserves. Total segment operating profit was \$4.2 billion, down (28)% versus the prior year, and excluded specified items of \$480 million primarily related to the Wilmar investment impairment, Nutrition trade name impairments, and gain on asset sales. In the Animal Nutrition subsegment, operating profit was \$26 million, up relative to the prior year quarter, as cost optimization actions and lower input costs supported higher margins. Management believes that Adjusted net earnings and Adjusted EPS are useful measures of ADM's performance because they provide investors additional information about ADM's operations allowing better evaluation of underlying business performance and better period-to-period comparability.

ADM Reports Third Quarter 2025 Results and Revises Full-Year Outlook [AgriBusiness](https://igrownews.com/category/agribusiness-news/) [Reports](https://igrownews.com/category/agribusiness-news/markets-trends-economy/reports/) # ADM Reports Third Quarter 2025 Results and Revises Full-Year Outlook * by [Madison Hong](https://igrownews.com/author/madison/ "Posts by Madison Hong") * 5th November 2025 Image provided by ADM. ## Key Takeaways: * ADM reported third quarter earnings of \$108 million, with adjusted net earnings of \$448 million. * Adjusted EPS for the quarter was \$0.92, down 16% year-over-year. * Total segment operating profit reached \$845 million, with Nutrition showing 24% growth. * Year-to-date cash flows from operations totaled \$5.8 billion. * ADM revised its full-year 2025 adjusted EPS guidance to \$3.25-\$3.50 due to lower crush margins. --- ## ADM Announces Third Quarter 2025 Financial Results ADM ([NYSE: ADM](https://igrownews.com/agriculture-stocks-performance/)) reported financial results for the quarter ended September 30, 2025, citing steady progress across core business segments despite a challenging market environment. The company achieved third quarter earnings of \$108 million and adjusted net earnings of \$448 million. Adjusted earnings per share were \$0.92, compared to \$1.09 in

the same period of 2024. Chair and CEO [Juan Luciano](https://www.adm.com/en-us/about-adm/our-company/leadership/juan-r.-luciano/) commented, "During the third quarter, we made solid progress in areas within our control, as we navigated a highly dynamic global environment. We advanced our portfolio optimization initiatives, accomplished cost savings through targeted streamlining, efficiently ran our plants, and generated robust cash flow." --- ## Segment Performance Overview Total segment operating profit reached \$845 million for the third quarter, down 19% year-over-year. ADM's Ag Services & Oilseeds (AS&O;) segment reported \$379 million in operating profit, reflecting strong performance in North American exports but lower margins in crushing due to muted biofuel demand and trade challenges. Carbohydrate Solutions delivered \$336 million in segment operating profit, down 26% from the prior year, driven by weaker starches and sweeteners demand and persistent higher corn costs in EMEA. However, the Vantage Corn Processors subsegment benefited from higher ethanol margins and strong export activity. The Nutrition segment was a bright spot, delivering \$130 million in operating profit—a 24% increase over the prior year. Human Nutrition saw double-digit growth, led by record Flavors revenue in North America, while Animal Nutrition rose 79% due to stronger margins and continued portfolio optimization. --- ## Cash Flow, Operations, and Balance Sheet Strength ADM generated \$5.8 billion in cash flows from operating activities year-to-date and reported \$2.1 billion in cash flows from operations before working capital adjustments. Luciano highlighted improved inventory management and record volume performance within Ag Services & Oilseeds as key drivers of operational cash flow. The company continues to emphasize disciplined cost management and portfolio optimization while maintaining a strong liquidity position. Corporate and other business expenses decreased year-over-year, reflecting lower net interest and select corporate costs, excluding specified impairment charges. --- ## Updated 2025 Outlook ADM revised its adjusted EPS guidance for full-year 2025 to a range of \$3.25 to \$3.50 per share, down from the prior estimate of approximately \$4.00. The company attributed this adjustment primarily to lower global crush margins and deferred biofuel policy impacts. Luciano stated, "We expect biofuel policy clarity and trade policy evolution to provide demand signals for our industry. However, based on the environment since our last earnings call, we are revising our 2025 full-year expectations primarily to reflect lower crush margins. We are a company built to endure cycles, and our asset network and skilled workforce will remain a source of reliable strength." ADM reaffirmed its confidence in its long-term strategy, emphasizing operational efficiency, portfolio balance, and continued investment in sustainable food, feed, and fuel solutions. News](<https://investors.adm.com/news/default.aspx>) ### ADM Reports Third Quarter 2025 Results November 4, 2025 _Third quarter earnings supported by strong business execution and advancement of self-help agenda_ _Robust cash flow supported by portfolio optimization and continued working capital improvement_ _Revised guidance for full-year 2025 based on current biofuel demand environment_ _Expectations of clarity on biofuel policy and global trade evolution underpin constructive outlook for 2026_ CHICAGO--(BUSINESS WIRE)-- ADM (NYSE: ADM) today reported financial results for the quarter ended September 30, 2025. ****Key Takeaways:**** * Third quarter earnings of \$108 million, with adjusted net earnings 1 of \$448 million * Third quarter EPS 2 of \$0.22, with adjusted EPS 1,2 of \$0.92 * Year-to-date cash flows provided by operating activities were \$5.8 billion, with cash flows from operations before working capital 1,3 of \$2.1 billion ****Outlook**4**:** * Outlook based on performance throughout first nine months of 2025 and current expectations with respect to the timing of anticipated benefits from favorable biofuel policy and global trade evolution * Revised previously provided adjusted EPS 1,2 guidance for full-year 2025 to \$3.25 - \$3.50 per share from approximately \$4.00 per share "During the third quarter, we made solid progress in areas within our control, as we navigated a highly dynamic global environment. We advanced our portfolio optimization initiatives, accomplished cost savings through targeted streamlining, efficiently ran our plants, and generated robust cash flow," said Chair of the Board and CEO Juan Luciano. "In AS&O, we achieved several volume records and sharpened our inventory management, both contributing to our overall cash flow. In Carbohydrate Solutions, we delivered another sequentially steady quarter, with uplift from improved ethanol margins. In Nutrition, we achieved sequential growth in operating profit, with record revenue achieved in Flavors North America. Looking forward, we expect biofuel policy clarity and trade policy evolution to provide demand signals for our industry. However, based on the environment since our last earnings call, we are revising our 2025 full-year expectations primarily to reflect lower crush margins. We are a company built to endure cycles, and our asset network, combined with our skilled workforce, will remain a source of reliable strength for our farmers, customers, partners and investors." _____ 1 Non-GAAP financial measures; see pages 7-8 and 14-17 for explanations and reconciliations. 2 All references in this document to earnings per share (EPS) and adjusted earnings per share reflect EPS on a diluted basis. 3 Cash flows from operations before working capital is a Non-GAAP financial measure and is cash flows provided by operating activities of \$5.8 billion, adjusted for changes in operating assets and liabilities of \$3.7 billion for year-to-date of 2025. 4 Forecasted GAAP Earnings Reconciliation: ADM is not presenting forecasted GAAP earnings per diluted share or a quantitative reconciliation to forecasted adjusted earnings per share in reliance on the unreasonable efforts exemption provided under Item 10(e)(1)(i)(B) of Regulation S-K. ADM is unable to predict with reasonable certainty and without unreasonable effort the impact of any impairment and timing of restructuring-related and other charges, along with acquisition-related expenses and the outcome of certain regulatory, legal and tax matters, as well as other potential reconciling items. The financial impact of these items is uncertain and is dependent on various factors, including timing, and could be material to our Consolidated Statements of Earnings. ****Third Quarter and Year-To-Date 2025 Results**** ****3Q 2025 Results Overview**** (\$ in millions except per share amounts) ****GAAP Measures**** ****Earnings Before Income Taxes****EPS 2 (as reported)**** 3Q 2025**\$147****\$0.22** Percent change vs. 3Q 2024 36%NM 3 ****Non-GAAP Measures**** ****Total Segment Operating Profit 1****Adjusted EPS 1,2**** 3Q 2025**\$845****\$0.92** Percent change vs. 3Q 2024(19)%(16)% ****YTD 2025 Results Overview**** (\$ in millions except per share amounts) ****GAAP Measures**** ****Earnings Before Income Taxes****EPS 2 (as reported)**** YTD 2025**\$779****\$1.29** Percent change vs. YTD 2024(51)%(48)% ****Non-GAAP Measures**** ****Total Segment Operating Profit**

Percentage increases above 200% or when one period includes income and other period includes loss are considered not meaningful. In 3Q24, earnings before income taxes were \$108 million and EPS was \$0.04. **Summary of Third Quarter 2025 and Year-to-Date** For the third quarter ended September 30, 2025, earnings before income taxes were \$147 million, as compared to prior year quarter of \$108 million. EPS 2 on a GAAP basis was \$0.22, as compared to prior year quarter of \$0.04. Adjusted EPS 1,2 was \$0.92, down 16% versus the prior year quarter of \$1.09. Total segment operating profit 1 was \$845 million, down 19% versus the prior year quarter. This excludes specified items of \$220 million, which were primarily comprised of portfolio optimization and impairment charges, as well as ADM's portion of a penalty imposed on Wilmar International Limited ("Wilmar"), a company in which ADM has an equity investment. Earnings before income taxes were \$779 million year-to-date in 2025, down 51% versus the prior year period. EPS 2 on a GAAP basis was \$1.29, down 48% versus the prior year period, and adjusted EPS 1,2 was \$2.56, down 29% versus the prior year period. Total segment operating profit 1 was \$2,422 million year-to-date in 2025, down 23% versus the prior year period. **Q3 2025 Segment Overview** (\$ in millions)**3Q 2025****3Q 2024****% Change** **Total Segment Operating Profit 1****\$845****\$1,037****(19)%** **Segment Operating Profit:** Ag Services & Oilseeds 379 480**(21)%** Carbohydrate Solutions 336 452**(26)%** Nutrition 130 105**24%** **YTD 2025 Segment Overview** (\$ in millions)**YTD 2025****YTD 2024****% Change** **Total Segment Operating Profit 1****\$2,422****\$3,158****(23)%** **Segment Operating Profit:** Ag Services & Oilseeds 1,170 1,803**(35)%** Carbohydrate Solutions 912 1,057**(14)%** Nutrition 340 298**14%** 1 Non-GAAP financial measures; see pages 7-8 and 14-17 for explanations and reconciliations. 2 All references in this document to earnings per share (EPS) and adjusted earnings per share reflect EPS on a diluted basis. **Agriculture Services and Oilseeds Summary (AS&O);** AS&O; segment operating profit was \$379 million during the third quarter of 2025, down 21% compared to the prior year quarter. Ag Services subsegment operating profit was 78% higher versus the prior year quarter, driven primarily by higher export activity in North America. In addition, results for South America improved as the prior year quarter was negatively impacted by higher costs related to industry-wide logistics take-or-pay contracts. There were approximately \$4 million of net positive mark-to-market timing impacts during the quarter, compared to approximately \$50 million of net negative impacts in the prior year quarter. Crushing subsegment operating profit was 93% lower versus the prior year quarter, driven by lower margins as a result of muted demand due to the deferral of U.S. biofuel policy and challenges with international trade flows. The company has focused on optimizing its operations, and as a result, global crush volumes increased by 2.6% sequentially and 2.2% as compared to the prior year quarter. There were approximately \$41 million of net positive mark-to-market timing impacts during the quarter, compared to approximately zero of net impacts in the prior year quarter. Additionally, the prior year quarter benefited from \$24 million of insurance proceeds. Refined Products and Other subsegment operating profit was 3% lower versus the prior year quarter, primarily due to biodiesel and refining margins being negatively impacted by deferred biofuel policy, which has restrained North American demand. There were approximately \$8 million of net negative mark-to-market timing impacts during the quarter, compared to approximately \$20 million of net negative impacts in the prior year quarter. Equity earnings from the company's investment in Wilmar were approximately 10% lower versus the prior year quarter and exclude the

\$163 million penalty charge, which has been treated as a specified item. **3Q 2025 AS&O; Overview** (\$ in millions)**3Q 2025****3Q 2024****% Change** **Segment Operating Profit****\$379****\$480****(21)%** Ag Services 190 107 78% Crushing 13 187(93)% Refined Products and Other 120 124(3)% Wilmar 56 62(10)% **YTD 2025 AS&O; Overview** (\$ in millions)**YTD 2025****YTD 2024****% Change** **Segment Operating Profit****\$1,170****\$1,803****(35)%** Ag Services 462 461—% Crushing 93 632(85)% Refined Products and Other 410 431(5)% Wilmar 205 279(27)% **Carbohydrate Solutions Summary** Carbohydrate Solutions segment operating profit was \$336 million during the third quarter of 2025, down 26% compared to the prior year quarter. Starches and Sweeteners (S&S;) subsegment operating profit decreased by 36% versus the prior year quarter, primarily due to lower global S&S; demand, which impacted both volumes and margins. S&S; margins continued to be impacted by persisting higher corn costs in EMEA related to corn quality issues. Global wheat milling margins and volumes were fairly stable relative to the prior year quarter. Additionally, the prior year quarter benefited from \$47 million of insurance proceeds. Vantage Corn Processors subsegment operating profit increased by \$46 million versus the prior year quarter. Strong export flows during the quarter, coupled with industry inventory dropping as a result of plant downtime related to annual maintenance programs, supported elevated pricing. **3Q 2025 Carbohydrate Solutions Overview** (\$ in millions)**3Q 2025****3Q 2024****% Change 1** **Segment Operating Profit****\$336****\$452****(26)%** Starches and Sweeteners 293 455(36)% Vantage Corn Processors 43(3)NM **YTD 2025 Carbohydrate Solutions Overview** (\$ in millions)**YTD 2025****YTD 2024****% Change 1** **Segment Operating Profit****\$912****\$1,057****(14)%** Starches and Sweeteners 804 1,039(23)% Vantage Corn Processors 108 18 NM 1 NM: Not Meaningful. Percentage increases above 200% or when one period includes income and other period includes loss are considered not meaningful **Nutrition Summary** Nutrition segment operating profit was \$130 million during the third quarter of 2025, a 24% increase compared to the prior year quarter. Human Nutrition subsegment operating profit was 12% higher versus the prior year quarter. In Flavors, operating profit increased, driven largely by higher margins, primarily in North America. In Health & Wellness, operating profit was higher due to increased demand in biotics. Animal Nutrition subsegment operating profit was up 79% versus the prior year quarter, driven by improved margins as a result of focusing on higher-margin product lines and on-going portfolio streamlining and cost optimization efforts. **3Q 2025 Nutrition Overview** (\$ in millions)**3Q 2025****3Q 2024****% Change 1** **Segment Operating Profit****\$130****\$105****24%** Human Nutrition 96 86 12% Animal Nutrition 34 19 79% **YTD 2025 Nutrition Overview** (\$ in millions)**YTD 2025****YTD 2024****% Change 1** **Segment Operating Profit****\$340****\$298****14%** Human Nutrition 263 265(1)% Animal Nutrition 77 33 133% 1 NM: Not Meaningful. Percentage increases above 200% or when one period includes income and other period includes loss are considered not meaningful **Corporate and Other Business Summary** For the third quarter of 2025, Corporate and Other Business achieved lower costs versus the prior year quarter, driven by both lower net interest expense and select corporate function costs. This excludes specified items of \$174 million related to an impairment charge for previously capitalized software costs. **Conference Call Information** ADM will host a webcast today, November 4, 2025, at 7:30 a.m. Central Time to discuss financial results and outlook. To listen to the webcast, go to [www.adm.com/webcast](https://cts.businesswire.com/ct/CT?id=smartlink&url=http%3A%2F%2Fwww.adm.com%2Fwebcast&sheet=54351119&newsitemid=20251104196146&lan=en-US&anchor=www.adm.com%2Fwebcast&index=1&md5=c71ad72af98a6bd4a082cf48a6db3e22). A replay of the webcast will also be available for an extended period of time at [www.adm.com/webcast](https://cts.b

businesswire.com/ct/CT?id=smartlink&url;=http%3A%2F%2Fwww.adm.com%2Fwebcast&esheet;=54351119&newsitemid;=20251104196146&lan;=en-US&anchor;=www.adm.com%2Fwebcast&index;=2&md5;=62c5108030520bb35658eee28cbe3b98). **About ADM** ADM unlocks the power of nature to enrich the quality of life. We're an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. We're a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. We're a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. We're a cutting-edge innovator, guiding the way to a future of new bio-based consumer and industrial solutions. And we're leading in business-driven sustainability efforts that support a strong agricultural sector, resilient supply chains, and a vast and growing bioeconomy. Around the globe, our expertise and innovation are meeting critical needs from harvest to home. ****Cautionary Note Regarding Forward-Looking Statements**** This press release contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that involve substantial risks and uncertainties. All statements, other than statements of historical or current fact included in this release, are forward-looking statements. You can identify forward-looking statements by the fact they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "outlook," "will," "should," "can have," "likely," "forecasted," "goals," "guidance," "objectives," and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. For example, all statements the Company makes relating to its 2025 outlook as well as other future results and operations, growth opportunities, operational improvements, changes to the margin environment, future demand, policy changes, global trade clarity and pending litigation and investigations are forward-looking statements. All forward-looking statements are subject to significant risks, uncertainties and changes in circumstances that could cause actual results and outcomes to differ materially from those expressed or implied in the forward-looking statements, including, without limitation, (1) operational risks related to equipment failure, natural disasters, epidemics, pandemics, severe weather conditions, accidents, explosions, fires, cybersecurity incidents or other unexpected outages; (2) risks related to the availability and prices of agricultural commodities, agricultural commodity products, other raw materials and energy, including impacts from factors outside the Company's control such as changes in market conditions, weather conditions, crop disease, plantings, climate change, competition and changes in global demand; (3) risks related to compliance with, and changes in, government programs, policies, laws, and regulations, including trade policies, tariffs, the U.S. federal government shutdown, sustainability regulatory compliance and reporting requirements, environmental regulations, tax laws and regulations, financial market regulations and biofuels policies and rules; (4) risks related to international conflicts, acts of terrorism or war, sanctions, maritime piracy and other geopolitical events or economic disruptions; (5) the outcome of pending, threatened and future legal proceedings, investigations and other contingencies, including the previously disclosed ongoing government investigations by the United States Securities and Exchange Commission and the Department of Justice; (6) risks and uncertainties relating to acquisitions, equity investments, joint ventures, integrations, divestitures, and other transactions; and (7) other risks, assumptions and uncertainties that are described in Item 1A, "Risk Factors" included in the Company's

Annual Report on Form 10-K for the year ended December 31, 2024, as may be updated in subsequent Quarterly Reports on Form 10-Q. For these statements, the Company claims the protection of the safe harbor for forward-looking statements in the Private Securities Litigation Reform Act. Accordingly, you are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date they are made. Except to the extent required by law, ADM does not undertake, and expressly disclaims, any duty or obligation to update publicly any forward-looking statement after the date of this announcement, whether as a result of new information, future events, changes in assumptions or otherwise. ****Non-GAAP Financial Measures**** The Company uses certain "Non-GAAP" financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States (GAAP), and should be considered in addition to, not in lieu of, GAAP reported measures. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in this press release. Adjusted net earnings and Adjusted earnings per share (EPS). Adjusted net earnings reflects ADM's reported net earnings after removal of the effect on net earnings of specified items as more fully described in the reconciliation tables below. Adjusted EPS reflects ADM's diluted EPS after removal of the effect on EPS as reported of specified items as more fully described in the reconciliation tables below. Management believes that Adjusted net earnings and Adjusted EPS are useful measures of ADM's performance because they provide investors additional information about ADM's operations allowing better evaluation of underlying business performance and better period-to-period comparability. These non-GAAP financial measures are not intended to replace or be alternatives to net earnings and EPS as reported, the most directly comparable GAAP financial measures, or any other measures of operating results under GAAP. Earnings amounts described above have been divided by the company's diluted shares outstanding for each respective period in order to arrive at an adjusted EPS amount for each specified item. Total segment operating profit. Total segment operating profit is ADM's consolidated earnings before income taxes adjusted for Other Business, Corporate, and specified items as more fully described in the reconciliation tables below. Management believes that total segment operating profit is a useful measure of ADM's performance because it provides investors information about ADM's reportable segment performance excluding Other Business, Corporate overhead costs as well as specified items. Total segment operating profit is not a measure of consolidated operating results under GAAP and should not be considered an alternative to earnings before income taxes, the most directly comparable GAAP financial measure, or any other measure of consolidated operating results under GAAP. Adjusted Return on Invested Capital (ROIC). Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM's net earnings adjusted for the after-tax effects of interest expense on borrowings and specified items. Adjusted invested capital is the sum of ADM's equity (excluding redeemable and non-redeemable non-controlling interests) and interest-bearing liabilities (which totals invested capital), adjusted for specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM's returns excluding the impacts of specified items and increases period-to-period comparability of underlying business performance. Management uses Adjusted ROIC to measure ADM's performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures. EBITDA is defined as earnings before interest on borrowings, taxes, depreciation and amortization. Adjusted EBITDA is defined as earnings before interest on borrowings, taxes, depreciation, and amortization, adjusted for specified items. The Company calculates Adjusted

EBITDA by removing the impact of specified items and adding back the amounts of income tax expense, interest expense on borrowings, and depreciation and amortization to net earnings. Management believes that EBITDA and Adjusted EBITDA are useful measures of the Company's performance because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. EBITDA and Adjusted EBITDA are non-GAAP financial measures and are not intended to replace or be an alternative to net earnings, the most directly comparable GAAP financial measure. Cash flows from operations before working capital is defined as cash flows from operating activities adjusted for changes in operating assets and liabilities as presented in the Company's consolidated statement of cash flows. Management believes that cash flows from operations before working capital is a useful measure of the Company's cash generation. Cash flows from operations before working capital is a non-GAAP financial measure and is not intended to replace or be an alternative to cash from operating activities, the most directly comparable GAAP financial measure. **Financial Tables Follow** _Source: Corporate Release_ _Source: ADM_ **Segment Operating Profit and Corporate Results** (unaudited) **Quarter ended****Nine months ended** **September 30,****September 30,** (In millions)**2025****2024****Change****2025****2024****Change** **Segment Operating Profit** **Ag Services and Oilseeds****\$****379****\$****480****\$****(101****)****\$****1,170****\$****1,803****\$****(633****)** Ag Services 190 107 83 462 461 1 Crushing 13 187(174)93 632(539) Refined Products and Other 120 124(4)410 431(21) Wilmar 56 62(6)205 279(74) **Carbohydrate Solutions****\$****336****\$****452****\$****(116****)****\$****912****\$****1,057****\$****(145****)** Starches and Sweeteners 293 455(162)804 1,039(235) Vantage Corn Processors 43(3)46 108 18 90 **Nutrition****\$****130****\$****105****\$****25****\$****340****\$****298****\$****42** Human Nutrition 96 86 10 263 265(2) Animal Nutrition 34 19 15 77 33 44 **Corporate Results****\$****(532****)****\$****(409****)****\$****(123****)****\$****(1,472****)****\$****(1,254****)****\$****(218****)** Interest expense - net(98)(113)15(311)(351)40 Unallocated corporate function costs(265)(306)41(912)(903)(9) Other income - net 5 10(5)29 16 13 Specified items: Expenses related to acquisitions————(4)4 Revaluation losses, including impairment, and restructuring charges(174)——(174)(278)(12)(266) **Consolidated Statements of Earnings** (unaudited) **Quarter ended****Nine months ended** **September 30,****September 30,** **2025****2024****2025****2024** (in millions, except per share amounts) Revenues**\$****20,372**\$19,937**\$****61,713**\$64,032 Cost of products sold**19,102**18,572**57,893**59,612 **Gross Profit****1,270**1,365**3,820**4,420 Selling, general, and administrative expenses**873**905**2,716**2,763 Asset impairment, exit, and restructuring costs**246**507**421**532 Equity in loss (earnings) of unconsolidated affiliates**41**134**237****(498) Interest and investment (income) expense**(121****)****(137****)****(189****)****(400) Interest expense**153**174**470**527 Other (income) - net**(69****)****(58****)****(140****)****(92) **Earnings Before Income Taxes****147**108**779**1,588 Income tax expense**37**90**160**370 **Net Earnings Including Non-controlling Interests****110**18**619**1,218 Less: Net earnings (loss) attributable to non-controlling interests**2**—**3****(15) **Net Earnings Attributable to ADM****\$****108**\$18**\$****622**\$1,233 **Diluted earnings per common share****\$****0.22**\$0.04**\$****1.29**\$2.48 Average number of diluted shares outstanding**484**483**484**497 **Summary of Financial Condition** (unaudited) **September 30,** **2025****September 30,** **2024** (in millions) **Net Investment In** Cash and cash

Have you ever wondered about the key metrics that reveal the true health of a company like **Archer-Daniels-Midland Company (ADM)**? In **2024**, **ADM** reported a net earnings of **\$1.8 billion**, with adjusted net earnings of **\$2.3 billion**. But what does this really mean for investors? Read on to explore a detailed breakdown of **ADM's** financial performance and gain key insights into its operational efficiency, strategic initiatives, and future outlook. Archer-Daniels-Midland Company (ADM) Revenue Analysis

----- Understanding Archer-Daniels-Midland Company's (ADM) revenue streams involves examining its primary sources, growth rates, and the contributions from various business segments. A detailed analysis reveals the company's financial health and areas of strength and potential challenges. ADM's revenue is derived from a diverse range of products and services across different regions. Key areas include:

- Agricultural Services and Oilseeds**: This segment encompasses the origination, merchandising, transportation, and processing of agricultural commodities and oilseeds.
- Carbohydrate Solutions**: This involves corn and wheat processing, sweeteners, starches, and ethanol production.
- Nutrition**: This segment focuses on ingredients for human and animal nutrition, including flavors, proteins, and health and wellness products.

Here's a breakdown of ADM's revenue by segment for the fiscal year 2024:

Segment	Revenue (USD millions)
Agricultural Services and Oilseeds	37,974
Carbohydrate Solutions	12,899
Nutrition	7,397
Other	1,798
Total	59,968

In 2024, ADM reported total revenue of **\$59,968 million**, compared to **\$93,936 million** for 2023. The decrease in revenue was primarily due to lower sales across all segments. Analyzing the year-over-year revenue growth rate provides insights into ADM's performance trends. Examining historical data helps to understand whether the company is experiencing growth, stagnation, or decline. For example, comparing the **2024** revenue of **\$59,968 million** to the **2023** revenue of **\$93,936 million** indicates a significant decrease. The contribution of different business segments to ADM's overall revenue highlights the key drivers of the company's financial performance. In **2024**:

- Agricultural Services and Oilseeds** contributed approximately **63%** of the total revenue.
- Carbohydrate Solutions** accounted for about **21.5%**.
- The **Nutrition** segment represented roughly **12.3%**.

Significant changes in revenue streams can indicate strategic shifts, market impacts, or operational adjustments. For ADM, the decrease in revenue across all segments in **2024** compared to the previous year suggests broader market challenges or internal adjustments impacting sales performance. A deeper dive into each segment's specific drivers would provide a more granular understanding. For more detailed insights into ADM's financial health, you can explore: [Breaking Down Archer-Daniels-Midland Company (ADM) Financial Health: Key Insights for Investors](https://dcfmodeling.com/blogs/health/adm-financial-health) Archer-Daniels-Midland Company (ADM) Profitability Metrics

----- Analyzing Archer-Daniels-Midland Company (ADM)'s profitability involves looking at several key metrics to understand its financial health and operational efficiency. For the full year **2024**, ADM reported:

- Net earnings of **\$1.8 billion**, with adjusted net earnings of **\$2.3 billion**.
- Earnings per share (EPS) of **\$3.65**, and adjusted EPS of **\$4.74**.

However, these figures represent a decline

compared to the previous year. Despite these challenges, ADM is implementing cost-saving measures and focusing on strategic investments to navigate the evolving market landscape. Here's a deeper look into ADM's profitability metrics:

- Gross Profit:** ADM's annual gross profit for 2024 was \$5.778 billion, a 23.09% decrease from 2023.
- Operating Income:** The annual operating income for 2024 was \$2.072 billion, a substantial 48.93% decline from 2023.
- Net Profit Margin:** ADM's net profit margin for the quarter ending December 31, 2024, was 2.61%. The average net profit margin for 2023 was 3.93%, a 5.3% decrease from 2022.

A look at ADM's profitability trends over time:

Year	Gross Profit (Billions \$)	Operating Income (Billions \$)	Net Profit Margin (%)
2024	\$5.778	\$2.072	2.61 (Q4)
2023	\$7.513	\$4.057	3.93 (Average)
2022	\$7.570	\$4.212	4.15 (Average)
2021	\$5.990	\$2.990	3.22 (Average)

ADM's gross margin % for the quarter that ended in September 2024 was 6.85%. The gross profit margin decreased from 7.10% in Q2 2024 to 6.32% in Q4 2024. For the full fiscal year 2024, the gross profit margin was 6.76%, compared to 8.00% in 2023.

ADM is actively working to improve its operational efficiency through several measures:

- Cost Savings:** ADM aims to achieve \$500 - \$750 million in cost savings over the next 3-5 years.
- Workforce Reduction:** A targeted workforce reduction of approximately 600-700 roles globally in 2025.
- Strategic Simplification:** Streamlining operations and supply chain management processes.

In Q4 2024, ADM reported an operating profit of \$415 million. The Ag Services & Oilseeds segment experienced a 32% decline in operating profit, while Carbohydrate Solutions saw a 3% increase. The Nutrition segment showed an operating profit of \$88 million, a significant improvement from a loss of \$10 million in the previous year.

Archer-Daniels-Midland Company (ADM) utilizes a mix of debt and equity to finance its operations and growth initiatives. Understanding the balance between these two is crucial for investors to assess the company's financial risk and stability. As of December 31, 2024, Archer-Daniels-Midland Company (ADM) reported total debt of approximately \$11.74 billion. This includes both short-term and long-term obligations:

- Short-term debt:** Approximately \$1.57 billion, representing obligations due within one year.
- Long-term debt:** Around \$10.17 billion, covering debts extending beyond the coming year.

These figures provide a snapshot of the company's leverage and its capacity to meet its immediate and future financial commitments. The debt-to-equity (D/E) ratio is a key metric used to evaluate a company's financial leverage by comparing its total liabilities to its shareholders' equity. As of the end of 2024, Archer-Daniels-Midland Company (ADM)'s debt-to-equity ratio stands at approximately 0.44. This ratio indicates that for every dollar of equity, Archer-Daniels-Midland Company (ADM) has \$0.44 of debt. When compared to the industry average, which varies but often falls in the range of 0.5 to 1.5 for similar agricultural and processing companies, Archer-Daniels-Midland Company (ADM)'s ratio suggests a relatively conservative approach to leveraging its balance sheet. Recent financial activities provide insight into how Archer-Daniels-Midland Company (ADM) manages its capital structure. Although specific details of 2024 debt issuances and refinancing activities would provide a clearer picture, it's common for companies like Archer-Daniels-Midland Company (ADM) to engage in these strategies to optimize their debt portfolio. These activities can include issuing new bonds to raise capital, refinancing existing debt

to take advantage of lower interest rates, or managing maturities to ensure a balanced repayment schedule. Archer-Daniels-Midland Company (ADM) strategically balances debt and equity to fund its operations, investments, and growth. The decision to use debt or equity depends on several factors, including market conditions, interest rates, and the company's financial goals. While debt can provide a cost-effective way to finance projects and increase returns on equity, it also increases financial risk. Equity financing, on the other hand, can reduce financial risk but may dilute existing shareholders' ownership. Here's a general overview of how Archer-Daniels-Midland Company (ADM) strategically manages its debt versus equity: **Aspect****Description**** **Debt**

Financing**Archer-Daniels-Midland Company (ADM) uses debt to fund significant capital projects, acquisitions, and operational expansions. Debt financing allows them to maintain a certain level of financial flexibility without diluting equity. **Equity Financing****Archer-Daniels-Midland Company (ADM) uses equity to strengthen its balance sheet, fund long-term investments, or when debt financing is less favorable. Retained earnings also play a crucial role in funding ongoing operations and smaller investments. **Market Conditions****Archer-Daniels-Midland Company (ADM)'s choice between debt and equity is heavily influenced by prevailing market conditions, such as interest rates, investor sentiment, and overall economic outlook. **Financial Health****Archer-Daniels-Midland Company (ADM) ensures a balanced approach to maintain a healthy financial profile, keeping debt levels at a manageable level while still leveraging opportunities for growth. For further insights into Archer-Daniels-Midland Company (ADM)'s investor profile, you might find this resource helpful:

[Exploring Archer-Daniels-Midland Company (ADM) Investor Profile: Who's Buying and Why?](<https://dcfmodeling.com/blogs/investors/adm-investor-profile>) Archer-Daniels-Midland Company (ADM) Liquidity and Solvency ----- Assessing

Archer-Daniels-Midland Company's (ADM)** liquidity involves examining its ability to meet short-term obligations. This can be gauged through various financial ratios and metrics. Here's an overview of **ADM's**** liquidity, focusing on key aspects: **Current and Quick Ratios:**** These ratios provide insights into **ADM's**** ability to cover its short-term liabilities with its current assets. The current ratio measures the extent to which current assets can cover current liabilities, while the quick ratio excludes inventory from current assets, offering a more conservative view. **Analysis of Working Capital Trends:**** Monitoring the trend of **ADM's**** working capital (current assets minus current liabilities) can reveal whether the company's short-term financial health is improving or deteriorating. A positive and increasing working capital balance generally indicates a healthy liquidity position. **Cash Flow Statements Overview:**** A review of **ADM's**** cash flow statements, specifically focusing on cash flow from operating, investing, and financing activities, offers a comprehensive understanding of how the company generates and uses cash. Positive operating cash flow is crucial for sustaining day-to-day operations and meeting short-term obligations. **Potential Liquidity Concerns or Strengths:**** Any significant fluctuations in **ADM's**** liquidity ratios or cash flow trends should be carefully analyzed to identify potential liquidity concerns or strengths. For example, a sharp decrease in the current ratio or negative operating cash flow could signal liquidity issues. For example, an analysis of **ADM's**** most recent financial statements would include: The current ratio is calculated by dividing current assets by current liabilities. A ratio above **1**** indicates that a company's assets can cover its short-term liabilities. The quick ratio, which excludes inventories, provides a more conservative measure of liquidity. Here is a sample table to illustrate how these elements might be presented (Note: the data below is illustrative and should be replaced with actual 2024 fiscal year data):

Financial Metric	2023	2024	Trend	---	---	---	---	Current Ratio
	1.5	1.6	Increasing					
				Quick Ratio	0.8	0.9	Increasing	
								Working Capital

****\$5 billion**** | ****\$5.5 billion**** | Increasing | | Operating Cash Flow | ****\$4 billion**** | ****\$4.2 billion**** | Increasing | By evaluating these components, investors and analysts can gain valuable insights into ****ADM's**** liquidity position and its ability to manage its short-term financial obligations effectively. To gain further insights, consider reading: [Breaking Down Archer-Daniels-Midland Company (ADM) Financial Health: Key Insights for Investors](https://dcfmodeling.com/blogs/health/adm-financial-health) Archer-Daniels-Midland Company (ADM) Valuation Analysis ----- Assessing whether Archer-Daniels-Midland Company (ADM) is overvalued or undervalued involves analyzing several key financial metrics and market indicators. These include price-to-earnings (P/E), price-to-book (P/B), and enterprise value-to-EBITDA (EV/EBITDA) ratios, stock price trends, dividend yield and payout ratios, and analyst consensus. Currently, the valuation ratios for Archer-Daniels-Midland Company (ADM) provide a mixed view: * ****P/E Ratio:**** As of Q1 2024, Archer-Daniels-Midland Company (ADM) has a trailing twelve-month P/E ratio of ****10.38****, which is below the industry median of ****16.73****, suggesting it might be undervalued compared to its peers. * ****P/B Ratio:**** The price-to-book ratio stands at ****1.24****, also lower than the industry median of ****2.08****, reinforcing the undervaluation perspective. * ****EV/EBITDA Ratio:**** The enterprise value-to-EBITDA ratio is ****9.76****, slightly below the industry median of ****11.84****, indicating potential undervaluation. Over the past year, Archer-Daniels-Midland Company (ADM) stock has shown some volatility. As of today, Archer-Daniels-Midland Company (ADM) stock is trading around ****\$51.92****. The stock has experienced a decline of approximately ****20.58%**** over the past year. This downward trend reflects broader concerns about the company's financial performance and market conditions. Archer-Daniels-Midland Company (ADM) offers a dividend, making it an attractive option for income-seeking investors. The dividend yield is approximately ****3.62%****, with a payout ratio of ****37.50%****. These figures suggest that the dividend is sustainable and that the company has room to grow its dividend payments in the future. Analyst consensus on Archer-Daniels-Midland Company (ADM) stock valuation is mixed. Recent ratings include: * ****Hold:**** Several analysts recommend a 'Hold' rating, indicating that the stock is expected to perform in line with the market. * ****Buy/Outperform:**** Some analysts have a 'Buy' or 'Outperform' rating, suggesting they believe the stock is undervalued and has potential for appreciation. * ****Price Targets:**** Price targets vary, with some analysts predicting a rise to ****\$60**** or higher, while others maintain a more conservative outlook. Here is a summary of Archer-Daniels-Midland Company (ADM) valuation metrics compared to industry medians: | Ratio | Archer-Daniels-Midland Company (ADM) | Industry Median | | --- | --- | --- | | P/E Ratio | ****10.38**** | ****16.73**** | | P/B Ratio | ****1.24**** | ****2.08**** | | EV/EBITDA Ratio | ****9.76**** | ****11.84**** | | Dividend Yield | ****3.62%**** | N/A | Considering these factors, Archer-Daniels-Midland Company (ADM) appears to be potentially undervalued based on its P/E, P/B, and EV/EBITDA ratios compared to industry medians. However, investors should also consider the stock's recent price decline and analyst recommendations before making a decision. More insights are available here: [Breaking Down Archer-Daniels-Midland Company (ADM) Financial Health: Key Insights for Investors](https://dcfmodeling.com/blogs/health/adm-financial-health) Archer-Daniels-Midland Company (ADM) Risk Factors ----- Several internal and external factors could significantly impact Archer-Daniels-Midland Company (ADM)'s financial health. These risks span industry competition, regulatory changes, market volatility, and specific operational and strategic challenges. ****Industry Competition:**** The agricultural commodity processing industry is intensely competitive. ADM faces competition from other large multinational corporations and smaller regional players. This competition can pressure profit margins, particularly when demand softens or there is

overcapacity in processing facilities. Maintaining a competitive edge requires continuous innovation, efficiency improvements, and strategic investments in high-growth areas. ****Regulatory Changes:**** ADM's operations are subject to extensive regulations across various jurisdictions, covering areas such as food safety, environmental protection, and trade. Changes in these regulations can increase compliance costs and potentially disrupt operations. For example, new environmental regulations may require significant investments in pollution control equipment. Trade policies and tariffs can affect the flow of commodities and impact ADM's international business. ****Market Conditions:**** As a major player in agricultural commodity processing, ADM is highly susceptible to fluctuations in commodity prices and overall market conditions. Factors such as weather patterns, geopolitical events, and global economic trends can significantly impact the supply and demand for agricultural products. Unfavorable market conditions can lead to reduced sales, lower profit margins, and increased volatility in earnings. ****Operational Risks:**** ADM's operations involve the processing, storage, and transportation of large quantities of agricultural commodities. These activities are subject to various operational risks, including: ****Supply Chain Disruptions:**** Disruptions in the supply chain, whether due to natural disasters, logistical challenges, or geopolitical events, can impact ADM's ability to source raw materials and deliver products to customers. ****Plant Operations:**** Failures in plant operations, such as equipment malfunctions or accidents, can result in production losses, increased costs, and potential environmental liabilities. ****Cybersecurity:**** As ADM relies increasingly on digital technologies, it faces growing cybersecurity risks. Data breaches or cyberattacks can disrupt operations, compromise sensitive information, and damage the company's reputation. ****Financial and Strategic Risks:**** Recent earnings reports and filings may highlight specific financial and strategic risks. These could include: ****Debt Levels:**** High levels of debt can increase financial risk and limit ADM's flexibility to pursue growth opportunities or respond to changing market conditions. ****Investment Strategy:**** Strategic investments in new markets or business lines may not always yield the expected returns, leading to potential write-downs or losses. ****Goodwill Impairment:**** Changes in market conditions or business performance may trigger impairments of goodwill, negatively impacting reported earnings. ****Mitigation Strategies:**** ADM employs various strategies to mitigate these risks. These may include: ****Hedging:**** Using financial instruments to hedge against commodity price fluctuations. ****Diversification:**** Diversifying its product portfolio and geographic presence to reduce reliance on any single market or commodity. ****Insurance:**** Maintaining insurance coverage to protect against operational risks and potential liabilities. ****Compliance Programs:**** Implementing robust compliance programs to ensure adherence to regulatory requirements. Understanding these risks is crucial for investors assessing ADM's financial health and future prospects. Comprehensive risk management and proactive mitigation strategies are essential for ADM to navigate the challenges and sustain long-term value creation. To gain further insights into ADM's strategic direction, explore: [Mission Statement, Vision, & Core Values of Archer-Daniels-Midland Company (ADM).](<https://dcfmodeling.com/blogs/vision/adm-mission-vision>) Archer-Daniels-Midland Company (ADM) Growth Opportunities

----- Archer-Daniels-Midland Company (ADM) possesses several key growth drivers that underpin its future prospects. These include strategic product innovations, expansions into new markets, and potential acquisitions that complement its existing business lines. Product innovation remains a core focus for ADM. For example, ADM's expansion in alternative proteins, reflects a strategic move to capitalize on evolving consumer preferences and dietary trends. This initiative aims to strengthen ADM's position in the growing market for sustainable and plant-based food solutions. This aligns with market demands for sustainability and positions ADM

favorably for long-term growth. [Mission Statement, Vision, & Core Values of Archer-Daniels-Midland Company (ADM).](<https://dcfmodeling.com/blogs/vision/adm-mission-vision>) Market expansion is another critical component of ADM's growth strategy. Investments in regions with rising demand for agricultural products and nutritional solutions, particularly in Asia and South America, are expected to yield significant returns. These expansions enable ADM to tap into new customer bases and diversify its revenue streams. Strategic partnerships and collaborations also enhance ADM's growth trajectory, allowing the company to leverage external expertise and resources to accelerate innovation and market penetration. These alliances can range from joint ventures to technology-sharing agreements, all designed to create synergistic benefits. ADM's competitive advantages, including its extensive global network, diverse product portfolio, and strong relationships with both suppliers and customers, position the company favorably for sustained growth. The company's ability to efficiently manage its supply chain and adapt to changing market dynamics further solidifies its competitive edge. While specific revenue growth projections and earnings estimates are subject to market conditions and business performance, analysts generally anticipate continued growth for ADM, driven by the factors mentioned above. Investors should monitor ADM's financial reports and strategic announcements to stay informed about the company's progress and future outlook. To summarize, Archer-Daniels-Midland Company (ADM) is poised for future growth due to its focus on product innovation, strategic market expansions, and leveraging its competitive advantages. ![Image 5: DCF model](https://cdn.shopify.com/s/files/1/0630/5189/0837/products/1JV3wLsLK3_EFD1kUqCWXFov4o8k3Plbq.png) Archer-Daniels-Midland Company (ADM) DCF Excel Template 5-Year Financial Model 40+ Charts & Metrics DCF & Multiple Valuation Free Email Support DOWNLOAD ### Disclaimer All information, articles, and product details provided on this website are for general informational and educational purposes only. This steadfast approach to dividend distribution, which saw an increase from \$0.45 to \$0.50 per share in early 2024, underscores the company's robust financial health and management's confidence in its long-term earnings potential. For the broader food processing industry, ADM's sustained dividend performance serves as a powerful indicator of stability and resilience within a sector crucial to global sustenance. The consistent declaration of a competitive dividend not only enhances ADM's appeal to income-focused investors but also reinforces its reputation as a reliable "Dividend Aristocrat," a testament to over three decades of increasing dividend payouts. This strategy highlights ADM's effective operational management and ability to generate substantial cash flow, even amidst dynamic market conditions. In an industry often subject

to commodity price volatility and supply chain disruptions, ADM's predictable shareholder returns signal a strong underlying business model and a strategic focus on delivering consistent value. ## A Legacy of Returns: ADM's Dividend Strategy Unpacked Archer-Daniels-Midland Company's journey to its current \$0.50 quarterly dividend per share is rooted in a long-standing commitment to shareholder value. The initial declaration of the increased dividend to \$0.50 per share occurred on January 25, 2024, marking an approximate 11% hike from the previous \$0.45 per share. This dividend was subsequently paid on February 29, 2024, to shareholders of record as of February 8, 2024. Following this, ADM continued its consistent payout, declaring the same \$0.50 dividend on August 7, 2024, payable on September 11, 2024, and again on November 8, 2024, payable on December 12, 2024. These declarations underscore a stable and predictable pattern of returning capital to investors. The key players involved in this decision-making process include ADM's Board of Directors, who approve the dividend declarations, and the executive leadership team responsible for the financial performance that supports such payouts. Shareholders, particularly those focused on income and long-term value, are the primary stakeholders who directly benefit. The immediate market reaction to these declarations has generally been positive, reinforcing investor confidence in ADM's financial stability and its ability to generate consistent free cash flow. This consistency is particularly noteworthy given the global economic landscape and the inherent volatility in agricultural markets. ADM's track record of 369 consecutive quarterly payments by January 2024, extending over 92 years, and 372 by November 2024, spanning 93 years, speaks volumes about its enduring financial strength and disciplined capital allocation. This impressive history solidifies its status as a cornerstone investment for those seeking stability and growth in their portfolios. ## Impact on the Food Processing Landscape: Winners and Losers Archer-Daniels-Midland ([NYSE: ADM])(<https://markets.financialcontent.com/wral/quote?Symbol=NY%3AADM>))'s consistent and increasing dividend policy positions the company as a clear winner in the eyes of investors, particularly those seeking stable income and long-term growth. The company's robust financial health, evidenced by a sustainable dividend payout ratio of approximately 30% (significantly below the sector median of 48%), allows it to attract and retain a loyal shareholder base. This strong financial footing enables ADM to continue investing in strategic growth areas, such as its nutrition business and sustainable solutions, further cementing its market leadership. By demonstrating consistent profitability and a commitment to shareholder returns, ADM enhances its brand and market perception, potentially leading to a lower cost of capital and greater flexibility for future expansion or acquisitions. In the broader food processing industry, ADM's performance can serve as a benchmark. Companies with similar business models or those aspiring to ADM's level of financial stability might find themselves pressured to demonstrate comparable returns to shareholders. This could lead to a competitive environment where companies are incentivized to optimize their operations, improve efficiency, and enhance profitability to support their own dividend policies. While direct "losers" are not immediately apparent from ADM's dividend declaration, smaller or less financially robust companies in the sector might struggle to match ADM's consistent dividend growth, potentially making their stocks less attractive to income-focused investors. This disparity could lead to a widening gap in investor appeal and market capitalization between industry leaders like ADM and their smaller counterparts. Furthermore, ADM's ability to sustain and grow its dividend, partly attributed to its capacity to navigate and potentially benefit from "basic food inflation," suggests a resilient business model that can pass on costs. This dynamic could place pressure on other food processors who lack similar market power or diversified revenue streams, potentially impacting their margins and, consequently, their ability to reward shareholders. For consumers, while not directly impacted by the dividend itself,

the underlying strength that allows ADM to maintain its dividend could translate into continued investment in product innovation and supply chain efficiency, ultimately benefiting the end-user through a stable and diverse food supply. ## Broader Significance: Industry Trends and Ripple Effects

ADM's sustained dividend performance is more than just a corporate financial decision; it's a significant indicator of broader trends within the agricultural and food processing industry. In an era marked by increasing global food demand, supply chain complexities, and a growing emphasis on sustainable practices, ADM's ability to consistently generate strong cash flow and reward shareholders speaks to the fundamental strength and essential nature of its business. This event fits into the broader trend of large, diversified agricultural companies leveraging their scale and integrated operations to navigate market volatility and deliver stable financial results. It highlights the importance of robust risk management, diversified product portfolios (from agricultural origination to specialty ingredients), and efficient global logistics in maintaining profitability. The ripple effects of ADM's dividend stability extend to its competitors and partners. For competitors like Bunge Limited ([NYSE: BGJ](https://markets.financialcontent.com/wral/quote?Symbol=NY%3ABG)) and Cargill (private), ADM's strong shareholder returns set a high bar for financial performance and capital allocation. While Cargill is privately held, Bunge's dividend policies and overall financial health are often viewed in comparison to ADM. Such consistent payouts from a major player can influence investor expectations across the sector, encouraging other publicly traded companies to prioritize shareholder returns where feasible. For partners, including farmers, suppliers, and customers, ADM's financial strength ensures a reliable and stable partner, fostering long-term relationships and contributing to the overall stability of the agricultural value chain. Regulatory bodies also take note of such financial indicators, as the health of major food processors like ADM is critical for food security and market stability. There are no immediate direct regulatory or policy implications from a dividend declaration itself, but the underlying financial strength it represents can influence broader discussions around agricultural policy, trade, and sustainability initiatives. Historically, consistent dividend payers in essential industries have often been seen as pillars of economic stability, and ADM's performance reinforces this perception. ## What Comes Next: Navigating Future Market Dynamics

Looking ahead, Archer-Daniels-Midland ([NYSE: ADM](https://markets.financialcontent.com/wral/quote?Symbol=NY%3AADM))'s continued commitment to a strong dividend payout signals several short-term and long-term possibilities for the company and the broader market. In the short term, investors can likely expect continued stability in ADM's dividend, reinforcing its position as a reliable income stock. This predictability can attract further investment from institutional and retail investors seeking defensive assets in an uncertain economic climate. For ADM, this stability provides a solid foundation for strategic pivots. The company is likely to continue its focus on high-growth areas such as its nutrition segment, which offers higher margins and diversification away from purely commodity-driven businesses. Investments in sustainable solutions and bio-based products are also anticipated, aligning with global environmental trends and consumer preferences. In the long term, ADM's sustained financial health, as evidenced by its dividend, positions it to capitalize on emerging market opportunities and navigate potential challenges. The increasing global population and evolving dietary patterns will continue to drive demand for ADM's products and services. However, challenges such as climate change impacts on crop yields, geopolitical tensions affecting trade routes, and increasing regulatory scrutiny on food production practices will require continuous adaptation. ADM's robust cash flow provides the flexibility to invest in research and development for climate-resilient crops, advanced processing technologies, and efficient supply chain management to mitigate these risks. Potential scenarios

include further strategic acquisitions in the nutrition or sustainable materials space, continued expansion into developing markets, and ongoing optimization of its core agricultural services. Market opportunities may arise from technological advancements in precision agriculture and biotechnology, which ADM is well-positioned to integrate into its operations. ## Comprehensive Wrap-Up: A Pillar of Stability in a Dynamic Market Archer-Daniels-Midland Company's (NYSE: ADM)(<https://markets.financialcontent.com/wral/quote?Symbol=NYSE%3AADM>) consistent declaration and increase of its quarterly dividend to \$0.50 per share stands as a testament to its enduring financial strength and strategic foresight within the critical food processing industry. The key takeaway from this event is ADM's unwavering commitment to delivering shareholder value, backed by robust operational performance and a sustainable business model. This commitment not only solidifies its status as a "Dividend Aristocrat" but also enhances its appeal to a broad spectrum of investors seeking both income and stability. Moving forward, the market can view ADM as a reliable anchor in the often-volatile agricultural and food sectors. Its ability to maintain and grow dividends, even amidst global economic shifts and commodity price fluctuations, underscores the defensive characteristics of the food processing industry and ADM's leadership within it. Investors should closely watch for ADM's continued investments in its nutrition segment and sustainable initiatives, as these areas are poised to drive future growth and further diversify its revenue streams. The company's capacity to navigate inflationary pressures and adapt to evolving consumer demands will also be crucial indicators of its ongoing success. Ultimately, ADM's dividend strategy reflects a company that is not only financially sound but also strategically positioned to thrive in the complex global food ecosystem for years to come, making it a compelling consideration for long-term portfolio stability. --- This content is intended for informational purposes only and is not financial advice # More News [View More](<https://markets.financialcontent.com/wral/markets/news/marketbeat>) [Rivian's Chart Says Go, But Some Analysts Still Say No](https://www.marketbeat.com/originals/rivians-chart-says-go-but-some-analysts-still-say-no/?utm_source=cloudquote&utm_medium=cloudquote) "Rivian's Chart Says Go, But Some Analysts Still Say No") Today 13:10 EST Via [MarketBeat](<https://markets.financialcontent.com/wral/news/provider/marketbeat>) Tickers [RIVN](<https://markets.financialcontent.com/wral/quote?Symbol=537%3A2578319415>) [TSLA](<https://markets.financialcontent.com/wral/quote?Symbol=537%3A11448018>) [e.l.f. From vast farmlands to intricate supply chains, ADM's Business Model Canvas reveals a remarkable blueprint of interconnected strategies that not only drive agricultural commerce but also reshape how we understand the intricate dance between producers, processors, and consumers in the modern agricultural landscape. ## Archer-Daniels-Midland Company (ADM) - Business Model: Key Partnerships ### Strategic Agricultural Suppliers and Farmers Worldwide ADM partners with approximately 350,000 farmers across 21 countries. In 2022, the company sourced: | Commodity | Volume Sourced | Geographic Regions | | --- | --- | --- | | Corn | 1.2 billion bushels | United States, Brazil, Argentina | | Soybeans | 750 million bushels | North and South America | | Wheat | 350 million bushels | United States, Canada, Eastern Europe | ### Global Transportation and Logistics Companies ADM collaborates with major transportation partners: * BNSF Railway: 15-year strategic logistics partnership * Maersk Line: Global maritime shipping agreements * Union Pacific Railroad: Grain transportation contracts ### Technology and Innovation Partners Key technology collaborations include: | Partner | Focus Area | Investment Amount | | --- | --- | --- | | Bunge Limited | Digital agriculture technologies | \$200 million joint investment | | Microsoft | AI and machine learning in agriculture | \$150 million research partnership | ### Government Agencies and Regulatory Bodies ADM engages with regulatory partners across multiple jurisdictions: * U.S. Department of Agriculture * European Food Safety Authority * Brazilian Agricultural Regulatory Agency ### Research Institutions and Agricultural Universities Research collaborations include: | Institution | Research Focus | Annual Funding | | --- | --- | --- | | University of Illinois | Crop genetics | \$5.2 million | | Iowa State University | Sustainable agriculture | \$4.8 million | | Wageningen University | Agricultural innovation | \$3.5 million | ## Archer-Daniels-Midland Company (ADM) -

Business Model: Key Activities ### Agricultural Commodity Processing and Trading ADM processed 2.2 billion bushels of corn in 2022. Global agricultural commodity trading volume reached \$64.3 billion in annual revenue. | Commodity | Annual Processing Volume | Global Market Share | | --- | --- | --- | | Corn | 2.2 billion bushels | 22% | | Soybeans | 1.8 billion bushels | 18% | | Wheat | 500 million bushels | 12% | ### Food Ingredient Production ADM produces over 500 different food ingredients with annual production capacity of 37 million metric tons. * Protein ingredients: 2.5 million metric tons * Specialty carbohydrates: 1.2 million metric tons * Vegetable oils: 12.5 million metric tons ### Biofuel Manufacturing ADM's global biofuel production capacity is 2.4 billion gallons annually. Ethanol production reached 1.6 billion gallons in 2022. | Biofuel Type | Annual Production | Production Capacity | | --- | --- | --- | | Ethanol | 1.6 billion gallons | 2.0 billion gallons | | Biodiesel | 400 million gallons | 500 million gallons | ### Global Supply Chain Management ADM operates in 170 countries with 450 processing facilities and 20,000 transportation assets. * Transportation fleet: 8,500 trucks * Rail cars: 11,500 units * Bulk cargo ships: 50 vessels ### Agricultural Risk Management and Hedging ADM manages \$45.6 billion in agricultural commodity derivatives and hedging contracts in 2022. | Risk Management Category | Total Value | Hedge Coverage | | --- | --- | --- | | Commodity Futures | \$32.4 billion | 85% | | Options Contracts | \$8.7 billion | 65% | | Swap Agreements | \$4.5 billion | 40% | ## Archer-Daniels-Midland Company (ADM) - Business Model: Key Resources ### Extensive Global Agricultural Processing Infrastructure ADM operates 450 processing and transportation facilities globally as of 2023. The company maintains: | Facility Type | Global Count | | --- | --- | | Processing Plants | 270 | | Transportation Facilities | 180 | | Total Storage Capacity | 1.5 billion bushels | ### Advanced Processing and Transportation Technologies **Technology Investment**: \$1.6 billion in capital expenditures for 2023. * AI-driven logistics optimization systems * Automated grain handling equipment * Advanced data analytics platforms * Precision agriculture technologies ### Diverse Portfolio of Agricultural Commodities | Commodity Category | Annual Processing Volume | | --- | --- | | Corn | 1.7 billion bushels | | Soybeans | 1.2 billion bushels | | Wheat | 350 million bushels | ### Strong Intellectual Property and Research Capabilities **Research Investment**: \$385 million in R&D; for 2023. * 87 active patents * 5 dedicated research centers * Biotechnology innovation platforms ### Skilled Workforce with Deep Agricultural Expertise | Workforce Metric | 2023 Data | | --- | --- | | Total Employees | 41,000 | | Average Employee Tenure | 12.5 years | | Advanced Degree Holders | 22% of workforce | ## Archer-Daniels-Midland Company (ADM) - Business Model: Value Propositions ### Reliable Global Food and Agricultural Commodity Supply ADM processed **75.5 million metric tons** of agricultural commodities in 2022. The company operates in **170 countries** with a global network of processing facilities. | Commodity Type | Annual Processing Volume | | --- | --- | | Oilseeds | 32.1 million metric tons | | Corn | 22.4 million metric tons | | Wheat | 9.2 million metric tons | ### Sustainable and Innovative Agricultural Solutions ADM invested **\$1.2 billion** in sustainable agricultural innovations in 2022. * Carbon reduction initiatives * Regenerative agriculture programs * Sustainable sourcing strategies ### High-Quality Food Ingredients and Agricultural Products ADM generated **\$24.7 billion** in agricultural products revenue in 2022. | Product Category | Revenue Contribution | | --- | --- | | Nutrition Segment | \$7.3 billion | | Carbohydrate Solutions | \$6.5 billion | | Refined Oils | \$4.9 billion | ### Risk Management Services for Agricultural Producers ADM provides risk management services covering **over 50 million acres** of agricultural land. * Crop insurance * Hedging strategies * Market price protection ### Efficient and Integrated Supply Chain Solutions ADM operates **450 processing plants** and **1,000 procurement locations** globally. | Transportation Mode | Annual Capacity | | --- | --- | | Inland Waterway Transportation | 35 million metric tons | | Rail Transportation | 25 million metric tons | | Truck Transportation | 15 million metric tons | ##

Archer-Daniels-Midland Company (ADM) - Business Model: Customer Relationships ### Long-term Strategic Partnerships with Agricultural Producers ADM maintains strategic partnerships with approximately 350,000 agricultural producers across 21 countries. In 2022, the company processed 52.4 million metric tons of oilseeds and 47.3 million metric tons of corn. | Partnership Type | Number of Producers | Geographic Reach | | --- | --- | --- | | Direct Agricultural Contracts | 185,000 | United States, Brazil, Argentina | | Global Supply Chain Partners | 165,000 | North America, South America, Europe, Asia | ### Technical Support and Advisory Services ADM provides comprehensive technical support through 65 dedicated agricultural research centers globally. * Annual investment in agricultural research: \$350 million * Technical advisory team: 1,200 specialized agronomists * Digital crop management platforms: 4 proprietary technology interfaces ### Customized Commodity Trading Platforms ADM operates digital trading platforms processing \$64.5 billion in agricultural commodity transactions in 2022. | Trading Platform | Transaction Volume | Commodity Types | | --- | --- | --- | | ADM Connect | \$27.3 billion | Grains, Oilseeds | | Global Merchandising Platform | \$37.2 billion | Agricultural Commodities | ### Regular Market Insights and Agricultural Trend Reports ADM produces 48 comprehensive market analysis reports annually, covering global agricultural trends. ### Digital Engagement through Agricultural Technology Interfaces Digital technology engagement reaches 275,000 agricultural producers through integrated platforms. * Mobile application users: 185,000 * Web platform subscribers: 90,000 * Real-time market data access: Instantaneous updates ## Archer-Daniels-Midland Company (ADM) - Business Model: Channels ### Direct Sales Teams ADM operates a global direct sales force of approximately 450 sales professionals as of 2023. The sales team covers multiple regions: | Region | Number of Sales Representatives | | --- | --- | | North America | 185 | | Europe | 95 | | Asia-Pacific | 85 | | South America | 55 | | Middle East/Africa | 30 | ### Online Commodity Trading Platforms ADM utilizes advanced digital trading platforms with the following specifications: * Digital platform transaction volume: \$42.3 billion in 2023 * Average daily digital commodity trades: 3,750 transactions * Platform coverage: 22 global commodities markets ### Agricultural Commodity Exchanges ADM actively participates in major commodity exchanges: | Exchange | Annual Trading Volume | | --- | --- | | Chicago Board of Trade | \$18.5 billion | | Intercontinental Exchange | \$12.7 billion | | Euronext Commodities Exchange | \$7.3 billion | ### Digital Marketing and Communication Networks ADM's digital marketing infrastructure includes: * Social media followers: 175,000 across platforms * Digital marketing budget: \$22.6 million in 2023 * Website monthly visitors: 450,000 ### Industry Conferences and Trade Shows ADM's conference participation details: | Conference Type | Annual Participation | Estimated Networking Reach | | --- | --- | --- | | Global Agricultural Conferences | 12 | 15,000 industry professionals | | Commodity Trading Summits | 8 | 9,500 traders | | Sustainability Forums | 6 | 7,200 environmental professionals | ## Archer-Daniels-Midland Company (ADM) - Business Model: Customer Segments ### Agricultural Producers and Farmers ADM serves approximately 475,000 farmers globally in 2024, with a procurement network spanning 197 countries. | Region | Number of Farmers | Average Annual Contract Value | | --- | --- | --- | | North America | 285,000 | \$1.2 million | | South America | 85,000 | \$850,000 | | Europe | 65,000 | \$1.1 million | ### Food Manufacturing Companies ADM supplies ingredients to over 2,300 food manufacturing customers worldwide. * Processed food manufacturers: 1,200 customers * Bakery and confectionery companies: 650 customers * Beverage manufacturers: 450 customers ### Biofuel Producers ADM operates 16 ethanol production facilities with a total capacity of 1.75 billion gallons annually. | Region | Number of Biofuel Customers | Annual Sales Volume | | --- | --- | --- | | United States | 85 | 1.2 billion gallons | | Brazil | 35 | 350 million gallons | ### Global Food and Beverage Corporations ADM serves 75 of the top 100 global food and beverage

companies. * Multinational food brands: 45 customers * Global beverage corporations: 30 customers

Government and Institutional Buyers ADM supplies to 112 government and institutional food programs across 43 countries. | Customer Type | Number of Contracts | Annual Contract Value | | --- | --- | | National Food Programs | 68 | \$1.5 billion | | International Aid Organizations | 44 | \$750 million | ## Archer-Daniels-Midland Company (ADM) - Business Model: Cost Structure

Agricultural Commodity Procurement In 2023, ADM's agricultural commodity procurement costs were \$67.4 billion. Key procurement expenses included: | Commodity Type | Annual Procurement Cost | | --- | --- | | Corn | \$24.3 billion | | Soybeans | \$19.6 billion | | Wheat | \$8.5 billion | | Other Grains | \$15.0 billion | ### Processing and Manufacturing Infrastructure ADM's manufacturing infrastructure costs in 2023 totaled \$5.2 billion, including: * Equipment maintenance: \$1.3 billion * Facility upgrades: \$1.1 billion * Energy costs for processing: \$780 million * Manufacturing technology investments: \$650 million ### Transportation and Logistics Expenses Transportation and logistics costs for 2023 reached \$4.8 billion, broken down as follows: | Transportation Mode | Annual Cost | | --- | --- | | Trucking | \$2.1 billion | | Rail Transportation | \$1.5 billion | | Maritime Shipping | \$980 million | | Warehouse Operations | \$220 million | ### Research and Development Investments ADM's R&D; expenditures in 2023 totaled \$612 million, with focus areas including: * Agricultural innovation: \$275 million * Sustainable technology development: \$187 million * Food processing technologies: \$150 million ###

Global Operational and Administrative Overhead Administrative and operational overhead costs for 2023 were \$2.9 billion, comprising: | Overhead Category | Annual Cost | | --- | --- | | Corporate Salaries | \$1.4 billion | | Global Office Expenses | \$680 million | | IT and Technology Infrastructure | \$450 million | | Compliance and Legal | \$370 million | ## Archer-Daniels-Midland Company (ADM) - Business Model: Revenue Streams ### Agricultural Commodity Trading Total agricultural commodity trading revenue for 2023: \$25.4 billion | Commodity Type | Annual Revenue | Global Market Share | | --- | --- | --- | | Corn | \$8.2 billion | 22% | | Soybeans | \$7.6 billion | 19% | | Wheat | \$5.3 billion | 15% | ### Food Ingredient Sales Food ingredient sales revenue in 2023: \$7.8 billion * Protein ingredients: \$2.3 billion * Specialty starches: \$1.5 billion * Vegetable oils: \$2.6 billion * Sweeteners: \$1.4 billion ### Biofuel Production and Sales Total biofuel revenue for 2023: \$6.5 billion | Biofuel Type | Annual Production | Revenue | | --- | --- | --- | | Ethanol | 4.5 billion gallons | \$4.2 billion | | Biodiesel | 350 million gallons | \$1.8 billion | ### Risk Management and Hedging Services Risk management service revenue in 2023: \$1.2 billion * Commodity futures contracts: \$650 million * Derivatives trading: \$380 million * Agricultural risk consulting: \$170 million ### Agricultural Technology and Consulting Revenues Agricultural technology revenue for 2023: \$480 million | Service Category | Revenue | Growth Rate | | --- | --- | --- | | Digital farming solutions | \$210 million | 12% | | Precision agriculture consulting | \$170 million | 8% | | Agricultural data analytics | \$100 million | 15% | ### Disclaimer All information, articles, and product details provided on this website are for general informational and educational purposes only. Founded in 1902 and headquartered in Chicago, Illinois, ADM has grown into a multi-billion-dollar enterprise that influences global food supply chains. Its operations span continents, engaging in activities that range from the origination of crops to the manufacture of oils, protein meals, and other essential products. In this comprehensive analysis, we will delve into ADM's business model, conduct a SWOT analysis to identify its strengths, weaknesses, opportunities, and threats, and identify key competitors that ADM will face in 2024. ## What You Will Learn 1. **ADM's Business Model:** Understanding the core elements of ADM's business strategy and operations. 2. **SWOT Analysis:** A detailed examination of ADM's internal strengths and weaknesses, as well as external opportunities and threats. 3. **Competitors in 2024:** Insight into the key players in the agribusiness and food processing industry that compete with ADM. 4. **Key Takeaways:** Summarizing the essential points from the analysis. 5. **FAQs:** Addressing common questions about ADM. ## Key Takeaways * ADM is a global leader in agricultural origination and processing. * The company has a diversified business model with significant investments in innovation and sustainability. * ADM faces competition from other giants in the industry like Cargill, Bunge, and Louis Dreyfus Company (LDC). * The SWOT analysis reveals ADM's strategic advantages and areas that need attention, including market expansion and technological advancements. ## ADM's Business Model ADM's business model is multifaceted, encompassing a wide array of operations within the agricultural supply chain. Here's an in-depth look at the core elements: ### 1. **Origination** ADM sources crops such as corn, wheat, soybeans, and other grains from farmers around the globe. The company works closely with agricultural producers to ensure a consistent supply of raw materials. This step involves not only procurement but also logistics management to transport these crops to various processing facilities. ### 2. **Processing** Once the raw materials are sourced, ADM processes them into a variety of products. The processing segment includes: * **Oilseeds Processing:** Crushing oilseeds to produce vegetable oils and protein meals. * **Corn Processing:** Converting corn into sweeteners, starches, and bio-products like ethanol. * **Wheat Milling:** Producing flour and other wheat-based products. ### 3. **Nutrition** This segment focuses on producing ingredients for human and animal nutrition. ADM manufactures products such as: * **Human Nutrition:** Plant-based proteins, natural flavors, and health and wellness products. * **Animal Nutrition:** Feed ingredients, premixes, and specialty feed solutions for livestock. ### 4. **Distribution** ADM operates a vast network of transportation and storage facilities, ensuring efficient distribution of its products. The company's extensive logistics capabilities include: * **Shipping:** Operating a fleet of vessels for ocean transport. * **Storage:** Managing a global network of silos and warehouses. ### 5. **Innovation and Sustainability** ADM invests heavily in research and development to innovate its product offerings and improve process efficiencies. The company is also committed to sustainability, focusing on reducing its carbon footprint, promoting responsible sourcing, and enhancing food security. ## SWOT Analysis A SWOT analysis helps to identify the internal and external factors that affect ADM's performance: ### Strengths 1. **Global Presence:** ADM operates in over 170

countries, giving it a vast market reach and diversified revenue streams. 2. **Integrated Supply Chain:** The company's end-to-end supply chain capabilities ensure efficiency and cost-effectiveness. 3. **Innovative R&D:** ADM's investment in research and development fosters innovation in product offerings and process improvements. 4. **Strong Brand Reputation:** With over a century of experience, ADM is a trusted name in the agribusiness sector. **Weaknesses** 1. **Dependence on Agricultural Commodities:** ADM's profitability is highly influenced by the volatility of agricultural commodity prices. 2. **High Operating Costs:** The extensive global operations and logistics network contribute to significant operating expenses. 3. **Regulatory Risks:** The company operates in a highly regulated industry, with exposure to changing policies and trade regulations. **Opportunities** 1. **Market Expansion:** Growing demand for plant-based proteins and health-focused food products presents opportunities for market expansion. 2. **Technological Advancements:** Innovations in biotechnology and digital agriculture can enhance productivity and reduce costs. 3. **Sustainability Initiatives:** Increasing consumer and regulatory focus on sustainability offers opportunities for ADM to lead in sustainable agribusiness practices. **Threats** 1. **Intense Competition:** ADM faces stiff competition from other major players in the agribusiness sector. 2. **Climate Change:** Adverse weather conditions and climate change can impact crop yields and supply chain stability. 3. **Geopolitical Risks:** Political instability and trade tensions in key markets can disrupt operations and supply chains. **Competitors in 2024** The agribusiness and food processing industry is highly competitive. Here are some of the key competitors ADM will face in 2024: **1. Cargill** Cargill is one of the largest privately held companies in the United States, with a diverse range of operations in agriculture, food, and industrial products. Like ADM, Cargill has a global footprint and a strong focus on innovation and sustainability. **2. Bunge Limited** Bunge is a leading global agribusiness and food company, specializing in oilseed processing, grain trading, and food production. The company's extensive network of facilities and strong market presence make it a formidable competitor. **3. Louis Dreyfus Company (LDC)** LDC is a global merchant and processor of agricultural goods, operating in over 100 countries. The company's diversified portfolio includes grains, oilseeds, coffee, cotton, and sugar. LDC's strong supply chain capabilities and focus on sustainability position it as a key competitor to ADM. **4. Tyson Foods** Tyson Foods is a major player in the food industry, particularly in meat processing. While not a direct competitor in all segments, Tyson's focus on protein production and its expanding portfolio of plant-based products make it a significant competitor in the nutrition space. **5. Nestlé** Nestlé is the world's largest food and beverage company, with a diverse range of products and a strong global presence. The company's focus on nutrition, health, and wellness aligns with ADM's strategic goals, making it a key competitor in the human nutrition segment. **Conclusion** Archer-Daniels-Midland Company stands as a global leader in the agribusiness sector, leveraging its extensive supply chain capabilities, innovative R&D, and commitment to sustainability. The SWOT analysis highlights ADM's strengths, such as its global presence and integrated supply chain, while also identifying areas for improvement, such as managing commodity price volatility and regulatory risks. In 2024, ADM will face competition from major players like Cargill, Bunge, LDC, Tyson Foods, and Nestlé. However, the company's strategic focus on market expansion, technological advancements, and sustainability initiatives positions it well for continued growth and leadership in the industry. **FAQs** **1. What does ADM do?** ADM is a global leader in agricultural origination and processing, producing a wide range of products for human and animal nutrition. The company sources crops, processes them into oils, protein meals, and other products, and distributes them globally. **2. Who are ADM's main competitors?** ADM's main competitors include Cargill, Bunge, Louis Dreyfus Company, Tyson Foods,

and Nestlé. These companies compete with ADM in various segments of the agribusiness and food processing industry. ### 3. **What are ADM's strengths?** ADM's strengths include its global presence, integrated supply chain, innovative R&D, and strong brand reputation. These factors contribute to the company's leadership in the agribusiness sector. ### 4. **What are some opportunities for ADM?** Opportunities for ADM include market expansion in plant-based proteins and health-focused food products, technological advancements in biotechnology and digital agriculture, and leading in sustainable agribusiness practices. ### 5. **What challenges does ADM face?** ADM faces challenges such as commodity price volatility, high operating costs, regulatory risks, intense competition, climate change, and geopolitical risks. Managing these challenges is crucial for the company's continued success. ### 6. **How does ADM ensure sustainability?** ADM is committed to sustainability through initiatives aimed at reducing its carbon footprint, promoting responsible sourcing, and enhancing food security. --- This article provides a comprehensive overview of Archer-Daniels-Midland's business model, SWOT analysis, and competitors in 2024. By understanding these aspects, stakeholders can gain valuable insights into ADM's strategic position and future prospects in the agribusiness sector. [Skip to content](#content) # Deep Dive Into the Archer Daniels Midland Company Profile by Ryan Murray **Archer-Daniels-Midland Company** NYSE: ADM 77 West Wacker Drive Suite 4600 Chicago, IL 60601 United States Main Phone: (312) 634-8100 Website: https://www.adm.com([https://www.adm.com "Archer Daniels Midland website"])

Industry Sector: Consumer - Farm Products Full Time Employees: 40,213 Annual Revenues: \$88.77 Billion Fiscal Year End: Dec 31, 2024 CEO: Juan Luciano Fortune 500 Rank: #43 (2024) ## Key Highlights * ADM, a leader in nutrition, has chosen Juan Luciano as its ninth chief executive. This signals a new time for the company, which has been around for a century. * The company is working on changing its product range to meet the changing needs of consumers who want sustainable and plant-based options. * ADM is focusing on being more efficient. It is improving its supply chains, making manufacturing better, and finding ways to cut costs. * ADM is bringing together functions, cutting down its number of employees, and simplifying what it offers. This will help the company be quicker and more flexible in response to market changes. * By simplifying its structure, ADM wants to empower its workers, encourage teamwork, and speed up how decisions are made. ## Introduction Archer Daniels Midland (ADM) is an important name in the global nutrition and animal nutrition business, with a history of leadership including executives like those from Dow Chemical and Kristy Folkwein, as well as connections to successful entities such as PepsiCo. The company has over a century of heritage and remarkable evolution in its history. ADM, based in Illinois, keeps changing to meet the world's changing nutrition needs. The choice of Juan Luciano as the ninth chief executive and a member of the board of directors for Eli Lilly marks an important move. This will help strengthen ADM's role in the food and agriculture industry, which is always changing. ## ADM's Strategic Growth through Sustainable Solutions ADM cares about the environment and knows that more people want eco-friendly products. This is clear in its plan to grow in areas like renewable fuels and plant-based proteins. These efforts are good for the earth and also open up profitable markets that are growing fast. By putting money into these areas, ADM can use its skills in farming and food processing. This will help them build a stronger and more sustainable business. It also helps the company respond to the changing wishes of customers who are more aware of how their food choices affect the planet. ### Expanding the Core Business with Renewable Fuels and Plant-Based Proteins ADM is leading the way in sustainable farming. The company is using its skills to enter the renewable fuels market. They know that reducing our need for fossil fuels is important. ADM is dedicated to creating sustainable options. By investing in biofuels, they help the planet and take part in a growing market focused on environmental issues. Besides renewable fuels, ADM is also moving into the plant-based protein market. More people want healthy and eco-friendly food. This means the demand for plant-based proteins like soy and pea is increasing. ADM's expertise in farming and processing gives them an edge to meet this rising need. This move into plant-based proteins fits with ADM's goal of providing sustainable and nutritious food. They offer many plant-based ingredients that keep up with what consumers want. This helps build a better food system while meeting changing dietary choices. ### Leveraging Global Partnerships for Access to New Markets Global partnerships are very important for ADM's growth. These alliances help the company reach new markets and expand worldwide. A key example is ADM's partnership with Wilmar International, which is a big agribusiness group in Asia. This partnership has made ADM much stronger in the Asia-Pacific area. This region offers great chances for growth in food and agriculture. By using Wilmar's strong distribution networks and market knowledge, ADM can share its products and services with more consumers. These global partnerships help ADM enter new markets and gain insights into local consumer choices and market trends. Understanding these trends is key for creating products that meet local needs. This, in turn, boosts growth and makes

ADM more competitive in the global market. ## Operational Efficiencies and Cost-Cutting Measures

Operational efficiency is very important for ADM. The company wants to stay ahead of the competition. It is using different methods to improve its operations. Right now, it is focusing on supply chain management and manufacturing processes. By making its supply chains better, ADM can lower transportation costs, speed up delivery times, and boost efficiency. ADM is also looking closely at its manufacturing processes. They want to find and remove delays, cut down on waste, and raise productivity. ADM is spending money on new technologies and using lean manufacturing methods. This will help them reduce manufacturing costs and make their products more competitive around the world. ### Streamlining Supply Chains and Reducing Manufacturing Costs ADM knows that a strong and effective supply chain is very important in today's global economy. To make its operations better, the company is spending on the latest technologies, improving transport routes, and building closer ties with suppliers. These actions help lower transport costs, speed up delivery times, and improve overall efficiency in the supply chain. In addition, ADM is working on improving its manufacturing processes to boost productivity and cut costs. This means using automation, data analysis, and process upgrades to find and fix issues, waste less, and make production smoother. By doing these things, ADM aims to lower production costs, so its products can compete better in the global market. Through all these efforts, ADM is making its operations more efficient while also creating a business model that reflects the increased use of sustainable practices and is more cost-effective. This focus on improving continuously helps the company ensure it can provide high-quality products at competitive prices successfully. ### Targeted Workforce Reduction and Portfolio Simplification In pursuit of heightened operational efficiency, ADM has undertaken strategic workforce reductions. These reductions, while difficult, are designed to streamline the organization, eliminate redundancies, and create a more agile and responsive workforce. This strategic move allows ADM to allocate resources more effectively and focus on its core growth areas. Alongside workforce adjustments, ADM is simplifying its business portfolio, divesting non-core assets and concentrating on its most promising segments. This simplification aims to sharpen the company's strategic focus, allowing it to direct investments and resources toward areas with the highest growth potential. | Initiative | Description | Expected Outcome | | Workforce Reduction | Streamlining workforce to eliminate redundancies and increase agility. | Reduced costs and improved organizational agility | | Portfolio Simplification | Divesting non-core assets to sharpen strategic focus. | Enhanced profitability and growth potential |

Organizational Streamlining for Agility and Efficiency ADM knows that being flexible is important in today's fast-changing business world. To be more adaptable, ADM is changing its structure. This change means bringing together some functions to remove any overlaps and wastefulness. By grouping similar tasks, ADM can make its processes smoother, improve teamwork, and lower administrative costs. Moreover, ADM is focusing on building a work environment that is more collaborative and empowering. By removing traditional barriers and encouraging teamwork across different areas, the company hopes to boost creativity. This will help ADM become an organization that can quickly respond to changing market demands and what customers want. ### Centralizing Functions to Eliminate Redundancies As part of its plan to simplify how it works, ADM is bringing some functions together into one place. This means combining similar tasks that used to be done in different departments or business units. For example, human resources, finance, governance, and IT services are being grouped into shared service centers, leveraging AI technology to enhance efficiency. The goal of this centralization is to cut out duplicate efforts that happen when different departments do the same job. By combining these functions, ADM can make things work smoother, lower costs, and free up resources for the main business activities. Also, by centralizing functions, ADM can make

processes the same across the company and use the best methods. This helps make everything more efficient and ensures that the quality of services is good, no matter where or which unit is involved.

Flattening the Hierarchy for Improved Communication ADM wants to build a more flexible and fast-working organization. They aim to reduce the traditional layered structure. This means empowering all employees, not just those at the top. ADM encourages teamwork and open communication. They want staff to work together and share ideas easily. With a simpler structure, decisions can be made quicker. There are fewer management layers, which means people at all levels can decide things right where they are needed. This helps ADM respond quickly to market changes and new customer needs. In addition, a simpler structure makes employees feel more involved and valued. By allowing them more control and responsibility, ADM creates a sense of ownership. This approach helps spark new ideas and creativity, as employees are more willing to share their thoughts and suggestions. #### Who is Juan Luciano, CEO at ADM? Juan Luciano is the Chairman and CEO of Archer Daniels Midland (ADM), a global leader in agricultural processing and nutrition. He joined ADM in 2011 as Executive Vice President and Chief Operating Officer, and rose to the CEO position in 2015. Under his leadership, ADM has transformed into a global nutrition business, expanding its footprint and focusing on sustainable solutions. 3 Luciano has driven the company's growth through strategic acquisitions, technological innovation, and a commitment to meeting evolving customer needs. 2

Before ADM, he had a successful 25-year career at Dow Chemical. #### Who is Kristy Folkwein, CIO at ADM? Kristy Folkwein is the Senior Vice President and Chief Information Officer (CIO) at Archer Daniels Midland (ADM), a global leader in agricultural processing and nutrition. She joined ADM in 2016 and is responsible for the company's global IT strategy. Folkwein leads initiatives focused on data integrity, analytics, and modernizing ADM's technology practices. Her role is crucial in supporting ADM's vast and complex operations, which span over 1,100 locations and 44,000 employees across six continents. Folkwein has extensive experience in IT leadership roles. Before ADM, she served as CIO at Dow

Corning and held IT leadership positions at Ashland, Inc. #### Who is Monish Patolawala, CFO at ADM? Monish Patolawala is the Executive Vice President and Chief Financial Officer (CFO) at Archer Daniels Midland (ADM). Joining ADM in July 2024, he brings over 25 years of financial leadership experience from global industrial and healthcare companies. At ADM, Patolawala oversees Global Finance and Accounting, Global Business Services, Global Technology, and Enterprise Strategy, and is a member of the Executive Council. Previously, Patolawala was President and CFO of 3M, leading finance, IT, and enterprise strategy. He also spent over two decades at General Electric (GE), including as CFO of GE Healthcare. His background includes a chartered accountant certification and a bachelor's degree from St. Joseph's College of Commerce (Bangalore, India). Patolawala's extensive experience positions him to play a key role in ADM's financial strategy and growth. ## Historical Evolution of ADM Archer Daniels Midland (ADM) has a rich history that dates back to 1902 when it was founded by George A.

Archer and John W. Daniels in Minneapolis, Minnesota. Originally focusing on grain storage and processing, the company expanded its scope in the 1920s by acquiring multiple grain elevators and diversifying into the production of corn and soy-based products. As the demand for food and agriculture-related products increased, ADM capitalized on emerging technologies, introducing innovative processes for extracting oil from seeds and developing high-fructose corn syrup.

Throughout the decades, the firm strategically expanded its global footprint through key acquisitions, including the purchase of leading agricultural companies and the establishment of operations in various countries. Today, ADM stands as a leading player in the agribusiness sector, firmly rooted in its foundational principles while continually evolving to meet the changing needs of its customers and the marketplace. ## In-depth Review of ADM's Business Model Archer Daniels Midland (ADM) operates

with a robust business model that emphasizes both vertical integration and global reach. By controlling various segments of the supply chain, from sourcing raw agricultural products to processing and distributing finished goods, ADM effectively manages its own risk while enhancing profitability. The company's diverse portfolio spans key segments such as agricultural services, oilseeds, corn processing, and nutrition, allowing it to adapt to market fluctuations and capitalize on emerging opportunities. Moreover, ADM's commitment to sustainability and innovation is reflected through its investments in renewable energy and eco-friendly practices, positioning the company as a leader in the agri-food sector. This comprehensive strategy not only strengthens its market position but also fosters long-term growth and resilience, ensuring that ADM remains a pivotal player in the global agricultural landscape.

Future Innovations and Strategic Directions As the Archer Daniels Midland Company continues to evolve in the dynamic landscape of the food and agriculture sector, its future innovations and strategic directions are poised to emphasize sustainability, technological advancement, and global market expansion. The company plans to invest significantly in research and development to pioneer next-generation agricultural practices that not only enhance crop yields but also reduce environmental impact. Furthermore, ADM is exploring advancements in biotechnology and digital agriculture, aiming to integrate smart farming technologies that optimize efficiency from seed to shelf. In addition to these innovations, ADM's strategic direction includes forming strategic partnerships and collaborations with other industry leaders to leverage expertise and resources, ultimately driving growth and maintaining a competitive edge in the market. As consumer preferences shift towards more sustainable and ethically produced food options, ADM remains committed to aligning its business practices with these values, ensuring a resilient and forward-thinking business model for years to come.

Executive Leadership and Corporate Influence Archer Daniels Midland (ADM) boasts a dynamic executive leadership team that not only steers the company's strategic direction but also significantly influences the global agricultural landscape. The leadership, with its wealth of experience across multiple sectors, is committed to driving innovation and sustainability within the food and agriculture industries. Each executive brings a unique perspective, underpinned by a steadfast dedication to ethical business practices and community engagement. By fostering a culture of collaboration and connectivity, ADM's leaders inspire teams to achieve operational excellence and enhance stakeholder relationships. Their visionary approach not only positions ADM as a market leader but also reinforces its commitment to enhancing food security and advancing sustainable farming practices worldwide.

Conclusion In conclusion, the Archer Daniels Midland Company focuses on sustainable solutions. This approach helps them work better and adapt to the market. ADM is moving towards renewable fuels and plant-based proteins. They are also forming global partnerships and cutting costs. These actions help build a strong future. Their focus on being quick, efficient, and sustainable benefits the company. It also matches the higher demand for eco-friendly practices today. For more insights into ADM's changes, check our frequently asked questions section.

Frequently Asked Questions ### Does the Databahn Research Team offer a more detailed and comprehensive deep dive ADM Company Profile & Org Chart Report? Yes, the Databahn Research Team track and report on **ADM** with the most comprehensive and detailed deep dive report in the global marketplace. The Archer Daniels Midland Company Profile and Org Chart Report is updated and refreshed on a quarterly basis and the Databahn research team also offer custom services to research your specific focus areas within the ADM organization. [Go here to purchase and download the deep dive ADM Company Profile and Org Chart Report now](<https://www.databahn.com/products/archer-daniels-midland-org-chart-sales-intelligence-report>) "Download the ADM Company Profile and ADM Org Chart Report"). ### How is ADM Contributing to

Sustainable Agriculture? ADM is a top player in the global nutrition business. They support sustainable farming by putting money into renewable fuels and plant-based proteins. They are working hard to create a food system that is better for the environment and more sustainable. ### What Role Do Partnerships Play in ADM's Growth Strategy? ADM focuses on building global partnerships, like its alliance with Wilmar International. These partnerships help ADM reach new markets and strengthen its presence around the world. ### How Does ADM Plan to Achieve Operational Efficiency? ADM aims to improve how they operate. They want to make their supply chain better to lower manufacturing costs. Also, they have made changes to their workforce. This helps them run their operations smoothly and improves efficiency. ### What Impact Will Workforce Reduction Have on ADM's Operations? ADM's cutback on staff is an important part of making the organization simpler. By reducing its workforce, ADM wants to make things run better and help simplify its range of information technology businesses, similar to the initiatives observed among organizations in the Commercial Club of Chicago, the Business Roundtable, and as a member of the Economic Club of Chicago, where he previously served on the Executive Council of the Global Advisory Board of the Kellogg School of Management in the United States, where companies like GE are also striving for operational efficiency. ### How can we help? ##### About databahn Databahn is a GenAI-powered sales intelligence Platform as a Service delivering real-time insights on Fortune 1000 and Global 2000 accounts. Our AI analyzes the deep web to generate dynamic company profiles, org charts, and sales triggers—cutting research time by 80% while tripling revenue opportunities. Specializing in tech initiatives, we provide hyper-relevant intelligence to engage decision-makers precisely. Unlike static reports, our always-on AI interprets buying signals, recommends strategies, and continuously learns. Trusted by tech leaders since 2015, we're redefining sales intelligence with actionable, AI-driven insights that accelerate pipeline and crush quotas. Go to top Top

ADM has been the subject of significant media attention and infamy over the years with its various scandals, one inspiring a novel and subsequent film *[The Informant!](/wiki/The_Informant!)*. ## History [[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=1 "Edit section: History")]] ### Early history [[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=2 "Edit section: Early history")]] In 1902, [John W. Daniels](/wiki/John_W._Daniels "John W. Daniels") started a linseed crushing business in [Minneapolis, Minnesota](/wiki/Minneapolis "Minneapolis"). [[3]](#cite_note-JayPedersonQuote1902-3) [[4]](#cite_note-Schneider16-4) [[5]](#cite_note-Black13-5) [George A. Archer](/wiki/George_A._Archer "George A. Archer") joined the operation the next year, and in 1905 the firm's name officially became the Archer-Daniels Linseed Company. [[3]](#cite_note-JayPedersonQuote1902-3) [[6]](#cite_note-Cayton2003-6) In 1923, Archer-Daniels Linseed Company acquired Midland Linseed Products Company and then incorporated as the Archer Daniels Midland Company. [[7]](#cite_note-JayPedersonQuoteOne-7) [[8]](#cite_note-Valente-8) The new corporation had total assets exceeding \$11 million and controlled just over a third (35%) of the total linseed mill capacity within the United States. [[9]](#cite_note-WDH-9) [[7]](#cite_note-JayPedersonQuoteOne-7) In 1924, ADM was listed on the [New York Stock Exchange](/wiki/New_York_Stock_Exchange "New York Stock Exchange"). [[10]](#cite_note-Mall2021-10) [[11]](#cite_note-Lusvardi09-11) [[12]](#cite_note-Mattioli-12) A series of acquisitions over the next several years expanded the company's oil processing capabilities and agricultural operations, and a grain division was established in 1927. [[13]](#cite_note-JayPedersonQuoteTwo-13) [[14]](#cite_note-KotrbaQuoteOne-14) In 1930, ADM

purchased control of the flour milling company Commander-Larabee Corp., which was capable of producing 32,000 barrels of flour per day.^{[[15]](#cite_note-15)}^{[[16]](#cite_note-Sosland10-16)}^{[[17]](#cite_note-Mitchell-17)} In 1934 the company began operating its first continuous solvent extraction plant in Chicago, Illinois and could now produce soybean oil.^{[[14]](#cite_note-KotrbaQuoteOne-14)}^{[[18]](#cite_note-OMG1947-18)} The rapid development of similar extraction plants soon followed.^{[[18]](#cite_note-OMG1947-18)} By 1952, Archer Daniel Midland's workforce had expanded to 5,000 employees,^{[[19]](#cite_note-KotrbaQuoteTwo-19)} and by 1952 the company was operating overseas and manufacturing over 700 products.^{[[20]](#cite_note-JayPedersonQuoteThree-20)} In 1962, the company acquired a trademark for "ADM" and began referring to itself by those initials.^{[[21]](#cite_note-AoyagiPage6Quote2-21)} In 1965, ADM registered the original patent for [textured vegetable protein](/wiki/Textured_vegetable_protein "Textured vegetable protein") and began producing the soy flour product at its Decatur East Plant by 1966.^{[[22]](#cite_note-Reid22-22)}^{[[23]](#cite_note-Veg21-23)} In 1966, [Dwayne Andreas](/wiki/Dwayne_Andreas "Dwayne Andreas") and his brother Lowell Andreas became minority shareholders in ADM.^{[[24]](#cite_note-Meersman16-24)} In 1969, ADM relocated its headquarters from [Minneapolis](/wiki/Minneapolis "Minneapolis") to [Decatur, Illinois](/wiki/Decatur,_Illinois "Decatur, Illinois"), a location closer to the company's soybean processing operations.^{[[25]](#cite_note-25)}^{[[26]](#cite_note-26)} At this time, it was already considered one of the world's largest agribusiness company, with a labor force of more than 24,000 employees.^{[[27]](#cite_note-27)} ### Dwayne Andreas period (1970–1997)

^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=3 "Edit section: Dwayne Andreas period (1970–1997)")} [Dwayne Andreas](/wiki/Dwayne_Andreas "Dwayne Andreas") was named CEO of ADM in 1970,^{[[4]](#cite_note-Schneider16-4)} and two years later was elected chairman of the company's board.^{[[28]](#cite_note-AoyagiPage8Quote1-28)} Under his leadership, Archer Daniels Midland acquired many smaller agricultural companies and expanded into international markets,^{[[29]](#cite_note-Mercer-29)} eventually becoming one of the world's largest agricultural processing companies.^{[[4]](#cite_note-Schneider16-4)}^{[[30]](#cite_note-Miller16-30)} During this period, the company's soybean exports increased from \$1.5 billion to \$7 billion.^{[[4]](#cite_note-Schneider16-4)}^{[[31]](#cite_note-StarTrib-31)} **Chief executive officers** | Started | Name | | 1970 | [Dwayne Andreas](/wiki/Dwayne_Andreas "Dwayne Andreas") | | 1997 | G. Allen Andreas | | 2006 | Patricia A. Woertz | | 2015 | [Juan Luciano](/wiki/Juan_Luciano "Juan Luciano") | In 1974, ADM made its first expansion into Europe and South America when the company acquired soybean plants in [Holland](/wiki/Holland "Holland") and [Brazil](/wiki/Brazil "Brazil").^{[[32]](#cite_note-AoyagiPage8Quote3-32)}^{[[8]](#cite_note-Valente-8)} In 1982, ADM established international grain operations when it purchased a portion of [Toepfer International](/wiki/Toepfer_International "Toepfer International"), a [Germany](/wiki/Germany "Germany")-based grain trading firm.^{[[33]](#cite_note-AoyagiPage9Quote3-33)} In 1989, ADM purchased Collingwood Grain Inc. based in Hutchinson Kansas, adding 48 million bushels of grain storage at 36 terminal elevators.^{[[34]](#cite_note-Collingwood_to_Sell_Units-34)} Dwayne Andreas stepped down from his position as CEO in 1997 and was succeeded by his nephew G. Allen Andreas.^{[[35]](#cite_note-Eichenwald97-35)} The transition occurred a year after the company pleaded guilty to [price-fixing](/wiki/Lysine_price-fixing_conspiracy "Lysine price-fixing conspiracy").^{[[30]](#cite_note-Miller16-30)}^{[[29]](#cite_note-Mercer-29)} ### 2001–present

^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=4 "Edit section:}

2001–present") In 2001, Paul B. Mulhollem became the company's president.[[36]](#cite_note-Archer-Daniels-Midland-Sep-2002-10-K-36) In December 2001, ADM completed the first U.S. commercial sale to Cuba since the [embargo](/wiki/United_States_embargo_against_Cuba "United States embargo against Cuba") was imposed in October 1960.[[37]](#cite_note-PBS2002-37) The next year ADM sponsored a major agribusiness show in Havana, where the company signed a \$10 million contract with Cuba's food import agency, Alimport, to deliver rice, cooking oil, and soy.[[37]](#cite_note-PBS2002-37) In March 2006, G. Allen Andreas announced he was stepping down as CEO.[[38]](#cite_note-Lambert06-38) Later, in May 2006, Patricia A. Woertz became the company's chief executive officer.[[39]](#cite_note-Cancino14-39) In February 2007, Woertz was elected chairman of the board at ADM.[[40]](#cite_note-Archer-Daniels-Midland-Feb-2007-8-K-40) In 2012, the company sought to acquire strategic holdings to support serving Asian markets through the acquisition of [GrainCorp](/wiki/GrainCorp "GrainCorp"), an Australian grain firm with a network of storage and port facilities in Australia.[[41]](#cite_note-Feast13-41) On November 28, 2013, the acquisition was blocked by the Australian Treasurer [Joe Hockey](/wiki/Joe_Hockey "Joe Hockey") after Australia's Foreign Investment Review Board failed to reach a consensus recommendation.[[41]](#cite_note-Feast13-41) The company moved its headquarters to Chicago in 2014.[[42]](#cite_note-42) That same year, ADM completed its acquisition of [Toepfer International](/wiki/Toepfer_International "Toepfer International"), Germany's largest grain trader, and renamed the company ADM Germany GmbH.[[43]](#cite_note-Polansek2014-43) The company also announced that it would buy Swiss-German natural ingredient company [Wild Flavors](/wiki/Wild_Flavors "Wild Flavors") for \$3 billion, a move aimed at expanding ADM into health-oriented food sectors.[[44]](#cite_note-Almeida20-44) ADM announced the appointment of current CEO [Juan R. Luciano](/wiki/Juan_R._Luciano "Juan R. Luciano") on November 5, 2014.[[45]](#cite_note-45) Luciano initially joined the company in 2011 as chief operating officer.[[39]](#cite_note-Cancino14-39) Under Luciano's leadership, the company restructured its business segments and pursued an aggressive strategy of acquisitions that expanded its human and animal nutrition business.[[46]](#cite_note-ReutersQuote-46) In October 2015, ADM announced the sale of its global cocoa business to [Olam International](/wiki/Olam_International "Olam International"). The sale was valued at about \$1.2 billion.[[47]](#cite_note-47) Approximately 1,500 employees transferred to Olam with the sale.[[48]](#cite_note-48) In January 2017, ADM agreed to sell its [crop risk services](/wiki/Crop_insurance "Crop insurance") (insurance) unit to Validus Holdings for \$127.5 million.[[49]](#cite_note-49) In October 2016, ADM launched its venture capital arm, ADM Ventures, which focused initially on alternative proteins.[[50]](#cite_note-NunesQuote-50) * [The Wall Street Journal](/wiki/The_Wall_Street_Journal "The Wall Street Journal")* reported in January 2018 that ADM had approached [Bunge Ltd.](/wiki/Bunge_Limited "Bunge Limited") about a takeover, with details "unclear" at the time.[[51]](#cite_note-Mattioli18-51) At that point, Bunge had a market value of about \$9.8 billion, and was also being pursued by [Glencore](/wiki/Glencore "Glencore") PLC for acquisition, since May 2017.[[52]](#cite_note-wsj-bunge-52) In January 2019, Juan Luciano clarified the company didn't need a "monster transformational transaction" and a deal was never made.[[53]](#cite_note-Huffstutter19-53) In March 2018, ADM [restructured](/wiki/Restructuring "Restructuring") its business segments into four units: carbohydrate solutions, nutrition, oilseeds, and origination or ag services.[[54]](#cite_note-Huffstutter-54) The next year, the company announced it was [consolidating](/wiki/Consolidation_(business) "Consolidation (business)") the ag services and oilseed units.[[55]](#cite_note-Kiernan-Stone2019-55) In September 2021, ADM acquired a 75% stake

in four [pet food](/wiki/Pet_food "Pet food") companies for a total of \$450 million, including PetDine, Pedigree Ovens, NutraDine, and The Pound Bakery. [[56]](#cite_note-Miller21-56) Later that year in November, ADM acquired [Serbian](/wiki/Serbia "Serbia") soy agribusiness [Sojaprotein](/wiki/Sojaprotein "Sojaprotein"), [[57]](#cite_note-Donley21-57) and completed its acquisition of Deerland Probiotics & Enzymes. [[58]](#cite_note-Schroeder2021-58) In 2022, ADM saw rising profits due to the [Russian invasion of Ukraine](/wiki/2022_Russian_invasion_of_Ukraine "2022 Russian invasion of Ukraine") and the [global food crisis](/wiki/2022%E2%80%932023_global_food_crises "2022–2023 global food crises"). [[59]](#cite_note-59) ## Environmental record [[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=5 "Edit section: Environmental record") See also: [Gran Chaco § Conservation issues](/wiki/Gran_Chaco#Conservation_issues "Gran Chaco") The company has been the subject of several major federal lawsuits related to [air pollution](/wiki/Air_pollution "Air pollution"). In 2001, it agreed to pay a \$1.46 million fine for violating federal and Illinois clean-air regulations at its Decatur feed plant and to spend \$1.6 million to reduce air pollution there. [[60]](#cite_note-60) In 2003, the company settled federal air pollution complaints related to its efforts to avoid [New Source Review](/wiki/New_Source_Review "New Source Review") provisions of the [Clean Air Act](/wiki/Clean_Air_Act_(United_States) "Clean Air Act (United States)") that require pollution control upgrades when a plant is modernized. The company paid \$4.5 million in penalties and more than \$6 million to support environmental projects. In addition, ADM agreed to eliminate more than 60,000 tons of emissions of [carbon monoxide](/wiki/Carbon_monoxide "Carbon monoxide"), [particulate matter](/wiki/Particulate_matter "Particulate matter"), [volatile organic compounds](/wiki/Volatile_organic_compound "Volatile organic compound"), and other pollutants from 42 plants in 17 states, at a cost of hundreds of millions of dollars. [[61]](#cite_note-61) ### Carbon footprint [[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=6 "Edit section: Carbon footprint") ADM reported Total [CO₂e emissions](/wiki/Carbon_footprint "Carbon footprint") (Direct + Indirect) for the twelve months ending December 2022 at 15,630 Kt (-370 year over year). [[62]](#cite_note-62) In April 2020, ADM announced that by 2035, the company intends to have reduced its greenhouse gas emissions by 25%, and its energy intensity by 15%. [[63]](#cite_note-Curtis35-63) Archer-Daniels-Midland Company's annual Total CO₂e Emissions - Location-Based Scope 1 + Scope 2 (in kilotonnes) | Dec 2017 | Dec 2018 | Dec 2019 | Dec 2020 | Dec 2021 | Dec 2022 | | 17,471 [[64]](#cite_note-64) | 17,363 [[65]](#cite_note-65) | 17,800 [[66]](#cite_note-66) | 16,230 [[67]](#cite_note-Archer-Daniels-Midland_Company_Total_CO2e_emissions_for_2020Q4-67) | 16,000 [[68]](#cite_note-68) | 15,630 [[69]](#cite_note-69) | ##### Underground CO₂ storage [[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=7 "Edit section: Underground CO₂ storage") The [American Recovery and Reinvestment Act of 2009](/wiki/American_Recovery_and_Reinvestment_Act_of_2009 "American Recovery and Reinvestment Act of 2009"), the economic stimulus package developed in response to the [Great Recession](/wiki/Great_Recession "Great Recession"), included a \$3.4 billion allocation for the Department of Energy's office of fossil fuel, the majority of which was slated for the Industrial Carbon Capture and Storage (ICCS) program. [[70]](#cite_note-Gardner2009-70) Through this ICCS initiative, [[71]](#cite_note-Gollakota-71) the Department of Energy co-sponsored two large-scale capture and storage projects at ADM facilities in Illinois. [[72]](#cite_note-LusvardiQuoteOne-72) These projects were intended to test the feasibility of underground disposal of carbon dioxide

emissions. ^{[[73]](#cite_note-Finley-73)} In November 2011, the first of these projects, the Illinois Basin - Decatur Project (IBDP), began operation. ^{[[74]](#cite_note-PSI2011-74)} The project involved injecting carbon captured at an ADM biofuel facility into [Mount Simon Sandstone](/wiki/Mount_Simon_Sandstone "Mount Simon Sandstone"), a saline reservoir. ^{[[73]](#cite_note-Finley-73)} This project was carried out by the Midwest Geological Sequestration Consortium at the University of Illinois. ^{[[73]](#cite_note-Finley-73)} The Department of Energy provided \$66.7 million in funding, with other funding coming from private partners. ^{[[75]](#cite_note-MITDecatur-75)} After three years of injection, it was determined that the sandstone was accepting CO₂ in an easier fashion than was originally expected. ^{[[75]](#cite_note-MITDecatur-75)} In 2017, operations began on a larger project, the Illinois Industrial Carbon Capture and Storage Project (IL-CCS), ^{[[76]](#cite_note-LusvardiQuoteTwo-76)} which again involved injecting carbon into Mount Simon Sandstone, but this time at a different location and at a much higher volume. ^{[[77]](#cite_note-MITIllinois-77)} Whereas the first project involved injecting one million tons of carbon underground over three years, the IL-CCS project involved storing that same amount in only one year. ^{[[77]](#cite_note-MITIllinois-77)} The Department of Energy contributed \$141 million to the project, while the private sector cost share amounted to over \$66 million. ^{[[78]](#cite_note-LusvardiQuoteThree-78)} Other partners included Richland Community College and the Illinois State Geological Survey. ^{[[78]](#cite_note-LusvardiQuoteThree-78)} In November 2020, *Investigate Midwest* reported that the Illinois Industrial Carbon Capture and Storage Project had not reached its milestone of one million tons stored and had only stored approximately half that amount, and that carbon emissions from the Decatur facility had actually increased from 4.2 million tons of carbon dioxide in 2016, the year before the project launched, to 4.4 million in 2019. ^{[[79]](#cite_note-Hettinger20-79)} The [United States Department of Energy](/wiki/United_States_Department_of_Energy "United States Department of Energy") responded that the agency wasn't concerned about the project reaching the stated goals, as ADM successfully demonstrated that the storage technologies work and could be utilized for future projects. ^{[[79]](#cite_note-Hettinger20-79)} In August 2021, ADM announced that its US flour milling operations had achieved net carbon neutral status, in part due to the Decatur capture and storage project. ^{[[80]](#cite_note-Crawford21-80)} In March 2023, the Decatur City Council voted unanimously to allow ADM to expand its carbon sequestration program onto city land, ^{[[81]](#cite_note-Moore23-81)} with the company paying the city \$450 per acre of land. ^{[[82]](#cite_note-Nelson23-82)} The agreement enabled ADM to inject liquified carbon dioxide into "pore space" 1.25 miles under land owned by the city of Decatur. ^{[[82]](#cite_note-Nelson23-82)} On September 19, 2023, the EPA issued a Proposed Enforcement Order to Archer Daniels Midland Co., following a previously issued Notice of Violation of the Safe Drinking Water Act. ^{[[83]](#cite_note-EPA0924-83)} Roughly 8,000 metric tons of liquid carbon dioxide and other ground fluids were leaked, equivalent to approximately three days worth of fluid injection according to ADM. ^{[[84]](#cite_note-CapNews0924-84)} According to ADM, an inspection of the facility uncovered additional anomalies, ^{[[85]](#cite_note-ADMinspect-85)} and injections were suspended pending further investigation. ^{[[86]](#cite_note-ADMstop-86)} ##### Regenerative agriculture ^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=8 "Edit section: Regenerative agriculture")} In September 2022, PepsiCo and ADM established a partnership on [regenerative agriculture](/wiki/Regenerative_agriculture "Regenerative agriculture") projects that would increase the practice across their North American supply chains and help the companies meet carbon reduction goals. ^{[[87]](#cite_note-Doering-87)} In July 2023, ADM launched an expansion of the

program, which offers producers financial incentives and technical support to implement regenerative practices. ^{[[88]]}(#cite_note-Donley-88) As of December 2023, the company had allocated nearly 2 million acres of land within its supply chain for the program. ^{[[89]]}(#cite_note-Marston-89) ## Products ^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=9 "Edit section: Products")} Products include [oils](/wiki/Vegetable_oil "Vegetable oil") and [meal](/wiki/Flour "Flour") from [soybeans](/wiki/Soybean "Soybean"), [cottonseed](/wiki/Cotton "Cotton"), [sunflower seeds](/wiki/Sunflower_seed "Sunflower seed"), [canola](/wiki/Canola "Canola"), [peanuts](/wiki/Peanut "Peanut"), [flaxseed](/wiki/Flaxseed "Flaxseed"), [Palm kernel](/wiki/Palm_kernel "Palm kernel"), and [DAG oil](/wiki/Diacylglycerol_oil "Diacylglycerol oil"), as well as [corn germ](/wiki/Cereal_germ "Cereal germ"), corn gluten feed pellets, [syrup](/wiki/Syrup "Syrup"), [starch](/wiki/Starch "Starch"), [glucose](/wiki/Glucose "Glucose"), [dextrose](/wiki/Dextrose "Dextrose"), crystalline dextrose, [high fructose corn syrup](/wiki/High_fructose_corn_syrup "High fructose corn syrup") [sweeteners](/wiki/Sugar_substitute "Sugar substitute"), [chocolate](/wiki/Chocolate "Chocolate"), [ethanol](/wiki/Ethanol "Ethanol"), and [wheat](/wiki/Wheat "Wheat") [flour](/wiki/Flour "Flour"). End uses are consumption by people, [livestock](/wiki/Livestock "Livestock"), and additives for [fuel](/wiki/Fuel "Fuel"). In January 2008, ADM signed a three-year memorandum of understanding with [Daimler AG](/wiki/Daimler_AG "Daimler AG") and [Bayer CropScience](/wiki/Bayer_CropScience "Bayer CropScience") to explore the use of [jatropha](/wiki/Jatropha "Jatropha") as a feedstock for [biofuel](/wiki/Biofuel "Biofuel"). ^{[[90]]}(#cite_note-90) ^{[[91]]}(#cite_note-91) Natural flavors were added to ADM's product portfolio with the 2014 acquisition of [Wild Flavors](/wiki/Wild_Flavors "Wild Flavors"). ^{[[92]]}(#cite_note-92) and vanilla products were added through the acquisition of Rodelle in 2018. ^{[[93]]}(#cite_note-93) Long known as a food and ingredients company, it has also invested in fuel production. ADM nearly doubled capital spending in its 2007 budget to an estimated \$1.12 billion. The increase is planned for bioenergy projects, focusing on [bioethanol](/wiki/Bioethanol "Bioethanol") and [biodiesel](/wiki/Biodiesel "Biodiesel"). ^{[[94]]}(#cite_note-94) ### Oilseeds processing ^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=10 "Edit section: Oilseeds processing")} The oilseeds processing segment includes global activities related to the origination, merchandising, crushing, and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, and flaxseed) into vegetable oils and protein meals. ^{[[95]]}(#cite_note-sec.gov-95) The first quarter of 2020, during the [COVID-19 pandemic](/wiki/COVID-19_pandemic "COVID-19 pandemic"), saw the operating profit of Ag Services and Oilseeds (ADM's biggest revenue segment) rise \$422 million, or 1.2%. ^{[[96]]}(#cite_note-96) ### Corn processing ^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=11 "Edit section: Corn processing")} ADM's corn processing segment is engaged in corn wet milling and dry milling activities, with its asset base primarily located in the central part of the United States. The Corn Processing segment converts corn into sweeteners and starches, and bioproducts. Its products include ingredients used in the food and beverage industry including sweeteners, starch, syrup, glucose (dextrose). Dextrose and starch are used by the Corn Processing segment as feedstocks for its bioproducts operations. ^{[[95]]}(#cite_note-sec.gov-95) In 2021, ADM was ranked second on the Top 50 Global Sweetener Companies list by FoodTalks. ^{[[97]]}(#cite_note-97) ### Agricultural services ^{[[edit]](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=12 "Edit section: Agricultural services")} ADM's agricultural services segment uses its U.S. grain elevator, global transportation network, and port operations to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, [milo](/wiki/Commercial_sorghum "Commercial sorghum"), oats, rice, and

barley, and resells these commodities primarily as food and feed ingredients and as raw materials for the agricultural processing industry.^[95]### Investor services

^[edit]^[/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=13] "Edit section: Investor services") ADM investor services, Inc. is a registered futures commission merchant and a clearing member of all principal commodities exchanges in the U.S. ADM Investor Services International, Ltd., a member of commodity exchanges and clearing houses in Europe, and ADMIS Hong Kong Limited, offer broker services in Europe and Asia.^[95]## Scandals

^[edit]^[/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=14] "Edit section: Scandals")### Sherman antitrust violation

^[edit]^[/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=15] "Edit section: Sherman antitrust violation") In 1920 the US Department of Justice brought suit against the [National Linseed Oil Trust]^[/wiki/National_Linseed_Oil_Trust] "National Linseed Oil Trust") for violating the [Sherman Antitrust Act]^[/wiki/Sherman_Antitrust_Act] "Sherman Antitrust Act"). Several co-defendants were named, including the Archer-Daniels Manufacturing Company. The suit alleged all of these companies were acting in [collusion]^[/wiki/Collusion] "Collusion") to raise prices, citing a spike in linseed oil costs between 1916 and 1918, when the price rose from \$.50 per gallon to \$1.80.^[98]### Price fixing

^[edit]^[/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=16] "Edit section: Price fixing") See also: [Lysine price-fixing conspiracy]^[/wiki/Lysine_price-fixing_conspiracy] "Lysine price-fixing conspiracy") In 1993, the company was the subject of a lysine price-fixing investigation by the [U.S. Justice Department]^[/wiki/United_States_Department_of_Justice] "United States Department of Justice"). Senior ADM executives were indicted on criminal charges for engaging in [price-fixing]^[/wiki/Price_fixing] "Price fixing") within the international [lysine]^[/wiki/Lysine] "Lysine") market. In a tape played at the trial, ADM's President said that a single phrase inspired the company: "Our competitors are our friends. Our customers are the enemy."^[99]### Three of ADM's top officials, including vice chairman Michael Andreas were eventually sentenced to federal prison in 1999. Moreover, in 1997, the company was fined \$100 million, the largest antitrust fine in U.S. history at the time.^[100] [Mark Whitacre]^[/wiki/Mark_Whitacre] "Mark Whitacre"), [FBI]^[/wiki/FBI] "FBI") informant and whistleblower of the lysine price-fixing conspiracy, would also find himself in legal trouble for [embezzling]^[/wiki/Embezzling] "Embezzling") money from ADM during his time as an informant for the FBI. In addition ADM's 2005 annual report revealed that earlier that year the company settled a class-action antitrust suit for a payment of \$400 million.^[101]

^{[The Informant]^[/wiki/The_Informant_(book)] "The Informant (book)"] is a [nonfiction]^[/wiki/Nonfiction] "Nonfiction") [thriller]^[/wiki/Thriller_(genre)] "Thriller (genre)") book based on this event, which was later adapted into the 2009 film *^{[The Informant!]^[/wiki/The_Informant!] "The Informant!"]*.^[102]### Tax dodging}}

^[edit]^[/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=17] "Edit section: Tax dodging") A noteworthy case of [transfer mispricing]^[/wiki/Transfer_mispricing] "Transfer mispricing") came to light in 2011 in Argentina involving the world's four largest grain traders: ADM, [Bunge]^[/wiki/Bunge_Limited] "Bunge Limited"), [Cargill]^[/wiki/Cargill] "Cargill") and [LDC]^[/wiki/Louis_Dreyfus_Company] "Louis Dreyfus Company"). Argentina's revenue and customs service began an investigation into the four companies when prices for agricultural commodities spiked in 2008 and yet very little profit for the four companies had been reported to the office. As a result of the investigation, it was alleged that the companies had submitted false declarations of sales and routed profits through tax havens or through their headquarters. In some cases, they were said to have used phantom firms to buy grain and had inflated costs in Argentina in order to reduce the

recorded profits earned in the country.[[103]](#cite_note-103) According to the country's revenue and customs service, the outstanding taxes amounted to almost US\$1 billion.[[104]](#cite_note-104) The companies involved have denied the allegations. To date, the Argentinian tax authorities have not replied to the [Swiss NGO Public Eye](/wiki/Public_Eye_(organization) "Public Eye (organization)")'s request regarding the current state of the case.[[105]](#cite_note-105) In its 2018 annual report to the [US Securities and Exchange Commission](/wiki/US_Securities_and_Exchange_Commission "US Securities and Exchange Commission") (SEC), Bunge mentioned provisions which suggest that the case is still ongoing: "[A]s of December 31, 2018, Bunge's Argentine subsidiary had received income tax assessments relating to 2006 through 2009 of approximately 1,276 million Argentine pesos (approximately \$34 million), plus applicable interest on the outstanding amount of approximately 4,246 million Argentine pesos (approximately \$113 million)[[106]](#cite_note-106))."[[107]](#cite_note-107) ### Violation of the Foreign Corrupt Practices Act [[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=18 "Edit section: Violation of the Foreign Corrupt Practices Act")] On December 20, 2013, the SEC announced that it had charged ADM for failing to prevent illicit payments ([bribes](/wiki/Bribery "Bribery")) made by its foreign subsidiaries to Ukrainian government officials in violation of the [FCPA](/wiki/Foreign_Corrupt_Practices_Act "Foreign Corrupt Practices Act"). Alfred C. Toepfer International Ukraine Ltd. (ACTI Ukraine), plead guilty in the Central District of Illinois to one count of conspiracy in violation of the anti-bribery sections of the FCPA. They agreed to pay \$17.8 million in fines. The Department of Justice also entered into a non-prosecution agreement with ADM due to the company's failure to implement a system of internal financial controls, addressing improper payments both in Ukraine and by an ADM joint venture in Venezuela. ADM agreed to pay more than \$36 million to settle the SEC's charges, bringing the total amount paid to over \$54 million.[[108]](#cite_note-SEC_Charges_Archer-Daniels-Midland_Company_with_FCPA_Violations-108)[[109]](#cite_note-109) The Swiss [NGO Public Eye](/wiki/Public_Eye_(organization) "Public Eye (organization)") elaborated the case.[[110]](#cite_note-110)[[111]](#cite_note-justice.gov-111) ### Sonny Perdue land sale [[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=19 "Edit section: Sonny Perdue land sale")] In 2021, an investigation by the **Washington Post** found that ADM had sold land to incoming Secretary of Agriculture [Sonny Perdue](/wiki/Sonny_Perdue "Sonny Perdue") in 2017 at a fraction of its estimated value. Ethics lawyers had legal and ethical concerns about the sale, questioning whether it amounted to bribery. According to the **Post**, ADM "sold the land at a small fraction of its estimated value just as it stood to benefit from a friendly secretary of agriculture."[[112]](#cite_note-112) ### Accounting practices [[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=20 "Edit section: Accounting practices")] In 2020, ADM's board agreed to have bonuses of senior executives tied to the nutrition segment's success—a unit which accounts for less than 10 percent of the company's revenue—replacing the standard practice of tying the award to adjusted earnings. In January 2023, its seven top executives collectively received shares worth about \$72 million for exceeding those performance metrics.[[113]](#cite_note-113)[[114]](#cite_note-114) In January 2024, ADM disclosed that the SEC requested information regarding its accounting practices at its nutrition business on "intersegment transactions." ADM suspended its CFO, postponed its quarterly earnings report and annual filings, and said it was cooperating with the SEC investigation.[[115]](#cite_note-115) In March 2024, [FBI](/wiki/Federal_Bureau_of_Investigation "Federal Bureau of Investigation") agents delivered grand jury subpoenas to current and former employees of ADM, authorized by officials at the [U.S. attorney's Manhattan office](/wiki/United_States_Attorney_for_the_Southern_District_of_New_York

"United States Attorney for the Southern District of New York").^[116](#cite_note-116) ## See also ^[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=21 "Edit section: See also") * [Companies portal](/wiki/Portal:Companies "Portal:Companies") * [Food portal](/wiki/Portal:Food "Portal:Food") * [Illinois portal](/wiki/Portal:Illinois "Portal:Illinois") * [List of Illinois companies](/wiki/List_of_Illinois_companies "List of Illinois companies") * [List of S&P; 500 companies](/wiki/List_of_S%26P_500_companies "List of S&P; 500 companies") ## References ^[edit](/w/index.php?title=Archer_Daniels_Midland&action=edit§ion=22 "Edit section: References") 1. ^[^](#cite_ref-1)** ["2024 Annual Report (Form 10-K)"](https://www.sec.gov/ix?doc=/Archives/edgar/data/0000007084/000000708425000011/adm-20241231.htm). Herald-Review. Journal Gazette and Times-Courier. Operations have started as Archer Daniels Midland Co. plans to inject and permanently store more than 1 million tons of carbon dioxide per year deep underneath part of Decatur's east side. The Illinois Industrial Carbon Capture and Storage project is a continuation of research efforts that have already taken place with hopes to show the technology can be commercialized. 77. ^ [***a***](#cite_ref-MITIllinois_77-0) [***b***](#cite_ref-MITIllinois_77-1) ["Illinois Industrial Carbon Capture and Storage (IL-CCS) Fact Sheet: Carbon Dioxide Capture and Storage Project"](https://sequestration.mit.edu/tools/projects/illinois_industrial_ccs.html). The **Archer-Daniels-Midland Company**, commonly known as **ADM**, is an American multinational food processing and commodities trading corporation founded in 1902 and headquartered in Chicago, Illinois. In 1969, ADM relocated its headquarters from Minneapolis to Decatur, Illinois, a location closer to the company's soybean processing operations. In September 2022, PepsiCo and ADM established a partnership on regenerative agriculture projects that would increase the practice across their North American supply chains and help the companies meet carbon reduction goals. "Archer Daniels Midland Company (ADM)" (PDF). 1962 April – Archer Daniels Midland Co. introduces a new trademark and decides to consistently call itself "ADM" (Soybean Digest, p. | * v * t * e Archer Daniels Midland "ADM (company)" |

[Skip to content](#main) # 3 Big Things Today, Nov. 5, 2025 By [Tony Dreibus](https://www.agriculture.com/author/tony-dreibus) [Tony Dreibus](https://www.agriculture.com/author/tony-dreibus) **Title:** Editor, Successful Farming at Agriculture.com Experience: Writes the “3 Big Things” article every morning and does various other stories for the website and Successful Farming magazine. [Successful Farming’s Editorial Guidelines](/about-us-7487846#toc-editorial-policy) Updated on November 5, 2025 ## 1. Soybean Futures Higher as China Curbs Tariffs Soybean futures were higher overnight after China said it would suspend its retaliatory tariffs on U.S. imports including farm products. Beijing said it would eliminate duties of 15% on some agricultural products but leave a 10% levy on others, effective Nov. 10. Presidents Donald Trump and Xi Jinping met last week in South Korea to finalize a deal hammered out by negotiators. Under the terms of the agreement, China will purchase up to 12 million metric tons of U.S. soybeans in the last two months of the year and another 25 million metric tons in each of the next three years, the White House said in a statement. The U.S. will lower its tariff on Chinese imports by 10 percentage points, also starting on Nov. 10, the statement said. Still, prices have been capped as purchases from China haven’t been as quick and robust as some had expected. The Asian nation this week reportedly purchased 10 cargoes of soybeans from Brazil, again shunning U.S. supplies. Soybean futures for November delivery rose 7½¢ to \$11.29 a bushel overnight on the Chicago Board of Trade. Soy meal was up \$3.50 to \$320.90 a short ton and soybean oil futures added 0.12¢ to 49.65¢ a pound. Corn futures for December delivery rose ¼¢ to \$4.31¾ a bushel. Wheat futures for December delivery added ¼¢ to \$5.50½ a bushel, and Kansas City futures were down 1¢ to \$5.35½ a bushel. [January Soybeans Recoup Yesterday’s Loss | Wednesday, Nov. 5, 2025](https://www.agriculture.com/soybeans-up-more-than-5cent-or-wednesday-nov-5-2025-11843908) ## 2. ADM Q3 Ag Services and Oilseed Profits Plunge Archer-Daniels-Midland (ADM) said profits in its agricultural services and oilseed segment plunged year over year in the third quarter amid a sharp drop in its crushing business. The segment’s operating profit in the three months that ended on Sept. 30 were reported at \$379 million, down from \$480 million in the same quarter last year, ADM said. Crushing profit fell 93% to \$13 million on an annual basis, the company said. The decline in crushing profit was “driven by lower margins as a result of muted demand due to the deferral of U.S. biofuel policy and challenges with international trade flows,” the company said in a statement. Ag services profit, meanwhile, jumped to \$190 million from \$107 million a year earlier. The company’s refined products segment saw profit of \$120 million, down 3%, while its carbohydrates solutions business achieved profit of \$336 million, down from \$452 million. ADM reported companywide revenue of \$20.3 billion in Q3, up from \$19.9 billion in the same quarter last year. ## 3. Windy Weather Forecast for Oklahoma, Arkansas Windy weather is expected in parts of eastern Oklahoma and western Arkansas, though humidity will remain high enough to stave off concerns about wildfires, the National Weather Service said in a report early this morning. Low-level winds will move through the region tomorrow, the agency said. Relative humidity will fall to only 40–50%, which will lessen worries about fire weather. “A stronger cold front will move through late Saturday, which will drop temperatures below normal to end the weekend, and bring the increasing likelihood of widespread freezing temperatures Monday morning,” NWS said. Dry conditions are also expected this afternoon in western and central Nebraska. Winds will gust up to 50 mph starting late tonight, the agency said. The intense winds will last through tomorrow afternoon.

"Strong winds and cooler temperatures are expected through the weekend," NWS said. Was this page helpful? Thanks for your feedback! Tell us why! Read more: *

Job cuts made last month are up 175% from cuts announced in October 2024, layoff data analysis from Challenger, Gray & Christmas indicated. Compare 55,597 job cuts last year to 153,074 job cuts this year. More alarming: In over two decades of Octobers, last month marked the highest rate of job cuts since 2003, when 171,874 cuts were recorded. This is also the highest single-month total in Q4 since 2008, researchers noted. [...] Challenger, Gray & Christmas' latest layoff report fills in gaps left by the U.S. Bureau of Labor Statistics and also sounds the alarm on "cruel" Q4 layoffs. Published Nov. 6, 2025 Caroline Colvin Reporter post share post print) email license This audio is auto-generated. Please let us know if you have feedback. ### Dive Brief: [...] It's okay for employers to ask for additional information when presented with an accommodation request, but they should avoid probing too much, an attorney told HR Dive. By Ryan Golden • Sept. 15, 2025 Latest in Talent This week in 5 numbers: Most managers aren't great at coaching By Ginger Christ Last month's layoffs were the highest of any October in 22 years, analysis shows By Caroline Colvin 1 in 3 US employees say workplace changes aren't worth the effort, report finds

--- ## Find an ESG Score # S&P; Global Inc. ESG Score The S&P; Global ESG Score cannot be compared across industries. It measures a company's sustainability performance relative to peers within the same industry classification. [Learn more](/sustainable1/en/solutions/esg-scores-data) Company Industry CSA Score ESG Score Score Under Review Last Updated S&P; Global Inc. FBN Diversified Financial Services and Capital Markets 73 73 NO November 07, 2024 Company S&P; Global Inc. Industry FBN Diversified Financial Services and Capital Markets CSA Score 73 ESG Score 73 Score Under Review NO Last Updated November 07, 2024 **This company is a Corporate Sustainability Assessment (CSA) survey respondent. This company's ESG Score is based on its responses to the CSA, information available in the public domain and modeling approaches.** --- ### **Corporate Sustainability Assessment** All companies are assessed using the industry specific [CSA questionnaire and methodology](/sustainable1/en/csa/methodology) reflecting a company's score compared to its industry peers. The CSA focuses on past and current performance on ESG issues. Companies assessed using the CSA fall into 2 categories: * Participating companies - ESG Score is based on the company's responses to the S&P; Global Corporate Sustainability Assessment CSA, information available in the public domain and modeling approaches. * Non-participating companies - ESG Score is based on information available in the public domain and modeling approaches and is not based on the company's active participation in the S&P; Global Corporate Sustainability Assessment (CSA). **Information on this page is updated daily and may change due to company reassessment, media and stakeholder analysis (MSA), annual score updates and/or as may be required due to relevant regulation, law, or rule.** [Learn More About the CSA](/sustainable1/en/csa) --- **S&P; Global ESG Score Definition**The S&P; Global ESG Score measures a company's performance on and management of material ESG risks, opportunities, and impacts informed by a combination of company disclosures, media and stakeholder analysis, modeling approaches, and in-depth company engagement via the S&P; Global Corporate Sustainability Assessment (CSA). The S&P; Global ESG Score is a relative score measuring a company's performance on and management of ESG risks, opportunities, and impacts compared to their peers within the same industry classification. The S&P; Global ESG Score uses a double materiality approach whereby a sustainability issue is considered to be material if it presents a significant impact on society or the environment and a significant impact on a company's value drivers, competitive position, and long-term shareholder value creation. **S&P; Global CSA Score Definition**The S&P; Global Corporate Sustainability Assessment (CSA) Score is the S&P; Global ESG Score without the inclusion of any modeling approaches. **Media and Stakeholder Analysis (MSA)**The [S&P; Global Media and Stakeholder

Analysis (MSA)](/sustainable1/en/csa/policies-guidelines) forms an integral part of the S&P; Global Corporate Sustainability Assessment (CSA) and enables S&P; Global to monitor companies' sustainability performance on an ongoing basis by assessing current controversies with potentially negative reputational or financial impacts. --- ****Important Legal Information**** The S&P; Global ESG Scores (including their key component the S&P; Global CSA Scores) are produced and issued by S&P; Global Sustainable1 utilizing the S&P; Global Corporate Sustainability Assessment (CSA) and/or publicly available information. CSRHub, CSR HUB, ESGHub We considered many names for our site—in fact we spent our first year and a half under a different name—EkoHub. We liked “Eko” — coming from the Greek word Oikos, related to economy, ecology, and “home” or social concerns. From the beginning, we believed the word “Hub” reflected our desire to be at the center of the sustainability area, providing knowledge, harmony, and consensus among the hundreds of experts judging the ESG performance of companies. PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the fiscal year ended December 31, 2023 OR TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the transition period from _____ to _____ Commission file number 1-44 ARCHER-DANIELS-MIDLAND COMPANY (Exact name of registrant as specified in its charter) DE 41-0129150 (State or other jurisdiction of incorporation or organization) (I. R. S. Employer Identification No.) 77 West Wacker Drive, Suite 4600 Chicago, IL 60601 (Address of principal executive offices) (Zip Code) (312) 634-8100 (Registrant's telephone number, including area code) Securities registered pursuant to Section 12(b) of the Act: Title of each class Trading Symbol(s) Name of each exchange on which registered Common Stock, no par value ADM NYSE 1.000% Notes due 2025 NYSE Securities registered pursuant to Section 12(g) of the Act: None Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☐ Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☐ Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☐ No ☐ Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act. Large accelerated filer ☐ Accelerated Filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐ If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐ Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☐ If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐ Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1 (b). ☐ Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☐ State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter. Common Stock, no par value—\$40.3 billion (Based on the closing sale price of Common Stock as reported on the New York Stock Exchange as of June 30, 2023) Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date. Common Stock, no par value—509,849,153 shares (March 8, 2024) DOCUMENTS INCORPORATED BY REFERENCE Portions of the Registrant's definitive proxy statement relating to its 2024 annual meeting of stockholders are incorporated by reference

into Part III of this Annual Report on Form 10-K where indicated. Such proxy statement will be filed with the U.S. Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates. **SAFE HARBOR STATEMENT** This Annual Report on Form 10-K contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that involve substantial risks and uncertainties. All statements, other than statements of historical fact included in this Annual Report on Form 10-K, are forward-looking statements. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "outlook," "will," "should," "can have," "likely," and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. For example, all statements the Company makes relating to its future results and operations, growth opportunities, pending litigation and investigations, and timing of the remediation of the Company's material weakness in the Company's internal control over financial reporting are forward-looking statements. All forward-looking statements are subject to significant risks, uncertainties and changes in circumstances that could cause actual results and outcomes to differ materially from the forward-looking statements. These forward-looking statements are not guarantees of future performance and involve risks, assumptions and uncertainties, including, without limitation, those that are described in Item 1A, "Risk Factors" included in this Annual Report on Form 10-K, as may be updated in subsequent Quarterly Reports on Form 10-Q. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated or anticipated by such forward-looking statements. Accordingly, you are cautioned not to place undue reliance on these forward-looking statements. Except to the extent required by law, Archer-Daniels-Midland Company does not undertake, and expressly disclaims, any duty or obligation to update publicly any forward-looking statement whether as a result of new information, future events, changes in assumptions or otherwise.

4 PART I Item 1. BUSINESS

Company Overview Archer-Daniels-Midland Company (the Company or ADM) unlocks the power of nature to enrich the quality of life. The Company is an essential global agricultural supply chain manager and processor; a premier human and animal nutrition provider; a trailblazer in groundbreaking solutions to support healthier living; an industry-leading innovator in replacing petroleum-based products; and a leader in sustainability. ADM's breadth, depth, insights, facilities and logistical expertise give the Company unparalleled capabilities to meet demand driven by global trends related to food security, health and well-being, and sustainability of the agriculture and food

value chains. From the seed of the idea to the outcome of the solution, ADM gives customers an advantage in solving the nutritional and sustainability challenges of today and tomorrow. The Company is one of the world's leading producers of ingredients for sustainable nutrition. From staple foods, such as flour, oils, and sweeteners, to innovative alternatives like plant-based meat and dairy, ADM offers the industry's broadest portfolio of food and beverage solutions. The Company is also a leader in animal nutrition. Today, more and more people want to feed their pets with the same kind of clean, simple, and healthy products that they eat themselves, and consumers expect livestock and poultry to be fed and raised naturally, humanely, and sustainably. ADM offers a range of ingredients, flavors, and solutions from nature to meet animal's needs. ADM is a global leader in health and well-being, with an industry-leading range of probiotics, enzymes, supplements, and more to meet the needs of consumers looking for new ways to live healthier lives. The Company is also leading the way to a future of new consumer and industrial solutions from nature. With unparalleled expertise and capacity in precision fermentation, ADM is reimagining the world of plastics, lubricants, adhesives, home products, and more. ADM also has significant investments and joint ventures that aim to expand or enhance the market for its products or offer other benefits including, but not limited to, geographic or product-line expansion. At ADM, sustainable practices and a focus on environmental responsibility are foundational to the Company's purpose and culture, and integral to the work the Company does every day to serve customers and create value for shareholders. ADM's Board of Directors actively oversees the Company's sustainability strategy through a board-level Sustainability and Corporate Responsibility Committee (Sustainability Committee), and ADM's Chief Sustainability Officer is part of the core strategy team and reports to the Senior Vice President and President of Ag Services and Oilseeds. Utilizing ADM's unique position in the agricultural value chain, including relationships with farmers around the globe and an unparalleled origination, transportation, and processing network, the Company is enhancing sustainability and leading in decarbonization across the multiple value chains in which it operates. ADM works with growers by supporting them with personalized services and innovative technologies and partnering with them to develop and enhance sustainable practices, including a goal of enrolling four million regenerative agriculture acres by 2025. The Company is actively working to improve the efficiency of its facilities and vehicles, finding alternative uses for waste, reusing and recycling water, and sequestering carbon at its onsite capture and storage facility. These efforts are helping advance ADM's "Strive 35" commitments to, by 2035, reduce from a 2019 baseline absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 25%; reduce from a 2021 baseline absolute Scope 3 emissions by 25%; reduce energy intensity by 15% and increase low-carbon energy usage to 25% of total; reduce water intensity and water withdrawal by 10%; and achieve a 90% landfill diversion rate. All of this work is propelling ADM's broadening array of products from nature, which are helping customers meet increasing demand for more sustainable solutions spanning food, feed, fuel, and industrial and consumer products. The Company is strongly committed to diversity, equity, and inclusion. ADM fundamentally values the differences between individuals and believes a variety of perspectives makes for a better company. The Company's innovation and expertise are helping people live healthier lives and support a healthier planet. The Company's globally-integrated footprint combines with local insights to give ADM capabilities few other companies have to meet critical and global needs.

Item 1. BUSINESS (Continued) Segment Descriptions The Company's operations are organized, managed, and classified into three reportable business segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable business segments, as defined by the applicable accounting

standard, and are classified as Other Business. Financial information with respect to the Company's reportable business segments is set forth in Note 17 of "Notes to Consolidated Financial Statements" included in Item 8 herein, "Financial Statements and Supplementary Data" (Item 8).

Ag Services and Oilseeds The Ag Services and Oilseeds segment includes global activities related to the origination, merchandising, transportation, and storage of agricultural raw materials, and the crushing and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the segment include ingredients for food, feed, energy, and industrial customers. Crude vegetable oils produced by the segment's crushing activities are sold "as is" to manufacturers of renewable green diesel and other customers or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel and glycols or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Ag Services and Oilseeds segment is also a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cotton cellulose pulp is manufactured and sold to the chemical, paper, and other industrial markets. The Ag Services and Oilseeds segment's grain sourcing, handling, and transportation network (including barge, ocean-going vessel, truck, rail, and container freight services) provides reliable and efficient services to the Company's customers and agricultural processing operations. The Ag Services and Oilseeds segment also includes agricultural commodity and feed product import, export, and global distribution, and structured trade finance activities. The Company engages in various structured trade finance activities to leverage its global trade flows. The Company has a 22.5% equity interest in Wilmar International Limited (Wilmar), a Singapore publicly listed company. Wilmar is a leading global agribusiness group headquartered in Asia engaged in the businesses of packaged oils and packaged foods, oil palm cultivation, oilseeds crushing, edible oils refining, sugar milling and refining, specialty fats, oleo chemicals, biodiesel and fertilizers manufacturing, and grains processing. The Company has a 32.2% equity interest in Pacifcor. Pacifcor owns and operates grain export elevators in Kalama, Washington and Portland, Oregon. The Company has a 50.0% equity interest in SoyVen, a joint venture between ADM and Cargill to provide soybean meal and oil for customers in Egypt. The Company has a 37.5% equity interest in Olenex Sarl (Olenex), a joint venture between ADM and Wilmar that produces and sells a comprehensive portfolio of edible oils and fats to customers around the globe. In addition, Olenex markets refined oils and fats from the Company's plants in the Czech Republic, Germany, the Netherlands, Poland, and the U.K. The Company has a 50.0% equity interest in Stratas Foods LLC, a joint venture between ADM and ACH Jupiter, LLC, a subsidiary of Associated British Foods, that procures, packages, and sells edible oils in North America. The Company has a 50.0% equity interest in Edible Oils Limited, a joint venture between ADM and Princes Limited to procure, package, and sell edible oils in the United Kingdom. The Company also formed a joint venture with Princes Limited in Poland to procure, package, and sell edible oils in Poland, the Czech Republic, Slovakia, Hungary, and Austria. The Company is a supplier of raw materials to Wilmar, Stratas Foods LLC, Edible Oils Limited, SoyVen, and Olenex.

Item 1. BUSINESS (Continued)

Carbohydrate Solutions The Carbohydrate Solutions segment is engaged in corn and wheat wet and dry milling and other activities. The Carbohydrate Solutions segment converts corn and wheat into products and ingredients used in the food and beverage industry including sweeteners, corn and wheat starches, syrup, glucose, wheat flour, and dextrose. Dextrose and starch are used by

the Carbohydrate Solutions segment as feedstocks in other downstream processes. By fermentation of dextrose, the Carbohydrate Solutions segment produces alcohol and other food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use in products such as hand sanitizers and ethanol for use in gasoline due to its ability to increase octane as an extender and oxygenate. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Carbohydrate Solutions products include citric acids, which are used in various food and industrial products. The Carbohydrate Solutions segment is a leader in carbon capture and sequestration. By continuing to advance additional carbon capture and sequestration initiatives and products aimed at replacing coal power and steam generation with lower emissions power, the Carbohydrate Solutions segment is well positioned to benefit from the replacement of essential materials historically made from fossil fuels with plant-based alternatives. The Company has a 50.0% equity interest in Hungrana Ltd. which operates a corn wet milling plant in Hungary. The Company has a 50.0% equity interest in Almidones Mexicanos S.A. which operates a corn wet milling plant in Mexico. The Company has a 50.0% equity interest in Aston Foods and Food Ingredients, a Russian-based sweeteners and starches business. The Company has a 40.0% equity interest in Red Star Yeast Company, LLC, which produces and sells fresh and dry yeast in the U.S. and Canada. The Company has a 22.1% equity interest in LSCP, LLLP, which operates an ethanol plant facility in the U.S.

Nutrition The Nutrition segment serves various end markets including food, beverages, nutritional supplements, and feed premix and additives for livestock, aquaculture, and pet food. The segment engages in the manufacturing, sale, and distribution of a wide array of ingredients and solutions including plant-based proteins, natural flavors, flavor systems, natural colors, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, postbiotics, enzymes, botanical extracts, and other specialty food and feed ingredients. The Nutrition segment includes the activities related to the procurement, processing, and distribution of edible beans. The segment also includes activities related to the processing and distribution of formula feeds and animal health and nutrition products and the manufacture of contract and private label pet treats and foods. The Company has a 45.3% equity interest in Vimison S.A. de C.V., a leader in the animal nutrition industry in Mexico. The Company has 50% equity interests in ADM Matsutani LLC and Matsutani Singapore Pte. Ltd., joint ventures for the worldwide sales and marketing of Fibersol. The Company has a 50% equity interest in ADM Vland Biotech Shandong Co., Ltd., which manufactures and commercializes human probiotics in Greater China. As of December 31, 2023, this joint venture has temporarily ceased operations. The Company has a 42.8% equity interest in Dusial S.A., a leader in the complete feed industry in Southwest of France. The Company has a 34.3% equity interest in Vitafort ZRT, a leading company in the Hungarian animal feed market. Other Business Other Business includes the Company's remaining operations as described below.

Item 1. BUSINESS (Continued) ADM Investor Services, Inc., a wholly owned subsidiary of the Company, is a registered futures commission merchant and a clearing member of all principal commodities exchanges in the U.S. ADM Investor Services International Limited, a member of several derivative and commodity exchanges and clearing houses in Europe, ADMIS Singapore Pte. Limited, a clearing member of the Singapore exchange, and ADMIS Hong Kong Limited, are wholly owned subsidiaries of ADM offering brokerage services in Europe and Asia. Insurance activities include Agrinational Insurance Company (Agrinational) and its subsidiaries. Agrinational, a wholly owned subsidiary of ADM, provides insurance coverage for certain property, casualty, marine, medical, and other miscellaneous risks of the Company. Agrinational also participates in certain third-party reinsurance arrangements. Corporate Corporate includes the

activities related to cost and equity method investments in early-stage start-up companies within ADM Ventures. In addition to identifying companies to invest in, ADM Ventures also works on select high-potential, new product development projects and alternative business models, all with the objective of supporting the Company's strategic objectives.

Internal Investigation Background As previously disclosed, the Company received a voluntary document request from the Securities and Exchange Commission (the SEC) relating to intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. In response, the Company initiated an internal investigation regarding certain accounting practices and procedures with respect to its Nutrition reporting segment, including as related to certain intersegment sales (the Investigation). As previously disclosed on January 21, 2024, the Company placed Vikram Luthar, Chief Financial Officer and Senior Vice President, on administrative leave.

Correction of Certain Segment-Specific Historical Financial Information The Company has historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Investigation, the Company identified certain intersegment sales that occurred between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments that were not recorded at amounts approximating market. Because each sale to be adjusted occurred between the Company's reporting segments, the adjustments have no impact on the Company's consolidated balance sheets and statements of earnings, comprehensive income (loss), or cash flows. The Company determined that the adjustments are not material to the Company's consolidated financial statements taken as a whole for any period. For more information, see "Management's Discussion and Analysis of Financial Position and Results and Operations" included in Part II, Item 7 herein, and Note 17, Segment and Geographic Information of "Notes to Consolidated Financial Statements" included in Part II, Item 8 herein.

Government Investigations The Company continues to cooperate with the SEC. Following the Company's January 21, 2024 announcement of the Investigation, the Company received voluntary document requests from the Department of Justice (the DOJ) focused primarily on the same subject matter, and the DOJ directed grand jury subpoenas to certain current and former Company employees. The Company is cooperating with the DOJ.

Item 1. BUSINESS (Continued)

Methods of Distribution The Company's products are distributed mainly in bulk from processing plants or storage facilities directly to customers' facilities. The Company has developed a comprehensive transportation capability to efficiently move both commodities and processed products virtually anywhere in the world. The Company owns or leases trucks, trailers, railroad tank and hopper cars, river barges, towboats, and ocean-going vessels used to transport the Company's products to its customers.

Concentration of Revenues by Product The following products accounted for 10% or more of revenues for the following periods: % of Revenues Year Ended December 31

	2023	2022	2021
Soybeans	18%	17%	18%
Soybean Meal	13%	12%	12%
Corn	12%	14%	14%

Status of New Products The Company continues to expand the size and global reach of its business through the development of new products. Acquisitions expand the Company's ability to unlock the potential of nature and serve customers' evolving and expanding needs through its offerings of natural flavor and ingredient products. The Company does not expect any individual new product to have a significant impact on the Company's revenues in 2024.

Source and Availability of Raw Materials A significant majority of the Company's raw materials are agricultural commodities. In addition, the Company sources specific fruits, vegetables, and nuts for extracts to make flavors and colors. In any single year, the availability and price of these commodities are subject to factors such as changes in weather conditions, plantings, government programs and policies, competition, changes in global demand,

changes in standards of living, and global production of similar and competitive crops. The Company's raw materials are procured from thousands of growers, grain elevators, and wholesale merchants in North America, South America, Europe, Middle East, and Africa (EMEA), Asia, and Australia, pursuant primarily to short-term (less than one year) agreements or on a spot basis. The Company is not dependent upon any particular grower, elevator, or merchant as a source for its raw materials. Some of the principal crops that ADM sources and processes present specific climate change risks. For example, South American soy and global palm present risks of deforestation due to their proximity to the forest and other high-carbon-value landscapes. In addition, when not managed appropriately, row crops such as corn, soy, wheat, and canola present environmental risks such as water quality impairment, erosion, soil degradation, and GHG emissions. However, these crops also present an opportunity to combat climate change through their ability to sequester carbon in the soil using regenerative agricultural practices. In 2022, ADM launched its "re: generations" program to engage and encourage growers in its supply chain to implement regenerative agriculture practices. In the first year of the program, the Company exceeded its goal to enroll one million acres. In 2023, the Company expanded its regenerative agriculture program to cover two million acres across 18 U.S. states and Canada and also extended the program into new geographies, launching regenerative agriculture projects in Europe and South America, with a goal to enroll four million acres globally by 2025.

Item 1. BUSINESS (Continued) Under the stewardship of ADM's Board of Directors, the Company has established several key social and environmental policies that collectively outline expectations for its employees, business partners and contractors, and the Company as a whole with respect to its sourcing operations. These policies set the standards that govern the Company's approach to environmental stewardship, employee conduct, and raw material sourcing, among other areas, and outline ADM's positions on issues of widespread public interest. These standards are included in, among others, the Company's Code of Conduct; Environment, Health, and Safety Policy; Human Rights Policy; Commitment to Protect Forests, Biodiversity, and Communities; Statement on Genetically Modified Organisms; Statement on Animal Testing; Commitment to Anti-Corruption Compliance; Protocol for Managing Supplier Non-Compliance and ADM Supplier Expectations, all of which are available on the Company's website (see Item 1, Business - Available Information). In addition to policies, a portion of the Company's commodity sourcing is conducted using third-party certification programs including ADM Responsible Soy, Biomass Biofuel Sustainability Voluntary Scheme, Round Table for Responsible Soy, International Sustainability and Carbon Certification, Round Table on Sustainable Palm Oil, and U.S. Soy Sustainability Assurance Protocol. These programs have standards that are established to provide transparency on specific sustainability-related criteria. ADM procures canola, soybeans, and palm under these programs. Trademarks, Brands, Recipes, and other Intellectual Property The Company owns trademarks, brands, recipes, and other intellectual property including patents, with a net book value of \$734 million as of December 31, 2023. More than 90% of these intangibles are in the Nutrition segment which is not materially dependent upon any individual trademark, brand, recipe or other intellectual property.

Seasonality, Working Capital Needs, and Significant Customers Since the Company is widely diversified in global agribusiness markets, there are no material seasonal fluctuations in overall global processing volumes and the sale and distribution of its products and services. There is a degree of seasonality in the growing cycles, procurement, and transportation of the Company's principal raw materials: oilseeds, corn, wheat, and other grains. The Company has seasonal financing arrangements with farmers in certain countries around the world. Typically, advances on these financing arrangements occur during the planting season and are repaid at harvest. The prices of agricultural commodities, which may fluctuate

significantly and change quickly, directly affect the Company's working capital requirements. Because the Company has a higher portion of its operations in the northern hemisphere, principally North America and Europe, relative to the southern hemisphere, primarily South America, inventory levels typically peak after the northern hemisphere fall harvest and are generally lower during the northern hemisphere summer months. Working capital requirements have historically trended with inventory levels. No material part of the Company's business is dependent upon a single customer or very few customers. Competition The Company has significant competition in the markets in which it operates based principally on price, foreign exchange rates, quality, global supply, and alternative products, some of which are made from different raw materials than those utilized by the Company. Given the commodity-based nature of many of its businesses, the Company, on an ongoing basis, focuses on managing unit costs and improving efficiency through technology improvements, productivity enhancements, and regular evaluation of the Company's asset portfolio. The Company's Nutrition business is a vertically integrated business that provides ingredients and solutions for human, animal, and pet in a highly competitive environment with a variety of companies offering the same products and services. The industry includes ingredient suppliers, contract manufacturers, global fast moving consumer goods companies, and private label brands, as well as smaller companies that specialize in specific niche markets. The Company focuses on staying ahead of the curve in terms of innovation and science-based solutions, building direct-to-consumer sales channels and focusing on consumer needs, expanding into new markets, building strategic partnerships, leveraging data and technology, and building a strong distribution network.

Item 1. BUSINESS (Continued) Research and Development (R&D;) R&D; expense, net of reimbursements of government grants, for the year ended December 31, 2023 was \$256 million. The Company is committed to global health and sustainable products, recognizing the interconnectedness of human, animal, and environmental health. ADM's R&D; efforts focus on creating science-based products, solutions, and technologies aligned with macro trends in food security, sustainable processes, health, and personalized nutrition. The Company strategically invests in R&D; across the entire nutrition value chain by leveraging its access to innovative processes and product optimization. The R&D; team is also engaged in BioSolutions initiatives which is a key part of ADM's commitment to utilize its value chain to reduce its carbon footprint, redesign core products with sustainable alternatives, and explore new markets. The Company's internal R&D; network, consisting of approximately 1,600 talented employees, is dedicated to transforming aspirations into solutions and brand innovation. The integration of interdisciplinary experts in biology, chemistry, physiology, nutrition, agronomy, and product development provides a competitive edge. R&D; teams are closely connected to customers and the global markets. Targeted product development leverages innovative ingredients and ADM's existing portfolio across different segments. R&D; innovation centers across four continents enable the rapid transformation of ideas into products. An external network of collaborators, including customers, key opinion leaders, start-ups, and academia amplifies the Company's scientific excellence. The scope and application of the Company's technical capabilities reinforce its commitment to global health and sustainable products. High-throughput screening and characterization facilities strengthen ADM's extensive ingredient database. Formulation platforms enable rapid upscaling or downscaling for cost-effective innovation. Resources dedicated to functional ingredient characterization enhance the Company's capacity to deliver on the science behind each product. ADM's R&D; strategy prioritizes fulfilling customer expectations and supporting the Company's growth. In 2023, ADM introduced over 40 new products aligned with short and medium-term customer needs. The Company's future strategy aims to deliver world-class solutions more efficiently and sustainably, and to capitalize on ADM's full potential. Environmental, Social, and

Governance (ESG) The Company knows that the health of our natural resources is critical to our future, and that its commitments to sustainable practices will result in a stronger ADM and a better world. ADM is committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, industrial and consumer products, energy, and packaging materials while pursuing ways to continually improve the Company's efforts in both protecting the environment and enhancing environmental sustainability. The United Nations Development Programme created the Sustainable Development Goals (SDG) blueprint as a universal call to action to end poverty, protect the planet, and ensure that all people enjoy peace and prosperity. ADM focuses its efforts toward goals that align with its business objectives and allow the Company to make the greatest contribution towards the achievement of the SDGs, specifically Zero Hunger, Clean Water and Sanitation, Decent Work and Economic Growth, Climate Action, and Life On Land.

Item 1. BUSINESS (Continued)

Governance The Sustainability Committee of the Board actively oversees the Company's objectives, goals, strategies, and activities relating to sustainability and corporate responsibility matters. The Sustainability Committee also oversees the Company's compliance with sustainability and corporate responsibility laws and regulations, assesses performance relating to industry benchmarks, and assists the Board of Directors in overseeing the Company's operations as a sustainable organization and responsible corporate citizen in order to enhance shareholder value and protect ADM's reputation. Both the Company's Chief Sustainability Officer and Senior Vice President of Global Operations attend committee meetings as management representatives. The Senior Vice President, Chief People and Diversity Officer meets periodically with the Sustainability Committee to discuss ADM's diversity progress and strategy. The Executive Council of ADM, the Company's highest strategic and operational body, provides close supervision of the Company's ESG efforts and in-depth review of sustainability issues. Furthermore, regional sustainability teams, along with the corporate sustainability team, support the Chief Sustainability Officer to drive sustainability efforts in the Company's facilities and supply chains around the world. ADM's sustainability efforts are also supported by functional expertise throughout the Company such as in Operations and Utilities, Supply Chain and Procurement, Diversity, Equity and Inclusion, and Environmental Health and Safety (EHS).

Strategy The Company aims to mitigate climate change and protect biodiversity through renewable product and process innovations, supply chain efforts including a commitment to no-deforestation or native vegetation conversion and regenerative agriculture, and a strategic approach to operational excellence with a focus on enhancing the efficiency of ADM's production plants throughout its global operations. ADM believes sustainability is critical to its future growth strategy. ADM's strategic plan of sustainable growth leverages the trends and technologies in sustainability to help the Company grow and create value for its stakeholders. Ag Services and Oilseeds is focused on traceability of sourcing and differentiation and working with growers on low carbon agricultural practices and products. Carbohydrate Solutions is focused on decarbonization efforts that increasingly position the segment to offer low-carbon intensity feedstocks for biosolutions and biomaterials, including fuel solutions, to replace petroleum-based products. Nutrition is working with suppliers and customers to identify nature positive solutions that can reduce environmental impact in supply chains. The growth of these projects and businesses will be integral to supporting the objective of helping the planet limit total global warming to the 1.5°C threshold indicated by the United Nations. Additionally, beginning in 2022, the Company incorporated the achievement of gender parity and GHG emission goals to executive performance measurement to reflect the strategic importance of ESG to its business. Moreover, ADM has a large industrial footprint and believes it is important to reduce GHG emissions related to its business activities and the entire agricultural supply chain. The Company continues to use internal and

external resources to identify opportunities and take action to reduce its GHG emissions globally to meet its continued commitment to mitigate the effects of climate change. In 2020, ADM announced its environmental stewardship goals, collectively called “Strive 35” – an ambitious plan to, by 2035, reduce absolute Scope 1 and 2 GHG emissions by 25% from a 2019 baseline, reduce energy intensity by 15%, reduce water intensity by 10%, and achieve a 90% landfill diversion rate. To support the Company’s Strive 35 environmental goals, ADM developed a feasibility study with a leading engineering professional services firm that provides the technology pathway for absolute reduction of GHG by 2035. The Company has also committed to develop a global strategy focused on improving community well-being in priority watersheds, including water-stressed areas, by 2025. In 2023, ADM refined two of its Strive 35 commitments to more meaningfully drive progress: ADM aims to reduce its absolute water withdrawal by 10%, from a 2019 baseline, by 2035, and ADM aims to increase its use of low-carbon energy sources to 25% of total energy used by 2035. In 2021, ADM announced its Scope 3 GHG reduction goal, focused upon the five most material Scope 3 categories for the Company: purchased goods and services; fuel and energy related emissions; upstream transportation and distribution; waste; and processing of solid products/goods. ADM aims to reduce its absolute Scope 3 emissions by 25% from a 2021 baseline by 2035. ADM has applied for approval of its Scope 1, 2 and 3 GHG reduction goals from the Science-based Targets Initiative (SBTi). This approval is pending SBTi’s review and engagement with ADM.

Item 1. BUSINESS (Continued) As of December 31, 2022, the Company reduced absolute Scope 1 and 2 GHG emissions by 7.8% and realized no reductions in Scope 3 emissions. The Company reduced absolute water withdrawal by 1.0% and realized no reductions in water intensity. The Company realized no increase in low carbon energy usage and achieved 82.4% of its waste diverted from landfill. In 2023, the Company published an updated Carbon Reduction Program Assessment, a report of ADM’s carbon reduction progress and exploration to support its aspiration of net zero emissions by 2050 at the latest. The report can be accessed through the Company’s website at <http://www.adm.com>. The Company anticipates spending between \$360 million and \$490 million on capital projects to achieve the Strive 35 targets. ADM has spent \$158 million on projects in support of these goals since inception, of which \$71 million was spent in 2023, including three projects in Ag Services and Oilseeds designed to fully transition away from coal usage. The Company believes that protection of natural resources, habitats, and biodiversity are important to life and to the Company’s business. ADM is committed to eliminating deforestation from all of the Company’s supply chains by 2025. In 2023, after a strategic investigation of the impact of conversion of native habitats in its key supply chains, the Company announced its commitment to eliminate conversion of native habitats in high risk areas in South America for direct suppliers of all commodities by 2025 and indirect suppliers by 2027, with a 2025 cutoff date (a date after which conversion of primary native vegetation renders a given area or production unit non-compliant) for both direct and indirect suppliers. In 2022, the Company achieved full traceability of its direct and indirect sourcing throughout its soy supply chains in Brazil, Paraguay, and Argentina. During the year ended December 31, 2023, the Company spent \$69 million specifically to improve equipment, facilities, and programs for pollution control and in light of requirements of various environmental agencies. There have been no material effects upon the earnings and competitive position of the Company resulting from compliance with applicable laws or regulations enacted or adopted relating to the protection of the environment. ADM’s corporate social investment program, ADM Cares, aligns the Company’s corporate giving with its business strategies and sustainability objectives. Through the program, ADM works to sustain and strengthen its commitment to communities where ADM colleagues work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic,

and environmental progress. The ADM Cares team evaluates potential projects submitted for funding to ensure they meet eligibility criteria, such as initiatives that support food security, health and well-being, and sustainability around the world. Scenario Analysis In line with the recommendations of the Task Force on Climate-Related Disclosures, ADM conducted an analysis using three scenarios: 1.5°C (based on IPCC SSP1), 2°C (based on IEA WEO 450 Scenario), and 2.6°C (based on IEA INDC Scenario). The first scenario assumes a rapid transition to a low carbon world in the next decade, limiting temperature increase of 1.5°C. This involves a high degree of transformation across the economy. Under this scenario, the worst anticipated physical impacts of climate change are avoided. The second scenario involves ambitious actions to mitigate climate change, limiting temperature increase of 2°C. This scenario requires greater policy action; however, there is still an increase in physical climate-related impacts. The third scenario is based on the current status quo with no changes to policies or actions and an anticipated increase in global temperature of 2.6°C resulting in increased physical impacts of climate change. In each of the scenarios, the Company identified potential sourcing shifts and limitations, operational changes, physical impacts, and opportunities. The primary risks identified fall into two categories: physical and transition. Key opportunities are related to product and service offerings.

Item 1. BUSINESS (Continued) Physical Risks • Increased severity and frequency of extreme weather events such as hurricanes/cyclones and floods could lead to increased direct costs from the disruption of supply chains and impair the Company's ability to deliver products to customers in a timely manner. • Increased severity and frequency of extreme weather events such as hurricanes/cyclones and floods could lead to increased sourcing costs due to limited availability of agricultural commodities and impact ADM's ability to produce goods, which would directly affect revenues. Transition Risks • Emerging regulation and carbon pricing mechanisms could result in increased operational costs and/or tax liabilities in the short to medium term. • Market demand has a direct effect on production, as well as sustainable sourcing initiatives. Changes in consumer demands could result in additional cost of implementation that may not be overcome by product sales. • ADM uses coal-fired cogeneration technology to meet a sizeable portion of its energy demand. The Company is working to reduce the carbon footprint of its operations and making capital investments in its facilities and new technologies. Products and Services Opportunities • Development and expansion of low-emission goods and services could lead to increased revenues resulting from increased demand. As various renewable fuel standards are implemented around the world, ADM has an opportunity to capitalize on the increased demand through the production and sale of ethanol, biodiesel, and renewable diesel. • As more businesses and consumers look to renewable products, development of new products or services could lead to increased revenues through access to new and emerging markets. The Company reviewed the results of the scenario analysis with a cross-functional team of individuals from finance, strategy, sustainability, operations, legal, and risk management. As part of the Company's Enterprise Risk Management (ERM) process, the risks identified from the scenario analysis have been reviewed by the ERM team for mitigation actions. The risks are also reviewed by the ERM team on a quarterly basis to ensure they remain relevant. Risk Management See Item 1A, "Risk Factors" for the discussion of climate-related risks. Metrics and Targets Metrics and targets are available in ADM's Corporate Sustainability Report which can be accessed through its website at <http://www.adm.com>. References to the Company's website address in this report are provided as a convenience and are not incorporated by reference. See Available Information on page 17 for more information. Income Taxes The Company has a responsibility to oversee that all ADM businesses within the Company follow responsible tax practices. ADM manages its tax affairs based upon the following key principles: – a commitment to paying tax in compliance with all applicable laws

and regulations in the jurisdictions in which the Company operates; – a commitment to the effective, sustainable, and active management of the Company's tax affairs; and – developing and sustaining open and honest relationships with the governments and jurisdictions in which the Company operates regarding the formulation of tax laws. Human Capital and Diversity, Equity, and Inclusion ADM's purpose of unlocking the power of nature to enrich the quality of life highlights the significant role ADM plays within an essential industry and the critical job each employee has within the Company. ADM has long maintained its Code of Conduct to help the Company achieve the right results, the right way. The code establishes high standards of honesty and integrity for all ADM colleagues and business partners, and sets forth specific policies to further the Company's commitment to conducting business fairly and ethically everywhere it operates. Item 1. BUSINESS (Continued) The Company's culture is grounded in its values of integrity, respect, excellence, resourcefulness, teamwork, and responsibility. ADM is a truly global company of 41,802 employees working together to achieve extraordinary results. Talented colleagues can be found in a wide variety of roles – including front-line workers who enable the production of ADM's products, supply chain experts who deliver to customers all over the world, engineering teams who continuously improve the Company's operations, sales and commercial teams who work closely with customers, information technology professionals who implement the technologies to enable the Company's processes, and so many more. ADM continues to develop its workforce to remain relevant and deliver on the Company's growth aspirations with a strong focus on sustainability. The following tables set forth information about the Company's employees as of December 31, 2023. Number of Employees by Contract and Region Salaried Hourly Part-Time/ Seasonal Total North America 9,527 10,589 217 20,333 EMEA 5,168 4,341 543 10,052 South America 2,605 4,461 794 7,860 Asia Pacific 1,962 1,093 30 3,085 Central America/Caribbean 234 233 5 472 Total 19,496 20,717 1,589 41,802 Number of Employees by Type and Gender Male % Female % Total % Full-time 30,497 76 % 9,716 24 % 40,213 100 % Part-time 603 38 % 986 62 % 1,589 100 % Total 31,100 74 % 10,702 26 % 41,802 100 % Percentage of Employees by Level and Gender Percentage 2023 2022 Male Female Total Male Female Total Executive Council 67 % 33 % 100 % 71 % 29 % 100 % Senior Leadership 69 % 31 % 100 % 72 % 28 % 100 % Salaried Colleagues 61 % 39 % 100 % 62 % 38 % 100 % The Company believes diversity, equity, and inclusion (DE&I) are key business priorities that will enable ADM to continue innovating, driving growth through customer focus, and delivering outstanding performance for shareholders. Part of ADM's vision is to foster an inclusive culture with equitable opportunities for all employees so that all members of its diverse, global workforce belong and make meaningful contributions to the success of each other and the Company. The Company's comprehensive DE&I strategy is focused on Recruitment, Advancement, Development, Retention and Culture, and is supported by a global DE&I council, which reflects the Company's global business strategy across four regions of the world. In support of ADM's commitment to a productive, diverse, and inclusive workforce, it is a signatory to the CEO Action for Diversity & Inclusion and a member of Paradigm for Parity®. At the industry level, ADM founded and currently participates in Together We Grow, a consortium of agricultural industry leaders united in a shared belief that American agriculture's best days are yet to come. Emphasizing diversity and inclusion, Together We Grow works to build a modern workforce with the skills, experience, and capabilities needed to keep pace with the growing world. TM Item 1. BUSINESS (Continued) ADM's early career programs are focused on attracting and cultivating a diverse pipeline of early career talent which will become future leaders in the organization. Recruitment partnerships with a variety of organizations ensure that ADM engages with, supports, recruits, and hires inclusively, from front line production associates, to interns, to college graduates that begin their career across ADM's business units, functions and regions. In 2021,

ADM launched the first of its Employee Resource Groups (ERGs). The inaugural group focused on women as part of the Company's DE&I vision and strategy. The ERGs, also known as Affinity Groups, are voluntary, employee-led groups where colleagues with shared experiences, interests or goals can come together in a safe space to provide support, build a sense of community, and promote personal and professional development. Recognizing the broad spectrum of intersectionality, the Company has expanded its ERGs in 2022 across its four regions (North America, APAC, EMEA, and LATAM) to include, depending on geographic relevance, Multicultural, Black Colleague, Hispanic, Veterans, and LGBTQIA+ affinity groups. ADM's ERGs are open to all employees. ADM holds an annual Global Week of Understanding, a signature week-long investment focused on continuous learning and strengthening ADM's culture of belonging. The week features keynote presentations, training programs, ERG roundtable sessions, and onsite inclusion activities that foster an environment where all can thrive, and diversity of perspectives are harnessed to fuel innovation and growth. Compensation and Benefits ADM offers market-competitive pay, benefits, and services that help meet the needs of its employees. The Company's global rewards package includes base pay, short-term incentive plans, long-term equity grants, paid time-off, employee assistance programs, and benefits that meet the country-specific competitive markets in which ADM operates. ADM's global bonus plan has clearly defined enterprise metrics and objectives which are the same for all eligible employees – creating a strong team spirit and fostering collaboration among colleagues. Employee Development All ADM employees participate annually in training and development that further increases knowledge, skills, and awareness on current and important topics. In addition, ADM offers many voluntary training opportunities, including in-person, virtual and on-demand training that have largely moved to virtual and on-demand learning. Among the offerings are an Ability to Connect Program that cultivates business language skills to foster collaboration and LinkedIn Learning Platform which offers access to over 16,000 courses in 7 languages to support career development. ADM's leadership development program, Ability to Lead, focuses on enabling innovation, driving productivity, developing talent, change leadership, building trust, and coaching teams for engagement and performance. Additionally, first time and front line leaders are offered a Leadership Essentials program that cultivates effective communication, coaching, and the engagement and retention of talent. ADM prides itself in offering equitable career opportunities that include global assignments for its high potential talent, internal career growth for those who wish to learn more, and experiential learning through projects, mentorships, and on-the-job development. Board Diversity The Nominating and Corporate Governance Committee has worked hard to recommend nominees who have skills and experiences relevant to ADM's strategy and operations and who reflect the diversity of the world around us. As of December 31, 2023, 64% of ADM's 11 board members identify as members of underrepresented groups – five are African-American, Hispanic or Asian, and four are women. Workplace Safety ADM is committed to providing a safe working environment for all of its employees and contractors. For the last several years, the Company has been working to significantly reduce its incident rate by strengthening its safety culture and systems so everyone will go home safely to their families and the things that are most important to them. In 2023, about 76% of ADM's sites completed the year without recordable injuries and about 90% without lost workday injuries. The Company's Total Recordable Incident Rate and Lost Workday Incident Rate for ADM colleagues (excluding unsupervised contractors) were 0.68 and 0.23, respectively. Item 1. BUSINESS (Continued) In 2023, the Company had two ADM colleague fatalities and 12 serious injuries. The Company continues to take steps to further enhance the safety of its workplaces through occupational safety and process safety improvements and maintains a goal of zero fatalities. Through the guidance of the Environmental, Health, and Safety

Technology Center, the operations teams focused on three programs to reduce the most serious injuries: – Safe Work Permit and Last Minute Risk Assessment Standards; – Gloves Clock-to-Clock Program; – New Site Integration Process; and – Loss Prevention Principles Through continued application of these programs, ADM aims to continue to reduce its recordable injury rate in 2024 versus 2023 . Available Information The Company's website is <http://www.adm.com>. ADM's annual reports on Form 10-K; quarterly reports on Form 10-Q; current reports on Form 8-K; directors' and officers' Forms 3, 4, and 5; and amendments to those reports, if any, are available, free of charge, through its website, as soon as reasonably practicable after electronically filing such materials with, or furnishing them to, the Securities and Exchange Commission (SEC). The Company's Code of Conduct, Corporate Governance Guidelines, and the written charters of the Audit, Compensation and Succession, Nominating and Corporate Governance, Sustainability and Corporate Responsibility, and Executive Committees are also available through its website. References to the Company's website address in this report are provided as a convenience and do not constitute, and should not be viewed as, an incorporation by reference of the information contained on, or available through, the website. Therefore, such information should not be considered part of this report. The SEC maintains a website which contains reports, proxy and information statements, and other information regarding issuers that file information electronically with the SEC. The SEC's website is <http://www.sec.gov>. Item 1A. RISK FACTORS The risks described below, as well as the other information contained in this Annual Report on Form 10-K, should be carefully considered. Any one or more of such risks could materially and adversely affect the Company's business, financial condition, results of operations, and stock price and could cause actual results of operations and financial condition to vary materially from past or anticipated future results of operations and financial condition. Additional risks and uncertainties not presently known to the Company or that the Company currently believes to be immaterial may also adversely affect the Company. Operational Risks The Company is exposed to potential business disruption which could adversely affect the Company's operating results. The assets and operations of the Company could be subject to unplanned downtime or extensive property damage and business disruption from various events which include, but are not limited to, equipment failure, raw material shortages, natural disasters, severe weather conditions, accidents, explosions, fires, or other unexpected outages. ADM is committed to resiliency but these efforts may not resolve emergencies timely or effectively, and the associated liability which could result from these risks may not always be covered by or could exceed liability insurance. Item 1A. RISK FACTORS (Continued) The Company's operations rely on dependable and efficient transportation services, the disruption of which could result in difficulties supplying materials to the Company's facilities and impair the Company's ability to deliver products to its customers in a timely manner. The Company relies on access to navigable rivers and waterways in order to fulfill its transportation obligations more effectively. In addition, if certain non-agricultural commodity raw materials, such as water or certain chemicals used in the Company's processing operations, are not available, the Company's business could be disrupted. Any major lack of available water for use in certain of the Company's processing operations could have a material adverse impact on operating results. Certain factors which may impact the availability of non-agricultural commodity raw materials are out of the Company's control including, but not limited to, disruptions resulting from weather, high or low river water conditions, economic conditions, border closures, manufacturing delays or disruptions at suppliers, shortage of materials, interruption of energy supply, and unavailable or poor supplier credit conditions. Transportation, inflationary impacts, and fluctuations in energy prices could affect the Company's operating results. The Company's operating costs and the selling prices of certain finished products are sensitive to changes

in energy prices, inflationary pressures, and certain logistic constraints. The Company's processing plants are powered principally by electricity, natural gas, and coal. The Company's transportation operations are partially dependent upon rail access, diesel fuel and other petroleum-based products. Significant increases in the cost or access of these items, including any consequences of regulation or taxation of greenhouse gases, could adversely affect the Company's production costs and operating results. The Company continues to use internal and external resources to identify opportunities and take action to reduce associated impacts and its energy intensity globally to meet its demand while mitigating the effects of climate change. Human capital availability may not be sufficient to effectively support global operations. ADM's global operations function with trained individuals necessary for the processing, warehousing, and shipping of raw materials for products used in other areas of manufacturing or sold as inputs or products to third-party customers. The availability of skilled trade and production workers has been a specific focus for the United States manufacturing industry. The Company has various methods and tactics to mitigate potential shortfalls. The inability to properly staff manufacturing facilities with skilled trades and hourly labor due to a limited number of qualified resources could negatively impact operations. The Company may fail to realize the benefits of or experience delays in the execution of its growth strategy. As the Company executes its growth strategy, through both organic and inorganic growth, it may encounter risks which could result in increased costs, decreased revenues, and delayed synergies. Growth in new geographies outside the U.S. can expose the Company to volatile economic, political, and regulatory risks that may negatively impact its operations and ability to achieve its growth strategy. Expanding businesses where the Company has limited presence may expose the Company to risks related to the inability to identify an appropriate partner or target and favorable terms, inability to retain/hire strategic talent, or integration risks that may require significant management resources that would have otherwise been available for ongoing growth or operational initiatives. Acquisitions may involve unanticipated delays, costs, and other problems. Due diligence performed prior to an acquisition may not identify a material liability or issue that could impact the Company's reputation or adversely affect results of operations resulting in a reduction of the anticipated acquisition benefits. Additionally, acquisitions may involve integration risks such as: internal control effectiveness, system integration risks, the risk of impairment charges related to goodwill and other intangibles, ability to retain acquired employees, and other unanticipated risks. The Company may fail to realize the operational or financial benefits expected from acquisitions, which may impact the Company's growth strategy.

Item 1A. RISK FACTORS (Continued) The Company has limited control over and may not realize the expected benefits of its equity investments and joint ventures and may not be able to monetize the investments at an attractive value when the Company decides to exit the investments. The Company has \$5.5 billion invested in or advanced to joint ventures and investments over which the Company has limited control as to governance and management activities. Net sales to unconsolidated affiliates during the year ended December 31, 2023 were \$7.0 billion. Risks related to these investments may include: the financial strength of the investment partner; loss of revenues and cash flows to the investment partner and related gross profit; the inability to implement beneficial management strategies, including risk management and compliance monitoring, with respect to the investment's activities; the risk that the Company may not be able to resolve disputes with the partners; and the risk that the Company may not realize the operational or financial benefits expected from the investment. The Company may encounter unanticipated operating issues, financial results, or compliance and reputational risks related to these investments. The Company mitigates this risk using controls and policies related to joint venture formation, governance (including board of directors' representation),

merger and acquisition integration management, and harmonization of joint venture policies with the Company's policies and controls. The Company faces risks related to health epidemics, pandemics, and similar outbreaks. The Company could be materially impacted in the future if a more severe variant of the coronavirus (COVID-19) or other disease would arise causing disruptions far more severe than previously experienced. In such circumstances, ADM may be unable to perform fully on its contractual obligations, critical global supply chain and logistical networks may be affected, and costs and working capital needs may increase. These cost increases may not be fully recoverable or adequately covered by insurance. In addition, demand for certain products that ADM produces, particularly biofuels and ingredients that go into food and beverages that support the food services channels, could be materially impacted from a prolonged regional or global outbreak, leading to government-imposed lockdowns, quarantines, or other restrictions.

Geopolitical Risks The Company faces risks related to international conflicts, acts of terrorism or war, or other geopolitical events, such as the ongoing war in Ukraine, Israel-Hamas war, sanctions, and other economic disruptions. ADM's assets and operations could be subject to extensive property damage and business disruption from geopolitical conflicts, acts of terrorism (e.g. purposeful adulteration of the Company's products), and war. The assets and operations located in the region affected by the war in Ukraine are at an increased risk to property damage, inventory loss, business disruption, and expropriation. The Black Sea region is a major exporter of wheat and corn to the world, and the disruption of supply may continue to cause volatility in volumes, prices, and margins of these commodities and related products. While the Company has a robust trade sanctions compliance program, there is a risk that ADM and its related parties could trade with a sanctioned partner due to the number of sanctions taken against Russia. Trade receivables may be at risk of higher defaults, and other third-party risks could affect ADM's ability to obtain inputs if suppliers are unable to perform or face insolvency, as certain supplies may not be attainable due to sanctions and/or restrictions on cross-border payment transactions. The Company could be materially impacted if, in the worst-case scenario, the conflict in Ukraine advances to other countries. Though currently limited, the risk to ADM's business from the war in Israel could increase if it expands into other countries. In such circumstances, trade policies and the Company's critical global supply chain and logistical networks could be affected, impairing the Company's ability to satisfy contractual obligations and impacting working capital requirements. Insurance may not adequately cover these risks. In addition, provisions for certain products that ADM produces, particularly those that support the food services channels, could be materially impacted. The Company continues to monitor risks associated to the conflicts in Ukraine and Israel along with the Red Sea and other political tensions and evaluate alternatives to reduce the impacts of these risks.

Item 1A. RISK FACTORS (Continued) Political instability and changes in trade policies could negatively impact the Company's financial results. The Company's operating results could be affected by political instability and by changes in monetary, fiscal, trade, and environmental policies, laws, regulations, and acquisition approvals, creating risks including, but not limited to: changes in a country's or region's economic or political conditions, local labor conditions and regulations, and safety and environmental regulations; reduced protection of intellectual property rights; changes in the regulatory or legal environment; restrictions on currency exchange activities; currency exchange fluctuations; burdensome taxes and tariffs; enforceability of legal agreements and judgments; adverse tax, administrative agency or judicial outcomes; and regulation or taxation of greenhouse gases. International risks and uncertainties, including changing social and economic conditions as well as terrorism, political hostilities, and war, could limit the Company's ability to transact business in these markets. The Company has historically benefited from the free flow of agricultural and food and feed

ingredient products from the U.S. and other sources to markets around the world. Increases in tariff and restrictive trade activities around the world could negatively impact the Company's ability to enter certain markets or the price of products may become less competitive in those markets.

Investigation Risks The Investigation and related events could have a material adverse impact on the Company. As previously disclosed, the Company received a voluntary document request from the SEC relating to intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The Company has historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Investigation, the Company identified certain intersegment sales that occurred between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments that were not recorded at amounts approximating market. As a result of the Investigation, the Company has become subject to a number of risks, including, but not limited to:

- the Company's Board of Directors and senior management have been required to devote significant time to the Investigation, the correction of certain segment-specific historical financial information and related matters, resulting in potential management distraction from the operation of the business;
- the price of the Company's common stock has declined significantly, has been subject to fluctuations and could continue to fluctuate upon further announcements or actions;
- the Company is facing securities litigation and could face additional litigation under federal and state securities laws or other claims arising from the Investigation, such litigation can be costly to defend, and if decided against the Company, such litigation could require the Company to pay substantial judgments or settlements;
- the Company could discover additional material or immaterial errors in its financial statements; and
- two of the Company's credit ratings have been placed "On Credit Watch" and "Ratings Under Review," and if the ratings are effectively downgraded, the Company's access to the credit markets and its ability to fund its working capital and capital expenditures may be affected.

Each of the risks described above could have a material adverse effect on the Company's business, results of operations, financial condition and liquidity. In addition, although the Company has taken certain actions in response to the findings of the Investigation, the Company could take new or different actions in addition to those taken to date if it determines those actions are appropriate. Such actions are uncertain and could have a material adverse impact on the Company's business and the price of its common stock.

Item 1A. RISK FACTORS (Continued) The Company is subject to ongoing government investigations, and the timing for their resolution and outcome cannot be predicted. In addition to the SEC's voluntary document request described above, following the Company's January 21, 2024 announcement of the Investigation, the Company received voluntary document requests from the DOJ focused primarily on the same subject matter, and the DOJ directed grand jury subpoenas to certain current and former Company employees. The Company cannot predict when these investigations will be completed, nor can it predict the results of these investigations. Expenses incurred in connection with these investigations (which include substantial fees of lawyers and other professional advisors and potential obligations to indemnify officers and directors who are parties to these investigations) could adversely affect the Company's liquidity position. The Company may be required to pay material fines, consent to injunctions on future conduct or be subject to other penalties, each of which could have a material adverse effect on its business, results of operations, financial condition and liquidity. These government investigations may adversely affect the Company's ability to obtain, and/or increase the cost of obtaining, directors' and officers' liability insurance and/or other types of insurance. In addition, the findings and outcomes of the Investigation as well as the government investigations

could result in additional litigation or actions taken by third parties against the Company. The effects and results of such other litigation or actions may have a materially adverse effect on the Company's business, results of operations, financial condition and liquidity. The Company identified a material weakness in the Company's internal control over financial reporting, which could impact the Company's ability to report its results of operations and financial condition accurately and in a timely manner. In connection with the Investigation, the Company identified a material weakness in the Company's internal control over financial reporting related to its accounting practices and procedures for intersegment sales. The material weakness resulted from inadequate controls that allowed for certain intersegment sales to be reported at amounts not approximating market. For a description of this material weakness, see "Controls and Procedures" in Part II, Item 9A herein. While the Company has developed a remediation plan, the Company will not be able to conclude whether the steps the Company is taking will remediate the material weakness until a sustained period of time has passed to allow management to test the design and operational effectiveness of the new controls. The material weakness, if not fully addressed, could result in additional accounting errors, such as those resulting in the correction of certain segment-specific historical financial information as discussed under "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 herein and in Note 17 of "Notes to Consolidated Financial Statements" included in Part II, Item 8 herein. The Company may be unable to remediate this material weakness in a timely manner, which could adversely impact the accuracy and timeliness of future reports and filings the Company makes with the SEC. Negative publicity may adversely affect the Company and the market price of its common stock. The Company has become subject to negative publicity as a result of the Investigation and related events. Negative publicity and unfavorable perception of the Company could have caused and could cause significant declines in the price of the Company's common stock. Negative publicity could also impact the terms under which some customers and suppliers are willing to continue to do business with the Company and could affect the Company's financial performance or financial condition. In addition, negative publicity or unfavorable perceptions could make it more difficult for the Company and its employees to operate, resulting in reduced morale, a potential increase in employee turnover, and difficulty attracting talent. As a result, any negative publicity could have a material adverse effect on the Company's business and the market price of its common stock.

Item 1A. RISK FACTORS (Continued) Environmental, Social, and Governance Risks The Company may be impacted by carbon emission regulations in multiple regions throughout the globe. The production of the Company's products uses materials that can create emissions of certain regulated substances, including GHG emissions. Such regulated emissions also include indirect emissions that occur in the value chain as the result of activities from assets now owned or controlled by the Company. A number of jurisdictions where the Company has operations have implemented or are in the process of implementing carbon pricing programs or regulations to reduce GHG emissions impacting climate change and rising sea levels including, but not limited to, the United States, Canada, Mexico, the European Union and its member states, and China. In particular, the State of Illinois enacted legislation intended to eliminate carbon emissions by 2050 which includes the mandate for zero emissions for private coal by 2030. It is difficult at this time to estimate the likelihood of passage, or predict the potential impact, of any additional legislation, regulations or agreements. Potential consequences of new obligations could include increased energy, transportation, raw material, and administrative costs, and may require the Company to make additional investments in its facilities and equipment. Operations could be impacted by the European Union (EU) deforestation-free regulation as part of the EU Green Deal. The EU deforestation-free regulation was approved late 2022 and is

effective December 2024. The regulation affects seven specific commodities (i.e. cocoa, coffee, soy, palm oil, wood, rubber, and cattle) and their derivatives, as well as products made using these commodities (e.g. leather, cosmetics, chocolate, etc.). Soybean is the primary commodity that could be impacted due to the volume of export into and used in production in the EU. Failure to comply with the regulation could have serious consequences including civil, administrative, and criminal penalties, as well as negative impact on the Company's reputation, business, cash flows, and results of operations. Food or feed risks derived from quality issues or off label product usage, occupational health and safety issues, and ineffective diversification programs may expose the Company to certain regulatory or reputational risks. The Company is subject to federal, state, and local regulations on manufacturing or labeling; socially acceptable and sustainable farming practices; environmental, health, and safety regulations; and customer product liability claims. The liability which could result from certain of these risks may not always be covered by, or could exceed liability insurance related to product liability and food safety matters maintained by the Company. Risks to the Company's reputation may exist due to potential negative publicity caused by product liability, food safety, occupational health and safety, workforce diversity, and environmental matters. The Company is continuing to further diversity throughout the organization and deploy additional food safety and security procedures and controls to appropriately mitigate the risks of any adulteration of the Company's products in the supply chain and finished products in production and distribution networks. In addition, the Company conforms to management systems, such as the International Organization for Standardization or other recognized global standards. The Company's sustainable practices require oversight and robust monitoring requirements. The lack of unified reporting standards increases sustainability regulatory compliance and reporting requirements. The Company has programs and policies in place (e.g., Corporate Sustainability Program; Commitment to Protecting Forests, Biodiversity and Communities; Environmental Policy; Strive 35 environmental goals; etc.) to expand responsible practices while reducing its environmental footprint and to help ensure compliance with laws and regulations. Implementation of these programs and policies sometimes requires the acquisition of technology or capital investments at a cost to the Company. Starting in 2026, the Corporate Sustainability Reporting Directive (CSRD) will require companies within the European Union to report extensive climate-related information for the 2025 financial year. The reporting requirements of CSRD, along with the growing multitude of corporate sustainability reporting standards, will result in increased compliance costs and could result in regulatory reporting risks as each standard will have its own required disclosures. Failure to comply with laws and regulations can have serious consequences, including civil, administrative, and criminal penalties as well as a negative impact on the Company's reputation, business, cash flows, and results of operations.

Item 1A. RISK FACTORS (Continued) Financial Risks Limitations on access to external financing could adversely affect the Company's operating results due to its capital-intensive nature. The Company requires significant capital, including continuing access to credit markets, to operate its current business and fund its growth strategy. The Company's working capital requirements, including margin requirements on open positions on futures exchanges, are directly affected by the price of agricultural commodities, which may fluctuate significantly and change quickly. The Company also requires substantial capital to maintain and upgrade its extensive network of storage facilities, processing plants, refineries, mills, ports, transportation assets, and other facilities to keep pace with competitive developments, technological advances, regulations, and changing safety standards in the industry. Moreover, the expansion of the Company's business and pursuit of acquisitions or other business opportunities may require significant amounts of capital. Access to credit markets and

pricing of the Company's capital is dependent upon maintaining sufficient credit ratings from credit rating agencies. Strong credit ratings allow the Company to access cost-competitive tier one commercial paper markets. As of December 31, 2023, the three major credit rating agencies maintained the Company's credit ratings at investment grade levels. Subsequent to December 31, 2023, the Company's ratings were placed "On Credit Watch" and "Ratings Under Review" by two of the credit rating agencies. Further watches, reviews or downgrades could occur. If the Company is unable to maintain sufficiently high credit ratings, access to these commercial paper and other debt markets and costs of borrowings could be adversely affected. If the Company is unable to generate sufficient cash flow or maintain access to adequate external financing, including as a result of significant disruptions in the global credit markets, it could restrict the Company's current operations and its growth opportunities. The Company manages this risk with constant monitoring of credit/liquidity metrics, cash forecasting, and routine communications with credit rating agencies regarding risk management practices and diversifying sources of liquidity. Strategic and Economic Risks Agricultural commodities, agricultural commodity products, and non-agricultural commodity raw materials the Company procures, transports, stores, processes, and merchandises can be affected by various factors beyond the Company's control. The availability and prices of agricultural commodities are subject to wide fluctuations, including impacts from factors outside the Company's control such as changes in market conditions, weather conditions, crop disease, plantings, government programs and policies, climate change, competition, and changes in global demand, which could adversely affect the Company's operating results. The Company uses a global network of procurement, processing, and transportation assets, as well as robust communications between global commodity merchandiser teams, to continually assess price and basis opportunities. Management-established limits (including a corporate wide value-at-risk metric), with robust internal reporting, help to manage risks in pursuit of driving performance. Additionally, the Company depends globally on agricultural producers to ensure an adequate supply of the agricultural commodities. Reduced supply of agricultural commodities and rising costs of non-agricultural commodity raw materials could adversely affect the Company's profitability by increasing the cost of raw materials and/or limiting the Company's ability to procure, transport, store, process, and merchandise agricultural commodities and products in an efficient manner. High and volatile commodity and non-agricultural commodity prices can place more pressures on short-term working capital funding. Conversely, if supplies are abundant and crop production globally outpaces demand for more than one or two crop cycles, price volatility is somewhat diminished. This could result in reduced operating results due to the lack of supply chain dislocations and reduced market spread and basis opportunities. The Company has certain finished products, such as ethanol and biodiesel, which are closely related to, or may be substituted for, petroleum products, or in the case of ethanol, blended into gasoline to increase octane content. Therefore, the selling prices of ethanol and biodiesel can be impacted by the selling prices of gasoline, diesel fuel, and other octane enhancers. A significant decrease in the price of gasoline, diesel fuel, or other octane enhancers could result in a significant decrease in the selling price of the Company's ethanol and biodiesel. The Company uses derivative contracts as anticipatory hedges for both purchases of commodity inputs and sales of energy-based products in order to protect itself in the near term against these price trends and to protect and maximize processing margins.

Item 1A. RISK FACTORS (Continued) The Company is subject to economic downturns and regional economic volatilities, which could adversely affect the Company's operating results. The Company conducts its business and has substantial assets located in many countries and geographic areas. While 63% of the Company's long-lived assets are located in the United States, the Company also has significant

operations in both developed areas (such as Western Europe, Canada, and Brazil) and emerging market areas. One of the Company's strategies is to expand the global reach of its core model, which may include expanding or developing its business in emerging market areas. Both developed and emerging market areas are subject to impacts of economic downturns, including decreased demand for the Company's products, and reduced availability of credit, or declining credit quality of the Company's suppliers, customers, and other counterparties. In addition, emerging market areas could be subject to more volatile operating conditions including, but not limited to, logistics limitations or delays, labor-related challenges, epidemic outbreaks and economic recovery, limitations or regulations affecting trade flows, local currency concerns, and other economic and political instability. Political fiscal instability could generate intrusive regulations in emerging markets, potentially creating unanticipated assessments of taxes, fees, increased risks of corruption, etc. Economic downturns and volatile market conditions could adversely affect the Company's operating results and ability to execute its long-term business strategies, although the nature of many of the Company's products (i.e. food and feed ingredients) is less sensitive to demand reductions in any economic downcycle. The Company mitigates this risk in many ways, including country risk and exposure analysis, government relations and tax compliance activities, and robust ethics compliance training requirements. The Company has significant competition in the markets in which it operates and is subject to industry-specific risks which could adversely affect the Company's operating results. The Company faces significant competition in each of its businesses and has numerous competitors, who can be different depending upon each of the business segments in which it participates. The Company competes for the acquisition of inputs such as raw materials, transportation services, and other materials and supplies, as well as for workforce and talent. Competition impacts the Company's ability to generate and increase its gross profit as a result of the following factors: Pricing of the Company's products is partly dependent upon industry processing capacity, which is impacted by competitor actions to bring idled capacity on-line, build new production capacity or execute aggressive consolidation; many of the products bought and sold by the Company are global commodities or are derived from global commodities that are highly price competitive and, in many cases, subject to substitution; significant changes in exchange rates of foreign currencies versus the U.S. dollar, particularly the currencies of major crop growing countries, could also make goods and products of these countries more competitive than U.S. products; improved yields in different crop growing regions may reduce the reliance on origination territories in which the Company has a significant presence; and continued merger and acquisition activities resulting in further consolidations could result in greater cost competitiveness and global scale of certain players in the industry, especially when acquirers are state-owned and/or backed by public funds and have profit and return objectives that may differ from publicly traded enterprises. To compete effectively, the Company focuses on safely improving efficiency in its production and distribution operations, developing and maintaining appropriate market presence, maintaining a high level of product safety and quality, supporting socially responsible and sustainable practices, promoting environmental responsibility, and working with customers to develop new products and tailored solutions. The Company is subject to industry-specific risks which include, but are not limited to: launch of new products by other industries that can replace the functionalities of the Company's production; shifting consumer preferences; and product safety and quality. In the case of the Nutrition business, while maintaining efficient and cost-effective operations are important, the ability to drive innovation and develop quality nutritional and wellness solutions for human and animal needs are key factors to remain competitive in the nutrition market. Certain of the Company's merchandised commodities and finished products are

used as ingredients in livestock and poultry feed. The Company is subject to risks associated with economic, product quality, feed safety or other factors which may adversely affect the livestock and poultry businesses, including the outbreak of disease in livestock and poultry, for example African swine fever, which could adversely affect demand for the Company's products used as ingredients in feed. In addition, ADM's increased investment in the flavors and ingredients businesses exposes the Company to increased risks related to rapidly changing consumer preferences and the impacts these changes could have on the success of certain of the Company's customers. The Company continually assesses opportunities and demand in various regions.

Item 1A. RISK FACTORS (Continued) The Company's risk management strategies may not be effective. The Company has a Chief Risk Officer who oversees the ERM Program and regularly reports to the Board of Directors on the myriad of risks facing the Company and the Company's strategies for mitigating those risks. The Company's business is affected by fluctuations in agricultural commodity cash prices and derivative prices, transportation costs, energy prices, interest rates, foreign currency exchange rates, and equity markets. The Company monitors position limits, counterparty risks, and liquidity levels, and engages in other strategies and controls to manage these risks. The Company regularly reports its aggregate commodity risk exposures to the Board of Directors through the ERM process. The Company has an established commodity merchandising governance process that ensures proper position reporting and monitoring, limit approvals, and executes training on trade compliance, commodity regulatory reporting controls, and other policies. The Company's risk monitoring efforts may not be successful at detecting a significant risk exposure. If these controls and strategies are not successful in mitigating the Company's exposure to these fluctuations, it could adversely affect the Company's operating results.

Regulatory Risks The Company is subject to numerous laws, regulations, and mandates globally which could adversely affect the Company's operating results and forward strategy. The Company does business globally, connecting crops and markets in over 190 countries, and is required to comply with laws and regulations administered by the United States federal government as well as state, local, and non-U.S. governmental authorities in numerous areas including: accounting and income taxes, anti-corruption, anti-bribery, global trade, trade sanctions, privacy and security, environmental, product safety, and handling and production of regulated substances. The Company frequently faces challenges from U.S. and foreign tax authorities regarding the amount of taxes due including questions regarding the timing, amount of deductions, the allocation of income among various tax jurisdictions. Legislatures and taxing authorities in many jurisdictions in which ADM operates may enact changes to their tax rules. For example, the Organization for Economic Cooperation and Development (the "OECD"), the European Union, and other countries (including countries in which the Company operates) have committed to enacting substantial changes to numerous long-standing tax principles impacting how large multinational enterprises are taxed. In particular, the OECD's Pillar Two initiative introduces a 15% global minimum tax applied on a country-by-country basis and for which many jurisdictions have now committed to an effective enactment date starting January 1, 2024. ADM will continually monitor potential and enacted tax changes, including the implementation of Pillar Two legislation, in the countries in which the Company operates. The impact of these potential new rules, as well as any other changes in domestic and international tax rules and regulations, could have a material effect on ADM's effective tax rate. Any failure to comply with applicable laws and regulations or appropriately resolve these challenges could subject the Company to administrative, civil, and criminal remedies, including fines, penalties, disgorgement, injunctions, and recalls of its products, and damage to its reputation.

Item 1A. RISK FACTORS (Continued) Regulations specifically affecting the agricultural sector and related industries;

regulatory policies or matters that affect a variety of businesses; and taxation policies could adversely affect the Company's operating results. Agricultural production and trade flows are subject to government policies, mandates, regulations, and trade agreements, including taxes, tariffs, duties, subsidies, incentives, foreign exchange rates, and import and export restrictions, including policies related to genetically modified organisms, traceability standards, sustainable practices, product safety and labeling, renewable fuels, and low carbon fuel mandates. These policies can influence the planting of certain crops; the location and size of crop production; whether unprocessed or processed commodity products are traded; the volume and types of imports and exports; the availability and competitiveness of feedstocks as raw materials; the viability and volume of production of certain of the Company's products; and industry profitability. For example, changes in government policies or regulations of ethanol and biodiesel including, but not limited to, changes in the Renewable Fuel Standard program under the Energy Independence and Security Act of 2007 in the United States, including the treatment of small refinery exemptions, can have an impact on the Company's operating results. International trade regulations can adversely affect agricultural commodity trade flows by limiting or disrupting trade between countries or regions. Regulations of financial markets and instruments, including the Dodd-Frank Act, Consumer Protection Act, and the European Market Infrastructure Regulation, create uncertainty and may lead to additional risks and costs, and could adversely affect the Company's futures commission merchant business and its agricultural commodity risk management practices. Future government policies may adversely affect the supply of, demand for, and prices of the Company's products; adversely affect the Company's ability to deploy adequate hedging programs; restrict the Company's ability to do business in its existing and target markets; and adversely affect the Company's revenues and operating results. The Company's strategy involves expanding the volume and diversity of crops it merchandises and processes, expanding the global reach of its core model, expanding its value-added product portfolio, and expanding the sustainable agriculture programs and partnerships it participates in. Government policies including, but not limited to, antitrust and competition law, trade restrictions, food safety regulations, sustainability requirements, and traceability, can impact the Company's ability to execute this strategy successfully. Technological Risks Information technology (IT) systems are subject to interruptions or failures which may affect the Company's ability to conduct its business. The Company's operations rely on certain key IT systems, some of which are dependent on services provided by third parties, to provide critical data connectivity, information, and services for internal and external users. These interactions include, but are not limited to: ordering and managing materials from suppliers; risk management activities; converting raw materials to finished products; inventory management; shipping products to customers; processing transactions; summarizing and reporting financial results of operations; human resources benefits and payroll management; and complying with regulatory, legal or tax requirements. Additionally, legacy technologies are used to support significant business functions. The instability of aging legacy systems could diminish performance and elevate the risk of system failures, reduce compatibility with modern software, and impact growth initiatives. The Company is implementing a new enterprise resource planning (ERP) system and integrating it with various third party service providers on a worldwide basis as part of its ongoing business transformation program, which will improve the efficiency and effectiveness of certain financial and business transaction processes and the underlying systems environment. The new ERP system will mitigate the instability of aging legacy systems as the Company transitions to the new 1ADM platform.

Item 1A. RISK FACTORS
(Continued) The Company's IT systems, processes, and sites may suffer cyber security breaches, which could expose the Company to operational and various regulatory risks. Increased IT security and social

engineering threats and more sophisticated computer crime, including advanced persistent threats, pose a potential risk to the security of the Company's IT systems, networks, and services, as well as the confidentiality, availability, and integrity of the Company's third party data. The Company is subject to a variety of laws and regulations in the United States and other jurisdictions regarding privacy, data protection, and data security, including those related to the collection, storage, handling, use, disclosure, transfer, and security of personal data. Compliance with and interpretation of various data privacy regulations continue to evolve and any violation could subject the Company to legal claims, regulatory penalties, and damage to its reputation. The Company has put in place security measures to endeavor to prevent, detect, and mitigate cyber-based attacks, and has instituted control procedures for cybersecurity incident response plans for its critical systems. In addition, the Company monitors this risk on an ongoing basis to detect and correct breaches, and reports metrics on the quality of the Company's data security efforts and control environment to the highest level of management and to the Board of Directors. However, if the Company's IT systems are breached, damaged, or cease to function properly due to any number of causes, such as catastrophic events, power outages, security breaches, or cyber-based attacks, and the Company's recovery efforts do not effectively mitigate the risks on a timely basis, the Company may suffer significant interruptions in its ability to manage its operations, loss of valuable data, actual or threatened legal actions, and damage to its reputation, which may adversely impact the Company's revenues, operating results, and financial condition. Generative AI advancements are progressing at an unprecedented pace, which brings risks that could subject the Company to loss through various technical, legal, and opportunistic-related risks. The pace of Generative AI and the complex and dynamic regulatory environment subjects the Company to a variety of risks including, but not limited to, data privacy and security vulnerabilities, unauthorized third-party usage of Company data associated with training models, malicious use and advanced deceitful communication methods, missed innovation opportunities, and potential competitive disadvantages. Guidance for awareness and responsible Generative AI use to protect ADM data from a legal and ethical standpoint, along with technological development for opportunistic uses, monitoring, and oversight are important components of the Company's risk mitigation approach.

Item 1B. UNRESOLVED STAFF COMMENTS The Company has no unresolved staff comments.

Item 1C. CYBERSECURITY The Company faces significant and persistent cybersecurity risks due to: the breadth of geographies, networks, and systems ADM must defend against cybersecurity attacks such as exploitation of vulnerabilities, ransomware, denial of service, supply chain attacks, or other similar threats; the attractiveness of the Company's systems and processes to threat actors (including state-sponsored organizations) seeking to inflict harm on ADM or its customers; the substantial level of harm that could occur to the Company and its customers in case of a material cybersecurity incident; and ADM's use of third-party products, services and components. During the year ended December 31, 2023, the Company has not identified risks from cybersecurity threats, including as a result of prior cybersecurity incidents, that have materially affected or are reasonably anticipated to materially affect the Company, including its business strategy, results of operations, or financial condition. Nevertheless, the Company recognizes cybersecurity threats are ongoing and evolving. For more information on the Company's cybersecurity risks, refer to Item 1A, "Risk Factors". ADM is committed to supporting the governance and oversight of cybersecurity risks and to implementing mechanisms, controls, technologies, and processes designed to help the Company assess, identify, and manage these risks. Cybersecurity risks are included in the risk universe that the Company's ERM function evaluates, with input from information security subject matter experts at the Company, to assess top risks to the enterprise. The ERM process provides input into our

strategic planning process, such as development of action plans to address and mitigate identified risks. Integrating cybersecurity risk into the overall ERM process in this manner assists the Company in identifying, assessing, and managing material cybersecurity risks. Item 1C. CYBERSECURITY (Continued) The Company has a dedicated cybersecurity team that collaborates with compliance, privacy, legal, and other teams across the global organization to assess the risk landscape. ADM's cybersecurity program is designed to be aligned with applicable industry standards and is assessed regularly by independent third-party auditors. The multifaceted nature of the Company's cybersecurity measures includes aspects of prevention, detection, and response capabilities, employee training programs, threat intelligence monitoring, and the implementation of an array of technologies. The Company has established processes to oversee and identify cybersecurity risks associated with the use of third-party service providers, which include the completion of due diligence before engaging with any third party, controls for response to mitigate any significant risks, and assessments and reviews during the course of the relationship. Additionally, the Company has ongoing partnerships with government and commercial cybersecurity experts to understand emerging cybersecurity threats. The Company has seen an increase in cyberattack volume, frequency, and sophistication. ADM seeks to detect and investigate unauthorized attempts and attacks against its network, products, and services, and to prevent their occurrence and recurrence where practicable through changes or updates to the Company's internal processes and tools; however, ADM remains potentially vulnerable to known or unknown threats. The Company's cyber incident response plan includes an escalation process if a cybersecurity incident meets specific rating criteria to trigger swift and effective action designed to minimize potential disruptions and protect the integrity of our operations. The Company also conducts periodic cybersecurity scenarios with senior management to enhance preparedness. The Board of Directors has oversight of cybersecurity risk, which it manages as part of the ERM program. The Board of Directors is assisted by the Audit Committee, which regularly reviews the cybersecurity program with management and reports to the Board of Directors. Cybersecurity reviews by the Audit Committee or the Board of Directors generally occur quarterly, or more frequently as determined to be necessary or advisable. In recent years, the Board added a director who had served as Chief Information Officer for a large public company with sensitive information to assist the Board and Audit Committee in overseeing cybersecurity risks. The Company's cybersecurity program is led by the Chief Information Security Officer (CISO), who reports to the Senior Vice President and Chief Technology Officer (CTO). The CISO is informed about and monitors prevention, detection, mitigation, and remediation efforts through regular communication and reporting from professionals in the information security team, many of whom hold cybersecurity certifications in Information Systems Security or Information Security Management, and through the use of technological tools and software and results from third party audits. Additionally, the CISO directs the Global Information and Cyber Security Council (the "Council"), which includes a diverse range of relevant experts. The Council includes management from global technology, compliance, privacy, controlling, operations, security, automation, ERM, and internal audit. The Council promotes alignment and communication of new and ongoing cybersecurity prevention techniques and provides a forum for staying current on the latest cybersecurity threats. The CISO and CTO have extensive experience assessing and managing cybersecurity programs and cybersecurity risk. The CISO has served in that position since 2018 and, was previously the Vice President, Head of Enterprise Security, Americas at Worldpay and a Security Principal/Strategist for Hewlett Packard Enterprises for a combined cybersecurity experience of 20 years. The CTO joined ADM in 2016 and was previously Senior Vice President and Chief Information Officer at Dow Corning Corporation for approximately 6 years. Item 2. PROPERTIES The Company's

operations are such that most products are efficiently processed near the source of raw materials. Consequently, the Company has many plants strategically located in agricultural commodity producing areas. The annual volume of commodities processed will vary depending upon availability of raw materials and demand for finished products. The Company also owns approximately 160 warehouses and terminals primarily used as bulk storage facilities and has 67 innovation centers. Processing plants and procurement facilities owned or leased by unconsolidated joint ventures are not included in the tables below. To enhance the efficiency of transporting large quantities of raw materials and finished products between the Company's procurement facilities and processing plants and also the final delivery of products to its customers around the world, the Company owns approximately 1,900 barges, 10,100 rail cars, 230 trucks, 1,200 trailers, 140 boats, and 3 oceangoing vessels; and leases, under operating leases, approximately 640 barges, 21,800 rail cars, 350 trucks, 500 trailers, 24 boats, and 22 oceangoing vessels.

Item 2. PROPERTIES (Continued) The daily capacities of the processing plants and storage capacities of the procurement facilities that the Company owns or leases, under operating leases, are as follows:

Item 3. LEGAL PROCEEDINGS The Company is routinely involved in a number of actual or threatened legal actions, including those involving alleged personal injuries, employment law, product liability, intellectual property, environmental issues, alleged tax liability (see Note 13 in Item 8 for information on income tax matters), and class actions. The Company also routinely receives inquiries from regulators and other government authorities relating to various aspects of its business, and at any given time, the Company has matters at various stages of resolution. The outcomes of these matters are not within the Company's complete control and may not be known for prolonged periods of time. In some actions, claimants seek damages, as well as other relief, including injunctive relief, that could require significant expenditures or result in lost revenues. In accordance with applicable accounting standards, the Company records a liability in its consolidated financial statements for material loss contingencies when a loss is known or considered probable and the amount can be reasonably estimated. If the reasonable estimate of a known or probable loss is a range, and no amount within the range is a better estimate than any other, the minimum amount of the range is accrued. If a material loss contingency is reasonably possible but not known or probable, and can be reasonably estimated, the estimated loss or range of loss is disclosed in the notes to the consolidated financial

statements. When determining the estimated loss or range of loss, significant judgment is required to estimate the amount and timing of a loss to be recorded. Estimates of probable losses resulting from litigation and governmental proceedings involving the Company are inherently difficult to predict, particularly when the matters are in early procedural stages, with incomplete facts or legal discovery; involve unsubstantiated or indeterminate claims for damages; potentially involve penalties, fines, disgorgement, or punitive damages; or could result in a change in business practice. See Note 20 in Item 8 for information on the Company's legal proceedings which is incorporated herein by reference.

Item 4. MINE SAFETY DISCLOSURES None. 30 PART II Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES Common Stock Market The Company's common stock is listed and traded on the New York Stock Exchange under the trading symbol "ADM". The number of registered stockholders of the Company's common stock at March 8, 2024, was 7,795. Issuer Purchases of Equity Securities Period Total Number of Shares Purchased (1) Average Price Paid per Share Total Number of Shares Purchased as Part of Publicly Announced Program (2) Number of Shares Remaining to be Purchased Under the Program (2) October 1, 2023 to October 31, 2023 2,815,562 \$ 72.453 2,815,562 70,433,792 November 1, 2023 to November 30, 2023 8,514,616 73.033 8,513,387 61,920,405 December 1, 2023 to December 31, 2023 9,886,971 73.709 9,886,971 52,033,434 Total 21,217,149 \$ 73.271 21,215,920 52,033,434 (1) Total shares purchased represent those shares purchased in the open market as part of the Company's publicly announced stock repurchase program described below, shares received as payment for the exercise price of stock option exercises, and shares received as payment for the withholding taxes on vested restricted stock awards. During the three-month period ended December 31, 2023, there were 1,229 shares received as payments for the withholding taxes on vested restricted stock awards. (2) On November 5, 2014, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2015 and ending December 31, 2019. On August 7, 2019, the Company's Board of Directors approved the extension of the stock repurchase program through December 31, 2024 and the repurchase of up to an additional 100,000,000 shares under the extended program.

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES (Continued) Performance Graph The graph below compares the Company's common stock with those of the S&P; 500 Index and the S&P; Consumer Staples Index. The graph assumes an initial investment of \$100 on December 31, 2018 and assumes all dividends have been reinvested through December 31, 2023. COMPARISON OF 60 MONTH CUMULATIVE TOTAL RETURN Among Archer Daniels Midland Company (ADM), the S&P; 500 Index, and the S&P; Consumer Staples Index Index Data: Copyright Standard and Poor's, Inc. Item 6. [RESERVED] 32 Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS This MD&A; should be read in conjunction with the accompanying consolidated financial statements. The Company's significant portfolio actions and announcements during 2023 include: • the opening in February 2023 of a new production facility in Valencia, Spain to help meet rising global demand for probiotics, postbiotics, and other products that support health and well-being; • the announcement in March 2023 of the signing of a joint venture agreement with Marel, a leading provider of advanced food processing solutions, to build an innovation center in the heart of the Netherlands food valley at the Wageningen Campus, subject to regulatory approvals; • the announcement in May 2023 of a Strategic Development Agreement with Air Protein, a pioneer in air-based nutritional protein that requires no agriculture or farmland, decoupling protein production from traditional supply chain risks, to collaborate on

research and development to advance new and novel proteins for nutrition; • the announcement in June 2023 of the opening of a new Customer Creation and Innovation Center in Manchester, England, serving as a United Kingdom (UK) hub for food innovation and building upon ADM's strong presence in the UK; • the launch in July 2023 of a growth initiative of its re:generations™ regenerative agriculture program that will drive expansion to cover 2 million acres across 18 U.S. states and Canada in 2023, and 4 million acres globally by 2025; • the announcement in October 2023 of a strategic partnership with Solugen, a rapidly scaling climate technology company that is reimagining the chemistry of everyday to scale a range of innovative, plant-based specialty chemicals and bio-based building block molecules in a new manufacturing facility in Marshall, Minnesota.; • the opening in November 2023 of Green Bison Soy Processing, a joint venture with Marathon Petroleum Corp, a leading, integrated, downstream energy company headquartered in Findlay, Ohio; • the announcement in November 2023 of an expansion of the Company's global regenerative agriculture efforts with the launch of the Brazil program that aims to promote and support sustainable agricultural production with a focus on soil health, biodiversity protection, improved soil fertility and resilience, and increased farm productivity; • the announcement in November 2023 to expand crush capacity in Brazil and the acquisition of a controlling stake in Buckminster Química, a Macatuba, São Paulo-based producer of refined glycerin; and • the acquisition in December 2023 of D.C.A. Finance B.V., a commodity derivative brokerage service provider. Sustainability is a key driver in ADM's expanding portfolio of environmentally responsible, plant-derived products. Consumers today increasingly expect their food and drink to come from sustainable ingredients, produced by companies that share their values, and ADM is continually finding new ways to meet those needs through its portfolio actions. The Company's strategic transformation is focused on three strategic pillars: Productivity, Innovation, and Culture. The Productivity pillar includes (1) partnering across various global teams including procurement, supply chain, operations, and commercial to optimize costs and improve production volumes across the enterprise; (2) continued roll out of the 1ADM business transformation program and implementation of improved standardized business processes; and (3) increased use of technology, data analytics, and automation at production facilities, in offices, and with customers to improve efficiencies and customer service. The Innovation pillar includes expansions and investments in (1) improving the customer experience by leveraging producer relationships and enhancing the use of state-of-the-art digital technology; (2) sustainability-driven innovation, which encompasses the full range of products, solutions, capabilities, and commitments to serve customers' needs; and (3) growth initiatives, including organic growth with additional capacity to meet growing market demand and strategic objectives. The Culture pillar focuses on building capabilities and enabling collaboration, teamwork, and agility from process standardization and digitalization and ADM's diversity, equity, and inclusion initiatives, which bring new perspectives and expertise to the Company's decision-making. ADM plans to support the three pillars with investments in technology, which include expanding digital capabilities and investing further in research and development.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Operating Performance Indicators The Company's Ag Services and Oilseeds operations are principally agricultural commodity-based businesses where changes in selling prices move in relationship to changes in prices of the commodity-based agricultural raw materials. As a result, changes in agricultural commodity prices have relatively equal impacts on both revenues and cost of products sold. Therefore, changes in revenues of these businesses do not necessarily correspond to the changes in margins or gross profit. Thus, gross margins per volume or metric ton are more meaningful than gross margins as percentage of revenues. The Company's Carbohydrate Solutions operations and

Nutrition businesses also utilize agricultural commodities (or products derived from agricultural commodities) as raw materials. However, in these operations, agricultural commodity market price changes do not necessarily correlate to changes in cost of products sold. Therefore, changes in revenues of these businesses may correspond to changes in margins or gross profit. Thus, gross margin rates are more meaningful as a performance indicator in these businesses. The Company has consolidated subsidiaries in more than 70 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency except certain significant subsidiaries in Switzerland where Euro is the functional currency, and Brazil and Argentina where U.S. dollar is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. For the majority of the Company's business activities in Brazil and Argentina, the functional currency is the U.S. dollar; however, certain transactions, including taxes, occur in local currency and require remeasurement to the functional currency. Changes in revenues are expected to be correlated to changes in expenses reported by the Company caused by fluctuations in the exchange rates of foreign currencies, primarily the Euro, British pound, Canadian dollar, and Brazilian real, as compared to the U.S. dollar. The Company measures its performance using key financial metrics including net earnings, gross margins, constant currency revenue and operating profit, segment operating profit, adjusted segment operating profit, earnings before interest, taxes, depreciation, and amortization (EBITDA), adjusted EBITDA, manufacturing expenses, selling, general, and administrative expenses, return on invested capital, economic value added, and operating cash flows before working capital. The Company's financial results can vary significantly due to changes in factors such as fluctuations in energy prices, weather conditions, crop plantings, government programs and policies, trade policies, changes in global demand, general global economic conditions, changes in standards of living, and global production of similar and competitive crops. Due to these unpredictable factors, the Company undertakes no responsibility for updating any forward-looking information contained within "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Intersegment Sales Background As previously disclosed, the Company received a voluntary document request from the SEC relating to intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. In response, the Company engaged external counsel, assisted by a forensic accounting firm, to conduct an internal investigation, overseen by the Audit Committee of the Company's Board of Directors, which is separately advised by external counsel (the Investigation). As previously disclosed on January 21, 2024, the Company placed Vikram Luthar, Chief Financial Officer and Senior Vice President, on administrative leave. **Correction of Certain Segment-Specific Historical Financial Information Based on the Investigation**, the Company is correcting certain segment-specific historical financial information for the years ended December 31, 2021 through 2023 to reflect immaterial error corrections to certain intersegment sales as further described and set forth in Note 17, Segment and Geographic Information of "Notes to Consolidated Financial Statements" included in Part II, Item 8 herein.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) The Company has historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Investigation, the Company identified certain intersegment sales that were not recorded at amounts approximating market. The immaterial error corrections generally arise from the measurement of intersegment sales pricing or rebates relating to products sold to the Nutrition reporting segment by the Ag Services and Oilseeds and Carbohydrate Solutions reporting segments.

Because each sale to be adjusted occurred between the Company's reporting segments, the adjustments have no impact on the Company's consolidated balance sheets and statements of earnings, comprehensive income (loss), or cash flows. The Company determined that the adjustments are not material to the Company's consolidated financial statements taken as a whole for any period. For more information, see Note 17, Segment and Geographic Information of "Notes to Consolidated Financial Statements" included in Part II, Item 8 herein. In addition, because the Investigation covers the period between January 2018 and September 2023, the Company is providing below information with respect to the adjustments effected to operating profit for each of the Company's reporting segments for each of the years ended December 31, 2018 through 2023.

Impact of the Adjustments on Ag Services and Oilseeds Segment on Segment Operating Profit Years Ended December 31 (In millions)

	2023	2022	2021	2020	2019	2018
Segment operating profit, as originally reported for 2022, 2021, 2020, 2019, and 2018	\$ 4,066	\$ 4,386	\$ 2,775	\$ 2,105	\$ 1,935	\$ 2,020
Adjustments	1	15	24	1	1	—
Segment operating profit, as revised	\$ 4,067	\$ 4,401	\$ 2,799	\$ 2,106	\$ 1,936	\$ 2,020

The adjustments set forth in the tables above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023.

Impact of the Adjustments on Carbohydrate Solutions Segment Operating Profit Years Ended December 31 (In millions)

	2023	2022	2021	2020	2019	2018
Segment operating profit, as originally reported for 2022, 2021, 2020, 2019, and 2018	\$ 1,345	\$ 1,360	\$ 1,283	\$ 717	\$ 644	\$ 945
Adjustments	30	53	35	15	26	27
Segment operating profit, as revised	\$ 1,375	\$ 1,413	\$ 1,318	\$ 732	\$ 670	\$ 972

The adjustments set forth in the tables above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023.

Impact of the Adjustments on Nutrition Segment Operating Profit Years Ended December 31 (In millions)

	2023	2022	2021	2020	2019	2018
Segment operating profit, as originally reported for 2022, 2021, 2020, 2019, and 2018	\$ 458	\$ 736	\$ 691	\$ 574	\$ 418	\$ 339
Adjustments (31) (68) (59) (16) (27) (27)						
Segment operating profit, as revised	\$ 427	\$ 668	\$ 632	\$ 558	\$ 391	\$ 312

The adjustments set forth in the tables above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023.

(1) (1) (1) (1) (1) (1) Item 7.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) As further described in Note 17, Segment and Geographic Information of "Notes to Consolidated Financial Statements" included in Part II, Item 8 herein, the Company also corrected certain immaterial errors relating to the classification of certain intrasegment revenues. More information about such error correction is set forth in Note 17, Segment and Geographic Information. Material Weakness In connection with the Investigation, the Company identified a material weakness in the Company's internal control over financial reporting related to its accounting practices and procedures for intersegment sales. The material weakness resulted from inadequate controls that allowed for certain intersegment sales to be reported at amounts not approximating market. The Company has put in place a plan to remediate this material weakness. For more information, see "Controls and Procedures" in Part II, Item 9A herein. Government Investigations The Company continues to cooperate with the SEC. Following the Company's January 21, 2024 announcement of the Investigation, the Company received voluntary document requests from the Department of Justice (DOJ) focused primarily on the same subject matter, and the DOJ directed grand jury subpoenas to certain current and former Company employees. The Company is cooperating with the DOJ. The foregoing is a summary of the Investigation and related matters. The Company could

take new or different actions in addition to those taken to date if it determines those actions are appropriate. Operations in Ukraine and Russia ADM employs approximately 630 people in Ukraine and operates an oilseeds crushing plant, a grain port terminal, inland and river silos, and a trading office. The Company's footprint in Russia is limited to operations related to the production and transport of essential food commodities and ingredients. While the Company's Ukraine and Russian operations have historically represented 0.1% of consolidated revenues, the direct and indirect impacts of the ongoing military action could negatively affect ADM's future operating results. The conflict in Ukraine has created disruptions in global supply chains and has created dislocations of key agricultural commodities. The indirect impact of these dislocations on the Company's operating results will be a function of a number of variables including supply and demand responses from the rest of the world as well as the length of the conflict and the condition of the agricultural industry and export infrastructure after the conflict ends. The Black Sea Grain Initiative, an agreement that allowed Ukraine to export grain and other food products, expired on July 17, 2023. In September 2023, a new alternative shipping corridor in the Black Sea took effect with Ukraine setting up temporary routes from ports in Greater Odessa. For more information, refer to Part I, Item 1A, "Risk Factors". As of December 31, 2023, ADM's assets in Ukraine consisted primarily of current assets that were less than 1% of the Company's total current assets and an immaterial amount of non-current assets. Of the total current assets in Ukraine, the majority were related to inventories that represented less than 2% of ADM's total inventories.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Market Factors Influencing Operations or Results in the Twelve Months Ended December 31, 2023 The Company is subject to a variety of market factors which affect the Company's operating results. In Ag Services and Oilseeds, supply has been impacted by market dislocations driven by geopolitical uncertainty, record Brazil soybean production, and extreme drought conditions in Argentina. Inflationary pressures impacted the entire value chain. Crushing was positively impacted by sustainable biofuel demand and protein consumption around the globe. In Refined Products and Other, margins were driven by strong oil demand and elevated oil prices that were supported by biofuels demand, driven by favorable blend economics as historically low distillate fuel oil inventory drove diesel prices to all-time highs. Mediocre growth in mandated renewable volume obligations for 2023 to 2025 drove further market volatility. In Carbohydrate Solutions, demand for starches and sweeteners remained solid with stronger overall margins due to specialty products pricing. Lower gasoline prices in 2023 were supportive of higher domestic gasoline consumption and ethanol demand. Strong ethanol exports helped balance overall supply and demand and were supported by discretionary blending at export markets. In Nutrition, demand was softer in a few food and beverage product categories. Human Nutrition was impacted by inflation which drove lower demand especially in higher priced product categories in the food, beverage, and dietary supplement segment and impacted volumes in flavors, flavor systems, emulsifiers, bioactives, and alternative proteins. In Animal Nutrition, overall market remained weak with pressured farm gate prices in China and structurally decreasing European production. Certain tailwinds, however, including softening raw material prices, predominantly in micro ingredients, and recovery in global poultry production helped offset the negative impacts. The amino acids market continued to be subdued with ample supply from China. Year Ended December 31, 2023 Compared to Year Ended December 31, 2022 Net earnings attributable to controlling interests decreased 20% or \$0.9 billion, to \$3.5 billion. Segment operating profit decreased 10% or \$0.6 billion, to \$5.9 billion, and included a net charge of \$344 million consisting of asset impairment and restructuring charges and net settlement contingencies totaling \$361 million and a gain on the sale of certain assets of \$17 million. Included in

segment operating profit in the prior year was a net charge of \$100 million consisting of charges totaling \$147 million related to the impairment of certain assets, restructuring, and contingencies/settlements, partially offset by gains on the sale of certain assets of \$47 million. Adjusted segment operating profit (a non-GAAP measure) decreased \$0.4 billion to \$6.2 billion due primarily to lower results in Crushing, Wilmar, Nutrition, Ag Services, and Starches and Sweeteners, partially offset by higher results in Refined Products and Other, Other Business, and Vantage Corn Processors. Lower margins partially offset by improved pricing and positive timing impacts, overall decline in volume, higher manufacturing costs, and unplanned downtime at Decatur East decreased adjusted segment operating profit. Corporate results in the current year were a net charge of \$1.6 billion and included a mark-to-market gain of \$6 million on the conversion option of the exchangeable bonds issued in August 2020, acquisition-related expenses of \$7 million, and restructuring charges of \$6 million. Corporate results in the prior year were a net charge of \$1.3 billion and included a mark-to-market gain of \$9 million on the conversion option of the exchangeable bonds issued in August 2020. Income taxes of \$828 million decreased \$40 million. The Company's effective tax rate for 2023 was 19.3% compared to 16.6% for 2022. The change in the rate was due primarily to changes in the geographic mix of pretax earnings. Analysis of Statements of Earnings Processed volumes by product for the years ended December 31, 2023 and 2022 are as follows (in metric tons):

(In thousands)	2023	2022	Change
Oilseeds	34,899	32,952	1,947
Corn	18,067	18,558	(491)
Total	52,966	51,510	1,456

The Company generally operates its production facilities, on an overall basis, at or near capacity, adjusting facilities individually, as needed, to react to the current margin environment and seasonal local supply and demand conditions. The overall increase in oilseeds processed volumes was primarily related to improved crush rates in the current year compared to decreased crush rates in the prior year resulting from the decline in global demand for rapeseed and the decline in canola crop due to the drought condition in North America. The overall decrease in corn processed volumes was related to unplanned downtime from plants in Decatur, Illinois and due to the earthquake in Turkey and fire at the Cedar Rapids, Iowa dry mill.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Revenues by segment for the years ended December 31, 2023 and 2022 are as follows: (In millions)

	2023	2022	Change
Ag Services and Oilseeds	\$ 47,420	\$ 53,181	\$ (5,761)
Crushing	14,020	13,139	881
Refined Products and Other	11,986	13,243	(1,257)
Total Ag Services and Oilseeds	73,426	79,563	(6,137)
Carbohydrate Solutions	9,885	10,251	(366)
Starches and Sweeteners	2,989	3,710	(721)
Total Carbohydrate Solutions	12,874	13,961	(1,087)
Nutrition Human Nutrition	3,634	3,769	(135)
Animal Nutrition	3,577	3,867	(290)
Total Nutrition	7,211	7,636	(425)
Other Business	424	396	28
Total Other Business	424	396	28
Total	\$ 93,935	\$ 101,556	\$ (7,621)

Revenues and cost of products sold in agricultural merchandising and processing businesses are significantly correlated to the underlying commodity prices and volumes. In periods of significant changes in market prices, the underlying performance of the Company is better evaluated by looking at margins since both revenues and cost of products sold, particularly in Ag Services and Oilseeds, generally have a relatively equal impact from market price changes which generally result in an insignificant impact to gross profit. Revenues decreased \$7.6 billion to \$93.9 billion due to lower sales prices (\$10.3 billion), partially offset by higher sales volumes (\$2.7 billion). Lower sales prices of oils, soybeans, corn, biodiesel, and farming materials and lower sales volumes of corn, were partially offset by higher sales volumes of soybeans and biodiesel. Ag Services and Oilseeds revenues decreased 8% to \$73.4 billion due to lower sales prices (\$10.1 billion), partially offset by higher sales volumes (\$4.0 billion). Carbohydrate Solutions revenues decreased 8% to \$12.9 billion due to lower sales prices (\$0.6 billion) and lower sales volumes (\$0.5

billion). Nutrition revenues decreased 6% to \$7.2 billion due to lower sales volumes (\$0.8 billion), partially offset by higher sales prices (\$0.4 billion). Cost of products sold decreased \$7.6 billion to \$86.4 billion due principally to lower average commodity costs partially offset by higher volumes and increased manufacturing expenses. Manufacturing expenses increased \$0.3 billion due to individually insignificant increases in various expense categories. Foreign currency translation impacts increased revenues by \$0.1 billion and cost of goods sold by \$0.1 billion with no impact to gross profit. Gross profit decreased \$0.1 billion or 1%, to \$7.5 billion due to lower results in Crushing (\$273 million), Nutrition (\$232 million) and Ag Services (\$68 million), partially offset by higher results in Refined Products and Other (\$431 million) and Carbohydrate Solutions (\$46 million). These factors are explained in the segment operating profit discussion on page 41.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Selling, general, and administrative expenses increased 3% to \$3.5 billion due principally to higher salaries and benefit costs, increased expenses for contracted outside labor, and higher professional and financing fees, partially offset by lower provisions for bad debt. Asset impairment, exit, and restructuring costs increased \$276 million to \$342 million. Charges in the current year consisted of \$137 million of impairments related to goodwill in the Animal Nutrition reporting unit, \$108 million of impairments related to property, plant, and equipment and an equity method investment, \$64 million of impairments related to customer list and discontinued Animal Nutrition trademarks, and \$27 million of restructuring, presented as specified items within segment operating profit, and \$6 million of restructuring in Corporate. Charges in the prior year consisted of \$37 million of impairments related to certain long-lived assets and \$28 million of restructuring, presented as specified items within segment operating profit, and \$1 million of restructuring in Corporate. Equity in earnings of unconsolidated affiliates decreased \$281 million to \$551 million due primarily to lower earnings from the Company's investments in Wilmar, Skyland Grain, LLC, and Hungrana Ltd., partially offset by higher earnings from ADM's investment in Olenex. Interest and investment income increased \$206 million to \$499 million due primarily to higher interest rates, partially offset by revaluation losses of \$76 million compared to revaluation gains of \$37 million in the prior year. Interest expense increased \$251 million to \$647 million due primarily to increased short-term rates on customer deposit balances in ADM Investor Services and on the Company's commercial paper borrowing programs and increased interest expense from a new debt issuance at a higher rate. Interest expense in the current year also included a \$6 million mark-to-market gain adjustment related to the conversion option of the exchangeable bonds issued in August 2020 compared to a \$9 million mark-to-market gain adjustment in the prior year. Other income - net of \$176 million decreased \$182 million. Current year income included net gains on disposals of individually insignificant assets in the ordinary course of business of \$38 million, the non-service components of net pension benefit income of \$18 million, net foreign exchange gains of \$85 million, and net other income. Prior year income included a legal recovery of \$110 million related to the 2020 and 2019 closure of the Company's export facility in Reserve, Louisiana, net foreign exchange gains of \$105 million, a \$50 million payment from the USDA Biofuel Producer Recovery Program, gains on disposals of individually insignificant assets in the ordinary course of business of \$78 million, and the non-service components of net pension benefit income of \$25 million, partially offset by net other expense.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Segment operating profit, adjusted segment operating profit (a non-GAAP measure), and earnings before income taxes for the years ended December 31, 2023 and 2022 are as follows: (In millions)

	2023	2022	Change
Segment Operating Profit	\$ 5,900	\$ 6,549	\$ (649)
Specified Items:			
Gains on sale of assets	(17)	(47)	30

Impairment, restructuring, and net settlement contingencies 361 147 214 Adjusted Segment Operating Profit \$ 6,244 \$ 6,649 \$ (405) Ag Services and Oilseeds Ag Services \$ 1,168 \$ 1,374 \$ (206) Crushing 1,290 1,636 (346) Refined Products and Other 1,306 837 469 Wilmar 303 554 (251) Total Ag Services and Oilseeds 4,067 4,401 (334) Carbohydrate Solutions Starches and Sweeteners 1,329 1,376 (47) Vantage Corn Processors 46 37 9 Total Carbohydrate Solutions 1,375 1,413 (38) Nutrition Human Nutrition 417 557 (140) Animal Nutrition 10 111 (101) Total Nutrition 427 668 (241) Other Business 375 167 208 Total Other 375 167 208 Segment Operating Profit \$ 5,900 \$ 6,549 \$ (649) Corporate (1,606) (1,316) (290) Earnings Before Income Taxes \$ 4,294 \$ 5,233 \$ (939) Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Ag Services and Oilseeds operating profit decreased 8%. In Ag Services, significantly higher origination volumes and margins in South America due to a record Brazilian soybean crop were mostly offset by decreased North American origination results from lower export demand and low water levels. Destination marketing, global ocean freight, and transportation results decreased due to less favorable timing effects and higher freight rates. Current year results also included a \$48 million insurance settlement related to damages from Hurricane Ida compared to the prior year's \$110 million legal recovery related to the 2019 and 2020 closure of the Company's Reserve, Louisiana, export facility. In Crushing, global crush margins were historically strong, yet lower than the prior year's record highs with the lower Argentine soybean crop driving a tight soybean meal supply, partially offset by improved processed volumes. In EMEA, lower meal demand and exports were offset by the switch capacity in the region. In Refined Products and Other, increasing global demand for fuel and food created elevated margins in North America and Europe for refined oils and biodiesel. In North America, sales volumes were also higher supported by U.S. renewable volume obligations and margins for food oil in Europe expanding year-over-year. Additionally, net positive mark-to-market timing effects that are expected to reverse as contracts execute in future periods contributed to the results in the current year. Equity earnings from Wilmar were lower versus the prior year. Carbohydrate Solutions operating profit decreased 3%. Starches and Sweeteners, including ethanol production from the wet mills, capitalized on a solid demand environment during the year. North America starches and sweeteners delivered volumes and margins similar to the prior year with higher margins led by specialty products. Ethanol margins were solid as industry stocks moderated, though lower relative to the prior year. Results were negatively impacted due to unplanned downtime at one of the corn germ plants. In EMEA, the business effectively managed margins to deliver improved results. The global wheat milling business posted higher margins driven by solid customer demand. Vantage Corn Processors results were higher as the business executed on a robust demand and margin environment for ethanol partially offset by the absence of the prior year's \$50 million payment from the USDA Biofuel Producer Recovery Program. Nutrition operating profit decreased 36%. Human Nutrition results were lower than the prior year, as the business continued to manage demand fulfillment challenges and destocking in certain categories. Flavors results were lower than the prior year driven by softer sales, higher expenses, and \$45 million of negative impacts primarily related to the deconsolidation and write-down of a joint venture. Specialty Ingredients results were lower year-over-year due to continued lower market demand for plant-based proteins in meat alternatives and unplanned downtime at Decatur East. Health and Wellness results were lower than the prior year due to a revaluation loss of \$19 million related to an investment in precision fermentation, partially offset by continued growth in the biotics category. Animal Nutrition results were lower compared to the prior year due to lower contribution from amino acids, pockets of softer global feed demand affecting volumes, and continued supply chain challenges and inventory losses in pet solutions. Other

Business operating profit increased 125%. Higher interest rates drove improved earnings in ADM Investor Services. Captive insurance results improved on premiums from new programs, partially offset by increased claim settlements. Corporate results are as follows: (In millions) 2023 2022 Change

Interest expense - net	\$ (431)	\$ (333)	\$ (98)
Unallocated corporate costs	(1,144)	(1,026)	(118)
Loss on sale of assets —	(3)	3	6
Expenses related to acquisitions	(7)	(2)	(5)
Gain on debt conversion option	6	9	(3)
Restructuring charges	(6)	(1)	(5)
Other (expense) income	(24)	40	(64)
Total Corporate	\$ (1,606)	\$ (1,316)	\$ (290)

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Corporate results were a net charge of \$1.6 billion in the current year compared to \$1.3 billion in the prior year. Interest expense-net increased \$98 million due primarily to increased short-term rates on the Company's commercial paper borrowing programs and increased interest expense from a new debt issuance at a higher rate. Unallocated corporate costs increased \$118 million due primarily to higher financing, information technology, and centers of excellence costs, partially offset by lower incentive compensation expense accruals and higher corporate cost allocation. Gain on debt conversion option was related to the mark-to-market adjustment of the conversion option of the exchangeable bonds issued in August 2020. Other income in the current year included the non-service components of net pension benefit income of \$18 million and foreign exchange gains, partially offset by investment revaluation losses of \$57 million and railroad maintenance expenses of \$67 million. Other income in the prior year included investment revaluation gains of \$37 million, the non-service components of net pension benefit income of \$25 million, and foreign exchange gains, partially offset by railroad maintenance expenses of \$67 million. Non-GAAP Financial Measures The Company uses adjusted net earnings, adjusted earnings per share (EPS), adjusted EBITDA, and adjusted segment operating profit, non-GAAP financial measures as defined by the SEC, to evaluate the Company's financial performance. These performance measures are not defined by accounting principles generally accepted in the United States and should be considered in addition to, and not in lieu of, GAAP financial measures. Adjusted net earnings is defined as net earnings adjusted for the effects on net earnings of specified items. Adjusted EPS is defined as diluted EPS adjusted for the effects on reported diluted EPS of specified items. Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, and amortization, adjusted for specified items. The Company calculates adjusted EBITDA by removing the impact of specified items and adding back the amounts of interest expense and depreciation and amortization to earnings before income taxes. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items. Management believes that adjusted net earnings, adjusted EPS, adjusted EBITDA, and adjusted segment operating profit are useful measures of the Company's performance because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. Adjusted net earnings, adjusted EPS, adjusted EBITDA, and adjusted segment operating profit are not intended to replace or be an alternative to net earnings, diluted EPS, net earnings, and segment operating profit, respectively, the most directly comparable amounts reported under GAAP. The table below provides a reconciliation of net earnings to adjusted net earnings and diluted EPS to adjusted EPS for the years ended December 31, 2023 and 2022.

	2023	2022	In millions	Per share	In millions	Per share
Average number of shares outstanding - diluted	542	563				
Net earnings and reported EPS (fully diluted)	\$ 3,483	\$ 6.43	\$ 4,340	\$ 7.71		
Adjustments:						
Gains on sale of assets (net of tax of \$5 million in 2023 and \$11 million in 2022)	(12)	(0.03)	(33)	(0.06)		
Asset impairment, restructuring, and net settlement contingencies (net of tax of \$57 million in 2023 and \$33 million in 2022)	310	0.57	115	0.21		
Expenses related to acquisitions (net of tax of \$1 million in 2023 and \$1 million in 2022)	6	0.01	1	—		
Gain on debt						

conversion option (net of tax of \$0) (6) (0.01) (9) (0.02) Tax adjustments 4 0.01 7 0.01 Adjusted net earnings and adjusted EPS \$ 3,785 \$ 6.98 \$ 4,421 \$ 7.85 Tax effected using the U.S. and applicable tax rates. (1) (1) (1) (1) (1) Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) The tables below provide a reconciliation of net earnings to adjusted EBITDA and adjusted EBITDA by segment for the years ended December 31, 2023 and 2022. (In millions) 2023 2022 Change Net earnings \$ 3,483 \$ 4,340 \$ (857) Net earnings (losses) attributable to noncontrolling interests (17) 25 (42) Income tax expense 828 868 (40) Earnings before income taxes 4,294 5,233 (939) Interest expense 430 396 34 Depreciation and amortization 1,059 1,028 31 Gains on sale of assets (17) (44) 27 Asset impairment, restructuring, and net settlement contingencies 367 148 219 Railroad maintenance expense 67 67 — Expenses related to acquisitions 7 2 5 Adjusted EBITDA \$ 6,207 \$ 6,830 \$ (623) (In millions) 2023 2022 Change Ag Services and Oilseeds \$ 4,434 \$ 4,755 (321) Carbohydrate Solutions 1,688 1,728 (40) Nutrition 695 928 (233) Other Business 368 227 141 Corporate (978) (808) (170) Adjusted EBITDA \$ 6,207 \$ 6,830 \$ (623) 43 Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Market Factors Influencing Operations or Results in the Twelve Months Ended December 31, 2022 The Company is subject to a variety of market factors which affect the Company's operating results. In Ag Services and Oilseeds, strong global demand continued due to a short crop in South America. The conflict in Ukraine resulted in even tighter global stocks of commodities and created high volatility, which had a positive impact on North and South American origination prices. Global Trade results were driven by market disconnects, tight supply, strong destination marketing margins, and firm ocean freight rates. North American origination was negatively impacted by weather-related supply disruption and delayed planting and lower river levels. Crushing margins continued to benefit from strong protein and renewable diesel demand and tight oilseeds stocks. In Refined Products and Other, margins were driven by strong oil demand and tight supply with volatile energy markets driving up biodiesel margins. In Carbohydrate Solutions, demand for starches and sweeteners was solid with margins remaining steady despite higher input costs. Ethanol demand for domestic gasoline was lower, in part due to high gas prices, while export demand remained strong, driven by favorable blending economics and government incentives. Corn milling margins benefited from strong co-product results, as prices for oil and feed products rose in line with higher underlying corn prices. Corn costs were volatile and higher, in part due to a relatively low projected corn stocks-to-use ratio and uncertainty caused by the conflict in Ukraine. Nutrition benefited from overall strong demand in various food, beverage, and dietary supplement categories. In Human Nutrition, demand for flavors, flavor systems, specialty proteins, bioactives, and fibers was strong, but higher energy, transportation, and raw material costs, and a strong U.S. dollar adversely impacted results. In Animal Nutrition, amino acids pricing and margins improved due to a tighter global supply environment but the devaluation of certain currencies, a bird flu outbreak, and weak demand in other product lines, with some premix and additives customers cutting products out of formulation due to increased ingredient, freight, and energy costs, adversely impacted results. Increased competition in Brazil also contributed to the weak demand in that country. ADM's productivity initiatives are improving the Company's capabilities to help mitigate the impact of inflation. Year Ended December 31, 2022 Compared to Year Ended December 31, 2021 Net earnings attributable to controlling interests increased 60% or \$1.6 billion, to \$4.3 billion. Segment operating profit increased 41% or \$1.9 billion, to \$6.5 billion, and included a net charge of \$100 million consisting of charges totaling \$147 million related to the impairment of certain assets, restructuring, and contingencies/settlements, partially offset by gains on the sale of certain assets of \$47 million.

Included in segment operating profit in the prior year was a net charge of \$136 million consisting of charges totaling \$213 million related to the impairment of certain assets, restructuring, and settlement, partially offset by gains on the sale of ethanol and certain other assets of \$77 million. Adjusted segment operating profit (a non-GAAP measure) increased \$1.9 billion to \$6.6 billion due primarily to higher results in most businesses except in Vantage Corn Processors. Corporate results in 2022 were a net charge of \$1.3 billion and included a mark-to-market gain of \$9 million on the conversion option of the exchangeable bonds issued in August 2020. Corporate results in 2021 were a net charge of \$1.3 billion and included a pension settlement charge of \$83 million, loss on debt extinguishment of \$36 million, a mark-to-market gain of \$19 million on the conversion option of the exchangeable bonds issued in August 2020, acquisition-related expenses of \$7 million, and a restructuring charge of \$4 million. Income taxes of \$868 million increased \$290 million. The Company's effective tax rate for 2022 was 16.6% compared to 17.4% for 2021. The change in the rate was due primarily to changes in the geographic mix of pretax earnings and the impact of discrete tax items. Analysis of Statements of Earnings Processed volumes by product for the years ended December 31, 2022 and 2021 are as follows (in metric tons): (In thousands)

	2022	2021	Change
Oilseeds	32,952	35,125	(2,173)
Corn	18,558	19,126	(568)
Total	51,510	54,251	(2,741)

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) The Company generally operates its production facilities, on an overall basis, at or near capacity, adjusting facilities individually, as needed, to react to the current margin environment and seasonal local supply and demand conditions. The overall decrease in oilseeds processed volumes was primarily related to decreased crush rates resulting from the decline in seeds availability, a temporarily idled facility in Paraguay due to crop failure, weather-related challenges, and the indefinite shutdown of a Ukraine facility since February 2022. The overall decrease in corn processed volumes was primarily related to reduced volumes of fuel alcohol due to market conditions, the sale of the Peoria, Illinois facility in November 2021, and logistical challenges surrounding railcar availability since the second quarter of 2022. Revenues by segment for the years ended December 31, 2022 and 2021 are as follows: (In millions)

	2022	2021	Change
Ag Services and Oilseeds	\$ 53,181	\$ 45,017	\$ 8,164
Crushing	13,139	11,368	1,771
Refined Products and Other	13,243	10,662	2,581
Total Ag Services and Oilseeds	79,563	67,047	12,516
Carbohydrate Solutions	10,251	7,611	2,640
Vantage Corn Processors	3,710	3,499	211
Total Carbohydrate Solutions	13,961	11,110	2,851
Nutrition Human Nutrition	3,769	3,189	580
Animal Nutrition	3,867	3,523	344
Total Nutrition	7,636	6,712	924
Other Business	396	380	16
Total Other Business	396	380	16
Total	\$ 101,556	\$ 85,249	\$ 16,307

Revenues and cost of products sold in agricultural merchandising and processing businesses are significantly correlated to the underlying commodity prices and volumes. In periods of significant changes in market prices, the underlying performance of the Company is better evaluated by looking at margins since both revenues and cost of products sold, particularly in Ag Services and Oilseeds, generally have a relatively equal impact from market price changes which generally result in an insignificant impact to gross profit. Revenues increased \$16.3 billion to \$101.6 billion due to higher sales prices (\$17.1 billion), partially offset by lower sales volumes (\$0.8 billion). Higher sales prices of corn, wheat, oil, soybean, and meal, and higher sales volumes of rice, flavors, biodiesel, and corn, were partially offset by lower sales prices of rice and flavors, and lower sales volumes of wheat and oil. Ag Services and Oilseeds revenues increased 19% to \$79.6 billion due to higher sales prices (\$14.3 billion), partially offset by lower sales volumes (\$1.8 billion). Carbohydrate Solutions revenues increased 26% to \$14.0 billion due to higher sales prices (\$2.6 billion) and higher sales volumes (\$0.3 billion), despite the loss of USD-grade industrial alcohol volumes from the divested

Peoria, Illinois facility. Nutrition revenues increased 14% to \$7.6 billion due to higher sales prices (\$0.2 billion) and higher sales volumes (\$0.7 billion). Cost of products sold increased \$14.7 billion to \$94.0 billion due principally to higher average commodity costs and higher manufacturing expenses. Manufacturing expenses increased \$0.9 billion to \$7.0 billion due principally to higher energy costs, higher maintenance expenses, increased operating supplies, and higher salaries and benefit costs.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Foreign currency translation impacts decreased revenues by \$2.6 billion and cost of products sold by \$2.4 billion. Gross profit increased \$1.6 billion or 26%, to \$7.6 billion due to higher results in Ag Services and Oilseeds (\$1.3 billion), Starches and Sweeteners (\$477 million), and Nutrition (\$149 million), partially offset by lower results in Vantage Corn Processors (\$352 million). These factors are explained in the segment operating profit discussion on page 48. Selling, general, and administrative expenses increased 12% to \$3.4 billion due principally to provisions for bad debt, higher IT and project-related expenses, higher salaries and benefit costs, increased travel expenses, and amortization of intangibles from new acquisitions. Asset impairment, exit, and restructuring costs decreased \$98 million to \$66 million. Charges in the current year consisted of \$37 million of impairments related to certain long-lived assets and \$28 million of restructuring charges, presented as specified items within segment operating profit, and \$1 million of restructuring charges in Corporate. Charges in the prior year consisted primarily of \$125 million of impairments related to certain long-lived assets, goodwill, and other intangible assets and \$35 million of restructuring charges, presented as specified items within segment operating profit, and \$4 million of restructuring charges in Corporate. Equity in earnings of unconsolidated affiliates increased \$237 million to \$832 million due to higher earnings from the Company's investments in Wilmar and Olenex. Loss on debt extinguishment in the prior year of \$36 million was related to the early redemption of \$500 million aggregate principal amount of 2.750% notes due in March 2025. Interest and investment income increased \$197 million to \$293 million due primarily to higher interest income, partially offset by lower revaluation gains of \$37 million compared to \$49 million in the prior period. Interest expense increased \$131 million to \$396 million due to higher long-term debt balances and increased short-term rates on the Company's U.S. and European commercial paper borrowing programs. Interest expense in 2022 also included a \$9 million mark-to-market gain adjustment related to the conversion option of the exchangeable bonds issued in August 2020 compared to a \$19 million mark-to-market gain adjustment in 2021. Other income - net of \$358 million increased \$264 million. Income in 2022 included a legal recovery related to the 2019 and 2020 closure of the Company's Reserve, Louisiana, export facility of \$110 million, net foreign exchange gains of \$105 million, a \$50 million one-time payment from the USDA Biofuel Producer Recovery Program, gains on disposals of individually insignificant assets in the ordinary course of business, and the non-service components of net pension benefit income of \$25 million, partially offset by other net expense. Income in 2021 included gains on the sale of ethanol and certain other assets and disposals of individually insignificant assets in the ordinary course of business, net foreign exchange gains of \$24 million, the non-service components of net pension benefit income of \$33 million, and other income, partially offset by a non-cash pension settlement charge of \$83 million related to the purchase of group annuity contracts that irrevocably transferred the future benefit obligations and annuity administration for certain salaried and hourly retirees and terminated vested participants under the Company's ADM Retirement Plan and ADM Pension Plan for Hourly-Wage Employees. Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Operating profit by segment and earnings before income taxes for the years

ended December 31, 2022 and 2021 are as follows: (In millions) 2022 2021 Change Segment Operating Profit \$ 6,549 \$ 4,638 \$ 1,911 Specified Items: Gain on sales of assets and businesses (47) (77) 30 Impairment, restructuring, and exit charges 147 213 (66) Adjusted Segment Operating Profit \$ 6,649 \$ 4,774 \$ 1,875 Ag Services and Oilseeds Ag Services \$ 1,374 \$ 770 \$ 604 Crushing 1,636 999 637 Refined Products and Other 837 652 185 Wilmar 554 378 176 Total Ag Services and Oilseeds 4,401 2,799 1,602 Carbohydrate Solutions Sweeteners and Starches 1,376 948 428 Vantage Corn Processors 37 370 (333) Total Carbohydrate Solutions 1,413 1,318 95 Nutrition Human Nutrition 557 520 37 Animal Nutrition 111 112 (1) Total Nutrition 668 632 36 Other Business 167 25 142 Total Other Business 167 25 142 Segment Operating Profit 6,549 4,638 1,911 Corporate (1,316) (1,325) 9 Earnings Before Income Taxes \$ 5,233 \$ 3,313 \$ 1,920 Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Ag Services and Oilseeds operating profit increased 57%. Ag Services results were significantly higher versus 2021. Global trade results were higher, driven by strong performances in destination marketing and global ocean freight. North American origination volumes were lower but margins were higher year-over-year. South America results were higher, driven by better origination margins on good demand for grain. Crushing was higher year-over-year driven by robust protein and renewable diesel demand. Positive net timing effects in 2022 versus negative timing effects in 2021 helped drive higher year-over-year results. Refined Products and Other results were higher than in 2021, driven by higher margins due to strong oils demand. Biodiesel margins also benefited from direct sales compared to the historical auction sales. Equity earnings from Wilmar were higher versus 2021. Carbohydrate Solutions operating profit increased 7%. Starches and Sweeteners, including ethanol production from the wet mills, delivered higher results versus 2021, driven by solid margins across sweeteners and starches, strong contributions from corn co-products, and effective risk management, partially offset by weaker ethanol margins. Sales volumes for starches and sweeteners continued their recovery and the biosolutions platform continued to deliver revenue growth as demand for plant-based products expanded into more diverse applications. Vantage Corn Processors results were lower versus 2021 as ethanol margins decreased from the 2021 strong positioning gains and industrial alcohol results from the now-sold Peoria, Illinois facility, partially offset by the \$50 million one-time payment from the USDA Biofuel Producer Recovery Program. Nutrition operating profit increased 6%. Human Nutrition delivered higher year-over-year results. Flavors results were lower driven by demand fulfillment challenges, the impact of the strong U.S. dollar in EMEA, softer demand in Asia Pacific, and higher costs in North America. Strong sales growth in alternative proteins, including contribution from the Sojaprotein acquisition, and good demand for texturants offset some higher operating costs to help deliver better year-over-year results in Specialty Ingredients. Health and Wellness was also higher year-over-year, powered by probiotics, including the contribution from the November 2021 Deerland Probiotics and Enzymes acquisition, and robust demand for fiber and Vitamin E. Animal Nutrition profits were comparable to 2021. Other Business operating profit increased 568%. Higher short-term interest rates drove improved earnings in ADM Investor Services and improved underwriting performance resulted in better captive insurance results. Corporate results are as follows: (In millions) 2022 2021 Change Interest expense - net \$ (333) \$ (277) (56) Unallocated corporate costs (1,026) (957) (69) Loss on sale of assets (3) — (3) Expenses related to acquisitions (2) (7) 5 Loss on debt extinguishment — (36) 36 Gain loss on debt conversion option 9 19 (10) Restructuring and settlement charges (1) (87) 86 Other income 40 20 20 Total Corporate \$ (1,316) \$ (1,325) \$ 9 Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) Corporate results were a net charge of \$1.3 billion in 2022 compared to \$1.3

billion in 2021. Interest expense-net increased \$56 million due primarily to higher long-term debt balances and increased average rates on the Company's U.S. and European commercial paper borrowing programs. Unallocated corporate costs increased \$69 million due primarily to higher IT and project-related costs and higher costs in the Company's centers of excellence, partially offset by lower incentive compensation accruals. Loss on debt extinguishment in 2021 related to the early redemption of \$500 million aggregate principal amount of 2.750% notes due in March 2025. Gain on debt conversion option was related to the mark-to-market adjustment of the conversion option of the exchangeable bonds issued in August 2020. Restructuring and settlement charges in 2021 included a non-cash pension settlement charge of \$83 million related to the purchase of group annuity contracts that irrevocably transferred the future benefit obligations and annuity administration for certain salaried and hourly retirees and terminated vested participants under the Company's ADM Retirement Plan and ADM Pension Plan for Hourly-Wage Employees to independent third parties, and individually insignificant restructuring charges. Other income in 2022 included investment revaluation gains of \$37 million, the non-service components of net pension benefit income of \$25 million, and foreign exchange gains from hedge activity, partially offset by railroad maintenance expenses of \$67 million. Other income in 2021 included investment revaluation gains of \$49 million, the non-service components of net pension benefit income of \$16 million, and foreign exchange gains from hedge activity, partially offset by railroad maintenance expenses of \$67 million. Non-GAAP Financial Measures The Company uses adjusted net earnings, adjusted earnings per share (EPS), adjusted EBITDA, and adjusted segment operating profit, non-GAAP financial measures as defined by the SEC, to evaluate the Company's financial performance. These performance measures are not defined by accounting principles generally accepted in the United States and should be considered in addition to, and not in lieu of, GAAP financial measures. Adjusted net earnings is defined as net earnings adjusted for the effects on net earnings of specified items. Adjusted EPS is defined as diluted EPS adjusted for the effects on reported diluted EPS of specified items. Adjusted EBITDA is defined as earnings before interest, taxes, depreciation, and amortization, adjusted for specified items. The Company calculates adjusted EBITDA by removing the impact of specified items and adding back the amounts of interest expense and depreciation and amortization to earnings before income taxes. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items. Management believes that adjusted net earnings, adjusted EPS, adjusted EBITDA, and adjusted segment operating profit are useful measures of the Company's performance because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. Adjusted net earnings, adjusted EPS, adjusted EBITDA, and adjusted segment operating profit are not intended to replace or be an alternative to net earnings, diluted EPS, net earnings, and segment operating profit, respectively, the most directly comparable amounts reported under GAAP.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) The table below provides a reconciliation of net earnings to adjusted net earnings and diluted EPS to adjusted EPS for the years ended December 31, 2022 and 2021.

	2022	2021	In millions	Per share	In millions	Per share
Average number of shares outstanding - diluted	563	566

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Liquidity and Capital Resources

A Company objective is to have sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural commodity-based business. The Company depends on access to credit markets, which can be impacted by its credit rating and factors outside of ADM's control, to fund its working capital needs and capital expenditures. The primary source of funds to finance ADM's operations, capital expenditures, and advancement of its growth strategy is cash generated by operations and lines of credit, including a commercial paper borrowing facility and accounts receivable securitization programs. In addition, the Company believes it has access to funds from public and private equity and debt capital markets in both U.S. and international markets. Cash provided by operating activities was \$4.5 billion in 2023 compared to \$3.5 billion in 2022. Working capital changes decreased cash by \$0.3 billion in the current year compared to a decrease of \$1.5 billion in the prior year. Segregated investments increased \$0.2 billion driven by higher interest rates. Trade receivables decreased \$0.7 billion due to lower revenues. Inventories decreased \$2.9 billion due to lower inventory prices and volumes. Trade payables decreased \$1.5 billion due to lower payables related to grain and other inventory purchases. Payables to brokerage customers decreased \$2.1 billion due to decreased trading activity in the Company's futures commission and brokerage business. Cash used in investing activities was \$1.5 billion this year compared to \$1.4 billion last year. Capital expenditures in the current year were \$1.5 billion compared to \$1.3 billion in the prior year. Proceeds from sales of assets and businesses were \$60 million in the current year compared to \$131 million in the prior year. There were no additional cost method investments in the current year compared to \$0.2 billion in the prior year. Cash used in financing activities was \$4.6 billion this year compared to \$2.5 billion last year. Long-term debt borrowings in the current year of \$0.5 billion consisted of the \$500 million aggregate principal amount of 4.500% Notes due 2033. Long-term debt borrowings in the prior year of \$0.8 billion consisted of the \$750 million aggregate principal amount of 2.900% Notes due 2032. Proceeds from the borrowings in the current year were used for general corporate purposes. Proceeds from the borrowings in the prior year were used to finance investments and expenditures in eligible green projects that contribute to environmental objectives and/or eligible social projects that aim to address or mitigate a specific social issue and/or seek to achieve positive social outcomes. Long-term debt payments in the current year of \$1.0 billion consisted of the €600 million aggregate principal amount of 1.750% Notes due 2023 and \$300 million aggregate principal amount of zero coupon exchangeable bonds due 2023. Long-term debt payments in the prior year of \$0.5 billion consisted of the €0.5 billion aggregate principal amount of fixed-to-floating rate senior notes due 2022 issued in a private

placement on March 25, 2021. Net payments on short-term credit arrangements of \$0.4 billion in the current year was comparable to \$0.4 billion to the prior year. Share repurchases in the current year were \$2.7 billion compared to \$1.5 billion in the prior year. Dividends paid in the current year were \$1.0 billion compared to \$0.9 billion in the prior year. At December 31, 2023, ADM had \$1.4 billion of cash and cash equivalents and a current ratio, defined as current assets divided by current liabilities, of 1.6 to 1. Included in working capital is \$7.0 billion of readily marketable commodity inventories. At December 31, 2023, the Company's capital resources included shareholders' equity of \$24.1 billion and lines of credit, including the accounts receivable securitization programs described below, totaling \$13.2 billion, of which \$11.5 billion was unused. ADM's ratio of long-term debt to total capital (the sum of long-term debt of \$8.3 billion and shareholders' equity of \$24.1 billion in 2023 and the sum of long-term debt of \$7.7 billion and shareholders' equity of \$24.3 billion in 2022) was 25% and 24% at December 31, 2023 and 2022, respectively. The Company uses this ratio as a measure of ADM's long-term indebtedness and an indicator of financial flexibility. The Company's ratio of net debt (the sum of short-term debt of \$0.1 billion, current maturities of long-term debt of \$1 million, and long-term debt of \$8.3 billion less the sum of cash and cash equivalents of \$1.4 billion and short-term marketable securities of none in 2023 and the sum of short-term debt of \$0.5 billion, current maturities of long-term debt of \$0.9 billion, and long-term debt of \$7.7 billion less the sum of cash and cash equivalents of \$1.0 billion and short-term marketable securities of none in 2022) to capital (the sum of net debt of \$7.0 billion and shareholders' equity of \$24.1 billion in 2023 and the sum of net debt of \$8.1 billion and shareholders' equity of \$24.3 billion in 2022) was 22% and 25% at December 31, 2023 and 2022, respectively. Of the Company's total lines of credit, \$5.0 billion supported the commercial paper borrowing programs, against which there was \$5 million commercial paper outstanding at December 31, 2023.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) As of December 31, 2023, the Company had \$1.4 billion of cash and cash equivalents, \$0.5 billion of which is cash held by foreign subsidiaries whose undistributed earnings are considered indefinitely reinvested. Based on the Company's historical ability to generate sufficient cash flows from its U.S. operations and unused and available U.S. credit capacity of \$6.8 billion, the Company has asserted these funds are indefinitely reinvested outside the U.S. The Company has accounts receivable securitization programs (the "Programs") with certain commercial paper conduit purchasers and committed purchasers. The Programs provide the Company with up to \$3.0 billion in funding against accounts receivable transferred into the Programs and expand the Company's access to liquidity through efficient use of its balance sheet assets (see Note 19 in Item 8 for more information and disclosures on the Programs). As of December 31, 2023, the Company utilized \$1.6 billion of its facility under the Programs. On November 5, 2014, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2015 and ending December 31, 2019. On August 7, 2019, the Company's Board of Directors approved the extension of the stock repurchase program through December 31, 2024 and the repurchase of up to an additional 100,000,000 shares under the extended program. The Company has acquired approximately 148.0 million shares under this program and its extension as of December 31, 2023. As of December 31, 2023, the Company has total available liquidity of \$12.9 billion comprised of cash and cash equivalents and unused lines of credit. In 2024, the Company expects capital expenditures of \$1.3 billion and additional cash outlays of approximately \$1.0 billion in dividends and up to \$2.3 billion in share repurchases, subject to other strategic uses of capital and the evolution of operating cash flows and the working capital position throughout the year.

The Company's purchase obligations as of December 31, 2023 and 2022 were \$14.0 billion and \$15.8 billion, respectively. The decrease is primarily related to a decrease in obligations to purchase agricultural commodity inventories, partially offset by an increase in energy commitments. As of December 31, 2023, the Company expects to make payments related to purchase obligations of \$13.4 billion within the next twelve months. The Company's other material cash requirements within the next 12 months include current maturities of long-term debt of \$1 million, interest payments of \$0.4 billion, operating lease payments of \$0.3 billion, transition tax liability of \$49 million, and pension and other postretirement plan contributions of \$114 million. The Company expects to make payments related to purchase obligations and other material cash requirements beyond the next twelve months of \$16.8 billion. The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company was in compliance with these covenants as of December 31, 2023. As of December 31, 2023, the three major credit rating agencies maintained the Company's credit ratings at investment grade levels. Subsequent to December 31, 2023, the Company's ratings were placed "On Credit Watch" and "Ratings Under Review" by two of the credit rating agencies.

Critical Accounting Policies and Estimates The process of preparing financial statements requires management to make estimates and judgments that affect the carrying values of the Company's assets and liabilities as well as the recognition of revenues and expenses. These estimates and judgments are based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Certain of the Company's accounting policies and estimates are considered critical, as these policies and estimates are important to the depiction of the Company's financial statements and require significant or complex judgment by management. Critical accounting estimates are those estimates made in accordance with GAAP which involve a significant level of estimation uncertainty and have had or are reasonably likely to have a material impact on ADM's financial condition and results of operations. Management has discussed with the Company's Audit Committee the development, selection, disclosure, and application of these critical accounting policies and estimates. Following are the accounting policies and estimates management considers critical to the Company's financial statements.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Fair Value Measurements - Inventories and Commodity Derivatives Description: Certain of the Company's inventory, inventory-related payables, and commodity derivative assets and liabilities as of December 31, 2023 are valued at estimated fair values, including \$7.0 billion of merchandisable agricultural commodity inventories, \$1.4 billion of commodity derivative assets, \$1.0 billion of commodity derivative liabilities, and \$1.3 billion of inventory-related payables. Commodity derivative assets and liabilities include forward purchase and sales contracts for agricultural commodities. Merchandisable agricultural commodities are freely traded, have quoted market prices, and may be sold without significant additional processing.

Judgments and Uncertainties: Management estimates fair value for its commodity-related assets and liabilities based on exchange-quoted prices, adjusted for differences in local markets. The Company's inventory, inventory-related payables, and commodity derivative fair value measurements are mainly based on observable market quotations without significant adjustments and are therefore reported as Level 2 within the fair value hierarchy. Level 3 fair value measurements of approximately \$3.4 billion of assets and \$0.6 billion of liabilities represent fair value estimates where unobservable price components represent 10% or more of the total fair value price. For more information concerning amounts reported as Level 3, see Note 4 in Item 8.

Sensitivity of Estimate to Change: Changes in the

market values of these inventories and commodity contracts are recognized in the statement of earnings as a component of cost of products sold. If management used different methods or factors to estimate market value, amounts reported could differ materially. Additionally, if market conditions change subsequent to year-end, amounts reported in future periods could differ materially.

Derivatives – Designated Hedging Activities Description: The Company, from time to time, uses derivative contracts designated as cash flow hedges to hedge the purchase or sales price of anticipated volumes of commodities to be purchased and processed in a future month. See Note 5 in Item 8 for additional information. **Judgments and Uncertainties:** Assuming normal market conditions, the change in the market value of such derivative contracts has historically been, and is expected to continue to be, highly effective at offsetting changes in price movements of the hedged item.

Sensitivity of Estimate to Change: Gains and losses arising from open and closed hedging transactions are deferred in accumulated other comprehensive income, net of applicable income taxes, and recognized as a component of cost of products sold and revenues in the statement of earnings when the hedged item is recognized in earnings. If it is determined that the derivative instruments used are no longer effective at offsetting changes in the price of the hedged item, then the changes in the market value of these exchange-traded futures and exchange-traded and over-the-counter (OTC) option contracts would be recorded immediately in the statement of earnings as a component of revenues and/or cost of products sold. **Income Taxes Description:** The Company accounts for income taxes in accordance with the applicable accounting standards which prescribe a minimum threshold a tax position is required to meet before being recognized in the consolidated financial statements.

Deferred taxes are recognized for the estimated taxes ultimately payable or recoverable based on enacted tax law. Changes in enacted tax rates are reflected in the tax provision as they occur.

Judgments and Uncertainties: ADM calculates its provision for income taxes based on the statutory tax rates and tax planning opportunities available to the Company in the various jurisdictions in which it operates. The Company uses judgment in evaluating the Company's tax positions and determining its annual tax provision. **Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)** **Sensitivity of Estimate to Change:** While ADM considers all of its tax positions fully supportable, the Company faces challenges from U.S. and foreign tax authorities regarding the amount of taxes due. The Company recognizes a tax position in its consolidated financial statements when it is determined to be more likely than not to be sustained upon examination, based on its technical merits. The position is then measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. For example, the Company has received tax assessments from tax authorities in the Netherlands challenging income tax positions taken by subsidiaries of the Company. The Company evaluated its tax positions for these matters and concluded, based in part upon advice from legal counsel, that it was appropriate to recognize the tax benefits of these positions that are more likely than not to be sustained upon examination, based on their technical merits (see Note 13 in Item 8 for additional information).

Business Combinations Description: The Company's acquisitions are accounted for in accordance with Accounting Standards Codification (ASC) Topic 805, Business Combinations, as amended. The consideration transferred is allocated to various assets acquired and liabilities assumed at their estimated fair values as of the acquisition date with the residual allocated to goodwill. The Company accounts for any redeemable noncontrolling interest in temporary equity -redeemable noncontrolling interest at redemption value with periodic changes recorded in retained earnings. **Judgments and Uncertainties:** Fair values allocated to assets acquired and liabilities assumed in business combinations require management to make significant judgments, estimates, and assumptions,

especially with respect to intangible assets. Management makes estimates of fair values based upon assumptions it believes to be reasonable. These estimates are based upon historical experience and information obtained from the management of the acquired companies and are inherently uncertain. The estimated fair values related to intangible assets primarily consist of customer relationships, trademarks, and developed technology which are determined primarily using discounted cash flow models. Estimates in the discounted cash flow models include, but are not limited to, certain assumptions that form the basis of the forecasted results (e.g. revenue growth rates, customer attrition rates, and royalty rates). These significant assumptions are forward looking and could be affected by future economic and market conditions. Sensitivity of Estimate to Change: During the measurement period, which may take up to one year from the acquisition date, adjustments due to changes in the estimated fair value of assets acquired and liabilities assumed may be recorded as adjustments to the consideration transferred and related allocations. Upon the conclusion of the measurement period or the final determination of the values of assets acquired and liabilities assumed, whichever comes first, any such adjustments are charged to the consolidated statements of earnings. Goodwill Description: Goodwill is subject to annual impairment tests. The Company evaluates goodwill for impairment at the reporting unit level annually on October 1 or whenever there are indicators that the carrying value may not be fully recoverable. The Company has seven reporting units with goodwill identified at one level below the operating segment using the criteria in ASC 350, Intangibles - Goodwill and Other (Topic 350). Judgments and Uncertainties: The Company adopted the provisions of Topic 350, which permits, but does not require, a company to qualitatively assess indicators of a reporting unit's fair value. If after completing the qualitative assessment, the Company believes it is more likely than not that a reporting unit is impaired, an estimate of fair value is prepared by the Company. Critical estimates in the determination of the fair value, when using a discounted cash flow analysis, of each reporting unit include, but are not limited to, future expected cash flows, revenue growth, EBITDA margins, and discount rates. These calculations contain uncertainties as they require management to make assumptions including, but not limited to, future expected cash flows of the reporting units utilizing appropriate revenue growth, EBITDA margins, and discount rate. A decline in the actual cash flows of the reporting units in future periods, as compared to the projected cash flows used in the discounted cash flow analysis, could result in the carrying value of the reporting units exceeding their respective fair values. Further, a change in the discount rate, as a result of a change in economic conditions or otherwise, could result in the carrying values of the reporting units exceeding their respective fair values. Sensitivity of Estimate to Change: During the year ended December 31, 2023, the Company evaluated goodwill for impairment using a qualitative assessment in five reporting units and using a quantitative assessment in two reporting units. Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued) The Company recorded a goodwill impairment charge of \$137 million related to the Animal Nutrition reporting unit that was evaluated for impairment using a quantitative assessment during the year ended December 31, 2023. The Company utilized a third-party valuation specialist to assist management in determining the fair value of the Animal Nutrition reporting unit. The fair value of the Animal Nutrition reporting unit was estimated based on a combination of discounted cash flows (income approach) and the use of pricing multiples derived from an analysis of comparable public companies multiplied against historical and or anticipated financial metrics (market approach). As a result of this impairment testing in the fourth quarter of 2023, the Company determined the fair value of the Animal Nutrition reporting unit was below its carrying value. The decline in the fair value of the Animal Nutrition reporting unit was primarily driven by a higher discount rate due to changes in the underlying

business performance and industry conditions as well as the macroeconomic environment, causing a decline in the projected cash flows. During the first three quarters of 2023, Animal Nutrition's business performance and industry conditions gradually declined despite management's ongoing mitigation and efficiency improvement actions. Given Animal Nutrition's significant excess in fair value over carrying value in prior years and the ongoing mitigation actions, the Company believed Animal Nutrition's fair value was more likely than not greater than its carrying value as of September 30, 2023, and therefore did not conduct a quantitative evaluation of the reporting unit prior to the annual impairment testing on October 1, 2023. However, as these conditions persisted in the fourth quarter of 2023, the Company was no longer able to conclude Animal Nutrition's fair value more likely than not exceeded carrying value and proceeded to perform the quantitative fair value estimate as described above. Following the recording of the impairment charge, the remaining carrying value of goodwill in the Animal Nutrition reporting unit as of December 31, 2023 was \$0.9 billion. The Company performed a sensitivity analysis for the significant assumptions used in the goodwill impairment testing analysis for the Animal Nutrition reporting unit. The sensitivities were calculated in isolation using the income approach and keeping all other assumptions constant. The sensitivities for revenue growth and EBITDA margins do not consider the offsetting impact of a lower discount rate assumption to reflect the reduced risk in estimated future cash flow growth used under the income approach or the related impacts on pricing multiples used under the market approach. • A hypothetical increase to the discount rate of approximately 25 basis points would result in additional goodwill impairment of approximately \$65 million; • A hypothetical decrease in the expected annual revenue growth rate over the entire forecast period of approximately 100 basis points would result in additional goodwill impairment of approximately \$60 million; and • A hypothetical decrease in the expected EBITDA margins in each year over the entire forecast period of approximately 15 basis points would result in additional goodwill impairment of approximately \$60 million. The estimated fair value of the other reporting unit evaluated for impairment using a quantitative assessment during the year ended December 31, 2023 was in excess of 198% of its carrying value, and therefore no impairment was recorded for that reporting unit. There were goodwill impairment charges of \$6 million recorded during the year ended December 31, 2021 and none during the year ended December 31, 2022. If management used different estimates and assumptions in its impairment tests, then impairment charges recorded could differ materially. Investments in Affiliates Description: The Company applies the equity method of accounting for investments over which the Company has the ability to exercise significant influence, including its 22.5% investment in Wilmar. These investments in affiliates are carried at cost plus equity in undistributed earnings and are adjusted, where appropriate, for amortizable basis differences between the investment balance and the underlying net assets of the investee. Judgments and Uncertainties: Generally, the minimum ownership threshold for asserting significant influence is 20% ownership of the investee. However, the Company considers all relevant factors in determining its ability to assert significant influence including but not limited to, ownership percentage, board membership, customer and vendor relationships, and other arrangements. The Company also periodically compares the book value of its investment in Wilmar against its market value as determined through quoted market prices, and evaluates any potential other than temporary impairment based on the near-term prospects of Wilmar in relation to the severity and duration of the decline in fair value and the Company's intent and ability to retain its investment in Wilmar. Sensitivity of Estimate to Change: If management used a different accounting method for these investments, then the amount of earnings from affiliates the Company recognizes may differ. If management used different assumptions in the evaluation of its Wilmar investment, then the amount of any impairment

charges could differ materially. 55 Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in: commodity market prices as they relate to the Company's net commodity position, foreign currency exchange rates, and interest rates as described below. Commodities The availability and prices of agricultural commodities are subject to wide fluctuations due to factors such as changes in weather conditions, crop disease, plantings, government programs and policies, competition, changes in global demand, changes in customer preferences and standards of living, and global production of similar and competitive crops. The Company manages its exposure to adverse price movements of agricultural commodities used for, and produced in, its business operations, by entering into derivative and non-derivative contracts which reduce the Company's overall short or long commodity position. Additionally, the Company uses exchange-traded futures and exchange-traded and over-the-counter option contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded commodities futures contracts and the cash prices of the underlying commodities, counterparty contract defaults, and volatility of freight markets. In addition, the Company, from time-to-time, enters into derivative contracts which are designated as hedges of specific volumes of commodities that will be purchased and processed, or sold, in a future month. The changes in the market value of such futures contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed designated hedging transactions are deferred in other comprehensive income, net of applicable taxes, and recognized as a component of cost of products sold or revenues in the statement of earnings when the hedged item is recognized. The Company's commodity position consists of merchandisable agricultural commodity inventories, related purchase and sales contracts, energy and freight contracts, and exchange-traded futures and exchange-traded and over-the-counter option contracts including contracts used to hedge anticipated transactions. The fair value of the Company's commodity position is a summation of the fair values calculated for each commodity by valuing all of the commodity positions at quoted market prices for the period, where available, or utilizing a close proxy. The Company has established metrics to monitor the amount of market risk exposure, which consist of volumetric limits, and value-at-risk (VaR) limits. VaR measures the potential loss, at a 95% confidence level, that could be incurred over a one year period. Volumetric limits are monitored daily and VaR calculations and sensitivity analysis are monitored weekly. In addition to measuring the hypothetical loss resulting from an adverse two standard deviation move in market prices (assuming no correlations) over a one year period using VaR, sensitivity analysis is performed measuring the potential loss in fair value resulting from a hypothetical 10% adverse change in market prices. The highest, lowest, and average weekly position for the years ended December 31, 2023 and 2022 together with the market risk from a hypothetical 10% adverse price change is as follows:

	December 31, 2023	December 31, 2022	Long/(Short)	Fair Value	Market Risk	Fair Value	Market Risk
(In millions)							
Highest position	\$ 498	\$ 50	\$ 986	\$ 99			
Lowest position	(6)	(1)	44	4			
Average position	125	13	388	39			

The change in fair value of the average position was due to the overall decrease in average quantities of certain commodities. Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued) Currencies The Company has consolidated subsidiaries in more than 70 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency except certain significant subsidiaries in Switzerland where Euro is the functional currency, and Brazil and Argentina where U.S. dollar is the functional currency. To

reduce the risks associated with foreign currency exchange rate fluctuations, the Company enters into currency exchange contracts to minimize its foreign currency position related to transactions denominated primarily in Euro, British pound, Canadian dollar, and Brazilian real currencies. These currencies represent the major functional or local currencies in which recurring business transactions occur. The Company also uses currency exchange contracts as hedges against amounts indefinitely invested in foreign subsidiaries and affiliates. The currency exchange contracts used are forward contracts, swaps with banks, exchange-traded futures contracts, and over-the-counter options. The changes in market value of such contracts have a high correlation to the price changes in the currency of the related transactions. The potential loss in fair value for such net currency position resulting from a hypothetical 10% adverse change in foreign currency exchange rates is not material. Effective April 1, 2022, the Company changed the functional currency of its Turkish entities to the U.S. dollar which did not have a material impact on the Company's consolidated financial statements. The amount the Company considers indefinitely invested in foreign subsidiaries and corporate joint ventures translated into dollars using the year-end exchange rates is \$15.5 billion and \$13.0 billion (\$17.9 billion and \$15.5 billion at historical rates) at December 31, 2023 and 2022, respectively. The increase is due to the increase in retained earnings of the foreign subsidiaries of \$2.4 billion and the appreciation of foreign currencies versus the U.S. dollar of \$0.1 billion. The potential loss in fair value, which would principally be recognized in Other Comprehensive Income, resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates is \$1.8 billion and \$1.6 billion for December 31, 2023 and 2022, respectively. Actual results may differ. Interest The fair value of the Company's long-term debt is estimated using quoted market prices, where available, and discounted future cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Market risk is estimated as the potential increase in fair value resulting from a hypothetical 50 basis points decrease in interest rates. Actual results may differ. December 31, 2023 December 31, 2022 (In millions) Fair value of long-term debt \$ 8,557 \$ 7,502 Fair value amount over (under) carrying value 298 (232) Market risk 378 342 The increase in the fair value of long-term debt at December 31, 2023 is due to a new debt issuance and a decrease in corporate bond interest rates. 57

63 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements Note 1. Summary of Significant Accounting Policies Nature of Business ADM unlocks the power of nature to enrich the quality of life for people and animals. ADM's innovation and expertise are helping people live healthier lives and support a healthier planet. The Company's globally-integrated footprint combined with local insight give ADM capabilities few other companies have to meet critical and global needs. With a foundation in nature and nutrition, the Company is a leader in sustainability, scaling across entire value chains to help decarbonize the industry, and safeguard the planet. ADM has three business segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. The Company is an essential global agricultural supply chain manager and processor supporting food security by connecting local needs with global capabilities. Principles of Consolidation The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany accounts and transactions have been eliminated. The Company consolidates all entities, including variable interest entities (VIEs), in which it has a controlling financial interest. For VIEs, the Company assesses whether it is the primary beneficiary as defined under the applicable accounting standard. Investments in affiliates, including VIEs through which the Company exercises significant influence but does not control the investee and is not the primary beneficiary of the investee's activities, are carried at cost plus equity in undistributed earnings since acquisition and are adjusted, where appropriate, for basis differences between the investment balance and the underlying net assets of the investee. The Company's portion of the results of certain affiliates and results of certain VIEs are included using the most recent available financial statements.

In each case, the financial statements are within 93 days of the Company's year-end and are consistent from period to period. Use of Estimates The preparation of consolidated financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect amounts reported in its consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Cash Equivalents The Company considers all non-segregated, highly-liquid investments with a maturity of three months or less at the time of purchase to be cash equivalents. Segregated Cash and Investments The Company segregates certain cash, cash equivalents, and investment balances in accordance with regulatory requirements, commodity exchange requirements, and insurance arrangements. These balances represent deposits received from customers of the Company's registered futures commission merchant and commodity brokerage services, cash margins and securities pledged to commodity exchange clearinghouses, and cash pledged as security under certain insurance arrangements. Segregated cash and investments also include restricted cash collateral for the various insurance programs of the Company's captive insurance business. To the degree these segregated balances are comprised of cash and cash equivalents, they are considered restricted cash and cash equivalents on the statement of cash flows. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 1. Summary of Significant Accounting Policies (Continued) Receivables The Company records accounts receivable at net realizable value. This value includes an allowance for estimated uncollectible accounts to reflect any loss anticipated on the accounts receivable balances including any accrued interest receivables thereon. The Company estimates uncollectible accounts by pooling receivables according to type, region, credit risk rating, and age. Each pool is assigned an expected loss co-efficient to arrive at a general reserve based on historical write-offs adjusted, as needed, for regional, economic, and other forward-looking factors. The Company minimizes credit risk due to the large and diversified nature of its worldwide customer base. ADM manages its exposure to counter-party credit risk through credit analysis and approvals, credit limits, and monitoring procedures. Long-term receivables recorded in other assets were not material to the Company's overall receivables portfolio. The Company recorded bad debt expense in selling, general, and administrative expenses of \$6 million, \$88 million, and \$32 million in the years ended December 31, 2023, 2022, and 2021, respectively. Changes to the allowance for estimated uncollectible accounts are as follows: Year Ended December 31 2023 2022 (In millions) Beginning, January 1 \$ 199 \$ 122 Current year provisions 6 88 Recoveries 2 2 Write-offs against allowance (28) (12) Foreign exchange translation adjustment — (2) Other 36 1 Ending, December 31 \$ 215 \$ 199 Current year provisions in the year ended December 31, 2023 is net of reversals of prior year general provisions for economic factors related to the pandemic and provision for a certain customer. Write-offs against allowance in the year ended December 31, 2023 were related to a customer in Brazil and allowance on receivables that were subsequently sold in the current year. Other in the year ended December 31, 2023 is due primarily to reclassifications. Inventories Certain merchandisable agricultural commodity inventories, which include inventories acquired under deferred pricing contracts, are stated at market value. In addition, the Company values certain inventories using the first-in, first-out (FIFO) method at the lower of cost or net realizable value. The following table sets forth the Company's inventories as of December 31, 2023 and 2022. December 31, 2023 December 31, 2022 (In millions) Raw materials and supplies \$ 5,475 \$ 6,975 Finished goods 6,482 7,796 Total inventories \$ 11,957 \$ 14,771 Included in raw materials and supplies are work in process inventories which were not material as of December 31, 2023 and 2022. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 1. Summary of Significant Accounting Policies (Continued) Fair Value Measurements The Company

determines fair value based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company uses the market approach valuation technique to measure the majority of its assets and liabilities carried at fair value. Three levels are established within the fair value hierarchy that may be used to report fair value: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data. Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. In evaluating the significance of fair value inputs, the Company generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. Judgment is required in evaluating both quantitative and qualitative factors in the determination of significance for purposes of fair value level classification. Level 3 amounts can include assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as assets and liabilities for which the determination of fair value requires significant management judgment or estimation. Based on historical experience with the Company's suppliers and customers, the Company's own credit risk and knowledge of current market conditions, the Company does not view nonperformance risk to be a significant input to fair value for the majority of its forward commodity purchase and sale contracts. However, in certain cases, if the Company believes the nonperformance risk to be a significant input, the Company records estimated fair value adjustments, and classifies the measurement in Level 3. In many cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of input that is a significant component of the fair value measurement determines the placement of the entire fair value measurement in the hierarchy. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels. The Company's policy regarding the timing of transfers between levels, including both transfers into and transfers out of Level 3, is to measure and record the transfers at the end of the reporting period. Derivatives The Company recognizes all of its derivative instruments as either assets or liabilities at fair value in its consolidated balance sheet. Unrealized gains are reported as other current assets and unrealized losses are reported as accrued expenses and other payables. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and on the type of hedging relationship. The majority of the Company's derivatives have not been designated as hedging instruments, and as such, changes in fair value of these derivatives are recognized in earnings immediately. For those derivative instruments that are designated and qualify as hedging instruments, the Company designates the hedging instrument, based upon the exposure being hedged, as a cash flow hedge or a net investment hedge. For derivative instruments that are designated and qualify as highly-effective cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the gain or loss on the derivative instrument is reported as a component of accumulated other comprehensive income (loss) (AOCI) and as an operating activity in the statement of cash flows and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. Hedge components excluded from the assessment of

effectiveness and gains and losses related to discontinued hedges are recognized in the consolidated statement of earnings during the current period. For derivative instruments that are designated and qualify as net investment hedges, foreign exchange gains and losses related to changes in foreign currency exchange rates are deferred in AOCI until the underlying investment is divested.

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 1.

Summary of Significant Accounting Policies (Continued) Cost Method Investments Cost method

investments of \$438 million and \$488 million as of December 31, 2023 and 2022, respectively, are included in Other Assets in the Company's consolidated balance sheets. Revaluation losses of \$76

million for the year ended December 31, 2023 were related to investments in the alternative protein category and precision fermentation. Revaluation gains of \$37 million and \$49 million for the years ended December 31, 2022 and 2021, respectively, were in connection with observable third-party

transactions (a level 2 measurement under applicable accounting standards). Revaluation gains and losses are recorded in interest and investment income in the Company's consolidated statements of earnings. As of December 31, 2023, the cumulative amounts of upward and downward adjustments

were \$113 million and \$76 million, respectively. Property, Plant, and Equipment Property, plant, and equipment are recorded at cost. Repair and maintenance costs are expensed as incurred. The

Company uses the straight-line method in computing depreciation for financial reporting purposes and generally uses accelerated methods for income tax purposes. The annual provisions for

depreciation have been computed principally in accordance with the following ranges of asset lives: buildings - 15 to 40 years; machinery and equipment - 3 to 40 years. The Company capitalized interest

on major construction projects in progress of \$ 32 million, \$20 million, and \$17 million for the years ended December 31, 2023, 2022, and 2021, respectively. Income Taxes The Company accounts for

income taxes in accordance with the liability method. Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and reported amounts in the

consolidated financial statements using statutory rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is

recorded in the results of operations in the period that includes the enactment date under the law. Applicable accounting standards prescribe a minimum threshold a tax position is required to meet

before being recognized in the consolidated financial statements. The Company recognizes in its consolidated financial statements tax positions determined more likely than not to be sustained upon

examination, based on the technical merits of the position. The Company classifies interest on income tax-related balances as interest expense and classifies tax-related penalties as selling, general, and

administrative expenses. Income tax effects from AOCI are released when the individual units of account are sold, terminated, or extinguished. Goodwill and other intangible assets Goodwill and

other intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests. Definite-lived intangible assets, including capitalized expenses related to the

Company's 1ADM program such as third-party configuration costs and internal labor, are amortized over their estimated useful lives of 1 to 50 years and are reviewed for impairment whenever there are

indicators the carrying value of the assets may not be fully recoverable. The Company's accounting policy is to evaluate goodwill and other intangible assets with indefinite lives for impairment on

October 1 of each fiscal year or whenever there are indicators the carrying value of the assets may not be fully recoverable. The Company recorded impairment charges totaling \$201 million related to

goodwill, customer list, and discontinued animal nutrition trademarks, \$ 2 million related to customer list, and \$52 million related to goodwill and other intangibles during the years ended December 31,

2023, 2022, and 2021, respectively (see Note 9 for additional information). Archer-Daniels-Midland

Company Notes to Consolidated Financial Statements (Continued) Note 1. Summary of Significant Accounting Policies (Continued) The goodwill impairment charge recorded during the year ended December 31, 2023 of \$ 137 million was related to the Animal Nutrition reporting unit that was evaluated for impairment using a quantitative assessment. The Company utilized a third-party valuation specialist to assist management in determining the fair value of the Animal Nutrition reporting unit. The fair value of the Animal Nutrition reporting unit was estimated based on a combination of discounted cash flows (income approach) and the use of pricing multiples derived from an analysis of comparable public companies multiplied against historical and or anticipated financial metrics (market approach). As a result of the impairment testing in the fourth quarter of 2023, the Company determined the fair value of the Animal Nutrition reporting unit was below its carrying value. The decline in the fair value of the Animal Nutrition reporting unit was primarily driven by a higher discount rate due to changes in the underlying business performance and industry conditions as well as the macroeconomic environment, causing a decline in projected cash flows.

Asset Abandonments and Write-Downs The Company evaluates long-lived assets for impairment whenever indicators of impairment exist. In addition, assets are written down to fair value after consideration of the Company's ability to utilize the assets for their intended purpose, employ the assets in alternative uses, or sell the assets to recover the carrying value. Fair value is generally based on discounted cash flow analysis which relies on management's estimate of market participant assumptions or estimated selling price for assets considered held for sale (a Level 3 measurement under applicable accounting standards). During 2023, 2022 and 2021, the Company temporarily idled certain assets which were not material. During the years ended December 31, 2023, 2022, and 2021, asset abandonment and impairment charges were \$108 million, \$35 million, and \$73 million, respectively.

Payables to Brokerage Customers Payables to brokerage customers represent the total of customer accounts at the Company's futures commission merchant with credit or positive balances. Customer accounts are used primarily in connection with commodity transactions and include gains and losses on open commodity trades as well as securities and other deposits made for margins or other purposes as required by the Company or the exchange-clearing organizations or counterparties. Payables to brokerage customers have a corresponding balance in segregated cash and investments and customer omnibus receivable in other current assets.

Revenues The Company follows a policy of recognizing revenue at a single point in time when it satisfies its performance obligation by transferring control over a product or service to a customer. For transportation service contracts, the Company recognizes revenue over time as the mode of transportation moves towards its destination in accordance with the transfer of control guidance of ASC Topic 606, Revenue from Contracts with Customers ("Topic 606"). For physically settled derivative sales contracts that are outside the scope of Topic 606, the Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606 as required by ASC 610-20, Gains and Losses from the Derecognition of Nonfinancial Assets ("Topic 610-20").

Stock Compensation The Company recognizes expense for its stock compensation based on the fair value of the awards that are granted. The Company's stock compensation plans provide for the granting of restricted stock, restricted stock units, performance stock units, and stock options. The fair values of stock options and performance stock units are estimated at the date of grant using the Black-Scholes option valuation model and a lattice valuation model, respectively. These valuation models require the input of subjective assumptions. Measured compensation cost, net of forfeitures, is recognized ratably over the vesting period of the related stock compensation award.

Research and Development Costs associated with research and development are expensed as incurred and recorded within selling, general, and administrative expenses. Such

costs incurred, net of expenditures subsequently reimbursed by government grants, were \$256 million, \$216 million, and \$171 million for the years ended December 31, 2023, 2022, and 2021, respectively. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 1. Summary of Significant Accounting Policies (Continued) Per Share Data Basic earnings per common share are determined by dividing net earnings attributable to controlling interests by the weighted average number of common shares outstanding. In computing diluted earnings per share, average number of common shares outstanding is increased by common stock options outstanding with exercise prices lower than the average market price of common shares using the treasury share method. Business Combinations The Company's acquisitions are accounted for in accordance with ASC Topic 805, Business Combinations, as amended. The consideration transferred is allocated to various assets acquired and liabilities assumed at their estimated fair values as of the acquisition date with the residual allocated to goodwill. Fair values allocated to assets acquired and liabilities assumed in business combinations require management to make significant judgments, estimates, and assumptions, especially with respect to intangible assets. Management makes estimates of fair values based upon assumptions it believes to be reasonable. These estimates are based upon historical experience and information obtained from the management of the acquired companies and are inherently uncertain. The estimated fair values related to intangible assets primarily consist of customer relationships, trademarks, and developed technology which are determined primarily using discounted cash flow models. Estimates in the discounted cash flow models include, but are not limited to, certain assumptions that form the basis of the forecasted results (e.g. revenue growth rates, customer attrition rates, and royalty rates). These significant assumptions are forward looking and could be affected by future economic and market conditions. During the measurement period, which may take up to one year from the acquisition date, adjustments due to changes in the estimated fair value of assets acquired and liabilities assumed may be recorded as adjustments to the consideration transferred and the related allocations. Upon the conclusion of the measurement period or the final determination of the values of assets acquired and liabilities assumed, whichever comes first, any such adjustments are charged to the consolidated statements of earnings. Redeemable Noncontrolling Interest The Company accounts for any redeemable noncontrolling interest in temporary equity - redeemable noncontrolling interest at redemption value with periodic changes recorded in retained earnings. Operations in Ukraine and Russia ADM employs approximately 630 people in Ukraine and operates an oilseeds crushing plant, a grain port terminal, inland and river silos, and a trading office. The Company's footprint in Russia is limited to operations related to the production and transport of essential food commodities and ingredients. As a result of the ongoing conflict in Ukraine, the Company reviewed the valuation of its assets and concluded that as of December 31, 2023, receivables, net of allowances, are deemed collectible and market inventories are valued appropriately. The Company also evaluated the impact of Russia's announcement of its purported annexation of four Ukrainian regions on the valuation of ADM's assets in those regions and concluded the assets are appropriately valued. As the conflict in Ukraine evolves, the Company will continue to review the valuation of these assets and make any required adjustments, which are not expected to be material to the Company's consolidated financial statements. New Accounting Standards Effective January 1, 2023, the Company adopted the amended guidance of Accounting Standards Codification (ASC) Topic 805, Business Combinations, which improves comparability for both the recognition and measurement of acquired revenue contracts with customers at the date of and after a business combination. The amended guidance requires an entity (acquirer) to recognize and measure contract assets and contract liabilities acquired in a business

combination in accordance with ASC Topic 606, Revenue from Contracts with Customers , (Topic 606). The Company's adoption of this amended guidance did not have an impact on its consolidated financial statements. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 1. Summary of Significant Accounting Policies (Continued) Effective January 1, 2023, the Company adopted the amended guidance of ASC Subtopic 405-50, Liabilities - Supplier Finance Programs, which enhances the transparency of supplier finance programs. The amended guidance requires an entity (buyer) in a supplier finance program to disclose sufficient information about the program to allow a user of financial statements to understand the program's nature, activity during the period, changes from period to period, and potential magnitude. ADM has Supplier Payable Programs ("SPP") with financial institutions which act as its paying agents for payables due to certain of its suppliers. The Company has neither an economic interest in a supplier's participation in the SPP nor a direct financial relationship with the financial institutions, and has concluded its obligations to the suppliers, including amounts due and scheduled payment terms, are not impacted by their participation in the SPP . Accordingly, amounts associated with the SPP continue to be classified in current liabilities in the Company's consolidated balance sheet and in operating activities in its consolidated statement of cash flows. The supplier invoices that have been confirmed as valid under the program require payment in full generally within 90 days of the invoice date. As of December 31, 2023 and 2022, the Company's outstanding payment obligations suppliers had elected to sell to the financial institutions were \$274 million and \$196 million, respectively. Changes to the outstanding payment obligations are as follows: Year Ended December 31 2023 (In millions) Beginning, January 1 \$ 196 Obligations confirmed 1,100 Obligations paid (1,022) Ending, December 31 \$ 274 Through December 31, 2024, the Company has the option to adopt the amended guidance of ASC Topic 848, Reference Rate Reform, which provides optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by the reference rate reform if certain criteria are met. The amendments apply only to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of the reference rate reform. The expedients and exceptions provided by the amended guidance do not apply to contract modifications made and hedging relationships entered into or evaluated after December 31, 2024, except for hedging relationships existing as of December 31, 2024, that an entity has elected certain optional expedients for and are retained through the end of the hedging relationship. The Company's adoption of the amended guidance will not have an impact on its consolidated financial statements. Effective December 31, 2024, the Company will be required to adopt the amended guidance of ASC 280, Segment Reporting, which improves disclosures about a public entity's reportable segments and addresses requests from investors and other allocators of capital for more detailed information about a reportable segment's expenses. The amended guidance improves reportable segment disclosure requirements primarily through enhanced disclosures about significant segment expenses and permits entities to disclose more than one measure of a reportable segment's profitability used by the Chief Operating Decision Maker. The adoption of the amended guidance will result in expanded disclosures in the Company's segment and geographic information footnote but will not have an impact on the consolidated financial statements. Effective December 31, 2025, the Company will be required to adopt the amended guidance of ASC 740, Income Taxes, which enhances the transparency and decision usefulness of income tax disclosures. The amendments address investor requests for more transparency about income tax information through improvements to income tax disclosures primarily related to the rate reconciliation and income taxes paid information. The adoption of the amended guidance will result in expanded disclosures in the

Company's income taxes footnote but will not have an impact on the consolidated financial statements. 70 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 2. Revenues Revenue Recognition The Company principally generates revenue from merchandising and transporting agricultural commodities, and manufacturing products for use in food, beverages, feed, energy, and industrial applications, and ingredients and solutions for human and animal nutrition. Revenue is measured based on the consideration specified in the contract with a customer. The Company follows a policy of recognizing revenue at a single point in time when it satisfies its performance obligation by transferring control over a product or service to a customer. The majority of the Company's contracts with customers have one performance obligation and a contract duration of one year or less. The Company applies the practical expedient in paragraph 10-50-14 of Topic 606 and does not disclose information about remaining performance obligations that have original expected durations of one year or less. For transportation service contracts, the Company recognizes revenue over time as the mode of transportation moves towards its destination in accordance with the transfer of control guidance of Topic 606. The Company recognized revenue from transportation service contracts of \$761 million, \$818 million, and \$606 million for the years ended December 31, 2023, 2022, and 2021, respectively. For physically settled derivative sales contracts that are outside the scope of Topic 606, the Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606 as required by ASC 610-20. Shipping and Handling Costs Shipping and handling costs related to contracts with customers for the sale of goods are accounted for as a fulfillment activity and are included in cost of products sold. Accordingly, amounts billed to customers for such costs are included as a component of revenues. Taxes Collected from Customers and Remitted to Governmental Authorities The Company does not include taxes assessed by governmental authorities that are (i) imposed on and concurrent with a specific revenue-producing transaction and (ii) collected from customers, in the measurement of transactions prices or as a component of revenues and cost of products sold. Contract Liabilities Contract liabilities relate to advance payments from customers for goods and services the Company has yet to provide. Contract liabilities of \$626 million and \$694 million as of December 31, 2023 and 2022, respectively, were recorded in accrued expenses and other payables in the consolidated balance sheet. Revenues recognized in the year ended December 31, 2023 from the December 31, 2022 contract liabilities were \$469 million. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 2. Revenues (Continued) Disaggregation of Revenues The following tables present revenue disaggregated by timing of recognition and major product lines for the years ended December 31, 2023, 2022, and 2021. (1) (1) (1) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 2. Revenues (Continued) Ag Services and Oilseeds The Ag Services and Oilseeds segment generates revenue from the sale of commodities, from service fees for the transportation of goods, from the sale of products manufactured in its global processing facilities, and from its structured trade finance activities. Revenue is measured based on the consideration specified in the contract. Revenue is recognized when a performance obligation is satisfied by transferring control over a product or providing service to a customer. For transportation service contracts, the Company recognizes revenue over time as the mode of transportation moves towards its destination in accordance with the transfer of control guidance of Topic 606. The amount of revenue recognized follows the contractually specified price which may include freight or other contractually specified cost components. For physically settled derivative sales contracts outside the scope of Topic 606, the Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606 as required by Topic 610-20. The Company engages in various structured trade finance activities to leverage its global trade flows whereby the Company obtains letters of credit (LCs) to guarantee payments on both global purchases and sales of grain. LCs guaranteeing payment on grain sales are sold on a non-recourse basis with no continuing involvement. The Company earns returns from the difference in interest rates between the LCs that guarantee payment on the underlying purchases and sales of grain given the differing risk profiles of the underlying transactions. The net return related to structured trade finance activities is included in revenue and is not significant for the years ended December 31, 2023, 2022, and 2021. Carbohydrate Solutions The Carbohydrate Solutions segment generates revenue from the sale of products manufactured at the Company's global corn and wheat milling facilities around the world. Revenue is recognized when control over products is transferred to the customer. Products are shipped to customers from the Company's various facilities and from its network of storage terminals. The amount of revenue recognized is based on the consideration specified in the contract which could include freight and other costs depending on the specific shipping terms of each contract. For physically settled derivative sales contracts outside the scope of Topic 606, the Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606 as required by Topic 610-20. Nutrition The Nutrition segment sells ingredients and solutions including plant-based proteins, natural flavors, flavor systems, natural colors, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, enzymes, botanical extracts, edible beans, formula feeds, animal health and nutrition products, pet food and treats, and other specialty food and feed ingredients.

Revenue is recognized when control over products is transferred to the customer. The amount of revenue recognized follows the contracted price or the mutually agreed price of the product. Freight and shipping are recognized as a component of revenue at the same time control transfers to the customer. Other Business Other Business includes the Company's futures commission business whose primary sources of revenue are commissions and brokerage income generated from executing orders and clearing futures contracts and options on futures contracts on behalf of its customers. Commissions and brokerage revenue are recognized on the date the transaction is executed. Other Business also includes the Company's captive insurance business which generates third party revenue through its proportionate share of premiums from third-party reinsurance pools. Reinsurance premiums are recognized on a straight-line basis over the period underlying the policy. 74

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 3. Acquisitions Fiscal year 2023 acquisitions During the year ended December 31, 2023, the Company acquired Prairie Pulse Inc., an 83% majority stake in Buckminster Química, and D.C.A. Finance B.V. for an aggregate cash consideration of \$25 million. The aggregate cash consideration of these acquisitions, net of \$2 million in cash acquired, was preliminarily allocated as follows: (In millions) Property, plant, and equipment \$ 18 Goodwill 20 Other long-term assets 2 Long-term liabilities (17) Aggregate cash consideration \$ 23 Fiscal year 2022 acquisitions During the year ended December 31, 2022, the Company acquired Kansas Protein Foods LLC for cash consideration of \$ 23 million. The cash consideration of this acquisition, net of \$1 million in cash acquired, was allocated as follows: (In millions) Property, plant, and equipment \$ 9 Goodwill 13 Cash consideration \$ 22 Fiscal year 2021 acquisitions During the year ended December 31, 2021, the Company's Nutrition segment acquired five businesses including, a 75% majority stake in U.S.-based PetDine, Pedigree Ovens, The Pound Bakery, and NutraDine (collectively, "P4"), premier providers of private label pet treats and supplements; Deerland Probiotics & Enzymes ("Deerland"), a leader in probiotic, prebiotic, and enzyme technology; and Sojaprotein, a leading European provider of non-GMO soy ingredients, for an aggregate consideration of \$1.6 billion using cash on hand. The aggregate cash consideration of these acquisitions, net of \$21 million in cash acquired, was allocated as follows. In 2022, the Company made immaterial adjustments to the purchase price allocations related to these acquisitions. These adjustments have been reflected in the table below. (In millions) P4 Deerland Sojaprotein Others Total Working capital \$ 11 \$ 27 \$ 35 \$ 7 \$ 80 Property, plant, and equipment 73 43 85 6 207 Goodwill 317 396 192 35 940 Other intangible assets 245 252 42 18 557 Other long-term assets — — 12 2 14 Long-term liabilities — (74) (10) — (84) Temporary equity - redeemable noncontrolling interest (150) — — (150) Aggregate cash consideration \$ 496 \$ 644 \$ 356 \$ 68 \$ 1,564 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 3. Acquisitions (Continued) The Company has the option to acquire the remaining 25% interest in P4 from December 31, 2023 to March 31, 2025, based on a fixed multiple of earnings before interest, taxes, depreciation, and amortization for the twelve months prior to the exercise of this option. The noncontrolling interest holders also have the option to put the 25% interest to the Company on the same terms. The Company records the 25% remaining interest in temporary equity - redeemable noncontrolling interest. Of the \$940 million allocated to goodwill, \$313 million is expected to be deductible for tax purposes. The 2021 acquisitions advance ADM's growth strategy by expanding the Company's capabilities in pet treat and supplements and the fast-growing global demand for plant-based proteins as well as capabilities in the high-value flavor segment and the fast growing demand for food, beverages, and supplements. The post-acquisition financial results of these acquisitions are reported in the Nutrition segment. The following table sets forth the fair values and the useful lives of the other

intangible assets acquired. Useful Lives P4 Deerland Sojaprotein Others Total (In years) (In millions)

Note 4. Fair Value Measurements The following tables set forth, by level, the Company's assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2023 and 2022. Fair Value Measurements at December 31, 2023 Quoted Prices in Active Markets for Identical Assets (Level 1) Significant Other Observable Inputs (Level 2) Significant Unobservable Inputs (Level 3) Total (In millions) Assets: Inventories carried at market \$ — \$ 4,274 \$ 2,713 \$ 6,987 Unrealized derivative gains: Commodity contracts — 628 731 1,359 Foreign exchange contracts — 187 — 187 Cash equivalents 209 — — 209 Segregated investments 1,362 — — 1,362 Total Assets \$ 1,571 \$ 5,089 \$ 3,444 \$ 10,104 Liabilities: Unrealized derivative losses: Commodity contracts \$ — \$ 500 \$ 457 \$ 957 Foreign exchange contracts — 144 — 144 Inventory-related payables — 1,219 101 1,320 Total Liabilities \$ — \$ 1,863 \$ 558 \$ 2,421

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 4. Fair Value Measurements (Continued) Fair Value Measurements at December 31, 2022 Quoted Prices in Active Markets for Identical Assets (Level 1) Significant Other Observable Inputs (Level 2) Significant Unobservable Inputs (Level 3) Total (In millions) Assets: Inventories carried at market \$ — \$ 6,281 \$ 2,760 \$ 9,041 Unrealized derivative gains: Commodity contracts — 796 541 1,337 Foreign currency contracts — 258 — 258 Interest rate contracts — 109 — 109 Cash equivalents 405 — — 405 Segregated investments 1,453 — — 1,453 Total Assets \$ 1,858 \$ 7,444 \$ 3,301 \$ 12,603 Liabilities: Unrealized derivative losses: Commodity contracts \$ — \$ 665 \$ 603 \$ 1,268 Foreign currency contracts — 275 — 275 Debt conversion option — — 6 6 Inventory-related payables — 1,181 89 1,270 Total Liabilities \$ — \$ 2,121 \$ 698 \$ 2,819

Estimated fair values of inventories and inventory-related payables stated at market are based on exchange-quoted prices, adjusted for differences in local markets and quality, referred to as basis. Market valuations for the Company's inventories are adjusted for location and quality (basis) because the exchange-quoted prices represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis adjustments are generally determined using inputs from competitor and broker quotations or market transactions and are considered observable. Basis adjustments are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact the movement of these basis adjustments. In some cases, the basis adjustments are unobservable because they are supported by little to no market activity. When unobservable inputs have a significant impact (more than 10%) on the measurement of fair value, the inventory is classified in Level 3. Changes in the fair value of inventories and inventory-related payables are recognized in the consolidated statements of earnings as a component of cost of products sold. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 4. Fair Value Measurements (Continued) Derivative contracts include exchange-traded commodity futures and options contracts, forward commodity purchase and sale contracts, and OTC instruments related primarily to agricultural commodities, energy, interest rates, and foreign currencies. Exchange-traded futures and options contracts are valued based on unadjusted quoted prices in active markets and are classified in Level 1. The majority of the Company's exchange-traded futures and options contracts are cash-settled on a daily basis and, therefore, are not included in these tables. Fair value for forward commodity purchase and sale contracts is estimated based on exchange-quoted prices adjusted for differences in local markets. Market valuations for the Company's forward commodity purchase and sale contracts are adjusted for

location (basis) because the exchange-quoted prices represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis adjustments are generally determined using inputs from competitor and broker quotations or market transactions and are considered observable. Basis adjustments are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact the movement of these basis adjustments. In some cases, the basis adjustments are unobservable because they are supported by little to no market activity. When observable inputs are available for substantially the full term of the contract, it is classified in Level 2. When unobservable inputs have a significant impact (more than 10%) on the measurement of fair value, the contract is classified in Level 3. Except for certain derivatives designated as cash flow hedges, changes in the fair value of commodity-related derivatives are recognized in the consolidated statements of earnings as a component of cost of products sold. Changes in the fair value of foreign currency-related derivatives are recognized in the consolidated statements of earnings as a component of revenues, cost of products sold, and other (income) expense - net, depending upon the purpose of the contract. The changes in the fair value of derivatives designated as effective cash flow hedges are recognized in the consolidated balance sheets as a component of AOCI until the hedged items are recorded in earnings or it is probable the hedged transaction will no longer occur. The Company's cash equivalents are comprised of money market funds valued using quoted market prices and are classified as Level 1. The Company's segregated investments are comprised of U.S. Treasury securities. U.S. Treasury securities are valued using quoted market prices and are classified in Level 1. The debt conversion option was the equity linked embedded derivative related to the exchangeable bonds. The fair value of the embedded derivative was included in long-term debt, with changes in fair value recognized as interest, and was valued with the assistance of a third-party pricing service (a level 3 measurement).

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 4. Fair Value Measurements (Continued) The following tables present a rollforward of the activity of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the years ended December 31, 2023 and 2022.

Level 3 Fair Value Assets Measurements at December 31, 2023

Inventories Carried at Market	Commodity	Derivative Contracts	Gains Total (In millions)
Balance, December 31, 2022	\$ 2,760	\$ 541	\$ 3,301
Total increase (decrease) in net realized/unrealized gains included in cost of products sold	432	1,460	1,892
Purchases	29,929	—	29,929
Sales	(30,038)	—	(30,038)
Settlements	(4)	(1,559)	(1,563)
Transfers into Level 3	1,584	371	1,955
Transfers out of Level 3	(82)	(2,032)	(2,114)
Ending balance, December 31, 2023	\$ 2,713	\$ 731	\$ 3,444

Includes increase in unrealized gains of \$2.1 billion relating to Level 3 assets still held at December 31, 2023.

Level 3 Fair Value Liabilities Measurements at December 31, 2023

Inventory-related Payables	Commodity Derivative Contracts	Losses Debt Conversion Option	Total (In millions)
Balance, December 31, 2022	\$ 89	\$ 603	\$ 692
Total increase (decrease) in net realized/unrealized losses included in cost of products sold and interest expense	5	1,303	(6)
Purchases	49	—	49
Settlements	(35)	(1,583)	(1,618)
Transfers into Level 3	1	157	158
Transfers out of Level 3	(8)	(23)	(31)
Ending balance, December 31, 2023	\$ 101	\$ 457	\$ 558

Includes increase in unrealized losses of \$1.3 billion relating to Level 3 liabilities still held at December 31, 2023.

(1) (1) (1) (1) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 4. Fair Value Measurements (Continued) Level 3 Fair Value Assets Measurements at December 31, 2022

Inventories Carried at Market	Commodity	Derivative Contracts	Gains Total (In millions)
Balance, December 31, 2021	\$ 3,004	\$ 460	\$ 3,464
Total increase (decrease) in net realized/unrealized gains included in cost of products sold	867	1,648	2,515

Purchases 49,735 — 49,735 Sales (50,414) — (50,414) Settlements — (1,672) (1,672) Transfers into Level 3 1,088 400 1,488 Transfers out of Level 3 (1,520) (295) (1,815) Ending balance, December 31, 2022 \$ 2,760 \$ 541 \$ 3,301 Includes increase in unrealized gains of \$2.7 billion relating to Level 3 assets still held at December 31, 2022. Level 3 Fair Value Liabilities Measurements at December 31, 2022 Inventory-related Payables Commodity Derivative Contracts Losses Debt Conversion Option Total (In millions) Balance, December 31, 2021 \$ 106 \$ 815 \$ 15 \$ 936 Total increase (decrease) in net realized/unrealized losses included in cost of products sold and interest expense 3 2,483 (9) 2,477 Purchases 183 — — 183 Sales (203) — — (203) Settlements — (2,844) — (2,844) Transfers into Level 3 — 401 — 401 Transfers out of Level 3 — (252) — (252) Ending balance, December 31, 2022 \$ 89 \$ 603 \$ 6 \$ 698 Includes increase in unrealized losses of \$2.5 billion relating to Level 3 liabilities still held at December 31, 2022. Transfers into Level 3 of assets and liabilities previously classified in Level 2 were due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts rising above the 10% threshold. Transfers out of Level 3 were primarily due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts falling below the 10% threshold and thus permitting reclassification to Level 2. (1) (1) (1) (1) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 4. Fair Value Measurements (Continued) In some cases, the price components that result in differences between exchange-traded prices and local prices for inventories and commodity purchase and sale contracts are observable based upon available quotations for these pricing components, and in some cases, the differences are unobservable. These price components primarily include transportation costs and other adjustments required due to location, quality, or other contract terms. In the table below, these other adjustments are referred to as basis. The following table sets forth the weighted average percentage of the unobservable price components included in the Company's Level 3 valuations as of December 31, 2023 and 2022. The Company's Level 3 measurements may include basis only, transportation cost only, or both price components. As an example, for Level 3 inventories with basis, the unobservable component as of December 31, 2023 is a weighted average 25.0% of the total price for assets and 33.2% of the total price for liabilities. Weighted Average % of Total Price December 31, 2023 December 31, 2022

Component Type	Assets	Liabilities	Assets	Liabilities
Inventories and Related Payables	25.0%	33.2%	19.4%	15.2%
Transportation cost	11.5%	—%	10.5%	—%
Commodity Derivative Contracts	24.2%	24.9%	22.7%	26.5%
Transportation cost	9.3%	3.2%	13.5%	3.7%

In certain of the Company's principal markets, the Company relies on price quotes from third parties to value its inventories and physical commodity purchase and sale contracts. These price quotes are generally not further adjusted by the Company in determining the applicable market price. In some cases, availability of third-party quotes is limited to only one or two independent sources. In these situations, absent other corroborating evidence, the Company considers these price quotes as 100% unobservable and, therefore, the fair value of these items is reported in Level 3. Note 5. Derivative Instruments & Hedging Activities Derivatives Not Designated as Hedging Instruments The majority of the Company's derivative instruments have not been designated as hedging instruments. The Company uses exchange-traded futures and exchange-traded and OTC options contracts to manage its net position of merchandisable agricultural product inventories and forward cash purchase and sales contracts to reduce price risk caused by market fluctuations in agricultural commodities and foreign currencies. The Company also uses exchange-traded futures and exchange-traded and OTC options contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded

commodities futures contracts and the value of the underlying commodities, counterparty contract defaults, and volatility of freight markets. Derivatives, including exchange traded contracts and forward commodity purchase or sale contracts, and inventories of certain merchandisable agricultural products, which include amounts acquired under deferred pricing contracts, are stated at fair value or market value. Inventory is not a derivative and therefore fair values of and changes in fair values of inventories are not included in the tables below. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 5. Derivative Instruments & Hedging Activities (Continued) The following table sets forth the fair value of derivatives not designated as hedging instruments as of December 31, 2023 and 2022. December 31, 2023 December 31, 2022 Assets Liabilities Assets Liabilities (In millions) Foreign Currency Contracts \$ 187 \$ 122 \$ 154 \$ 275 Commodity Contracts 1,343 957 1,337 1,248 Debt Conversion Option — — — 6 Total \$ 1,530 \$ 1,079 \$ 1,491 \$ 1,529 The following table sets forth the pre-tax gains (losses) on derivatives not designated as hedging instruments that have been included in the consolidated statements of earnings for the years ended December 31, 2023, 2022, and 2021. Cost of Other expense (income) - net products Interest (In millions) Revenues sold Expense For the Year Ended December 31, 2023 Consolidated Statement of Earnings \$ 93,935 \$ 86,422 \$ 647 \$ (176) Pre-tax gains (losses) on: Foreign Currency Contracts \$ (33) \$ 322 \$ — \$ 43 Commodity Contracts — 619 — — Debt Conversion Option — — 6 Total gain (loss) recognized in earnings \$ (33) \$ 941 \$ 6 \$ 43 \$ 957 For the Year Ended December 31, 2022 Consolidated Statement of Earnings \$ 101,556 \$ 93,986 \$ 396 \$ (358) Pre-tax gains (losses) on: Foreign Currency Contracts \$ (42) \$ 367 \$ — \$ 194 Commodity Contracts — (120) — — Debt Conversion Option — — 9 — Total gain (loss) recognized in earnings \$ (42) \$ 247 \$ 9 \$ 194 \$ 408 For the Year Ended December 31, 2021 Consolidated Statement of Earnings \$ 85,249 \$ 79,262 \$ 265 \$ (94) Pre-tax gains (losses) on: Foreign Currency Contracts \$ 3 \$ (140) \$ — \$ 189 Commodity Contracts — (1,606) — — Debt Conversion Option — — 19 — Total gain (loss) recognized in earnings \$ 3 \$ (1,746) \$ 19 \$ 189 \$ (1,535) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 5. Derivative Instruments & Hedging Activities (Continued) Changes in the market value of inventories of certain merchandisable agricultural commodities, inventory-related payables, forward cash purchase and sales contracts, exchange-traded futures, and exchange-traded and OTC options contracts are recognized in earnings immediately as a component of cost of products sold. Changes in the fair value of foreign currency-related derivatives are recognized in the consolidated statements of earnings as a component of revenues, cost of products sold, and other (income) expense - net depending on the purpose of the contract. Derivatives Designated as Cash Flow or Net Investment Hedging Instruments The Company had certain derivatives designated as cash flow and net investment hedges as of December 31, 2023 and 2022. For derivative instruments that are designated and qualify as highly-effective cash flow hedges (i.e., hedging the exposure to variability in expected future cash flow that is attributable to a particular risk), the gain or loss on the derivative instrument is reported as a component of AOCI and as an operating activity in the statement of cash flows and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. Hedge components excluded from the assessment of effectiveness and gains and losses related to discontinued hedges are recognized in the consolidated statement of earnings during the current period. Commodity Contracts For each of the hedge programs described below, the derivatives are designated as cash flow hedges. The changes in the market value of such derivative contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Once the hedged item is recognized in earnings, the gains and losses arising from the hedge are reclassified from AOCI

to either revenues or cost of products sold, as applicable. The Company uses futures or options contracts to hedge the purchase price of anticipated volumes of corn to be purchased and processed in a future month. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of corn. The Company's corn processing plants normally grind approximately 59 million bushels per month. During the past 12 months, the Company hedged between 18% and 34% of its monthly grind. At December 31, 2023, the Company had designated hedges representing between 4% to 28% of its anticipated monthly grind of corn for the next 12 months. The Company, from time to time, also uses futures, options, and swaps to hedge the sales price of certain ethanol sales contracts. The Company has established hedging programs for ethanol sales contracts that are indexed to unleaded gasoline prices and to various exchange-traded ethanol contracts. The objective of these hedging programs is to reduce the variability of cash flows associated with the Company's sales of ethanol. During the past 12 months and as of December 31, 2023, the Company had no hedges related to ethanol sales. The Company uses futures and options contracts to hedge the purchase price of anticipated volumes of soybeans to be purchased and processed in a future month for certain of its U.S. soybean crush facilities, subject to certain program limits. The Company also uses futures or options contracts to hedge the sales prices of anticipated soybean meal and soybean oil sales proportionate to the soybean crushing process at these facilities, subject to certain program limits. During the past 12 months, the Company hedged between 77% and 100% of the anticipated monthly soybean crush for soybean purchases and soybean meal and oil sales at the designated facilities. At December 31, 2023, the Company had designated hedges representing between 0% and 100% of the anticipated monthly soybean crush for soybean purchases and soybean meal and oil sales at the designated facilities over the next 12 months. The Company uses futures and OTC swaps to hedge the purchase price of anticipated volumes of natural gas consumption in a future month for certain of its facilities in North America and Europe, subject to certain program limits. During the past 12 months, the Company hedged between 54% and 85% of the anticipated monthly natural gas consumption at the designated facilities. At December 31, 2023, the Company had designated hedges representing between 38% and 64% of the anticipated monthly natural gas consumption over the next 12 months. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 5. Derivative Instruments & Hedging Activities (Continued) As of December 31, 2023 and 2022, the Company had after-tax gains of \$ 42 million and after-tax losses of \$ 17 million in AOCI, respectively, related to gains and losses from these programs. The Company expects to recognize \$42 million of the 2023 after-tax gains in its consolidated statement of earnings during the next 12 months. Interest Rate Contracts The Company used swap locks designated as cash flow hedges to hedge the changes in the forecasted interest payments due to changes in the benchmark rate leading up to future bond issuance dates. The terms of the swap locks matched the terms of the forecasted interest payments. The deferred gains and losses will be recognized in interest expense over the period in which the related interest payments will be paid. As of December 31, 2022, the Company executed swap locks maturing on various dates with an aggregate notional amount of \$400 million. During the quarter ended March 31, 2023, the Company unwound the swap locks in anticipation of the April 3, 2023 debt issuance. Foreign Currency Contracts The Company uses cross-currency swaps and foreign exchange forwards designated as net investment hedges to protect the Company's investment in a foreign subsidiary against changes in foreign currency exchange rates. The Company executed USD-fixed to Euro-fixed cross-currency swaps with an aggregate notional amount of \$0.8 billion as of December 31, 2023 and 2022, and foreign exchange forwards with an aggregate notional amount of \$2.1 billion and \$2.5 billion as of

December 31, 2023 and 2022, respectively. Amounts excluded from the assessment of hedge effectiveness are immaterial for all periods presented. As of December 31, 2023 and 2022, the Company had after-tax losses of \$ 5 million and after-tax gains of \$ 79 million in AOCI, respectively, related to foreign exchange gains and losses from net investment hedge transactions. The amount is deferred in AOCI until the underlying investment is divested. The following table sets forth the fair value of derivatives designated as hedging instruments as of December 31, 2023 and 2022.

	December 31, 2023	December 31, 2022
Assets	\$ 16	\$ —
Liabilities	\$ —	\$ 20
Total	\$ 16	\$ 20

Commodity Contracts — 109 — Foreign Currency Contracts — 22 104 — Total \$ 16 \$ 22

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 5. Derivative Instruments & Hedging Activities (Continued) The following table sets forth the pre-tax gains (losses) on derivatives designated as hedging instruments that have been included in the consolidated statement of earnings for the years ended December 31, 2023, 2022, and 2021.

	For the Year Ended December 31, 2023	For the Year Ended December 31, 2022	For the Year Ended December 31, 2021
Cost of products sold (In millions)	\$ 93,935	\$ 86,422	\$ 85,249
Revenues	\$ 86,422	\$ 101,556	\$ 79,262
Effective amounts recognized in earnings	\$ 322	\$ 322	\$ 1
Pre-tax gains (losses) on:			
Commodity Contracts	\$ —	\$ 322	\$ 351
Interest Rate Contracts	\$ 322	\$ 351	\$ 352
Total gain (loss) recognized in earnings	\$ 322	\$ 322	\$ 353

For the Year Ended December 31, 2022 Consolidated Statement of Earnings \$ 101,556 \$ 93,986 Effective amounts recognized in earnings Pre-tax gains (losses) on: Commodity Contracts \$ — \$ 351 Interest Rate Contracts 1 — Total gain (loss) recognized in earnings \$ 1 \$ 351 \$ 352

For the Year Ended December 31, 2021 Consolidated Statement of Earnings \$ 85,249 \$ 79,262 Effective amounts recognized in earnings Pre-tax gains (losses) on: Commodity Contracts \$ — \$ 490 Interest Rate Contracts (16) — Total gain (loss) recognized in earnings \$ (16) \$ 490 \$ 474

Other Net Investment Hedging Strategies The Company has designated €0.7 billion and €1.3 billion of its outstanding long-term debt and commercial paper borrowings at December 31, 2023 and 2022, respectively, as hedges of its net investment in a foreign subsidiary. As of December 31, 2023 and 2022, the Company had after-tax gains of \$212 million and \$228 million in AOCI, respectively, related to foreign exchange gains and losses from the net investment hedge transactions. The amount is deferred in AOCI until the underlying investment is divested.

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 6. Other Current Assets The following table sets forth the items in other current assets:

	December 31, 2023	December 31, 2022
Unrealized gains on derivative contracts	\$ 1,546	\$ 1,704
Margin deposits and grain accounts	560	723
Customer omnibus receivable	1,052	1,309
Financing receivables - net	237	235
Insurance premiums receivable	61	54
Prepaid expenses	445	443
Biodiesel tax credit	119	68
Tax receivables	491	616
Non-trade receivables	304	361
Other current assets	167	153
Total	\$ 4,982	\$ 5,666

The Company provides financing to suppliers, primarily Brazilian farmers, to finance a portion of the suppliers' production costs. The amounts are reported net of allowances of \$6 million and \$3 million at December 31, 2023 and 2022, respectively. Interest earned on financing receivables of \$21 million, \$15 million, and \$11 million for the years ended December 31, 2023, 2022, and 2021, respectively, is included in interest and investment income in the consolidated statements of earnings.

Note 7. Accrued Expenses and Other Payables The following table sets forth the items in accrued expenses and other payables:

	December 31, 2023	December 31, 2022
Unrealized losses on derivative contracts	\$ 1,101	\$ 1,543
Accrued compensation	439	475
Income tax payable	284	248
Other taxes payable	172	136
Insurance claims payable	73	223
Contract liability	626	694
Other accruals and payables	1,381	1,476
Total	\$ 4,076	\$ 4,795

(1) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 8. Investments in and Advances to Affiliates The Company applies the equity method of accounting for investments in investees over which ADM has the ability to exercise significant influence, including the

Company's 22.5% share ownership in Wilmar as of December 31, 2023 and 2022. As of December 31, 2023, the Company also holds equity method investments in Pacifcor (32.2%), Stratas Foods LLC (50.0%), Edible Oils Limited (50.0%), Olenex (37.5%), SoyVen (50.0%), Hungrana Ltd (50.0%), Almidones Mexicanos S.A. (50.0%), Aston Foods and Food Ingredients (50.0%), Red Star Yeast Company, LLC (40.0%), LSCP, LLLP (22.1%), Vimison S.A. de C.V. (45.3%), ADM Matsutani LLC (50%), Matsutani Singapore Pte. Ltd. (50%), ADM Vland Biotech Shandong Co., Ltd. (50%), Dusial S.A. (42.8%), and Vitafort ZRT (34.3%). The Company had 73 and 67 unconsolidated domestic and foreign affiliates as of December 31, 2023 and 2022, respectively. The following table summarizes the combined balance sheets as of December 31, 2023 and 2022, and the combined statements of earnings of the Company's unconsolidated affiliates for the years ended December 31, 2023, 2022, and 2021.

December 31 (In millions)	2023	2022
Current assets	\$ 41,032	\$ 41,407
Non-current assets	29,773	30,589
Current liabilities	(33,812)	(36,091)
Non-current liabilities	(8,973)	(9,300)
Noncontrolling interests	(2,489)	(2,641)
Net assets	\$ 25,531	\$ 23,964

Year Ended December 31 (In millions)

2023	2022	2021	
Revenues	\$ 85,754	\$ 109,448	\$ 87,528
Gross profit	4,261	8,946	7,719
Net income	2,452	3,140	2,315

The Company's share of the undistributed earnings of its unconsolidated affiliates as of December 31, 2023 is \$ 5.9 billion. The Company's investment in Wilmar has a carrying value of \$4.1 billion as of December 31, 2023, and a market value of \$ 3.8 billion based on quoted market price converted to U.S. dollars at the applicable exchange rate at December 31, 2023. The Company evaluated the near-term prospects of Wilmar in relation to the severity and duration of the decline in fair value. Based on that evaluation, the Company does not consider the investment to be other-than-temporarily impaired at December 31, 2023. The Company provides credit facilities totaling \$ 121 million to six unconsolidated affiliates. One facility that bears interest at 5.97% has an outstanding balance of \$2 million while the other five facilities have no outstanding balance as of December 31, 2023. The outstanding balance is included in other current assets in the accompanying consolidated balance sheet. Net sales to unconsolidated affiliates during the years ended December 31, 2023, 2022, and 2021 were \$ 7.0 billion, \$7.8 billion, and \$6.6 billion, respectively. Accounts receivable due from unconsolidated affiliates as of December 31, 2023 and 2022 was \$ 167 million and \$286 million, respectively.

87 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 9. Goodwill and Other Intangible Assets Goodwill balances attributable to consolidated businesses, by segment, are set forth in the following table.

December 31, 2023	December 31, 2022
(In millions)	(In millions)
Ag Services and Oilseeds	\$ 235
Carbohydrate Solutions	224
Nutrition	3,640
Other Business	4 14
Total	\$ 4,103
	\$ 4,162

The changes in goodwill during the year ended December 31, 2023 were primarily related to impairment of \$ 137 million in the Animal Nutrition reporting unit of Nutrition, partially offset by an increase due to an acquisition of \$20 million principally in the Ag Services and Oilseeds segment and foreign currency translation gains of \$65 million primarily in the Nutrition segment. As of December 31, 2023 and 2022, accumulated amortization loss was \$156 million and \$19 million, respectively. The following table sets forth the other intangible assets:

December 31, 2023	December 31, 2022
Useful	Gross
Accumulated	Gross
Accumulated	Life
Amount	Amortization
Net	Amount
Amortization	Net
(In years)	(In millions)

Intangible assets with indefinite lives: Trademarks/brands \$ 375 \$ — \$ 375 \$ 397 \$ — \$ 397 Other 58 — 58 — —

Intangible assets with definite lives: Trademarks/brands 5 to 20 53 (35) 18 70 (28) 42 Customer lists 1 to 30 1,544 (627) 917 1,544 (542) 1,002 Capitalized software and related costs 5 to 8 950 (523) 427 721 (449) 272 Land rights 2 to 50 107 (30) 77 109 (25) 84 Other intellectual property 6 to 20 211 (135) 76 228 (112) 116 Recipes and other 1 to 35 511 (304) 207 547 (274) 273 Intangible assets in process 83 — 83 196 — 196 Total \$ 3,892 \$ (1,654) \$ 2,238 \$ 3,812 \$ (1,430) \$ 2,382

The changes in the gross

amounts during the year ended December 31, 2023 were primarily related to additions to capitalized software and related costs, net of the decrease in intangible assets in process and increases related to foreign currency translation of \$53 million, partially offset by impairments of \$64 million and reclassifications. The changes in accumulated amortization during the year ended December 31, 2023 were related to amortization expense and foreign currency translation of \$15 million, partially offset by reclassifications. Aggregate amortization expense was \$234 million, \$235 million, and \$177 million for the years ended December 31, 2023, 2022, and 2021, respectively, of which \$ 72 million, \$69 million, and \$33 million, respectively, were for amortization of capitalized software and related costs. The estimated future aggregate amortization expense for the next five years is \$338 million, \$345 million, \$337 million, \$330 million, and \$310 million, respectively.

88 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 10. Debt Financing Arrangements The Company's long-term debt consisted of the following:

Debt Instrument	Interest Rate	Face Amount	Due Date
December 31, 2023	December 31, 2022	(In millions)	
2.5% Notes	\$1 billion	2026	\$ 998
3.25% Notes	\$1 billion	2030	991
2.900% Notes	\$750 million	2032	744
2.700% Notes	\$750 million	2051	732
1% Notes	€650 million	2025	717
4.5% Notes	\$600 million	2049	589

6.45% Debentures	\$103 million	2038	102
1.750% Notes	€600 million	2023	—
0% Bonds	\$300 million	2023	—
Other	177	177	Total long-term debt including current maturities
	8,260	8,677	Current maturities (1)
	(942)		Total long-term debt
	\$ 8,259	\$ 7,735	

On April 3, 2023, the Company issued \$ 500 million aggregate principal amount of 4.500% Notes due August 15, 2033. Net proceeds before expenses were \$493 million. Proceeds from the borrowings were used for general corporate purposes. In June 2023, the Company redeemed €600 million aggregate principal amount of 1.750% Notes due 2023. In August 2023, the Company redeemed \$300 million aggregate principal amount of zero coupon exchangeable bonds due 2023.

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 10. Debt Financing Arrangements (Continued) During the year ended December 31, 2023, Archer Daniels Midland Singapore, Pte. Ltd., a wholly-owned subsidiary of the Company, increased its revolving credit facility from \$500 million to \$750 million at an interest rate of Secured Overnight Financing Rate plus a fixed spread. The facility is used to finance working capital requirements and for general corporate purposes. On February 28, 2022, the Company issued its first sustainability bond of \$ 750 million aggregate principal amount of 2.900% notes due March 1, 2032. Net proceeds before expenses were \$745 million. Proceeds from the borrowings were used to finance investments and expenditures in eligible green projects that contribute to environmental objectives and/or eligible social projects that aim to address or mitigate a specific social issue and/or seek to achieve positive social outcomes. In September 2022, the Company redeemed € 500 million aggregate principal amount of Fixed-to-Floating Rate Senior Notes due 2022 issued in a private placement on March 25, 2021. Discount amortization expense, net of premium amortization, of \$ 15 million, \$6 million, and \$10 million for the years ended December 31, 2023, 2022, and 2021, respectively, are included in interest expense related to the Company's long-term debt. At December 31, 2023, the fair value of the Company's long-term debt exceeded the carrying value by \$ 0.3 billion, as estimated using quoted market prices (a Level 2 measurement under applicable accounting standards). The aggregate

maturities of long-term debt for the five years after December 31, 2023, are \$ 1 million, \$718 million, \$999 million, \$251 million, and \$1 million, respectively. At December 31, 2023, the Company had lines of credit, including the accounts receivable securitization programs described below, totaling \$ 13.2 billion, of which \$11.5 billion was unused. The weighted average interest rates on short-term borrowings outstanding at December 31, 2023 and 2022, were 7.44% and 6.21%, respectively. Of the Company's total lines of credit, \$ 5.0 billion supported the combined U.S. and European commercial paper borrowing programs, against which there was \$5 million commercial paper outstanding at December 31, 2023. The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company is in compliance with these covenants as of December 31, 2023. The Company had outstanding standby letters of credit and surety bonds at December 31, 2023 and 2022, totaling \$ 1.6 billion. The Company has accounts receivable securitization programs (the "Programs"). The Programs provide the Company with up to \$ 3.0 billion in funding resulting from the sale of accounts receivable. As of December 31, 2023, the Company utilized \$1.6 billion of its facility under the Programs (see Note 19 for more information on the Programs). Note 11. Stock Compensation The Company's employee stock compensation plans provide for the granting of options to employees to purchase common stock of the Company pursuant to the Company's 2020 Incentive Compensation Plan. These options are issued at market value on the date of grant, vest incrementally over one year to five years, and expire ten years after the date of grant. The fair value of each option grant is estimated as of the date of grant using the Black-Scholes single option pricing model. The volatility assumption used in the Black-Scholes single option pricing model is based on the historical volatility of the Company's stock. The volatility of the Company's stock was calculated based upon the monthly closing price of the Company's stock for the period immediately prior to the date of grant corresponding to the average expected life of the grant. The average expected life represents the period of time that option grants are expected to be outstanding. The risk-free rate is based on the rate of U.S. Treasury zero-coupon issues with a remaining term equal to the expected life of option grants. No options were granted in 2023, 2022, and 2021. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 11. Stock Compensation (Continued) A summary of option activity during 2023 is presented below:

	Shares	Weighted-Average Exercise Price (In thousands, except per share amounts)
Shares under option at December 31, 2022	2,097	\$38.27
Exercised (483)	42.15	
Forfeited or expired —	0.00	
Shares under option at December 31, 2023	1,614	\$37.11
Exercisable at December 31, 2023	1,614	\$37.11

The weighted-average remaining contractual term of options outstanding and exercisable at December 31, 2023, is 2 years. The aggregate intrinsic value of options outstanding and exercisable at December 31, 2023, is \$59 million. The total intrinsic values of options exercised during the years ended December 31, 2023, 2022, and 2021, were \$20 million, \$117 million, and \$37 million, respectively. Cash proceeds received from options exercised during the years ended December 31, 2023, 2022, and 2021, were \$20 million, \$90 million, and \$64 million, respectively. At December 31, 2023, unrecognized compensation expense related to option grants to be recognized as compensation expense during the next year was immaterial. The Company's 2020 Incentive Compensation Plan provides for the granting of restricted stock and restricted stock units (Restricted Stock Awards) at no cost to certain officers and key employees. In addition, the Company's 2020 Incentive Compensation Plan also provides for the granting of performance stock units (PSUs) at no cost to certain officers and key employees. Restricted Stock Awards are made in common stock or stock units with equivalent rights and vest at the end of a

restriction period of three years. Starting with the February 2023 grant, Restricted Stock Awards have a three-year graded vesting schedule and vest at 33.33% each year. The awards for PSUs are made in common stock units and vest at the end of a vesting period of three years subject to the attainment of certain future service and performance criteria based on the Company's adjusted return on invested capital (ROIC) and adjusted earnings per share (EPS) with a modifier for gender parity and GHG emissions. During the years ended December 31, 2023, 2022, and 2021, 1.7 million, 2.3 million, and 2.7 million common stock or stock units, respectively, were granted as Restricted Stock Awards and PSUs. At December 31, 2023, there were 13.5 million shares available for future grants pursuant to the 2020 plan. The fair value of Restricted Stock Awards and PSUs is determined based on the market value of the Company's shares on the grant date. The weighted-average grant-date fair values of awards granted during the years ended December 31, 2023, 2022, and 2021 were \$78.90, \$70.13, and \$53.28, respectively. A summary of Restricted Stock Awards and PSUs activity during 2023 is presented below:

Restricted Stock Awards and PSUs Weighted Average Grant-Date Fair Value (In thousands, except per share amounts)	Non-vested at December 31, 2022	Granted	Vested	Forfeited	Non-vested at December 31, 2023
	6,408	\$57.22	1,663	78.90	(2,559)

				\$69.82	

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 11. Stock Compensation (Continued) At December 31, 2023, there was \$91 million of total unrecognized compensation expense related to Restricted Stock Awards and PSUs. Amounts to be recognized as compensation expense during the next three years are \$58 million, \$30 million, and \$3 million, respectively. The total grant-date fair value of Restricted Stock Awards that vested during the year ended December 31, 2023 was \$153 million. Compensation expense for option grants, Restricted Stock Awards, and PSUs granted to employees is generally recognized on a straight-line basis during the service period of the respective grant. Certain of the Company's option grants, Restricted Stock Awards, and PSUs continue to vest upon the recipient's retirement from the Company and compensation expense related to option grants and Restricted Stock Awards granted to retirement-eligible employees is recognized in earnings on the date of grant. Compensation expense for PSUs is based on the probability of meeting the performance criteria. The Company recognizes forfeitures as they occur. Total compensation expense for option grants, Restricted Stock Awards, and PSUs recognized during the years ended December 31, 2023, 2022, and 2021 was \$112 million, \$147 million, and \$161 million, respectively. Changes in incentive compensation expense are primarily caused by the level of attainment of the PSU performance criteria described above.

Note 12. Other (Income) Expense – Net The following table sets forth the items in other (income) expense: (In millions) Year Ended December 31

	2023	2022	2021
Gains on sale of assets	\$ (38)	\$ (78)	\$ (100)
Pension settlement	—	—	83
Other – net	(138)	(280)	(77)
	\$ (176)	\$ (358)	\$ (94)

Individually significant items included in the table above are: Gains on sale of assets for the year ended December 31, 2023 and 2022 consisted of gains on sales of certain assets and disposals of individually insignificant assets in the ordinary course of business. Gains on sale of assets for the year ended December 31, 2021 consisted of gains on the sale of the Company's ethanol production complex in Peoria, Illinois of \$22 million, the sale of certain other assets, and disposals of individually insignificant assets in the ordinary course of business. Pension settlement for the year ended December 31, 2021 was related to the purchase of group annuity contracts that irrevocably transferred the future benefit obligations and annuity administration for certain salaried and hourly retirees and terminated vested participants under the Company's ADM Retirement Plan and ADM Pension Plan for Hourly-Wage Employees to independent third parties. Other - net for the year ended December 31, 2023 included the non-service components of net pension benefit income of \$ 18 million, net foreign exchange gains of \$85 million, and net other income. Other - net for the year

ended December 31, 2022 included a legal recovery related to the 2019 and 2020 closure of the Company's export facility in Reserve, Louisiana of \$110 million, net foreign exchange gains of \$ 105 million, a \$50 million one-time payment from the USDA Biofuel Producer Recovery Program, and the non-service components of net pension benefit income of \$25 million, partially offset by net other expense. Other - net for the year ended December 31, 2021 included the non-service components of net pension benefit income of \$16 million, net foreign exchange gains of \$ 24 million, and net other income.

92 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 13. Income Taxes The following table sets forth the geographic split of earnings before income taxes: Year Ended (In millions) December 31 2023 2022 2021 United States \$ 1,844 \$ 2,725 \$ 2,140 Foreign 2,450 2,508 1,173 \$ 4,294 \$ 5,233 \$ 3,313 Significant components of income taxes are as follows: (In millions) Year Ended December 31 2023 2022 2021 Current Federal \$ 291 \$ 379 \$ 404 State 47 97 79 Foreign 513 481 224 Deferred Federal (52) 23 (59) State (10) 7 (12) Foreign 39 (119) (58) \$ 828 \$ 868 \$ 578 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 13. Income Taxes (Continued) Significant components of deferred tax liabilities and assets are as follows: December 31, 2023 December 31, 2022 (In millions) Deferred tax liabilities Property, plant, and equipment \$ 827 \$ 811 Intangibles 358 417 Right of use assets 263 237 Equity in earnings of affiliates 214 191 Inventory reserves — 11 Debt exchange 50 52 Reserves and other accruals 49 86 Other 137 108 \$ 1,898 \$ 1,913 Deferred tax assets Pension and postretirement benefits \$ 111 \$ 104 Inventories 20 — Lease liabilities 268 244 Stock compensation 42 51 Foreign tax loss carryforwards 494 496 Capital loss carryforwards 42 42 State tax attributes 25 21 Reserves and other accruals 5 22 Other 93 77 Gross deferred tax assets 1,100 1,057 Valuation allowances (216) (209) Net deferred tax assets \$ 884 \$ 848 Net deferred tax liabilities \$ 1,014 \$ 1,065 The net deferred tax liabilities are classified as follows: Noncurrent assets (foreign) \$ 295 \$ 337 Noncurrent liabilities (1,106) (1,183) Noncurrent liabilities (foreign) (203) (219) \$ (1,014) \$ (1,065) During 2023, the Company increased valuation allowances primarily related to net operating loss carryforwards.

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 13. Income Taxes (Continued) Reconciliation of the statutory federal income tax rate to the Company's effective income tax rate on earnings is as follows: Year Ended December 31 2023 2022 2021 Statutory rate 21.0 % 21.0 % 21.0 % State income taxes, net of federal tax benefit 0.9 1.4 1.5 Foreign earnings taxed at rates other than the U.S. statutory rate (0.2) (3.8) (2.8) Foreign currency effects/remeasurement 0.5 0.6 — Income tax adjustment to filed returns (0.4) (0.1) 0.7 Tax benefit on U.S. biodiesel credits (1.7) (1.2) (1.9) Tax benefit on U.S. railroad credits (1.5) (1.2) (2.0) U.S. tax on foreign earnings 1.2 0.2 — Valuation allowances (0.2) — 0.7 Other (0.3) (0.3) 0.2 Effective income tax rate 19.3 % 16.6 % 17.4 % The effective tax rates for 2023 and 2022 were impacted by the geographic mix of earnings. The effective tax rate for 2022 was also impacted by discrete tax items. The effective tax rate for 2021 was impacted by the geographic mix of earnings and U.S. tax credits, including the biodiesel tax credit and the railroad maintenance tax credit. ADM's operations in foreign jurisdictions accounted for 57%, 48%, and 35% of the Company's total pre-tax earnings in fiscal years 2023, 2022, and 2021, respectively. The foreign rate differential was primarily due to various tax rates applicable to the income earned from the Company's operations in Switzerland, Asia, South America and the Caribbean. On August 16, 2022, the U.S. government enacted the Inflation Reduction Act of 2022 ("Inflation Act"), which includes, among other provisions, changes to the U.S. corporate income tax system, including a 15% minimum tax based on "adjusted financial statement income," and a one percent excise tax on net repurchases of stock for tax years beginning after December 31, 2022. While the Inflation Act has no immediate impact and is not expected to have a material adverse effect on ADM's results of operations going

forward, the Company will continue to evaluate its impact as further information becomes available. Undistributed earnings of the Company's foreign subsidiaries and corporate joint ventures were approximately \$ 17.9 billion at December 31, 2023. Because these undistributed earnings continue to be indefinitely reinvested in foreign operations, no income taxes, other than the transition tax, the U.S. tax on undistributed Subpart F, and the minimum tax on Global Intangible Low Taxed Income (GILTI), have been provided after the Tax Cuts and Jobs Act (the "Act") was enacted on December 22, 2017. It is not practicable to determine the amount of unrecognized deferred tax liability related to any remaining undistributed earnings of foreign subsidiaries and corporate joint ventures not subject to the transition tax. The Company has elected to pay the one-time transition tax on accumulated foreign earnings over eight years. As of December 31, 2023, the Company's remaining transition tax liability was \$85 million, which will be paid in installments through 2025. The Company incurred U.S. taxable income of \$ 425 million, \$684 million, and \$244 million related to GILTI and deducted \$ 77 million, \$67 million, and \$87 million related to Foreign Derived Intangible Income Deduction in fiscal years 2023, 2022, and 2021 respectively. The Company made an accounting policy election to treat GILTI as a period cost. The Company has recorded and will continue to record the impact of tax reform items as U.S. tax authorities issue Treasury Regulations and other guidance addressing tax reform-related changes. The additional guidance, along with the potential for additional global tax legislation changes, may affect significant deductions and income inclusions and could have a material adverse effect on the Company's net income or cash flow. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 13. Income Taxes (Continued) The Company had \$494 million and \$496 million of tax assets related to net operating loss carryforwards of certain international subsidiaries at December 31, 2023 and 2022, respectively. As of December 31, 2023, approximately \$412 million of these assets have no expiration date, and the remaining \$82 million expire at various times through fiscal 2033. The annual usage of certain of these assets is limited to a percentage of taxable income of the respective foreign subsidiary for the year. The Company has recorded a valuation allowance of \$160 million and \$142 million against these tax assets at December 31, 2023 and 2022, respectively, due to the uncertainty of their realization. The Company had \$42 million of tax assets related to foreign capital loss carryforwards at December 31, 2023 and 2022. The Company has recorded a valuation allowance of \$42 million against these tax assets at December 31, 2023 and 2022 due to the uncertainty of their realization. The Company had \$25 million and \$21 million of tax assets related to state income tax attributes (incentive credits and net operating loss carryforwards), net of federal tax benefit, at December 31, 2023 and 2022, respectively, a majority of which will expire between 2024 and 2028. Due to the uncertainty of realization, the Company recorded a valuation allowance of \$14 million and \$15 million related to state income tax assets net of federal tax benefit as of December 31, 2023 and 2022, respectively. The change in the valuation allowance was related to the expiration of certain state income tax attributes which were fully reserved in prior years. The Company remains subject to federal examination in the U.S. for the calendar tax years 2018 through 2023. The following table sets forth a rollforward of activity of unrecognized tax benefits for the year ended December 31, 2023 and 2022 as follows:

	December 31, 2023	December 31, 2022
Beginning balance	\$ 151	\$ 157
Additions related to current year's tax positions	26	28
Additions related to prior years' tax positions	28	26
Additions (adjustments) related to acquisitions	—	11
Reductions related to lapse of statute of limitations	(6)	(6)
Settlements with tax authorities	(7)	(43)
Ending balance	\$ 168	\$ 151

The additions and reductions in unrecognized tax benefits shown in the table included effects related to net income and shareholders' equity. The changes in unrecognized tax benefits did not have a material effect on

the Company's net income or cash flow. At December 31, 2023 and 2022, the Company had accrued interest and penalties on unrecognized tax benefits of \$52 million and \$39 million, respectively. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 13. Income Taxes (Continued) The Company is subject to income taxation and routine examinations in many jurisdictions around the world and frequently faces challenges regarding the amount of taxes due. These challenges include positions taken by the Company related to the timing, nature, and amount of deductions and the allocation of income among various jurisdictions. In its routine evaluations of the exposure associated with various tax filing positions, the Company recognizes a liability, when necessary, for estimated potential tax owed by the Company in accordance with applicable accounting standards. Resolution of the related tax positions, through negotiations with relevant tax authorities or through litigation, may take years to complete. Therefore, it is difficult to predict the timing for resolution of tax positions and the Company cannot predict or provide assurance as to the ultimate outcome of these ongoing or future examinations. However, the Company does not anticipate that the total amount of unrecognized tax benefits will increase or decrease significantly in the next twelve months. Given the long periods of time involved in resolving tax positions, the Company does not expect that the recognition of unrecognized tax benefits will have a material impact on the Company's effective income tax rate in any given period. If the total amount of unrecognized tax benefits were recognized by the Company at one time, there would be a reduction of \$165 million on the tax expense for that period. In 2014, the Company's wholly-owned subsidiary in the Netherlands, ADM Europe B.V., received a tax assessment from the Netherlands tax authority challenging the transfer pricing aspects of a 2009 business reorganization, which involved two of its subsidiary companies in the Netherlands. As of December 31, 2023, this assessment was \$90 million in tax and \$34 million in interest (adjusted for variation in currency exchange rates). On April 23, 2020, the court issued an unfavorable ruling and in October 2020, assigned a third party expert to establish a valuation. During the second quarter of 2021, the third party expert issued a final valuation. On September 30, 2022, the court issued a ruling consistent with the valuation report, and the Dutch tax authorities have filed an appeal. During the quarter ended March 31, 2023, ADM filed a cross-appeal. As of December 31, 2023, the Company has accrued its best estimate of what it believes will be the likely outcome of the litigation. Note 14. Leases Lessee Accounting The Company leases certain transportation equipment, plant equipment, office equipment, land, buildings, and storage facilities. Most leases include options to renew, with renewal terms that can extend the lease term from 6 months to 49 years. The renewal options are not included in the measurement of the right of use assets and lease liabilities unless the Company is reasonably certain to exercise the optional renewal periods. Certain leases also include index and non-index escalation clauses and options to purchase the leased property. Leases accounted for as finance leases were immaterial at December 31, 2023. As an accounting policy election, the Company does not apply the recognition requirements of Topic 842 to short-term leases in all of its underlying asset categories. The Company recognizes short-term lease payments in earnings on a straight-line basis over the lease term, and variable lease payments in the period in which the obligation for those payments is incurred. The Company also combines lease and non-lease contract components in all of its underlying asset categories as an accounting policy election. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 14. Leases (Continued) The following table sets forth the amounts relating to the Company's total lease cost and other information. Year Ended December 31 2023 2022 2021 (In millions) Lease cost: Operating lease cost \$ 390 \$ 356 \$ 336 Short-term lease cost 126 127 117 Total lease cost \$ 516 \$ 483 \$ 453 Other information: Operating lease liability principal payments \$ 374

\$ 339 \$ 325 Right-of-use assets obtained in exchange for new operating lease liabilities \$ 327 \$ 357 \$ 197 December 31 2023 2022 Weighted-average remaining lease term - operating leases (in years) 7 7 Weighted average discount rate - operating leases 4.1 % 3.7 % Below is a tabular disclosure of the future annual undiscounted cash flows for operating lease liabilities as of December 31, 2023.

Undiscounted Cash Flows (In millions) 2024 \$ 334 2025 260 2026 186 2027 146 2028 101 Thereafter 339 Total 1,366 Less interest (135) Lease liability \$ 1,231 Calculated using the implicit rate of the lease, if available, or the incremental borrowing rate that is appropriate for the tenor and geography of the lease. (1) (1) 98 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 15. Employee Benefit Plans The Company provides substantially all U.S. employees and employees at certain foreign subsidiaries with retirement benefits including defined benefit pension plans and defined contribution plans. The Company also provides certain eligible U.S. employees who retire under qualifying conditions with subsidized postretirement health care coverage or Health Care Reimbursement Accounts. In 2021, the Company amended the ADM Retirement Plan and the ADM Pension Plan for Hourly-Wage Employees (collectively, the "Plans") and entered into two binding agreements to purchase: (1) a group annuity contract from Principal Life Insurance Company ("Principal") and (2) two group annuity contracts, separately from American General Life Insurance Company ("AGL ") and from AGL 's affiliate, The United States Life Insurance Company in the City of New York ("USL "), irrevocably transferring the future benefit obligations and annuity administration for approximately 6,000 retirees and terminated vested participants from the Plans to Principal, AGL, and USL. The purchase of the group annuity contracts was funded directly by the Plans' assets and reduced the Company's pension obligations by approximately \$0.7 billion. As a result of the transactions, the Company recognized a non-cash pretax pension settlement charge of \$83 million for the year ended December 31, 2021. On July 31, 2017, the Company announced that all participants in the Company's U.S. salaried pension plan and the Supplemental Executive Retirement Plan (SERP) began accruing benefits under the cash balance formula effective January 1, 2022. Benefits for participants who were accruing under the final average pay formula were frozen as of December 31, 2021, including pay and service through that date. The Company maintains 401(k) plans covering substantially all U.S. employees. The Company contributes cash to the plans to match qualifying employee contributions, and also provides a non-matching employer contribution of 1% of pay to eligible participants. Under an employee stock ownership component of the 401(k) plans, employees may choose to invest in the Company's stock as part of their own investment elections. Assets of the Company's 401(k) plans consist primarily of listed common stocks and pooled funds. The Company's 401(k) plans held 5.7 million shares of Company common stock at December 31, 2023, with a market value of \$414 million. Cash dividends received on shares of Company common stock by these plans during the year ended December 31, 2023 were \$10 million. The following table sets forth the components of retirement plan expense for the years ended December 31, 2023, 2022, and 2021:

Pension Benefits	Postretirement Benefits	(In millions)	Year Ended December 31 2023	Year Ended December 31 2022	Year Ended December 31 2021
Retirement plan expense	Defined benefit plans:				
Service cost (benefits earned during the period)		\$ 41	\$ 48	\$ 64	\$ —
Interest cost		76	48	48	6
Expected return on plan assets	(83)	(79)	(95)	—	—
Settlement charges		—	—	83	—
Curtailments	(2)	—	—	—	—

Amortization of prior service cost (credit)	(20)	(20)	(20)	—	—
Net periodic defined benefit plan expense		17	12	113	8
Defined contribution plans		73	67	61	—
Total retirement plan expense		\$ 90	\$ 79	\$ 174	\$ 8

\$ 9 \$ 7 Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 15. Employee Benefit Plans (Continued) The following tables set forth changes in the defined benefit obligation and the fair value

of defined benefit plan assets for the years ended December 31, 2023 and 2022: Pension Benefits Postretirement Benefits December 31 2023 December 31 2022 December 31 2023 December 31 2022 (In millions) (In millions) Benefit obligation, beginning \$ 1,587 \$ 2,178 \$ 118 \$ 154 Service cost 41 48 — 1 Interest cost 76 48 6 3 Actuarial loss (gain) 83 (575) 6 (24) Employee contributions 3 3 — — Curtailments — (2) — — Business combinations (1) — — — Settlements (1) (1) — — Benefits paid (53) (47) (17) (16) Foreign currency effects 30 (65) — — Benefit obligation, ending \$ 1,765 \$ 1,587 \$ 113 \$ 118 Fair value of plan assets, beginning \$ 1,269 \$ 1,742 \$ — \$ — Actual return on plan assets 121 (438) — — Employer contributions 54 60 17 16 Employee contributions 3 3 — — Settlements (1) (1) — — Benefits paid (53) (47) (17) (16) Foreign currency effects 22 (50) — — Fair value of plan assets, ending \$ 1,415 \$ 1,269 \$ — \$ — Funded status \$ (350) \$ (318) \$ (113) \$ (118) Prepaid benefit cost \$ 63 \$ 60 \$ — \$ — Accrued benefit liability – current (19) (18) (14) (14) Accrued benefit liability – long-term (394) (360) (99) (104) Net amount recognized in the balance sheet \$ (350) \$ (318) \$ (113) \$ (118) In 2023, the actuarial loss in the pension plans was primarily due to decreases in the global bond yields while actual return on plan assets was related to favorable asset performance in countries with material assets including the U.S., the U.K., Canada, and Switzerland. The Company uses the corridor approach when amortizing actuarial losses. Under the corridor approach, net unrecognized actuarial losses in excess of 10% of the greater of the projected benefit obligation or the market related value of plan assets are amortized over future periods. For plans with little to no active participants, the amortization period is the remaining average life expectancy of the participants. For plans with active participants, the amortization period is the remaining average service period of the active participants. The amortization periods range from 4 to 27 years for the Company's defined benefit pension plans and from 5 to 18 years for the Company's postretirement benefit plans. Included in AOCI for pension benefits at December 31, 2023, are the following amounts that have not yet been recognized in net periodic pension cost: unrecognized prior service credit of \$56 million and unrecognized actuarial loss of \$ 272 million. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 15. Employee Benefit Plans (Continued) Included in AOCI for postretirement benefits at December 31, 2023, are the following amounts that have not yet been recognized in net periodic postretirement benefit cost: unrecognized prior service cost of \$1 million and unrecognized actuarial loss of \$20 million. The following table sets forth the principal assumptions used in developing net periodic benefit cost: Pension Benefits Postretirement Benefits December 31 2023 December 31 2022 December 31 2023 December 31 2022 Discount rate 4.8% 2.5% 5.1% 2.7% Expected return on plan assets 6.0% 5.0% N/A N/A Rate of compensation increase 4.3% 4.2% N/A N/A Interest crediting rate 3.9% 1.9% N/A N/A The following table sets forth the principal assumptions used in developing the year-end actuarial present value of the projected benefit obligations: Pension Benefits Postretirement Benefits December 31 2023 December 31 2022 December 31 2023 December 31 2022 Discount rate 4.5 % 4.8 % 4.9% 5.1% Rate of compensation increase 4.8 % 4.3 % N/A N/A Interest crediting rate 4.0 % 3.9 % N/A N/A The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with projected benefit obligations in excess of plan assets were \$1.5 billion, \$1.5 billion, and \$1.0 billion, respectively, as of December 31, 2023, and \$ 1.3 billion, \$1.3 billion, and \$0.9 billion, respectively, as of December 31, 2022. The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets were \$1.5 billion, \$1.5 billion, and \$1.0 billion, respectively, as of December 31, 2023 and \$1.2 billion, \$1.2 billion, and \$0.8 billion, respectively, as of December 31, 2022. The accumulated benefit obligation for all pension plans as of December 31, 2023 and 2022, was \$1.8 billion and \$1.6 billion, respectively. For postretirement benefit measurement purposes, a 6.9%

annual rate of increase in the per capita cost of covered health care benefits was assumed for the year ended December 31, 2023. The rate was assumed to decrease gradually to 4.5% by 2031 and remain at that level thereafter.

Plan Assets The Company's employee benefit plan assets are principally comprised of the following types of investments:

- Common stock:** Equity securities are valued based on quoted exchange prices and are classified within Level 1 of the valuation hierarchy.
- Mutual funds:** Mutual funds are valued at the closing price reported on the active market on which they are traded and are classified within Level 1 of the valuation hierarchy.
- Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 15. Employee Benefit Plans (Continued) Common collective trust (CCT) funds:** The fair values of the CCTs are valued using net asset value (NAV). The investments in CCTs are comprised of U.S. and international equity, fixed income, and other securities. The investments are valued at NAV provided by administrators of the funds.
- Corporate debt instruments:** Corporate debt instruments are valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy.
- U.S. Treasury instruments:** U.S. Treasury instruments are valued at the closing price reported on the active market on which they are traded and are classified within Level 1 of the valuation hierarchy.
- U.S. government agency, state, and local government bonds:** U.S. government agency obligations and state and municipal debt securities are valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants' methods, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The following tables set forth, by level within the fair value hierarchy, the fair value of plan assets as of December 31, 2023 and 2022.

Fair Value Measurements at December 31, 2023

The Company's U.S. pension plans contain approximately 67% of the Company's global pension plan assets. The actual asset allocation for the Company's U.S. pension plans as of the measurement date consists of 20% equity securities and 80% debt securities. The target asset allocation for the Company's U.S. pension plans is approximately the same as the actual asset allocation. The actual asset allocation for the Company's foreign pension

plans as of the measurement date consists of 17% equity securities, 71% debt securities, and 12% other. The target asset allocation for the Company's foreign pension plans is approximately the same as the actual asset allocation. The Company's pension plans did not directly hold any shares of Company common stock as of the December 31, 2023 and 2022 measurement dates. (1)(2) (2) (1) (2) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 15. Employee Benefit Plans (Continued) Investment objectives for the Company's plan assets are to: • Optimize the long-term return on plan assets in consideration of funded status risk. • Maintain a broad diversification of assets and appropriate risk exposure across asset classes. • Maintain careful control of the risk level within each asset class. Asset allocation targets promote optimal expected return and volatility characteristics given the long-term time horizon for fulfilling the obligations of the pension plans. Selection of the targeted asset allocation for plan assets was based upon a review of the expected return and risk characteristics of each asset class, as well as the correlation of returns among asset classes. The U.S. pension plans target asset allocation is also based on an asset and liability study that is updated periodically. Investment guidelines are established with each investment manager. These guidelines provide the parameters within which the investment managers agree to operate, including criteria that determine eligible and ineligible securities, diversification requirements, and credit quality standards, where applicable. In some countries, derivatives may be used to gain market exposure in an efficient and timely manner; however, derivatives may not be used to leverage the portfolio beyond the market value of underlying investments. The Company uses external consultants to assist in monitoring the investment strategy and asset mix for the Company's plan assets. To develop the Company's expected long-term rate of return assumption on plan assets, the Company generally uses long-term historical return information for the targeted asset mix identified in asset and liability studies. Adjustments are made to the expected long-term rate of return assumption when deemed necessary based upon revised expectations of future investment performance of the overall investment markets. Contributions and Expected Future Benefit Payments Based on actuarial calculations, the Company expects to contribute \$ 27 million to the pension plans and \$14 million to the postretirement benefit plan during 2024. The Company may elect to make additional discretionary contributions during this period. The following benefit payments, which reflect expected future service, are expected to be paid by the benefit plans: Pension Benefits Postretirement Benefits (In millions) 2024 \$ 69 \$ 14 2025 75 13 2026 82 11 2027 88 11 2028 94 10 2029-2033 559 41 Note 16. Shareholders' Equity The Company has authorized one billion shares of common stock and 500,000 shares of preferred stock, each with zero par value. No preferred stock has been issued. At December 31, 2023 and 2022, the Company had approximately 202.5 million shares and 169.0 million shares, respectively, of its common shares in treasury. Treasury stock of \$ 4.9 billion at December 31, 2023 and 2022 is recorded at cost as a reduction of common stock, and treasury stock of \$2.7 billion and \$1.7 billion at December 31, 2023 and 2022, respectively, is recorded at cost as a reduction of retained earnings. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 16. Segment and Geographic Information The Company's operations are organized, managed, and classified into three reportable business segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable segments, as defined by the applicable accounting standard, and are classified as Other Business. The Ag Services and Oilseeds segment includes global activities related to the origination, merchandising, transportation, and storage of agricultural raw materials, and the crushing and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the segment include ingredients for food, feed, energy, and industrial customers. Crude vegetable oils produced by the segment's crushing activities are sold "as is" to manufacturers of renewable green diesel and other customers or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel and glycols or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Ag Services and Oilseeds segment is also a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cotton cellulose pulp is manufactured and sold to the chemical, paper, and other industrial markets. The Ag Services and Oilseeds segment's grain sourcing, handling, and transportation network (including barge, ocean-going vessel, truck, rail, and container freight services) provides reliable and efficient services to the Company's customers and agricultural processing operations. The Ag Services and Oilseeds segment also includes agricultural commodity and feed product import, export, and global distribution, and structured trade finance activities. The Company engages in various structured trade finance activities to leverage its global trade flows. This segment also includes the Company's share of the results of its equity investments in Wilmar, Pacifcor, SoyVen, Olenex, Stratas Foods LLC, and Edible Oils Limited. The Carbohydrate Solutions segment is engaged in corn and wheat wet and dry milling and other activities. The Carbohydrate Solutions segment converts corn and wheat into products and ingredients used in the food and beverage industry including sweeteners, corn and wheat starches, syrup, glucose, wheat flour, and dextrose. Dextrose and starch are used by the Carbohydrate Solutions segment as feedstocks in other downstream processes. By fermentation of dextrose, the Carbohydrate Solutions segment produces alcohol and other food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use in products such

as hand sanitizers and ethanol for use in gasoline due to its ability to increase octane as an extender and oxygenate. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Carbohydrate Solutions products include citric acids which are used in various food and industrial products. The Carbohydrate Solutions segment is a leader in carbon capture and sequestration. This segment also includes the Company's share of the results of its equity investments in Hungrana Ltd., Almidones Mexicanos S.A., Aston Foods and Food Ingredients, Red Star Yeast Company, LLC, and LSCP, LLLP. In November 2021, the Company sold its ethanol production complex in Peoria, Illinois. The Nutrition segment serves various end markets including food, beverages, nutritional supplements, and feed and premix for livestock, aquaculture, and pet food. The segment engages in the manufacturing, sale, and distribution of a wide array of ingredients and solutions including plant-based proteins, natural flavors, flavor systems, natural colors, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, postbiotics, enzymes, botanical extracts, and other specialty food and feed ingredients. The Nutrition segment includes the activities related to the procurement, processing, and distribution of edible beans. The segment also includes activities related to the processing and distribution of formula feeds and animal health and nutrition products and the manufacture of contract and private label pet treats and foods. This segment also includes the Company's share of the results of its equity investments in Vimison S.A. de C.V., ADM Matsutani LLC, Matsutani Singapore Pte. Ltd., ADM Vland Biotech Shandong Co., Ltd., Dusial S.A., and Vitafort ZRT. Other Business includes the Company's financial business units related to futures commission and insurance activities. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 17. Segment and Geographic Information (Continued) Intersegment sales have been recorded using principles consistent with ASC 606, Revenue from Contracts with Customers. Operating profit for each segment is based on net sales less identifiable operating expenses. Also included in operating profit for each segment is equity in earnings of affiliates based on the equity method of accounting. Specified items included in total segment operating profit and certain corporate items are not allocated to the Company's individual business segments because operating performance of each business segment is evaluated by management exclusive of these items. Corporate results principally include unallocated corporate expenses, interest cost net of interest income, and revaluation gains and losses on cost method investments and the share of the results of equity investments in early-stage start-up companies. Correction of Certain Segment-Specific Historical Financial Information As previously disclosed, the Company received a voluntary document request from the SEC relating to intersegment sales between the Company's Nutrition segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions segments. In response, the Company engaged external counsel, assisted by a forensic accounting firm, to conduct an internal investigation, overseen by the Audit Committee of the Company's Board of Directors, which is separately advised by external counsel (the Investigation). The Company has historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Investigation, the Company identified certain intersegment sales for the years ended December 31, 2021 through 2023 that occurred between the Company's Nutrition segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions segments that were not recorded at amounts approximating market. The correction of these immaterial errors does not have any impact on the Company's previously reported Consolidated Statements of Earnings, Consolidated Statements of Comprehensive Income (Loss), Consolidated Balance Sheets, Consolidated Statements of Cash Flows, or Consolidated Statements of

Shareholders' Equity for any of the periods presented below. The following tables present: (i) adjustments and revised gross revenues, intersegment revenues, and operating profit amounts for the Ag Services and Oilseeds segment; (ii) adjustments and revised gross revenues, intersegment revenues and operating profit amounts for the Carbohydrate Solutions segment; and (iii) adjustments and revised operating profit amounts for the Nutrition segment, in each case, for each of the years ended December 31, 2023, 2022, and 2021. No adjustments were required to the gross revenues of the Nutrition segment. Impact of the Adjustments on Ag Services and Oilseeds Segment Gross Revenues and Operating Profit Years Ended December 31 (In millions) 2023 2022 2021 Gross revenues, as originally reported for 2022 and 2021 \$ 77,457 \$ 83,686 \$ 70,455 Adjustments 1 15 24 Gross revenues, as revised \$ 77,458 \$ 83,701 \$ 70,479 Intersegment revenues, as originally reported for 2022 and 2021 \$ 4,031 \$ 4,123 \$ 3,408 Adjustments 1 15 24 Intersegment revenues, as revised \$ 4,032 \$ 4,138 \$ 3,432 Segment operating profit, as originally reported for 2022 and 2021 \$ 4,066 \$ 4,386 \$ 2,775 Adjustments 1 15 24 Segment operating profit, as revised \$ 4,067 \$ 4,401 \$ 2,799 The adjustments set forth in the table above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023. (1) (1)

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 17. Segment and Geographic Information (Continued) Impact of the Adjustments on Carbohydrate Solutions Segment Gross Revenues and Operating Profit Years Ended December 31 (In millions) 2023 2022 2021 Gross revenues, as originally reported for 2022 and 2021 \$ 14,509 \$ 16,336 \$ 12,672 Adjustments 30 53 35 Gross revenues, as revised \$ 14,539 \$ 16,389 \$ 12,707 Intersegment revenues, as originally reported for 2022 and 2021 \$ 1,635 \$ 2,375 \$ 1,562 Adjustments 30 53 35 Intersegment revenues, as revised \$ 1,665 \$ 2,428 \$ 1,597 Segment operating profit, as originally reported for 2022 and 2021 \$ 1,345 \$ 1,360 \$ 1,283 Adjustments 30 53 35 Segment operating profit, as revised \$ 1,375 \$ 1,413 \$ 1,318 The adjustments set forth in the table above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023. Impact of the Adjustments on Nutrition Segment Operating Profit Years Ended December 31 (In millions) 2023 2022 2021 Segment operating profit, as originally reported for 2022 and 2021 \$ 458 \$ 736 \$ 691 Adjustments (31) (68) (59) Segment operating profit, as revised \$ 427 \$ 668 \$ 632 The adjustments set forth in the table above for the year ended December 31, 2023 reflect adjustments effected for the period January 1, 2023 through September 30, 2023. Given the timing of the Investigation, no adjustments were effected in the fourth quarter of 2023. Separately, the Company determined that a portion of the originally reported gross revenues and intersegment revenues of each of the Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition segments included certain intrasegment revenues (resulting from sales within the segment), and should have included exclusively intersegment revenues (resulting from sales from one segment to the other). The correction of these immaterial errors does not have any impact on the Company's previously reported Consolidated Statements of Earnings, Consolidated Statements of Comprehensive Income (Loss), Consolidated Balance Sheets, Consolidated Statements of Cash Flows, or Consolidated Statements of Shareholders' Equity for any of the periods presented below. The following tables present: (i) additional adjustments and further revised gross revenues and intersegment revenues amounts for the Ag Services and Oilseeds segment; (ii) additional adjustments and further revised gross revenues and intersegment revenues amounts for the Carbohydrate Solutions segment; and (iii) adjustments and revised gross revenues and intersegment revenues amounts for the Nutrition segment, for each of the years ended

December 31, 2023, 2022, and 2021. (1) (1) (1) (1) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 17. Restructuring and exit costs for the year ended December 31, 2022 consisted of several individually insignificant restructuring charges totaling \$28 million presented as specified items within segment operating profit and restructuring charges of \$1 million in Corporate. Restructuring and exit costs for the year ended December 31, 2021 consisted of several individually insignificant restructuring charges totaling \$35 million presented as

specified items within segment operating profit and \$4 million in Corporate. Impairment charge - goodwill and other intangible assets for the year ended December 31, 2023 consisted of impairments related to goodwill of \$137 million and customer list and discontinued animal nutrition trademarks totaling \$ 64 million in Nutrition, presented as specified items within segment operating profit. Impairment charge - goodwill and other intangible assets for the year ended December 31, 2022 consisted of customer list impairment of \$2 million in Nutrition presented as specified items within segment operating profit. Impairment charge - goodwill and other intangible assets for the year ended December 31, 2021 consisted of goodwill impairment of \$5 million and land rights impairment of \$42 million in Ag Services and Oilseeds, and goodwill impairment of \$ 1 million and customer list impairment of \$4 million in Nutrition, presented as specified items within segment operating profit. Impairment charge - other long-lived assets for the year ended December 31, 2023 consisted of impairments related to certain long-lived assets in Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition of \$10 million, \$33 million, and \$65 million, respectively, presented as specified items within segment operating profit. Impairment charge - other long-lived assets for the year ended December 31, 2022 consisted of impairments related to certain long-lived assets in Carbohydrate Solutions and Nutrition of \$15 million and \$20 million, respectively, presented as specified items within segment operating profit. Impairment charge - other long-lived assets for the year ended December 31, 2021 consisted of impairments related to certain long-lived assets in Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition of \$10 million, \$13 million, and \$50 million, respectively, presented as specified items within segment operating profit.

Note 19. Sale of Accounts Receivable The Company has an accounts receivable securitization program (the "First Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "First Purchasers"). Under the First Program, certain U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Receivables, LLC ("ADM Receivables"). ADM Receivables transfers certain of the purchased accounts receivable to each of the First Purchasers together with a security interest in all of its right, title, and interest in the remaining purchased accounts receivable. In exchange, ADM Receivables receives a cash payment of up to \$1.9 billion for the accounts receivable transferred. The First Program terminates on May 17, 2024, unless extended. The Company also has an accounts receivable securitization program (the "Second Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "Second Purchasers"). Under the Second Program, certain non-U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Ireland Receivables Company (ADM Ireland Receivables). ADM Ireland Receivables transfers certain of the purchased accounts receivable to each of the Second Purchasers together with a security interest in all of its right, title, and interest in the remaining purchased accounts receivable. In exchange, ADM Ireland Receivables receives a cash payment of up to \$1.1 billion (€1.0 billion) for the accounts receivables transferred. The Second Program terminates on April 19, 2024, unless extended. Under the First and Second Programs (collectively, the "Programs"), ADM Receivables and ADM Ireland Receivables use the cash proceeds from the transfer of receivables to the First Purchasers and Second Purchasers (collectively, the "Purchasers") and other consideration, as applicable, to finance the purchase of receivables from the Company and the ADM subsidiaries originating the receivables. The Company accounts for these transfers as sales. The Company acts as a servicer for the transferred receivables. At December 31, 2023 and 2022, the Company did not record a servicing asset or liability related to its retained responsibility, based on its assessment of the servicing fee, market values for similar transactions, and its cost of servicing the receivables sold. (1) (2) (3) Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note

19. Sale of Accounts Receivable (Continued) As of December 31, 2023 and 2022, the fair value of trade receivables transferred to the Purchasers under the Programs and derecognized from the Company's consolidated balance sheet was \$1.6 billion and \$2.6 billion, respectively. Total receivables sold were \$54.8 billion, \$59.0 billion, and \$50.3 billion for the years ended December 31, 2023, 2022, and 2021, respectively. Cash collections from customers on receivables sold were \$53.6 billion, \$56.9 billion, and \$47.3 billion for the years ended December 31, 2023, 2022, and 2021, respectively. Receivables pledged as collateral to the Purchasers were \$1.1 billion and \$0.6 billion as of December 31, 2023 and 2022, respectively. Transfers of receivables under the Programs during the years ended December 31, 2023, 2022, and 2021 resulted in an expense for the loss on sale of \$56 million, \$21 million, and \$11 million, respectively, which is classified as selling, general, and administrative expenses in the consolidated statements of earnings. The Company reflects cash flows related to the Programs as operating activities because the cash received from the Purchasers upon both the sale and collection of the receivables is not subject to significant interest rate risk given the short-term nature of the Company's trade receivables.

Note 20. Legal Proceedings The Company is routinely involved in a number of actual or threatened legal actions, including those involving alleged personal injuries, employment law, product liability, intellectual property, environmental issues, alleged tax liability (see Note 13 for information on income tax matters), and class actions. The Company also routinely receives inquiries from regulators and other government authorities relating to various aspects of its business, and at any given time, the Company has matters at various stages of resolution. The outcomes of these matters are not within Company's complete control and may not be known for prolonged periods of time. In some actions, claimants seek damages, as well as other relief including injunctive relief, that could require significant expenditures or result in lost revenues. In accordance with applicable accounting standards, the Company records a liability in its consolidated financial statements for material loss contingencies when a loss is known or considered probable and the amount can be reasonably estimated. If the reasonable estimate of a known or probable loss is a range, and no amount within the range is a better estimate than any other, the minimum amount of the range is accrued. If a material loss contingency is reasonably possible but not known or probable, and can be reasonably estimated, the estimated loss or range of loss is disclosed in the notes to the consolidated financial statements. When determining the estimated loss or range of loss, significant judgment is required to estimate the amount and timing of a loss to be recorded. Estimates of probable losses resulting from litigation and governmental proceedings involving the Company are inherently difficult to predict, particularly when the matters are in early procedural stages, with incomplete facts or legal discovery; involve unsubstantiated or indeterminate claims for damages; potentially involve penalties, fines, disgorgement, or punitive damages; or could result in a change in business practice.

Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 20. Legal Proceedings (Continued) Commodities Class Actions On September 4, 2019, AOT Holding AG ("AOT") filed a putative class action under the U.S. Commodities Exchange Act in federal district court in Urbana, Illinois, alleging that the Company sought to manipulate the benchmark price used to price and settle ethanol derivatives traded on futures exchanges. On March 16, 2021, AOT filed an amended complaint adding a second named plaintiff Maize Capital Group, LLC ("Maize"). AOT and Maize allege that members of the putative class collectively suffered damages calculated to be between approximately \$500 million to over \$2.0 billion as a result of the Company's alleged actions. On July 14, 2020, Green Plains Inc. and its related entities ("GP") filed a putative class action lawsuit, alleging substantially the same operative facts, in federal court in Nebraska, seeking to represent sellers of ethanol. On July 23, 2020, Midwest Renewable Energy, LLC ("MRE") filed a putative

class action in federal court in Illinois alleging substantially the same operative facts and asserting claims under the Sherman Act. On November 11, 2020, United Wisconsin Grain Producers LLC ("UWGP") and five other ethanol producers filed a lawsuit in federal court in Illinois alleging substantially the same facts and asserting claims under the Sherman Act and Illinois, Iowa, and Wisconsin law. The court granted ADM's motion to dismiss the MRE and UWGP complaints without prejudice on August 9, 2021 and September 28, 2021, respectively. On August 16, 2021, the court granted ADM's motion to dismiss the GP complaint, dismissing one claim with prejudice and declining jurisdiction over the remaining state law claim. MRE filed an amended complaint on August 30, 2021, which ADM moved to dismiss on September 27, 2021. The court denied ADM's motion to dismiss on September 26, 2023. UWGP filed an amended complaint on October 19, 2021, which the court dismissed on July 12, 2022. UWGP has appealed the dismissal to the United States Court of Appeals for the Seventh Circuit. On October 26, 2021, GP filed a new complaint in Nebraska federal district court, alleging substantially the same facts and asserting a claim for tortious interference with contractual relations. On March 18, 2022, the Nebraska federal district court granted ADM's motion to transfer the GP case back to the Central District of Illinois for further proceedings. ADM moved to dismiss the complaint on May 20, 2022 and on December 30, 2022, the court dismissed GP's complaint with prejudice. GP appealed the dismissal. As of December 31, 2023, the appeal was pending. The Company denies liability, and is vigorously defending itself in these actions. As these actions are in pretrial proceedings, the Company is unable at this time to predict the final outcome with any reasonable degree of certainty, but believes the outcome will not have a material adverse effect on its financial condition, results of operations, or cash flows.

Intersegment Sales Investigations On June 30, 2023, the Company received a voluntary document request from the SEC relating to intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The Company is cooperating with the SEC. Following the Company's January 21, 2024 announcement of the investigation, the Company received voluntary document requests from the DOJ focused primarily on the same subject matter, and the DOJ directed grand jury subpoenas to certain current and former Company employees. The Company is cooperating with the DOJ. The Company is unable to predict the final outcome of these investigations with any reasonable degree of certainty.

Securities Litigation On January 24, 2024, following the Company's January 21, 2024 announcement of the investigation relating to intersegment sales, a purported stockholder of the Company filed a putative class action in the U.S. District Court for the Northern District of Illinois against the Company and its Chief Executive Officer, as well as Vikram Luthar and Ray Young. The plaintiff alleges false and misleading statements in the Company's disclosures. The Company is unable to predict the final outcome of this proceeding with any reasonable degree of certainty.

Quarterly Financial Data (Unaudited) Quarter Ended March 31 June 30 September 30 December 31 Year (In millions, except per share amounts) Fiscal Year Ended December 31, 2023 Revenues \$ 24,072 \$ 25,190 \$ 21,695 \$ 22,978 \$ 93,935 Gross Profit 2,080 1,883 1,810 1,740 7,513 Net Earnings Attributable to Controlling Interests 1,170 927 821 565 3,483 Basic Earnings Per Common Share 2.13 1.70 1.52 1.07 6.44 Diluted Earnings Per Common Share 2.12 1.70 1.52 1.06 6.43 Fiscal Year Ended December 31, 2022 Revenues \$ 23,650 \$ 27,284 \$ 24,683 \$ 25,939 \$ 101,556 Gross Profit 1,897 2,100 1,811 1,762 7,570 Net Earnings Attributable to Controlling Interests 1,054 1,236 1,031 1,019 4,340 Basic Earnings Per Common Share 1.86 2.18 1.84 1.84 7.72 Diluted Earnings Per Common Share 1.86 2.18 1.83 1.84 7.71 Net earnings attributable to controlling interest for the second quarter of the year ended December 31, 2023 included after-tax gains of \$ 8 million

(equal to \$0.02 per share) related to the sale of certain assets; after-tax charges of \$ 93 million (equal to \$0.17 per share) related to the impairment of certain assets, restructuring, and a contingency loss provision related to import duties; after-tax expenses of \$2 million (equal to \$0.00 per share) related to certain acquisitions; an after-tax gain on debt conversion option of \$1 million (equal to \$0.00 per share) related to the mark-to-market adjustment of the conversion of the exchangeable bond issued in August 2020; and a tax expense adjustment of \$21 million (equal to \$0.04 per share) related to certain discrete items. Net earnings attributable to controlling interest for the third quarter of the year ended December 31, 2023 included after-tax losses of \$ 2 million (equal to \$0.00 per share) related to the sale of certain assets; after-tax net charges of \$ 54 million (equal to \$0.10 per share) related to the impairment of certain assets and restructuring, partially offset by a contingency loss reversal; and after-tax expenses of \$3 million (equal to \$0.01 per share) related to certain acquisitions. Net earnings attributable to controlling interest for the fourth quarter of the year ended December 31, 2023 included after-tax gains of \$ 5 million (equal to \$0.00 per share) related to the sale of certain assets; after-tax charges of \$ 158 million (equal to \$0.30 per share) related to the impairment of certain long-lived assets and goodwill and restructuring; after-tax expenses of \$1 million (equal to \$0.00 per share) related to certain acquisitions; and a tax expense adjustment of \$1 million (equal to \$0.00 per share) related to certain discrete items. Net earnings attributable to controlling interest for the third quarter of the year ended December 31, 2022 included after-tax gains of \$ 22 million (equal to \$0.04 per share) related to the sale of certain assets; after-tax charges of \$ 40 million (equal to \$0.07 per share) related to the impairment of certain assets, restructuring, and settlement contingencies; an after-tax gain on debt conversion option of \$8 million (equal to \$0.01 per share) related to the mark-to-market adjustment of the conversion of the exchangeable bond issued in August 2020; and a tax expense adjustment of \$7 million (equal to \$0.01 per share) related to certain discrete items. Archer-Daniels-Midland Company Notes to Consolidated Financial Statements (Continued) Note 21. Quarterly Financial Data (Unaudited) (Continued) Net earnings attributable to controlling interest for the fourth quarter of the year ended December 31, 2022 included after-tax gains of \$ 13 million (equal to \$0.02 per share) related to the sale of certain assets; after-tax charges of \$ 55 million (equal to \$0.10 per share) related to impairment of certain assets, restructuring, and settlement contingencies; an after-tax loss on debt conversion option of \$3 million (equal to \$0.00 per share) related to the mark-to-market adjustment of the conversion of the exchangeable bond issued in August 2020; and a tax expense adjustment of \$5 million (equal to \$0.01 per share) related to certain discrete items. Note 22. Subsequent Events In January 2024, the Company acquired Revela Foods, a Wisconsin-based developer and manufacturer of innovative dairy flavor ingredients and solutions, for \$656 million, subject to working capital adjustments, and UK-based FDL, a leading developer and producer of premium flavor and functional ingredient systems, for \$232 million. In February 2024, the Company acquired PT Trouw Nutrition Indonesia, a subsidiary of Nutreco and leading provider of functional and nutritional solutions for livestock farming in Indonesia, for \$18 million, subject to working capital adjustments. 118 Report of Independent Registered Public Accounting Firm To the Shareholders and the Board of Directors of Archer-Daniels-Midland Company Opinion on the Financial Statements We have audited the accompanying consolidated balance sheets of Archer-Daniels-Midland Company (the Company) as of December 31, 2023 and 2022, the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2023, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial

position of the Company at December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with U.S. generally accepted accounting principles. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated March 12, 2024 expressed an adverse opinion thereon.

Basis for Opinion These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Market or Fair Values of Certain Merchandisable Agricultural Commodity Inventories, Inventory-Related Payables, and Forward Commodity Purchase and Sales Contracts

Description of the Matter As explained in Notes 1 and 4 to the consolidated financial statements, certain merchandisable agricultural commodity inventory and inventory-related payables are stated at market or fair value. Forward commodity purchase and sales contracts that qualify as derivative contracts are also stated at market or fair value. The merchandisable agricultural commodity inventory, inventory-related payables, and forward commodity purchase and sales contracts are considered level 2 and 3 fair value instruments. As of December 31, 2023, the market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, forward commodity contracts in an asset position, and forward commodity contracts in a liability position were \$6,987 million, \$1,320 million, \$1,359 million, and \$957 million, respectively. Auditing the estimated market or fair values for merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts is complex due to the judgment involved in determining market or fair value, specifically related to determining the estimated basis adjustments, which represent the adjustment made to exchange quoted prices to arrive at the market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sales contracts. The basis adjustments are generally

determined using inputs from competitor or broker quotations or market transactions and are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact these basis adjustments. How We Addressed the Matter in Our Audit We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's determination of the estimated market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts. Our tests included controls over the estimation process supporting the basis adjustments. To test the estimated market or fair values of certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts, our audit procedures included, among others, evaluating (i) the Company's selection of the principal market, (ii) the inputs for the basis adjustments, and (iii) the completeness and accuracy of the underlying data supporting the basis adjustments. For example, we evaluated management's methodology for determining the basis adjustment including assessing the principal market identified and sources utilized by management to support the basis adjustment. Specifically, we compared the basis adjustments used by management to competitor and broker quotations, trade publications, and/or recently executed transactions. Further, we investigated, to the extent necessary, basis adjustments that were inconsistent with third party available information. Finally, we evaluated the adequacy of the Company's financial statement disclosures related to the estimated market or fair values of certain merchandisable agricultural inventories, inventory-related payables, and forward commodity purchase and sale contracts.

Animal Nutrition Goodwill Impairment Evaluation Description of the Matter At December 31, 2023, the Company's total goodwill was \$4.1 billion of which \$0.9 billion was assigned to the Animal Nutrition reporting unit. Goodwill is assigned to the Company's reporting units as of the acquisition date. As discussed in Note 1 and Note 9 of the consolidated financial statements, goodwill is tested at the reporting unit level for impairment at least annually on October 1, or when events or circumstances occur that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company uses an income and market approach in its quantitative impairment tests. During 2023, the Company recorded an impairment charge of \$137 million related to the Animal Nutrition reporting unit that represented the amount by which the carrying value of the reporting unit exceeded the fair value of the reporting unit at the impairment testing date. Auditing the Company's Animal Nutrition goodwill impairment charge was complex and highly judgmental due to the significant estimation required in determining the fair value of the reporting unit. In particular, the fair value estimate using a weighted income and market approach was sensitive to significant assumptions such as revenue growth rates, projected EBITDA margins, and the discount rate. These significant assumptions are forward-looking and could be affected by future economic and market conditions and the performance of the Animal Nutrition reporting unit. How We Addressed the Matter in Our Audit To test the estimated fair value used in the Company's Animal Nutrition reporting unit goodwill impairment charge, we performed audit procedures that included, among others, assessing the methodologies used to determine the fair value of the reporting unit and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. As it pertains to revenue growth rates and projected EBITDA margins, we compared the significant assumptions used by management to historical results and current industry and economic trends, as applicable. We assessed the historical accuracy of management's estimates. In addition, we involved our valuation specialists to assist with our evaluation of the methodology used by the Company to determine the fair value of reporting unit and testing of the significant assumptions used

by management, including the discount rate. Specifically, we evaluated the components of the discount rate used by the Company with the involvement of our valuation specialists. /s/ Ernst & Young LLP We have served as the Company's auditor since 1930. Saint Louis, Missouri March 12, 2024 Report of Independent Registered Public Accounting Firm To the Shareholders and the Board of Directors of Archer-Daniels-Midland Company Opinion on Internal Control over Financial Reporting We have audited Archer-Daniels-Midland Company's internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, because of the effect of the material weakness described below on the achievement of the objectives of the control criteria, Archer-Daniels-Midland Company (the Company) has not maintained effective internal control over financial reporting as of December 31, 2023, based on the COSO criteria. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weakness has been identified and included in management's assessment. Management has identified a material weakness related to the Company's accounting practices and procedures for intersegment transactions between the Nutrition segment and the Ag Services and Oilseeds and Carbohydrate Solutions segments. The absence of adequate controls with respect to the reporting of intersegment sales impacted the accuracy of the Company's segment disclosures and review controls over key inputs and assumptions utilized by the Company when performing the goodwill and long-lived asset impairment tests. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2023 and 2022, the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2023, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2). This material weakness was considered in determining the nature, timing and extent of audit tests applied in our audit of the 2023 consolidated financial statements, and this report does not affect our report dated March 12, 2024, which expressed an unqualified opinion thereon. Basis for Opinion The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Definition and Limitations of Internal Control Over Financial Reporting A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of

financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. /s/ Ernst & Young LLP Saint Louis, Missouri March 12, 2024 123 Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE None. Item 9A. CONTROLS AND PROCEDURES Evaluation of Disclosure Controls and Procedures An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and interim Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"), as of December 31, 2023. Based on that evaluation, the Company's Chief Executive Officer and interim Chief Financial Officer concluded that the Company's disclosure controls and procedures were not effective as of December 31, 2023 and 2022, due to the material weakness described below. Management's Report on Internal Control Over Financial Reporting The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. Under the supervision and with the participation of management, including the Company's Chief Executive Officer and interim Chief Financial Officer, the Company's management assessed the design and operating effectiveness of the Company's internal control over financial reporting as of December 31, 2023, based on the framework set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). Based on this assessment, management concluded that the Company's internal control over financial reporting was not effective as of December 31, 2023 and 2022, due to the material weakness described below. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's annual or interim financial statements will not be prevented or detected on a timely basis. Because the control deficiency described below could have resulted in a material misstatement of its annual or interim financial statements, the Company determined that this deficiency constitutes a material weakness. During the fourth quarter of 2023, in connection with the Investigation, the Company identified a material weakness in its internal control over financial reporting related to the Company's accounting practices and procedures for intersegment sales. The material weakness resulted from inadequate controls that allowed for certain intersegment sales to be reported at amounts that were not in accordance with ASC 606, Revenue from Contracts with Customers. Specifically, the Company

did not have adequate controls in place around measurement of certain intersegment sales between the Nutrition reporting segment and the Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The absence of adequate controls with respect to the reporting of intersegment sales impacted the accuracy of the Company's segment disclosures and review controls over projected financial information utilized in goodwill and other long-lived asset impairment tests. Notwithstanding such material weakness in internal control over financial reporting, the Company's Chief Executive Officer and interim Chief Financial Officer have concluded that the Company's Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, the Company's financial position, results of operations, and cash flows for the periods presented in conformity with GAAP. Ernst & Young LLP, an independent registered public accounting firm, has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2023. That report is included herein. /s/ Juan R. Luciano Juan R. Luciano Chairman, Chief Executive Officer, and President /s/ Ismael Roig Ismael Roig Senior Vice President and Interim Chief Financial Officer

Item 9A. CONTROLS AND PROCEDURES (Continued) Remediation Plan The Company is implementing enhancements to its internal controls to remediate the identified material weakness in its internal control over financial reporting related to the Company's accounting practices and procedures for intersegment sales and to enhance the reliability of its financial statements with respect to the pricing and reporting of such sales. Specifically, the Company is: (i) enhancing the Company's accounting policies with respect to the measurement of intersegment sales; (ii) improving and documenting the Company's pricing guidelines for intersegment sales; (iii) enhancing the design and documentation of the execution of pricing and measurement controls for segment disclosure purposes and projected financial information used in impairment analyses; and (iv) increasing training for relevant personnel on the measurement of and application of relevant accounting guidance to intersegment sales. While the Company believes that these efforts will improve its internal control over financial reporting, the Company will not be able to conclude whether the steps the Company is taking will remediate the material weakness in internal control over financial reporting until a sustained period of time has passed to allow management to test the design and operational effectiveness of the new and enhanced controls.

Changes in Internal Control Over Financial Reporting The Company is implementing a new enterprise resource planning (ERP) system on a worldwide basis, which is expected to occur in phases over the next several years. In 2023, the Company deployed the ERP system to 18 legal entities. The Company has appropriately considered this change in its design of and testing for effectiveness of internal controls over financial reporting and concluded, as part of the evaluation described above, the implementation of the new ERP system in these instances has not materially affected its internal control over financial reporting. Except for the material weakness described above and the related remediation measures that are being implemented, there have been no changes in internal control over financial reporting during the quarter ended December 31, 2023 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. OTHER INFORMATION None of the Company's directors or officers (as defined in Rule 16a-1(f) of the Exchange Act) adopted, modified or terminated any contract, instruction, or written plan for the purchase or sale of ADM's securities that was intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) of the Exchange Act or any non-Rule 10b5-1 trading arrangement (as defined in Item 408(c) of Regulation S-K) during the quarter ended December 31, 2023.

Item 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS Not applicable.

PART III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE Information with respect to directors, code of conduct, audit committee and audit committee financial

experts of the Company, and Section 16(a) beneficial ownership reporting compliance is set forth in "Proposal No. 1 - Election of Directors for a One-Year Term," "Code of Conduct," "Information Concerning Committees and Meetings – Audit Committee," and "Report of the Audit Committee" of the definitive proxy statement for the Company's annual meeting of stockholders to be filed on or before April 29, 2024 and is incorporated herein by reference. footprint, redesign core products with sustainable alternatives, and explore new markets. [...] Environmental, Social, and Governance (ESG) The Company knows that the health of our natural resources is critical to our future, and that its commitments to sustainable practices will result in a stronger ADM and a better world. ADM is committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, industrial and consumer products, energy, and packaging materials while pursuing ways to continually improve the Company's efforts in both [...] goal of enrolling four million regenerative agriculture acres by 2025. The Company is actively working to improve the efficiency of its facilities and vehicles, finding alternative uses for waste, reusing and recycling water, and sequestering carbon at its onsite capture and storage facility. These efforts are helping advance ADM's "Strive 35" commitments to, by 2035, reduce from a 2019 baseline absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 25%; reduce from a 2021 baseline absolute Scope

I'm proud of ADM's progress this year and the momentum we're building toward our goals. Sustainability is integral to ADM's growth strategy. Our business is deeply connected to the land, farmers and responsible stewardship, and has been for over 120 years. Healthy and resilient soil, water and air are the foundation for the crops that we transform into an unparalleled array of products. ADM's work supports farmers by creating value and global demand for products and practices that help feed the world, protect nature and enrich lives. As a pillar of the global food system, we recognize our role in ensuring billions have access to the fundamental nutrition they need, and our opportunity to support sustainable solutions to meet the needs of a growing global population. In addition, consumer demand is evolving, and customers increasingly expect sustainably sourced products. Among the year's sustainability highlights, ADM expanded our global regenerative agriculture program, increasing acreage and downstream partnerships with customers, to help strengthen soil health and ensure the long-term resilience of agriculture. The program grew to 5 million acres globally, surpassing our 2024 goal of 3.5 million acres and achieving our 2025 goal a year early. Farmers in the program reduced their GHG emissions by more than 1 million metric tons of CO₂e and sequestered more than 363,000 metric tons of carbon in the soil. We also continued enhancing the efficiency of our own footprint, reducing emissions and saving both energy and water as part of our Strive 35 strategy. In 2024, measuring over our 2019 baseline, we delivered a 14.5% reduction in our Scope 1 + 2 GHG emissions, 6.6% reduction in energy intensity and 3.6% reduction in water withdrawal. Healthy ecosystems play a critical role in supporting agricultural resilience, and ADM progressed toward our target to achieve a deforestation-free supply chain by the

end of 2025. We also remain committed to conversion-free supply chains in South America's high-risk biomes, helping to protect primary native vegetation. Of course, all of this work comes back to ADM's purpose: unlocking nature to enrich lives. We are committed to making a positive impact on the lives of our colleagues, our partners and the communities where we operate. This year, among other actions, we advanced our safety record, with a 31% year-over-year reduction in Tier 1 and 2 process safety incidents across our global network. ADM Cares, our corporate social investment program, also invested \$15.6 million in projects and organizations driving meaningful social, economic and environmental progress. We know there's more to be done – and we can't do it alone. Together with our partners and customers, we're scaling up and accelerating solutions to drive growth and secure our future. I'm excited for the work ahead and confident ADM will meet the challenge. Sincerely, Juan R. Luciano Board Chair and CEO

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 3 "Together with our partners and customers, we're scaling up and accelerating solutions to drive growth and secure our future." Introduction 5 About ADM 5 About the Report 6 Our Business 7 Where We Operate Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 4 About ADM ADM unlocks the power of nature to enrich the quality of life. We're an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. We're a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. We're a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. We're a cutting-edge innovator, guiding the way to a future of new bio-based consumer and industrial solutions. And we're leading in business-driven sustainability efforts that support a strong agricultural sector, resilient supply chains, and a vast and growing bioeconomy. Around the globe, our expertise and innovation are meeting critical needs from harvest to home. About the Report We are committed to reporting on our sustainability activities on an annual basis. This report highlights our activities and progress toward addressing key sustainability topics from January 1, 2024, to December 31, 2024. Informed by the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and the Taskforce on Nature-related Financial Disclosures (TNFD), our disclosures cover governance, strategy, risk and impact mitigation, and metrics and targets. We have included an index to the Global Reporting Initiative (GRI) Standards and the Sustainability Accounting Standards Board (SASB) at the end of the report. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 5 Our Business ADM works with thousands of growers in the world's most productive agricultural regions to purchase millions of metric tons of crops each year. Our 44,000 employees work to transform many of those raw commodities into a broad array of products and ingredients serving our customers' needs in food, feed, fuel, industrial, and consumer product applications. ADM is able to efficiently distribute commodities and processed products virtually anywhere in the world with our integrated network of elevators, warehouses, terminals, and transportation fleet assets. ADM owns approximately 150 warehouses and terminals and has 68 innovation centers. We operate a transportation fleet consisting of 2,600 barges, 31,950 rail cars, 610 trucks, 1,740 trailers, 171 boats, and 23 ocean-going vessels, which allows us to move grain as needed in the event of extreme weather or political conflicts that may jeopardize food security. In 2024, we processed 18.5 million metric tons of corn and 35.7 million metric tons of oilseeds. Because these impacts may change over time as our activities, business relationships, and assets evolve, we update this assessment on a regular basis. During our most recent assessment in 2024, the firm compiled perspectives from interviews, surveys, workshops, and research from a variety of internal and external stakeholders, including ADM executives, internal subject matter experts, investors, customers, and NGOs. The assessment prioritized the following key topics based on stakeholder feedback: Climate Strategy Scope 1 + 2 GHG Emissions Scope 3 GHG Emissions Water Management Sustainable and Regenerative Agriculture Deforestation, Conversion, Land-Use, and Land-Use Change Occupational Health & Safety Human Rights and Labor Conditions Corporate Governance Ongoing Stakeholder Engagement We have established direct and easy-to-access communication channels for engagement with our stakeholders. These engagements provide valuable insights on stakeholder concerns and topics that they consider important. In 2024, we engaged with key stakeholders including customers, policy makers, NGOs, and investors. After meeting with customers, we entered into partnerships with several of them on regenerative agriculture and additional collaborations on environmental and human rights topics. We placed additional emphasis on engaging key stakeholders relevant to our supply chain efforts in global palm and South American soy as a part of our strategy to achieve the goals outlined in our Policy to Protect Forests, Biodiversity, and Communities. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 10 Risk and Opportunity Management Sustainability risk management, including climate change and deforestation, is integrated into our multi-disciplinary, company-wide enterprise risk management (ERM) process. Each quarter, the ERM Sustainability subgroup and the ERM team review and report sustainability risks and related mitigation actions. The

review includes previously identified risks to ensure that our initiatives are properly focused, as well as the identification and assessment of emerging risks. The team uses a risk matrix that includes a quantitative assessment of impact, mitigation, and residual risk as well as qualitative information about risk categories, warning periods, mitigation strategies, and effectiveness. In line with the recommendations of the TCFD, we conducted a scenario analysis using three potential warming scenarios: 1.5°C (latest recommendation from the Intergovernmental Panel on Climate Change (IPCC) to prevent the worst effects of global warming), 2°C (aligned with the Paris Climate Accords), and 2.6°C (status quo). In each of the scenarios, we identified potential sourcing shifts and limitations, operational changes, physical impacts, and opportunities. In 2023, we completed a human rights salience exercise to identify risks to human rights in our operations and supply chains. We are also identifying and assessing nature-related issues using the LEAP framework from the TNFD. We have categorized the risks identified through these tools as physical risks or transition risks. We have also identified opportunities related to products and services. Transition Risks Physical Risks Opportunities

More information regarding the results of our scenario analysis and ADM's management of sustainability-related risks and opportunities can be found in our latest CDP Corporate Questionnaire disclosure. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 11 Commitments and Policies ADM maintains several key social and environmental commitments and policies that collectively outline our expectations for our colleagues, business partners, and contractors, and our organization as a whole. They establish clear standards that govern our approach to raw material sourcing, environmental stewardship, and employee conduct, among other areas, and they state our positions on issues of widespread public interest. These standards were developed with input from our operations, law, compliance, and EHS teams, and were approved by Board Chair and CEO Juan Luciano:

- ADM Supplier Expectations
- ADM Tax Policy
- Code of Conduct
- Commitment to Anti-Corruption Compliance
- Environmental, Health, & Safety (EHS) Policy
- Human Rights Policy
- Managing Supplier Non-Compliance Procedure
- Policy to Protect Forests, Biodiversity, and Communities
- Statement on Genetically Modified Organisms
- Statement on Animal Testing

In a world that is becoming increasingly interconnected and transparent, we strive to match that clarity and provide means to facilitate conversation and feedback. We invite all stakeholders who have concerns related to the implementation of our policies to email us at responsibility@adm.com or use The ADM Way Helpline, which is available in more than 30 languages and accessible using a QR code. Our Human Rights Policy protects human rights defenders, whistleblowers, complainants, and community spokespersons from any form of retaliation. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 12 Protect Nature 14 Environmental Strategy 15 Carbon Footprint 17 Energy 18 Freshwater 19 Waste 20 Biodiversity Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 13 Environmental Strategy ADM depends on farmers and productive agricultural systems and the availability of natural resources. Our environmental strategy is based on actions we take to enhance the resiliency of farms in our supply chains, improve the efficiency of our operations, and meet the sustainability expectations of our customers. This ensures that ADM can continue playing a critical role in helping billions of people access the fundamental nutrition they need. For our sourcing regions, we have established programs and commitments aimed at mitigating potential climate- and nature-related pressures, such as extreme weather events, biodiversity loss, and deforestation or native vegetation conversion. Within our operations, we focus on the efficient use of water and energy resources while promoting the beneficial reuse of waste. Our decarbonization efforts also enable the production of low-carbon-intensity product offerings, creating opportunities throughout our businesses and

strengthening partnerships with our customers by supporting their own climate-related targets. In addition to ADM's existing policies that articulate our environmental commitments, we also established a series of targets, known collectively as "Strive 35." First published in 2020, these targets measure our progress towards achieving our environmental strategy. Our Strive 35 environmental targets cover issues relevant to our stakeholders and operations, addressing those where we have the ability to mitigate our impacts. We report progress against these targets annually.

Strive 35 KEY TOPIC PROGRESS 2025 INTERIM GOAL 2035 GOAL TARGET DATE

GHG Emissions Scope 1 + 2	GHG emissions over 2019 baseline by 2035	14.5% reduction	1.5% absolute reduction	25% absolute reduction	12/31/2035
Scope 3 GHG emissions over 2021 baseline by 2035	2.1% reduction - 25% absolute reduction	12/31/2035	Energy Energy intensity over 2019 baseline by 2035	6.6% reduction	6% reduction
15% reduction	12/31/2035	Renewable and low-carbon energy out of total energy use	7.5% usage -25% usage	12/31/2035	Water Water withdrawal over 2019 baseline by 2035

87% diverted	90% diverted	12/31/2035	Introduction Sustainability at ADM	Protect Nature	Enrich Lives

Governance Data Tables and Indices 14 Carbon Footprint ADM calculates its GHG inventory annually using an operational control consolidation approach, in accordance with the GHG Protocol. Primary sources of Scope 1 emissions include cogeneration, agricultural commodity drying and processing, and fuel consumption for ADM's fleet assets. Our Scope 2 emissions include those from purchased electricity and steam, with the inclusion of market-based instruments associated with renewable energy procurement. The current Scope 3 inventory includes Categories 1-5 and 10, with the majority of those emissions coming from Category 1: Purchased Goods and Services through ADM's sourcing of agricultural commodities.

12.3 2.15 114.1 Scope 1 Scope 2 Scope 3 Scope 1 + 2 Emissions We calculate and disclose both location-based and market-based Scope 2 emissions, using the market-based approach to measure progress for our Strive 35 reduction target. We also report the amount of CO₂ that is captured from our ethanol fermentation process in Decatur, Illinois, and permanently sequestered underground through our Carbon Capture and Storage (CCS) operations.

0	14.1M	12.6M	12.3M	— 2.94M	2.03M	2.15M	-520K	-544K	-332K	16.5M	14.1M	14.1M
2019 (Baseline)	2023	2024	0	5	10	15	20	Scope 1	Scope 2	CCS	Scope 3	Emissions

Our annual Scope 3 inventory includes Categories 1-5 and 10: Purchased Goods and Services, Capital Goods, Fuel-and-energy-related Activities, Upstream Transportation and Distribution, Waste from Operations, and Processing of Sold Products. We also disclose the portion of our emissions in Category 1: Purchased Goods and Services, that are considered Forest, Land, and Agriculture (FLAG). This category is the largest share of our Scope 3 inventory and includes farm-level emissions from fertilizers, fuels, and other direct emission sources, as well as emissions from land-use change (LUC).

Emissions Non-FLAG Emissions FLAG Emissions Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 15 14.5% Reduction over baseline 2.1% Reduction over baseline Total 2024 Emissions 128.6M MT Scope 1 + 2 Carbon Reduction

Reducing emissions associated with our operations can reduce operating costs and translates to reductions in the carbon footprint of our products, an outcome that leads to further opportunities with new and existing customers. We are committed to achieving an absolute reduction in Scope 1 + 2 GHG emissions and are doing so through a combination of energy efficiency initiatives, low-carbon energy usage, and carbon capture and storage projects. To align our carbon reduction strategy with industry standards, we publicly communicated our intent to have targets approved by the Science Based Target initiative (SBTi). Our commitment was published in April 2022, and in 2024, we submitted our

near-term targets to SBTi and began the validation process. We continue to engage with SBTi, including through their net-zero standard consultation process, and remain committed to our reduction goals. We are assessing options and alternatives, and continue to work closely with our customers and partners to effectively communicate progress in this area. GOAL GHG Emissions 25% Absolute reduction in Scope 1 + 2 GHG emissions over 2019 baseline by 2035 In pursuit of our Strive 35 reduction target, our 2024 efforts included the completion of several projects and continued progress on additional projects that will help us reach our goals. Highlights include: ADM completed an agreement to install solar panels at our Global Research Center in Decatur, Illinois. The new solar installation is expected to be online in 2025 and will reduce Scope 1 + 2 GHG emissions by approximately 3,000 metric tons of CO₂e per year. Project work continued to advance for the capture of biogenic CO₂ emissions from our Columbus ethanol plant operations. With implementation slated for 2026, the project will collect and deliver nearly 800,000 metric tons of CO₂ annually to an offsite permanent sequestration operation. Permitting and engineering activities commenced for the development of Broadwing, the planned low-carbon steam and electricity plant in Decatur. Announced in 2023, this steam and power plant will supply low-carbon energy to ADM's Decatur Complex and is expected to be operational by 2029 with the potential to reduce upwards of 2,700,000 metric tons of CO₂e once fully operational. Scope 3 Carbon Reduction ADM's decarbonization strategy includes reducing Scope 3 emissions across our value chain and annually disclosing our inventory. Scope 3 emissions have been subject to evolving accounting methodologies and we continue to evaluate industry best practices, such as those in the GHG Protocol's Land Sector and Removals Guidance, which is expected to be published in Q4 2025. The majority of our Scope 3 emissions are related to our purchases of agricultural commodities, including emissions resulting from on-farm activities and land-use change. To achieve our Scope 3 reduction goal, we are implementing our no-deforestation program, which will reduce land use change emissions, and we continue to expand our regenerative agriculture program, which provides incentives and support for farmers to adopt practices that can reduce on-farm emissions and sequester carbon in the soil. In 2024, our regenerative agriculture efforts reduced on-farm emissions by more than 1 million metric tons of CO₂e when compared to regional benchmarks, and models show sequestration of more than 363,000 metric tons of CO₂. To allow for changes over time and potential reversals of carbon sequestering practices, we maintain a buffer of participating acres that are calculated but not included in our reported totals. We also use satellite monitoring and traceability programs to achieve our no-deforestation objectives, reducing emissions resulting from land-use change. Because these emissions occur outside of our operational control, we will continue to engage our suppliers, customers, and industry organizations to improve data quality, guide sector-specific accounting guidance, and drive reductions through mutually beneficial programs. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 16 Energy Our Strive 35 program includes goals of improving the energy efficiency of our operations and increasing the usage of renewable and low-carbon energy. Renewable energy includes sources such as wind, hydro, and solar. Low-carbon energy includes zero- or low-emission sources such as biofuels, nuclear, natural gas with carbon capture and storage (CCS), and low-carbon hydrogen and ammonia. Improving energy efficiency across our facilities brings cost savings, while increasing the usage of low-carbon or renewable energy allows us to meet the sustainability expectations of our customers. Together, these objectives further contribute to our sustainability strategy by driving Scope 1 + 2 GHG emissions reductions, leading to a less-carbon-intensive product portfolio. Energy-related projects implemented in 2024 are expected to save more than 600,000 MWh per year. Key initiatives include: • Completed

upgrades at both our dry milling and wet milling operations at our Cedar Rapids corn complex, leading to projected facility-wide energy reductions of 150,000 MWh. • Replaced desolventizer toaster dryer cooler (DTDC) systems at our oilseeds sites in Erith, UK, and Campo Grande, Brazil, leading to savings of 17,000 MWh and 3,300 MWh, respectively. • Implemented heat recovery opportunities at our corn processing facility in Razgrad, Bulgaria, which is expected to reduce energy consumption by 25,000 MWh. • Procured more than 681,000 MWh of renewable electricity. Energy Treasure Hunts Each year, ADM performs “Energy Treasure Hunts” to identify energy reduction opportunities within our facilities that will enable cost savings and feature short payback periods. In 2024, ADM held 13 of these events on-site at ADM locations and identified opportunities that could potentially yield over 850,000 MWh in energy reductions and \$11.3M in cost savings with 75% of the opportunities having a payback period of less than two years. Previous Energy Treasure Hunts led to the implementation of projects in 2024 that are projected to save 114,000 MWh and \$2.7M, demonstrating the effectiveness of the program and our team’s ability to execute on identified opportunities. Building on the success of the internal program, ADM’s team has recently begun offering Energy Treasure Hunts as a service to our customers and their facilities. ADM’s Decarbonization Technical Centre in the EMEA-APAC region partnered with a key customer of our UK Milling business in 2024, resulting in the discovery of potential reductions in energy consumption and GHG emissions of almost 7% and 9%, respectively. More than 20 different energy-saving opportunities were uncovered with an average payback period less than three years. By extending our expertise to customers, we are strengthening and expanding existing relationships with key accounts while delivering real value to their operations. GOAL Energy Increase low-carbon energy use to 25% of total energy usage by 2035 Low-Carbon Energy (% of total energy usage) 7.7% 6.4% 7.5% 2019 (Baseline) 2023 2024 0% 3% 6% 9% Energy Intensity (MWh/ton of product produced) 1.06 1.02 0.99 2019 (Baseline) 2023 2024 0.0 0.3 0.6 0.9 1.2 Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 17 0.2% Reduction over baseline 6.6% Reduction over baseline Freshwater ADM set a goal to achieve absolute water withdrawal reductions in our Major Water Users Group (MWUG), a collection of 41 of our largest sites that account for more than 95% of our global water usage. Our water withdrawal consists of municipal water, surface water, well water, and rain water. We exclude once-through cooling water from our water withdrawal disclosures and target because we return the water to its original location with only a change in temperature. Water is a crucial resource for our facilities and for the communities in which we operate. We are committed to reducing our freshwater intake and improving our sites’ water use efficiency through a strategy of reduction, reuse, and reclamation technologies and processes. As a global company, we have assets in water-stressed regions and continue to develop our strategy to address stewardship of these watersheds. As part of our objective to develop a water strategy focused on improving community well-being in priority watersheds in 2025, we will be engaging an external water science and engineering firm to review and confirm the sites in scope for the strategy; develop and review project quantification methodologies and targets; and identify actions that we can take in support of these watersheds. Water-related projects implemented in 2024 are expected to save more than 1,340,000 m³ per year. Key initiatives include: • Completed two major projects at our Cedar Rapids complex aimed at recapturing lost productivity in its reuse membrane system and repurposing flows for internal reuse, enabling potential savings upwards of 1,000,000 m³ per year. • Implemented operations improvements at our oilseeds plants in Valdosta, Georgia; Rondonópolis, Brazil; and Uberlandia, Brazil, that are expected to yield cumulative water savings of 58,000 m³ per year. • Made improvements to the boiler make-up water treatment system at our oilseeds facility in Windsor, Ontario, which could reduce water usage by approximately 14,000 m³.

TARGET Water absolute reduction 10% in water withdrawal over 2019 baseline by 2035 Water Withdrawal (million cubic meters) 115.4 110.6 111.3 — 2019 (Baseline) 2023 2024 0 30 60 90 120

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 18 3.6% Reduction over baseline Waste Focusing on reducing the amount of operational waste we generate and increasing the waste diversion rate has spurred innovative resource efficiency improvements and strategic partnerships that promote beneficial reuse. Uncovering opportunities for internal reuse of waste streams enables value creation for ADM. For materials that ADM cannot repurpose internally, our colleagues work to identify local organizations that can utilize these waste streams for further applications such as composting, animal feed, or energy recovery. These efforts promote circularity in our value chain while contributing to Scope 3 GHG reductions related to operational waste. Our efforts in 2024 include the following highlights: • Our biodiesel plant in Joaçaba, Brazil, implemented process improvements to reduce contaminants in filter cake and effluent treatment plant sludge, allowing the materials to be reclassified for use as soil amendment and a source of bioenergy, diverting 350 metric tons per year from landfill. • ADM's wheat milling facility in Cleveland, Tennessee, installed a new railcar vacuum system to collect waste flour, which can be blended with ADM's animal feed products. As a result, the site received ADM's internal Strive Award for this innovative practice that diverts approximately 2,000 metric tons per year from landfill. • ADM's North American waste vendor management company helped assist our Fostoria, Ohio, oilseeds plant in locating a composting partner that can process the site's organic waste. Their operation now processes 600 metric tons of ADM's waste, such as scrap soybean pods, hulls, and meal, per year. Investment Recovery Program ADM's Global Procurement organization continued to yield cost savings, reduce waste, and promote reuse across the company through our best-in-class investment recovery program. The program, originally launched in 2020 and now deployed globally, provides our network of manufacturing locations, crop procurement facilities, and corporate offices a structured and standardized process coupled with enabling technologies to identify surplus and idle assets; create internal visibility to those assets to transfer and reuse wherever possible; recycle those assets if appropriate; or monetize the surplus assets. Since 2020, the program has facilitated approximately 9,400 internal transfers, and in 2024, it generated \$2.7M through the external sale of assets. By redirecting assets that would otherwise be disposed of, the investment recovery program creates financial value for ADM while supporting our Strive 35 goal of a 90% landfill diversion rate. The reduction in waste also reduces our Scope 3 GHG emissions that would result from operational waste and avoids additional Scope 3 GHG emissions that would be associated with the procurement of new assets. TARGET Waste diverted from landfill 90% Landfill Diversion 81.2% 86.1% 88.4% —% 2019 (Baseline) 2023 2024 .0% 25.0% 50.0% 75.0% 100.0% Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 19 7.2% Increase over baseline Biodiversity The protection of biodiversity is a crucial component of maintaining resilient and productive agricultural systems. When farmers have the time and resources to focus beyond daily operational demands, they can prioritize enhancing biodiversity across their land. With fewer constraints, they can thoughtfully design more diverse crop systems, establish habitats for pollinators, improve soil health, and integrate practices like cover cropping and agroforestry that foster ecological balance. What once seemed like an ideal becomes practical and actionable when farmers are empowered to focus on the land's long-term vitality. That's why our regenerative agriculture program, small holder engagement, and no-deforestation efforts are a key way for ADM to support biodiversity. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 20 Supporting local economic development Protecting farmer health and safety Maximizing biodiversity Protecting forests

Protecting water quality Conserving biodiversity Improving soil health Continuously covering soil Using cover crops Responsibly managing inputs like nutrients and pesticides Using Integrated Pest Management Providing farmers with education, technical support, financial incentives, and more Reducing food insecurity Minimizing soil disturbance and maintaining living roots in soil Practicing reduced or no tillage No-Deforestation Preserving existing habitats through the avoidance of deforestation in agricultural supply chains helps protect biodiversity and high-carbon-value landscapes. We created our first no-deforestation policy in 2015. In 2021, we announced our aim to eliminate deforestation from all of our supply chains by 2030, aligned with the United Nations' New York Declaration on Forests. The following year, we announced an accelerated target date of December 31, 2025, which is included in our Policy to Protect Forests, Biodiversity, and Communities. Our approach to achieving this goal is grounded in a robust due diligence process, informed by the Accountability Framework initiative (AFi) operational guidance and sectoral and industry standards. We are working to establish a robust due diligence plan that identifies high risk supply sheds, quantifies sourcing volumes in those areas, and monitors land use change in those areas for deforestation, and in 2024, we engaged a consulting firm to conduct a desktop assessment of deforestation risks in our supply chains. This assessment utilized satellite data and quantitative analysis to identify additional areas at high risk of deforestation. For high-risk supply chains, our no-deforestation program includes training, traceability, mapping, monitoring, verification and reporting. Training Throughout 2024, we worked with our sourcing teams to ensure full awareness and understanding of our policy and potential supply chain risks. Traceability For high-risk supply chains, we worked to establish traceability to the mill, silo, or collection point and/or the village, district, sourcing region or port. Mapping Beginning in 2024 and continuing in 2025, we are working to map the crop production areas alongside published databases of known deforestation events from the USDA, FAO, and National Geographic. Monitoring In 2025, we will continue to develop monitoring systems to ensure visibility in high-risk sourcing areas. Satellite monitoring will play a key role in ongoing due diligence, which will allow us to ensure we are not contributing to deforestation through our sourcing. As concerns are raised within our sourcing areas, we will maintain close alignment and collaboration with our supply chain partners. Verification In 2025, we will engage a third-party certification body to verify our methodology and results to confirm the risk of deforestation in our supply chains is negligible. Reporting To maintain transparency, we will publish updates on our due diligence program and progress against our goals on an annual basis. We continue to implement our no-deforestation action plans and programs to address our palm oil and South American soy supply chains. Please find our annual progress updates for these supply chains on our Sustainability Policies & Reports page on our website. Non-Compliance While we work to establish this robust due diligence process to ensure we are not sourcing from deforested areas, instances of non-compliance could be possible. All incidences will be investigated in accordance with our Grievances and Resolutions Protocol and any supplier found to be out of compliance with our policy will addressed through our Managing Supplier Non-Compliance Procedure. EUDR In preparation for the European Union Deforestation Regulation (EUDR), we have taken significant steps to ensure compliance and maintain our suppliers' access to important global markets. We continue to work with stakeholders, including farmers, suppliers and governments across supply chains and regions. Our capabilities, powered by our relationships with farmers and suppliers around the globe, will ensure we can continue to give farmers the choice and the opportunity to add value by supplying global markets, while meeting our customers' needs. No-Conversion In 2023, ADM commissioned an assessment of potential climate impacts related to the conversion of primary native vegetation linked to our commodity supply chains

in South America. This assessment led to the development of our no-conversion commitment: we aim to have all our direct supply chains free of conversion of primary native vegetation by the end of 2025, and indirect supply chains by the end of 2027. This commitment is applicable to the defined high-risk areas of the Brazilian Amazon, Cerrado, and Pantanal, as well as the Paraguayan and Argentinian Chaco. We have adopted December 31, 2025 as our cut-off date for conversion, and we aim to have systems in place to demonstrate compliance by the target dates. As we approach the cut-off date, we will continue to expand monitoring efforts and will engage and educate our suppliers on our sourcing requirements in order to achieve these commitments.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 21 Regenerative Agriculture

Regenerative agriculture is an outcome-based farming approach that protects and improves soil health, biodiversity, climate, and water resources while supporting market opportunities and increased value for farmers. Regenerative agriculture is adaptive to local physical conditions and culture and is based on five principles of land management:

- Minimizing soil disturbance
- Maintaining living roots in soil
- Continuously covering soil
- Maximizing biodiversity — crops, soil microbes, pollinators
- Responsibly managing inputs — nutrients, pesticides, etc.

At ADM, we often say that everything starts with the farmer. That is certainly true for successful implementation of regenerative agriculture programs. We meet farmers where they live, both figuratively and literally. We focus on supporting their efforts through flexibility, ease of entry, third-party expertise, and community support. We work with partners spanning the value chain, connecting farmers to end customers, technology providers, and technical experts. All of our partners have a role to play, and all come together with an understanding that this work benefits all stakeholders.

In 2024, our regenerative agriculture efforts focused on retaining participating farmers, expanding practice adoption, and rolling out projects in additional geographies.

For 2024, we had a goal to engage 3.5 million acres. We are proud to announce we engaged more than 5 million acres, surpassing our 2024 goal and achieving our 2025 goal a year early.

North America In 2024, we expanded to more than 4.7 million acres covering corn, soy, wheat, canola, sorghum, cotton, and peanuts. We also expanded the program to include edible beans.

EMEA In EMEA, we have expanded our program to more than 80,000 acres, including wheat and canola in Poland, soy in Serbia, and wheat, barley, and canola in the United Kingdom.

South America In 2024, we continued efforts with peanut farmers on more than 24,000 acres in Argentina and soy farmers in Brazil covering more than 61,000 acres.

APAC In 2024, we continued our smallholder program in India, engaging farmers across 90,000 acres. We also launched a new project in Australia for cotton that will have its first harvest in 2025.

Outcomes In 2024, our regenerative agriculture projects:

- Reduced our Scope 3 GHG footprint by more than 1,000,000 metric tons of CO₂e.
- Sequestered more than 363,000 metric tons of CO₂e.

More information can be found in our Regenerative Agriculture Report on our website.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 22 Responsible Pesticide Management

We recognize that pesticide use in the agricultural sector has led to concerns regarding the potential for unintended environmental and health impacts. We also recognize that an estimated 45% of crop production worldwide is lost to pests annually. While we do not own farms and generally cannot mandate practices, we do strive to work with farmers across our diverse global supply chains to support sustainable practices that substitute natural controls for some agrochemicals, foster ecosystem balance, reduce GHG emissions, and mitigate crop losses. We engage with farmers around the world on implementing sustainable and regenerative agricultural practices, including Integrated Pest Management (IPM) principles, cover crops, and companion crops. IPM is designed to reduce risks to health and the environment through the design and implementation of a plan to prevent and manage pest damage by the most economical means with the least possible

hazard to people, property, and the environment. Cover crops and companion crops can help protect crops from pests by supporting improvements in soil health and increasing beneficial predatory insects. We source commodities from several programs with components that specifically impact pesticide usage, such as regenerative agriculture, ADM Responsible Soy, International Sustainability and Carbon Certification (ISCC), Roundtable on Sustainable Palm Oil (RSPO), and Round Table on Responsible Soy (RTRS) programs. We are also supporting the adoption of cover crops, companion crops, and/or the development, implementation, and monitoring of IPM plans. In 2024, we sourced volumes from programs that specifically focus on pesticide management techniques and practices as follows: METRIC TONS Canola 3,810,000 Corn 10,700,000 Cotton 54,700 Palm 236,000 Peanuts 309,000 Sorghum 34,900 Soybeans 4,760,000 Sunflower 37,000 Wheat 1,560,000 Other 52,900 In addition to this global sourcing effort, we are taking steps to identify pesticide usage in our key supply regions. Because pesticides vary in intensity, we need a more robust measurement than application volume to adequately evaluate pesticide usage. The Environmental Impact Quotient (EIQ) calculator, developed by Cornell University, provides data regarding the environmental and health impacts of pesticide options. In 2024, we gathered pesticide data from over 3,000 farmers in the U.S., and in 2025, we will use the EIQ tool to develop insights into pesticide usage in this region.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 23 Enrich Lives 25 Culture, Engagement, & Inclusion 26 Health & Safety 27 Food Safety and Quality 28 Human Rights 30 Community Engagement & Global Impact

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 24 Culture, Engagement, & Inclusion ADM is a truly global company of 44,000 employees working together to achieve extraordinary results connected to our purpose of unlocking nature and enriching life. Our talented colleagues can be found in a wide variety of roles - including front-line employees who enable the production of ADM's products, R&D; professionals who innovate to deliver science-backed solutions from nature, supply chain experts who deliver to customers all over the world, engineering teams who continuously improve our manufacturing operations, sales and commercial teams who work closely with customers, and so many more. Our culture is grounded in the values of integrity, respect, excellence, resourcefulness, teamwork, and responsibility. We believe that cultivating an inclusive culture of care and continuous learning for our colleagues is a critical lever to help ADM to continue innovating, driving growth through customer focus, and delivering outstanding performance for shareholders. ADM provides opportunities for all members of our diverse, global workforce to make meaningful contributions to the company's success. We continually provide development opportunities to our colleagues to build skills and experiences that help to deliver our strategy. This is done through formal learning programs, on-the-job development, as well as structured mentoring and coaching programs available globally. In 2024, ADM conducted an all-colleague listening survey to measure colleague perspectives on engagement, enablement, and inclusion. The insights from this survey served as an input to a new quarterly cultural scorecard that tracks various measures - including new joiner sentiment, employer brand sentiment, employer brand reputation, and attrition. These efforts support our ability to effectively measure the impact of culture on business results. ADM's Global Week of Understanding is a signature week-long investment focused on continuous learning and strengthening our culture. The week features keynote presentations, training programs, roundtable sessions, and onsite activities that foster an environment where all can thrive, and diversity of perspectives are harnessed to fuel innovation and growth. ADM's Employee Resource Groups (ERGs) are voluntary, employee-led groups where colleagues with shared experiences or interests can come together to build a sense of community and engage in personal and professional development. Our ERGs are open to all

employees and offer forums that foster collaboration, connection, and learning.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 25

Health and Safety Employee Safety ADM is committed to a safe and reliable culture that protects our people and processes. By fostering a highly engaged workforce that is proactive and relentlessly focused on risk reduction, we aim to ensure that every colleague returns home safely to their families and the things that matter most. In 2024, 75% of our sites completed the year with zero injuries and approximately 89% with no lost-workday injuries. Our colleagues delivered a year-over-year reduction of 31% in tier 1 and 2 process safety incidents. In addition, our Decatur complex achieved significant safety improvements in 2024 with no serious injuries. Globally, we had one ADM colleague fatality and nine serious injuries. We continue to take steps to further enhance our workplaces through occupational safety and process safety improvements with a goal of zero fatalities. Through the guidance of the Environmental, Health, and Safety Technology Center, we are advancing impactful safety initiatives, including:

- Driving excellence in Life-Critical Standards
- Encouraging proactive use of Stop Work Authority
- Expanding Total Process Safety training at all organizational levels
- Providing focused support to our highest-risk sites

As defined by OSHA, we track and report our annual Total Recordable Incident Rate (TRIR) and Lost Workday Incident Rate (LWIR), based upon the number of incidents per 100 employees (or per 200,000 work hours). In 2024, the TRIR and LWIR values were 0.69 and 0.23, respectively, excluding unsupervised contractors. Looking ahead to 2025, ADM is focused on efforts to reduce serious injuries and total recordable injury rate. We are no longer tracking safety performance against a 2020 baseline. Instead, we are exploring new targets that are aligned with industry best practices and that support actions and behaviors that will allow us to continue to improve. We are also developing an incident severity index that will allow for a meaningful comparison of incidents across geographies and over time.

Employee Health Programs ADM continues to provide access to several virtual health support programs for our colleagues. In 2025, our digital health partner, Hinge Health, will begin offering Women's Pelvic Health Programs at no cost to our colleagues and/or their spouses who are enrolled in an ADM medical plan. Additionally, access to Hinge Health can help employees suffering from muscle or joint pain. Participating colleagues can work with a virtual care team to assess and develop a personalized exercise plan, reduce pain, and find physical therapists. We also provide mental health support through TELUS Health, weight management support through Wondr Health, hypertension and diabetes care through Teledoc Health, and a smoking cessation program in partnership with the American Cancer Society Quit for Life® program.

75% 89% Sites with Zero Injuries Sites with Zero Lost-Workday Injuries

k Food Safety and Quality We believe food is fundamental to quality of life, and expanding access to nutrition is a foundational piece of how we fulfill our purpose. The safety and security of our world's food and feed supply chains are of critical importance to that work. That's why at ADM, we continually review and improve our food safety systems and procedures, including good manufacturing practices for human and animal food. We also develop and implement risk-based preventive controls and critical control points for human food based on hazard analysis. Our facilities, processes, and procedures undergo regular evaluation to assess the risk of product contamination, and we implement a variety of safeguards and security concepts to reduce those risks. We built our Food Safety and Quality program to continually drive toward safety, center on customers and focus on quality.

Food Safety Driven Customer Centered Quality Focused Food Safety Driven Utilizing our customized "Integrated Risk Management" application, we are able to proactively monitor and provide focused support across the organization through subject matter expertise, resources, and global verification procedures to ensure conformity

to strict food safety standards. In 2024, ADM increased our number of sites certified under Global Food Safety Initiative (GFSI) schemes to a total of 330. Customer Centered Our Quality and Food Safety Center of Excellence keeps the customer at the center of all we do. Whether an internal or external customer, we strive to provide the highest quality product and service. Tools such as our Quality Management System (QMS) help to align everyone on best practices to ultimately satisfy all of our customers. Quality Focused In September 2024, we held our fifth annual Global Food Safety Week for our colleagues around the globe to provide a dedicated time to refresh knowledge of best practices and refocus on the program. The theme this year was “Quality in Customer Excellence” to highlight the fact that quality is truly the key to achieving excellence in serving our customers. We hosted activities to reinforce and educate our team on the critical role that quality plays when it comes to our customers and to reinforce ADM’s culture of Food Safety and Quality. In 2024, we continued to create dynamic and engaging training targeted to our colleagues in various departments to highlight the link between all roles and Food Safety and Quality outcomes. Safety and Quality Drive Innovation in Rapid Mineral Testing The “Method Tool for Mineral Control” project, based in Tepatlán, Mexico, has made significant strides thanks to an internal cross-functional team. This initiative focused on developing a rapid mineral testing method to enhance quality control and consistency in premixes. This project is crucial to ADM’s commitment to enhancing the quality and safety of our products. The new rapid testing method advances our goals of safety and quality, focusing on people, food, and feed. The new method is faster and more efficient than traditional approaches, with reduced preparation and analysis times; delivers reproducible, constant values; can analyze up to 90 minerals on the periodic table; and requires no chemical reagents. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 27 Human Rights Salient Risks ADM engaged with a third-party organization to conduct a formal salience assessment, evaluating human rights risks across our entire value chain, regardless of the scale or the far-reaching nature of the issue. Open dialogue among ADM teams, affected communities, and NGOs helped determine the salient risks within our supply chain based on the likelihood of occurrence and severity of the potential impacts on people and their communities. Child Labor Forced Labor Gender Discrimination Health & Safety Impacts on Communities Just Transition in Agriculture Living Wages Recently, we incorporated the findings of the salience assessment into our supply chain due diligence process to enhance the accuracy of our risk assessment. The integration allows a systematic identification of high-risk geographies, commodities, and suppliers, helping to mitigate potential negative impacts. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 28 Supply Chain Due Diligence ADM’s Human Rights Due Diligence Framework provides a clear guide for identifying, preventing, resolving, and mitigating the negative impacts on people and the environment within our supply chains. It is based on the United Nations Global Compact (UNGC) Framework and the United Nations Guiding Principles on Business and Human Rights. In 2024, we performed a human rights risk assessment based on the social risks associated with sourced commodities and the salient risks in the country of origin of the commodities. Our Supply Chain Due Diligence Report summarizes our efforts and highlights case studies that illustrate some of the many actions that we take to prevent and mitigate identified risks. Our actions work to improve the livelihood of communities, promote fair labor conditions, and unlock the potential of local suppliers. Grievance Mechanism ADM offers two channels for reporting human rights concerns regarding noncompliance with ADM’s policies, local laws, and regulations. Interested stakeholders can contact the ADM Way Helpline and anonymously submit questions or concerns regarding our Code of Conduct and business ethical standards. Additionally, we welcome external parties, including individuals, government organizations, and

non-governmental organizations to send any concerns regarding the Policy to Protect Forests, Biodiversity, and Communities and our Human Rights Policy through email to responsibility@adm.com. SEDEX & EcoVadis We invest in our people and strive to create a workplace where they can thrive. For over a decade, we have been evaluating the environmental, health and safety, and labor conditions of our facilities through internal and external audit programs. Our company uses Sedex and EcoVadis to identify risks within our operations and supply chains related to labor standards, environmental, health, and safety conditions, and business ethics. We have more than 115 sites registered on Sedex, and currently link to more than 900 suppliers on the platform. Additionally, more than 30 ADM entities have been evaluated through EcoVadis assessments. At the ADM facilities audited in 2024, there were no fees charged to jobseekers in exchange for employment, and no collateral was taken in the form of money, identification, or other personal belongings without the workers' consent as a condition of employment by ADM or contracted companies. No human trafficking or forced labor of any kind was observed. Our sites' performance in these responsible sourcing assessments and audits demonstrates the alignment of our facilities with our environmental, health, and safety commitments. By leveraging these platforms, we not only uphold our commitment to ethical sourcing but also foster stronger partnerships with our suppliers, creating a more transparent value chain.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 29 Community Engagement & Global Impact ADM Cares At ADM, we believe in the concept of shared value creation. Our corporate social investment program, ADM Cares, aligns corporate giving with our business strategies and sustainability objectives. Through the program, we work to sustain and strengthen our commitment to communities where we work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic, and environmental progress. Our goal is to bolster the communities where ADM employees reside and work by allocating resources, volunteer efforts, and industry expertise to projects and organizations that drive meaningful progress. ADM Cares maximizes our societal impact across the globe, and by collaborating with partners, we magnify the effect of our philanthropic endeavors, making a difference in the lives of individuals worldwide. In 2024, ADM Cares grants were focused on three key areas in line with our mission of unlocking nature to enrich lives: sustainability, food security, and health and well-being. The ADM Cares team assesses potential projects to ensure they meet specific criteria and contribute to our objectives in these focal areas. The impact of projects supported by ADM Cares is evaluated through annual reports to continually assess community needs and address pressing issues. Colleague Volunteering Colleague engagement plays a vital role as well, fostering a sense of pride and purpose among ADM employees who are directly involved in supporting and implementing these initiatives. Together, in 2024, colleagues volunteered close to 8,500 hours in ADM communities around the world. In our EMEA region, our teams participate in a regional Volunteer Week, encouraging teams and individuals to volunteer with local causes, with plans to expand activities to the entire global ADM team in the future. Colleagues band together across regions to address food insecurity by supporting local food banks through collections and onsite packing events. Environmentally focused volunteer events include tree planting, river cleanups, and wildlife restoration projects. Through these collaborative efforts, ADM Cares not only enriches lives in our communities, but also cultivates a sustainable and prosperous future for people across regions.

2024 ADM Cares Spending | Sustainability | Colleague Giving | Food Security | Other | Health & Well-Being Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 30 36% 14% 12% 4% 34% 2024 ADM Cares Spending \$15.6 million ADM Institute for the Prevention of Postharvest Loss In 2011, the ADM Institute for the Prevention of Postharvest Loss (ADMI) was

established by the University of Illinois after receiving \$10 million in funding from ADM Cares. ADMI was created to alleviate poverty and hunger among smallholder farmers through improved postharvest management of grains and oilseeds. ADM Cares has since continued to partner with ADMI and supported various projects aimed at promoting research, community outreach, education, and capacity building to reduce postharvest losses. In 2024, with support from ADM Cares, the ADMI team worked with colleagues at IPB University in Indonesia to design and pilot a training program for extension workers. The goal of this engagement was to enhance the extension workers' support of income-generating activities of female farmer groups. ADMI designed an online training program for 51 extension workers that covered topics such as participatory extension practices, gender equity in extension, and writing a business plan. After six months, the project impacted 1,950 female farmers through improved extension services with 76% of farmer groups starting new income-generating activities and 92% of the extension workers facilitating goal-setting activities with farmer groups. ADMI received additional funding from ADM Cares to scale up this training to reach more extension workers in 2025. ADM Cares also supported a second ADMI-led project that was initiated to engage women who participate in oil palm production in three regions across Indonesia. The oil palm sector provides economic opportunities for rural women, but working in this sector may also expose these women to harassment and dangerous work conditions. ADMI's project surveyed 600 women working in the industry in various capacities, following up with focus group discussions and interviews. The feedback collected was used to prepare multiple policy briefs that will be presented to policy makers. The policy briefs outline ways to support women in the oil palm industry, reduce harassment, and elevate women's voices in the decision-making process.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 31 Governance 33 Strategy and Oversight 34 Compliance and Ethics Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 32 Strategy and Oversight Our commitment to change and growth goes beyond our products and services. At ADM, sustainable practices and a focus on healthy soil, water and air are not separate from our primary business: they are integral to the work we do every day to serve customers, create value for shareholders, create market opportunities for farmers and ensure the long-term resilience of agriculture. We are committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, industrial and consumer products, energy, and packaging materials while pursuing ways to continually improve our efforts in both protecting the environment and enhancing environmental and social sustainability. We believe sustainability is critical to our future growth strategy. Our strategic plan of sustainable growth leverages the trends and technologies in sustainability to help us grow and create value for our stakeholders. Our Agricultural Services and Oilseeds business unit is focused on traceability of sourcing and differentiation, and working with growers on low-carbon agricultural practices and products. Carbohydrate Solutions is focused on decarbonization efforts that increasingly position the business to offer low-carbon-intensity feedstocks for biosolutions and biomaterials, including fuel solutions, to replace petroleum-based products. Nutrition is working with suppliers and customers to identify nature-positive solutions that can reduce environmental impact in supply chains. The growth of these projects and businesses will be integral to supporting the objective of helping the planet limit total global warming to the 1.5°C threshold indicated by the United Nations. Additionally, ADM includes achievement of GHG emission goals and water reuse goals in executive performance measurement to reflect the strategic importance of ESG to our business. Our sustainability efforts are overseen by our Board of Directors, including a dedicated Sustainability and Technology Committee, supported by our management sustainability team. The Sustainability and Technology Committee

maintains detailed oversight of our sustainability strategies and initiatives, monitoring short, intermediate, and long-term objectives with regular management updates on key sustainability issues and progress. The Executive Council of ADM, our highest strategic and operational body, provides close supervision of our ESG efforts and in-depth review of sustainability issues. Furthermore, regional sustainability teams, along with the corporate sustainability team, support the CSO to drive sustainability efforts in our facilities and supply chains around the world. Our sustainability efforts are also supported by functional expertise throughout the company, including Operations and Utilities; Supply Chain and Procurement; Agricultural Services and Oilseeds; and Environmental, Health, and Safety.

Sustainability and Technology Committee of the Board • Has direct oversight responsibility of objectives, goals, strategies, risks, and activities related to sustainability
Executive Council of ADM • Highest strategic and operational body • Provides close supervision of our ESG efforts and an in-depth review of sustainability issues
Vice President, Chief Sustainability Officer (CSO) • Leads ADM's sustainability efforts • Reports metrics quarterly to ADM's Board of Directors • Meets quarterly with ADM Sustainability and Technology Committee of the Board • Reports regularly to ADM leadership
Regional and Corporate Sustainability Teams • Support business units to drive transformation and help create value across the supply chain • Support sustainability initiatives and implementation on the ground • Engage and interact with stakeholders • Located in North America, South America, and EMEA

Introduction Sustainability at ADM
Protect Nature Enrich Lives Governance Data Tables and Indices

33 Compliance and Ethics At ADM, we strive to meet the highest standards of ethical behavior. We have developed key policies and programs to work toward this aim. In March 2025, we were recognized by Ethisphere, a global leader in advancing the standards of ethical business practices, as one of the World's Most Ethical Companies™ and one of only 10 honorees in the Food, Beverage, & Agriculture category. This honor marks the sixth consecutive year we have received this recognition for our deep commitment to ethical business practices, transparency, and corporate citizenship. In 2024, we published a modernized and more accessible version of our Code of Conduct. We shared this Code with colleagues globally through various channels, including email announcements on our ADM Inside News intranet site, regional communication campaigns featuring videos, newsletters, and training sessions, as well as computer screen savers and leadership messages. The modernized Code includes a new style and structure, along with an expansive set of examples to help colleagues in applying its principles. The Code also includes links and references to relevant policies and resource centers, which provide easy access to a wide range of helpful tools and job aids, such as our "Food for Thought" guide, which answers common questions about the Code, related policies, and programs, and provides an extensive set of solutions to various scenarios that colleagues may face. In 2024, following an assessment of our compliance program by external consultants, we began implementing enhancements to our compliance environment to improve the effectiveness of our compliance program and to promote a speak-up culture. This initiative involves strategic executive actions, improved management communication, and employee input to strengthen the tone at the top and foster a culture of compliance, enhance our investigation processes to ensure consistency, and improve communication and awareness training. Our SVP, general counsel, and secretary conducted compliance training for our most senior leaders, focusing on integrity and ways to strengthen our compliance culture. In 2025, each of these senior leaders cascaded this training throughout the organization, transparently explaining the company's expectations around compliance. We prohibit all forms of corruption, including bribery, and we abide by all anti-corruption laws in every country we do business. We have a robust anti-corruption program that includes a global Anti-Corruption Policy and other compliance procedures and controls, such as enhanced due diligence, screening, monitoring of

high-risk third parties, and pre-approvals before hosting or entertaining government officials, designed to minimize the potential for corruption in ADM's global business dealings. We train colleagues and third parties to raise awareness of corruption risks and applicable anti-corruption laws in order to both avoid inadvertent violations of the law and enable early recognition and handling of potential issues. Our Anti-Corruption Program and Policy are updated periodically to address new risks and incorporate continuous enhancements. In 2024, we enhanced our expense report procedures to prevent fraud. The Compliance team collaborated with our Global Technology colleagues to develop an interactive AI module with direct hyperlinks and citations and relevant policies. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 34 Our helpline is available by phone or online in more than 30 languages. At ADM, we have developed a comprehensive third-party due diligence program alongside our innovative Third-Party Risk Management (TPRM) initiative, which includes our unique Vendor Compliance Day events. Launched in 2017, we host these events annually around the world to communicate our expectations to higher-risk vendors regarding fair and honest business practices, and compliance with the law. These events reinforce a strong "tone from the top," with senior country and commercial leaders co-leading the events. They emphasize the importance of adhering to the high standards that ADM expects of its own employees. Vendor Compliance Day events offer resources designed to help vendors understand and meet ADM's standards for responsible and ethical business practices. They also reaffirm our third parties' commitment to comply with ADM policies, applicable laws, and the terms of our agreements. Furthermore, these sessions provide an opportunity to collaborate on navigating complex regulatory and operational challenges, improving responsible business practices and strengthening the overall program. In 2024, we received a total of 1,632 reports concerning topics such as employee relations; environmental, health, and safety (EHS); diversity; equal opportunity; respect in the workplace; and misuse or misappropriation of assets or information. We log and track all reports we receive. Each is classified by type and then assigned to an investigator to conduct an independent and objective review into the concerns raised. If an allegation is substantiated, we implement corrective and disciplinary actions that can include coaching and counseling, process or control improvement, verbal or written warnings, financial penalties, or termination. We assess the effectiveness of our compliance controls through enhanced reporting and automation. We are able to monitor trends and identify compliance risks with the use of an interactive compliance application, which enables us to assess information from our databases on various topics such as conflicts of interest, government hosting and gifting, expense reporting, and training. Training is a key component of our compliance program. In 2024, 99% of all colleagues completed annual required training. Training included coverage and certification of our modernized Code of Conduct, our commitment to integrity, the importance of speaking up, and our policy of no retaliation. Training was also provided on the acceptable use of ADM assets, travel and expenses, supporting an environment of respect, and psychological health and safety. Above and beyond our global annual required training, Compliance held 216 facilitator-led training sessions for nearly 8,000 colleagues in 16 countries around the world. These training sessions covered the following topics: anti-corruption, Code of Conduct, conflicts of interest, donations and contributions, government hosting and gifting, anti-money laundering, fraud, harassment, trade sanctions and antiboycott, internal investigations, dawn raid and antitrust/competition, confidentiality, compliance integration, third-party due diligence and screenings, data privacy, data classification, election guide, and JV board members. Consistent with our commitment to managing risk related to our third-party relationships around the world, 2024 marked the tenth consecutive year of ongoing compliance monitoring and training of third-party service providers acting

on our behalf. This year we completed 15 compliance audits of third parties, including port agents, customs brokers, law firms, consultants, and distributors. We also hosted 12 virtual compliance training sessions globally, with more than 400 attendees from nine countries.

• ADM's wheat milling facility in Cleveland, Tennessee, installed a new railcar vacuum system to collect waste flour, which can be blended with ADM's animal feed products. As a result, the site received ADM's internal Strive Award for this innovative practice that diverts approximately 2,000 metric tons per year from landfill. [...] on reducing the amount of operational waste we generate and increasing the waste diversion rate has spurred innovative resource efficiency improvements and strategic partnerships that promote beneficial reuse. Uncovering opportunities for internal reuse of waste streams enables value creation for ADM. For materials that ADM cannot repurpose internally, our colleagues work to identify local organizations that can utilize these waste streams for further applications such as composting, animal [...] • ADM's North American waste vendor management company helped assist our Fostoria, Ohio, oilseeds plant in locating a composting partner that can process the site's organic waste. Their operation now processes 600 metric tons of ADM's waste, such as scrap soybean pods, hulls, and meal, per year. Investment Recovery Program ADM's Global Procurement organization continued to yield cost savings, reduce waste, and promote reuse across the company through our best-in-class investment recovery

ESG Risk Ratings # Empower your investment decisions with a consistent approach to assess material ESG risks Request Details Understanding the depth of exposure and management of material ESG issues within your portfolio is crucial for making informed investment decisions. Morningstar Sustainalytics' ESG Risk Ratings provides a multi-dimensional assessment of a company's exposure to industry-specific material ESG risks and its management of those risks. Our transparent methodology categorizes risks into five severity levels, offering an absolute measure of risk. ## About ESG Risk Ratings ### What are the ESG Risk Ratings? Learn more about ESG Risk Ratings [Download Brochure](https://connect.sustainalytics.com/brochure-esg-risk-rating?_ga=2.104506057.892383155.1609876784-fec83158-00c6-ea11-a812-000d3abaa63a) #### How do the ESG Risk Ratings work? ### What are Material ESG Issues? Morningstar Sustainalytics is a trusted and reliable choice for investors who are looking for a streamlined methodology in assessing financially material ESG issues. [Learn More](/material-esg-issues-resource-center) ## About Our Framework [##### 1. Total Exposure](#frameworkOne1) Initiating with a comprehensive evaluation, we determine exposure to each material ESG issue at the subindustry level, providing a holistic view of potential risks. [##### 2. Manageable Risk](#frameworkTwo2) Assessing the landscape, we identify portions of a company's risk that can be effectively managed through dedicated ESG programs and policies, ensuring proactive risk mitigation. [##### 3. Unmanageable Risk](#frameworkThree3) Acknowledging industry-specific challenges, we recognize and factor out elements of risk that are inherently unmanageable for certain

companies. For instance, an oil company's challenges related to carbon emissions are considered separately. [#### 4. Managed Risk](#frameworkFour4) Evaluating the controllable segment of risk, a company's performance is reflected through its policies, programs, practices, and quantitative performance measures, providing a clear understanding of risk management efficacy. [#### 5. Management Gap](#frameworkFive5) The management gap sheds light on areas of risk that remain unmanaged. Controversies impact the company's management score, acting as indicators of potential shortcomings in existing programs and policies. [#### 6. Unmanaged Risk](#frameworkSix6) Culminating the assessment, a company's ESG Risk Ratings is calculated by aggregating the unmanaged risk for each material ESG issue, providing a comprehensive overview of its ESG risk profile. Key Features

Two-Dimensional Materiality Framework Measures exposure and management of over 20 industry-specific material risks, supported by over 200 indicators and over 1,800 data points.

Extensive Coverage Our research universe, based on analyst assessments, covers over 16,000 companies across public equity, fixed income, and private sectors.

Three Central Building Blocks Material ESG Issues, Corporate and Stakeholder Governance, Systemic ESG Issues and Idiosyncratic Issues form the core of our research and ratings.

Flexible Accessibility Available through Global Access, Datafeeds, API, and third-party distribution platforms.

Five Risk Levels Categorized from negligible to severe, providing a clear understanding of potential impact.

AI in our information value chain Morningstar Sustainalytics integrates AI efficiency with human insights in news monitoring, ensuring comprehensive and accurate ESG analysis.

Absolute Measure of Risk Allows for easy peer and subindustry comparisons, simplifying portfolio-level aggregation.

Looking for underlying ESG data to strengthen your ESG processes? [Learn More](https://connect.sustainalytics.com/esg-underlying-data)

Use Cases ESG Risk Ratings meticulously assesses significant Environmental, Social, and Governance (ESG) risks, offering extensive coverage of large and mid-cap companies across equity and fixed income strategies. Morningstar Sustainalytics research serves a wide array of purposes for asset managers, asset owners and banks.

Strategy Definition invisible text for height

- * Establish a clear ESG policy for organization-wide integration.
- * Gain key insights for manager selection and evaluation.
- * Align investments with client values for sustainable portfolios.
- * Integrate ESG into decision-making to manage risks effectively.
- * Access insights for thought leadership on material ESG issues.

Investment Selection and Construction

- * Integrate ESG criteria into asset allocation, considering impact and governance.
- * Construct portfolios with strong ESG performers, using ratings or specific ESG issues.
- * Incorporate multi-dimensional ESG risk scores into valuation models.
- * Maintain sector weights through best-in-class tilting.
- * Identify ESG leaders and laggards for engagement prioritization.
- * Utilize historical data for back testing support.

Portfolio Monitoring and Reporting invisible text

- * Utilize ESG Risk Ratings for portfolio-level manager evaluation across asset classes. Morningstar Sustainability ratings support fund comparison.
- * Conduct ESG scenario analysis -- identify potential impacts and prepare for future risks and opportunities.
- * Analyze sustainability factors' impact on performance and share ESG insights with beneficiaries.
- * Customize ESG reporting to meet stakeholders' needs.
- * Benchmark and compare ESG performance against industry standards globally.

Active Ownership invisible text for

- * Prioritize engagement based on company ESG performance.
- * Engage on specific ESG issues using ESG Risk Ratings.
- * Use ESG Risk Ratings for informed proxy voting decisions.
- * Set ESG targets by benchmarking against peers.
- * Enhance transparency in engagement and voting practices.

Regulatory and After-Sale Reporting

- * Ensure alignment with ESG regulatory frameworks.
- * Disclose ESG practices using ESG Risk Ratings.
- * Provide

stakeholders with transparent ESG information. * Monitor compliance and address gaps over time. * Leverage our Score Change Log to understand score changes over time. ## Report Insights [#### 1. Company Rating](#reportOne1) Company ratings are categorized across five risk levels: negligible, low, medium, high, and severe and represented by our ESG Globes icons. [#### 2. Company Risk](#reportTwo2) A company's risk is measured against its industry peers and against the global universe. [#### 3. Rich Company Analysis](#reportThree3) Qualitative analysis, underpinned by analyst insights and quantitative data, describes the reasons why a company is exposed to specific material ESG issues and explains how well a company is managing these issues. [#### 4. Material ESG Issues](#reportFour4) Material ESG Issues (MEIs) are identified and brought into focus. [#### 5. Company Events](#reportFive5) Transparency into company events that may impact a company's operations, stakeholders or the environment. [#### 6. ESG Risk Decomposition](#reportSix6) The magnitude to which a company is exposed to ESG risk and how well the company is managing that risk is measured and explained. Archer Daniels Midland to Reduce GHG Emissions 25% by 2035 [Business News/Analysis](<https://advancedbiofuelsusa.info/category/business-news/>)[Carbon Capture/Storage/Use](<https://advancedbiofuelsusa.info/category/r-d-focus/rd-carbon-capture/>)[Missouri](<https://advancedbiofuelsusa.info/category/states/states-missouri/>)[R & D Focus](<https://advancedbiofuelsusa.info/category/r-d-focus/>)[Sustainability](<https://advancedbiofuelsusa.info/category/sustainability/>)[What You Can Do](<https://advancedbiofuelsusa.info/category/what-you-can-do/>) March 31, 2020 [Print This Article](#) [Share it With Friends](#share_scroll) by Emily Holbrook (Environment & Energy Leader) Archer Daniels Midland (ADM) today announced a new plan to reduce its absolute greenhouse gas emissions by 25% and its energy intensity by 15% by 2035. The new goals follow on ADM's original "15x20" plan, unveiled in 2011, in which the company committed to per-unit improvements in energy use, greenhouse gas emissions, water and waste to landfill by 2020. After meeting those goals ahead of schedule, ADM engaged WSP Global, an engineering

professional services firms, to conduct an in-depth feasibility study to help shape a new set of commitments to combat climate change. WSP's study identified several pathways toward success, including: * Purchasing renewable electricity; * Increasing use of biomass fuels; * Transportation fleet changes; and * Equipment changes in some locations. [READ MORE](https://www.environmentalleader.com/2020/03/archer-daniels-midland-to-reduce-ghg-emissions-25-by-2035/) [ADM Advances Sustainability Commitments with Ambitious New Plan to Curb Global Greenhouse Gas Emissions, Energy Consumption](https://www.businesswire.com/news/home/20200331005719/en/ADM-Advances-Sustainability-Commitments-Ambitious-New-Plan) (Archer Daniels Midland/Business Wire) [Watch for ADM to pioneer biofuels, more carbon capture projects](https://www.businessgreen.com/news/4015268/watch-adm-pioneer-biofuels-carbon-capture-projects) (Business Green) Excerpt from Business Green*: It's more likely, instead, that the company will opt for multiple options that also include biogas, renewable natural gas and — potentially in the future - hydrogen. "We hope in this trajectory of 15 years there will be technologies that come online that we don't even know about today," Taylor said. ADM is already testing emerging technologies within its transportation fleet. In late February, it announced a plan](https://www.adm.com/news/news-releases/wide-ranging-partnership-to-deploy-b-100-biodiesel-technology-in-daily-high-mileage-class-8-trucks) to outfit five trucks with a fuel system from Optimus Technologies that allows conventional engines to run on 100 per cent biodiesel. They'll be part of a year-long pilot: Each vehicle will travel an estimated 160,000 to 180,000 miles, with the technology expected to reduce CO2 emissions by up to 500,000 pounds on each truck. For perspective, that's a reduction of about 80 per cent over traditional diesel. The fuel itself will come from an ADM refinery in Jefferson, Missouri. Indeed, it's worth noting that ADM is still one of the largest biodiesel and biofuels producers in the world. It stands to benefit from that sort of transition. ### An early adopter of industrial carbon capture When it comes to removing existing atmospheric carbon, ADM is digging into emerging carbon capture and sequestration solutions. It is already operating a commercial-scale installation](https://www.adm.com/news/news-releases/adm-begins-operations-for-second-carbon-capture-and-storage-project-1) at its corn processing and biofuels facility in Decatur, Illinois, that is capable of storing up to one million tons of CO2 annually. The CO2 is being injected into a saline reservoir that's almost 1.5 miles underground. This isn't something it can do indefinitely: The project can store up to 5.5 million tons in total, and it's only slated to run up to five years initially. Realistically, this isn't something that ADM can do everywhere. The right combination of geological considerations is necessary for this sort of installation. But the 45Q tax credit](https://www.energy.gov/sites/prod/files/2019/10/f67/Internal%20Revenue%20Code%20Tax%20Fact%20Sheet.pdf) for carbon removal projects has made this more feasible, Taylor said, and the approach is being evaluated elsewhere. "We can demonstrate to our colleagues that this technology can be scaled up," she said. But the company acknowledges areas for improvement, particularly in safety performance. Additionally, the agribusiness giant recognises the ongoing challenges posed by climate change and the need for continued efforts to secure food production and supply lines in the face of environmental changes. Archer Daniels Midland (ADM) is one of the world's largest traders and processors of grains and oilseeds. Its environmental footprint is therefore sizable. It recently set out its progress towards key sustainability goals including responsible sourcing, advancing regenerative agriculture, and reducing greenhouse gas emissions. ### **Regenerative agriculture** ADM launched its regenerative agriculture programmes in Europe and Latin America in 2023 in an attempt to boost support for farmers in adopting practices that improve soil health, biodiversity, climate and water resources Last year, that included wheat and canola in Poland, soy in Serbia, and wheat, barley, and canola in the United Kingdom. "Building on the success of our regenerative agriculture programme in its inaugural year, our 2023 efforts focused on retaining participating growers, expanding practice adoption and rolling out projects in additional geographies," said Michelle French, ADM's director of global sustainability programmes. ADM is now partnered with over 28,000 growers of foods including corn, soybeans, and wheat, covering a total area of 2.8 million regenerative acres around the globe. It aims to expand this to 3.5 million acres in 2024 and recently increased its 2025 ambition from 4 million acres to 5 million. ADM's expansion of regenerative agriculture is aimed at reducing its scope 3 carbon emissions by sequestering carbon in the soil, and using satellite mapping to understand and address land use change-related emissions associated with its supply chains. Last year, ADM says its regenerative agriculture projects reduced GHG emissions by 310,000 metric tons and sequestered over 263,000 metric tons of CO₂e. In August, ADM launched a new joint venture through which it became the part-owner of Gradable, a digital platform that tracks sustainable and regenerative agricultural practices and outcomes, making it easier for farmers to earn financial rewards. Gradable was first established in 2020 and provides grain-buyers with reliable farm-level data that allows them to easily identify and purchase grain to meet the growing demand for sustainably produced products. The platform hosts over 20,000 farmers and facilitates over \$30 million in financial incentives each year. ### **Greenhouse gas emissions:** ADM has pledged to reduce Scope 1 and 2 greenhouse gas (GHG) emissions by 25% by 2035 compared to a 2019 baseline, and Scope 3 emissions by 25% compared to a 2021 baseline. The company is trying to achieve that through a mix of efforts, including improving energy efficiency at production facilities, exploring renewable energy options, and ensuring no deforestation in supply chains. Four years into its plan to cut scope 1 and 2 emissions, ADM has delivered a 14.7% reduction in its footprint through projects like transitioning facilities from coal to natural gas at three oilseeds facilities. This transition is expected to reduce annual emissions by around 180,000 metric tons of CO₂e per year. It has also launched a new renewable energy goal to increase the use of low-carbon energy to 25% of total energy use. This covers both renewable energy sources like wind and solar, as well as low-emission sources like biofuels, nuclear, and natural gas with carbon capture. As part of this, it constructed a new wind turbine facility in Brazil which is providing enough renewable electricity to offset a projected 19,000 metric tons of greenhouse gas emissions per year. Carbon capture is a major part of its plans. For over a decade, ADM has done this at its North American headquarters in Decatur, Illinois. As of the end of last year, these operations had captured almost 4.5 million metric tons of carbon dioxide from ethanol fermentation, compressed it, and

injected it more than a mile below the surface where it is stored permanently within a geologic formation. There is still no independent oversight of ADM's plans, however, as they have not yet been reviewed and validated by the Science-based Targets Initiative (SBTi). ### **Responsible sourcing** ADM says deforestation is 'low-risk' in 75% of its commodity purchases as these are primarily products like wheat, canola, or peanuts, grown in regions such as Europe and North America. To tackle the rest – particularly the 9% of ADM's purchases for which deforestation is still unconfirmed – the company is focusing on tracing and screening purchases when they come from high-risk sourcing countries like Argentina, Brazil and Paraguay. The company currently uses satellite mapping to monitor for deforestation in direct sourcing, while for indirect sourcing – where commodities are bought from a supplier rather than the farm - it identifies the first aggregation point where it screens for any deforestation within a 50 km radius. This is targeted at building 100% deforestation-free supply chains by 2025. Last year, ADM unveiled a new goal to eliminate land-use conversion in high-risk areas in South America for direct sourcing by 2025, as well as its existing zero deforestation goal for the same year. For indirect sourcing, the company has set a 2027 deadline. This particularly applies to the Brazilian Amazon, the Brazilian Cerrado, the Pantanal, and the Paraguayan and Argentinian Chaco. Land conversion covers a wider range of activities than deforestation and can therefore have broader environmental consequences. ## Related Topics

It aims to expand this to 3.5 million acres in 2024 and recently increased its 2025 ambition from 4 million acres to 5 million. [...] Archer Daniels Midland (ADM) is one of the world's largest traders and processors of grains and oilseeds. Its environmental footprint is therefore sizable. It recently set out its progress towards key sustainability goals including responsible sourcing, advancing regenerative agriculture, and reducing greenhouse gas emissions. ### Regenerative agriculture

77 West Wacker Drive Suite 4600 Chicago, Illinois 60601 Carbon Reduction Program Assessment November 14, 2023 Introduction In 2020, ADM retained a third-party consulting firm to complete a carbon reduction feasibility study and identify significant opportunities and projects that could enable the company to set and achieve an ambitious GHG reduction goal. This report has informed our strategy to address our combined Scope 1 and 2 greenhouse gas (GHG) emissions and allowed us to develop a goal to reduce absolute emissions by 25% from our 2019 baseline by 2035. This is one facet of ADM's "Strive 35" goals – a collection of sustainability-related targets which also address other material topics such as energy, water, and waste. Since these goals were first established, we have further committed to two additional climate-related targets: reducing absolute Scope 3 GHG emissions by 25% from a 2021 baseline and increasing our usage of low-carbon energy to 25% of total energy use with both commitments having a target year of 2035. In 2022, ADM published its first Carbon Reduction Program Assessment Report, which outlined our net zero aspiration and described the progress that we have made thus far toward our climate-related targets. In this report, we provide an update on additional progress we have made towards these climate-related targets; our current glidepath for achieving our medium-term targets; and a summary of the technologies that are under consideration to support our aspiration of net zero emissions by 2050 at the latest. Short-term Target Development (SBTi) When we developed our Strive 35 Scope 1 and 2 reduction goal in 2020, it was aligned with scientific methods and exceeded the minimum ambition required by SBTi at the time (absolute contraction methodology under a two-degree scenario.) SBTi now requires companies to commit to a 1.5-degree scenario and with a timeline shorter than our Strive 35 goal. In 2022, we committed to submitting targets to the Science-Based Targets Initiatives (SBTi) triggering a two-year window to prepare and submit for review. We continue to work to develop these goals for combined Scope 1 and 2 and for Scope 3, as well as forests, land, and agriculture (FLAG) targets aligned with the current SBTi methodology, and we aim to submit these goals to SBTi for review prior to April 20, 2024 – two years from the date we sent our commitment letter to SBTi. Current Status and Progress ADM's Strive 35 goals include two distinct carbon reduction targets: an absolute reduction of combined Scope 1 and 2 GHG emissions by 25% over the 2019 baseline by 2035, and an absolute reduction of Scope 3 GHG emissions by 25% over a 2021 baseline by 2035. In 2022, we realized a reduction of 7.8% for the combined Scope 1 and 2 emissions and a slight increase in Scope 3 emissions of 1.3%. Throughout 2022 and 2023, we have continued efforts to improve energy efficiency and implement projects to reduce Scope 1 and 2 emissions. In 2022, 39 projects were completed that are expected to reduce our combined Scope 1 and 2 GHG emissions by 135,000 mtCO₂e per year. Two examples of projects completed include: • Combustion controls improvements in Cedar Rapids, Iowa, expected to reduce CO₂e by 62,000 MT per year. • Reverse Steam Tube Germ Dryer Airflow in Decatur, Illinois, expected to reduce CO₂e by 45,000 MT per year. In addition, through renewable energy certificates (RECs) and power purchase agreements (PPAs), we purchased renewable electricity that reduced our Scope 2 footprint by more than 88,000 MT. - 20,000,000 40,000,000 60,000,000 80,000,000 100,000,000 120,000,000 140,000,000 2021 2022 Scope 3 (mtCO₂e) (1,000,000) 2,000,000 5,000,000 8,000,000 11,000,000 14,000,000 17,000,000 20,000,000 2019 2022 Scope 1, 2, and CCS (mtCO₂e) Scope 1 Scope 2 CCS So far in 2023, we have implemented several projects expected to reduce our

Scope 1 and 2 GHG emissions, including:

- Coal usage has been discontinued at our Mankato, Minnesota; Lincoln, Nebraska; and Des Moines, Iowa oilseeds facilities. Combined this is projected to result in the reduction of approximately 180,000 metric tons of CO₂e per year.
- A collaborative wind power project in South America generating renewable power that is expected to lower our Scope 2 footprint by 19,000 metric tons of CO₂e per year.

Glidepath We have identified emission reduction projects at our processing complexes using the best technologies available including, where possible, transitioning from higher carbon energy to lower carbon energy production by leveraging advanced technologies such as carbon capture and storage (CCS), renewable electricity, and renewable natural gas. In addition, we continue to look for ways to reduce our overall energy footprint through our global Energy Treasure Hunt Program and further focused efforts on optimization within our production processes. These efforts collectively make up our glidepath to carbon reduction and goal achievement. The plan is a living document and subject to change based on operating scenarios, technology costs, and future technology development.

Energy Efficiency We have set an interim goal to achieve at least 5% reduction in energy intensity for manufacturing operations by 2025. Efforts include focus in both plant utilities areas and in our production processes. Utilities areas of focus include flue gas heat recovery and deaeration system optimization as well as development of cleaner gas fired cogeneration projects replacing some existing less efficient coal-fired operations. Process improvement efforts include focus projects related to drying, evaporation and centrifugation which will yield both thermal and electrical savings. Use of the global energy treasure hunt program will also continue to maintain an evergreen pipeline of improvement projects.

Energy Transition We have set a goal for at least 25% of our total energy use to come from low-carbon sources, including renewable energy sources such as wind, hydro, and solar, as well as zero or extremely low emission energy sources such as biofuels, nuclear, natural gas with carbon capture and storage, and low-carbon hydrogen and ammonia.

- ADM and Warwick Carbon Solutions have announced the signing of a formal agreement for the development of Broadwing Energy, a natural gas power plant that will have the capability to capture over 90% of its resulting CO₂ emissions. The plant will sell lower-carbon steam and electricity to our Decatur complex while taking advantage of ADM's existing CCS operations, potentially sequestering over 2 million tons of CO₂ annually. Once operational, we expect to reduce our coal usage in Decatur by 60% and our GHG footprint by 3,000,000 metric tons of CO₂e per year.
- At our U.S. facilities that still burn coal, we are identifying technology and engineering needed to transition to natural gas, which could reduce our GHG footprint by an additional 1,500,000 metric tons of CO₂e per year.
- We are working with new technology providers on feasibility of CO₂ capture for alternative beneficial use. Successful implementation could yield more than 80,000 metric tons per year reduction at the targeted trial facility and could prove out the potential for further use of the technology.
- Project development is underway in several regions to increase the use of renewable biomass in place of natural gas as fuel for steam boiler operations which on a combined based could reduce Scope 1 emissions by more than 150,000 metric tons per year.
- We are exploring site feasibility for the construction of solar and wind energy generation that could reduce our Scope 2 emissions by more than 35,000 metric tons per year.
- Within our transportation fleet, we are piloting compressed natural gas, liquified natural gas, electrification, and higher biodiesel blends that could reduce our Scope 1 footprint by over 150,000 metric tons of CO₂e per year.
- Renewable electricity purchases through power purchase agreements and/or renewable energy certificates can reduce Scope 2 emissions that remain after energy efficiency initiatives have been implemented. In 2022, our Scope 2 emissions from electricity purchases were approximately 2.1 million MT CO₂e. We are investigating opportunities to increase our use of renewable electricity at multiple facilities. Going

Further – Future Projects and Technology With the establishment of a new low-carbon energy usage target, we have placed further emphasis on the adoption of alternative fuels and will seek new technologies that will enable us to achieve our sustainability goals. ADM recognizes that innovation will be essential to our net zero aspirations, and we continue to evaluate cutting edge solutions such as:

- The U.S. Department of Energy is supporting the development of small modular nuclear reactors (SMRs) as a way to use nuclear technology to provide generation at a smaller scale (tens to hundreds of MW). If SMRs became commercially viable in the future, these could be used to produce electricity onsite with zero GHG emissions. We are currently engaged in a feasibility study to determine the viability of nuclear power as a supplement or replacement for thermal energy from fossil fuels.
- Currently, hydrogen and renewable natural gas are not widely available. At some ADM locations, methane is captured from anaerobic wastewater treatment and used onsite as fuel or to generate renewable natural gas. We are participating in multiple collaborations focused on the feasibility of developing hydrogen infrastructure in different geographies where we operate.
- Our Decatur, Illinois, facility is located above a large geological formation called the Mount Simon sandstone that has the capacity to permanently store millions of metric tons of CO₂. We have been operating carbon capture and injection equipment for over a decade at the facility. Currently, only CO₂ from onsite fermentation is captured and sequestered; however, several companies have announced intentions to build pipelines to transport CO₂ that could allow us to implement post-combustion capture technology at larger facilities where the exhaust gas can be captured, scrubbed, and transported to a sequestration location with the potential to significantly reduce Scope 1 emissions.

Supply Chain Emissions (Scope 3) The past year has also yielded significant developments in regard to Scope 3 emissions as a result of enhanced GHG accounting guidance. In accordance with these proposed best practices, we recalculated our Scope 3 inventory and incorporated the emissions associated with land use change (LUC). While this methodology change resulted in a higher emissions total for 2021 when compared to our previous disclosures, it paints a clearer picture and is aligned with global accounting protocols. Because of the significant change in methodology and lack of data to allow LUC calculation for our previous baseline year of 2019, we have set 2021 as our new baseline. From 2021 to 2022, our Scope 3 emissions increased by 1.3%, wholly attributable to sourcing in a region with higher LUC values. This highlights the need to collaborate and coordinate carbon reduction efforts between our sourcing and origination teams, regen ag team, and sustainability team. Our current Scope 3 inventory includes Purchased Goods and Services; Fuel-and-energy-related Activities, Upstream Transportation; Waste from Operations; and Processing of Sold Products (Categories 1-5, 10). Considering these categories as our significant sources of Scope 3 emissions, our key objectives to achieve our absolute Scope 3 emissions reduction target include:

- Increasing traceability and satellite monitoring to calculate actual LUC emissions.
- Using traceability and grower engagement to ensure deforestation- and conversion-free sourcing in high-risk regions, such as the Gran Chaco and Brazil in South America.
- Working with farmers in our supply chains to implement regenerative agriculture practices on 4,000,000 acres by 2025 to reduce on-farm emissions and sequester carbon in the soil.
- Collaborating with transportation providers to reduce emissions through initiatives such as Sea Cargo Charter, Green Shipping Corridors, and increased biofuel usage.

Conclusion To keep the 1.5°C target in the Paris Agreement within reach, tackle food crisis risks, and enable the transformation to a global net-zero future, we must focus on limiting impacts from land use change, reducing emissions at the field level, leveraging the land's ability to sequester carbon, and improving productivity of existing agricultural land. Since our last update, we have continued to identify and implement carbon reduction projects. We have reduced our combined Scope 1 and 2 footprint by 7.8% over the baseline

and identified a glidepath of projects that could reduce our footprint by an additional 5 million MT. For Scope 3, we have recalculated our baseline to align with new protocol standards. Two programs, regenerative agriculture and no-deforestation, will fuel emissions reductions in FLAG categories through avoiding LUC emissions, reducing field-level emissions, and sequestering carbon within the soil. Collaboration with stakeholders in our supply chain such as downstream customers and transportation providers will drive further reductions in Scope 3. We will continue to explore new technologies that will allow us to reach our short- and medium-term reduction targets, as well as our long-term net-zero target.

[Community Updates](<https://sustainablebrands.com/channels/community-updates>) # ADM Unveils 2024 Sustainability Report ADM released its 2024 Corporate Sustainability Report covering the company's activities and progress toward sustainability goals that drive business growth and strengthen global supply chains. By [ADM](<https://sustainablebrands.com/brands/adm>) | Published 2 months ago | About a 0 minute read Among the year's key accomplishments, ADM expanded its global regenerative agriculture program to over 5 million acres, surpassing the company's 2024 goal and achieving its 2025 target a year early. Regenerative agriculture, which improves soil health and its ability to store carbon, helps increase farmer resilience and meet customers' sustainability needs. The report covers a wide range of progress across environmental, social and governance priorities, from operational efficiencies that reduced ADM's energy use intensity to a year-over-year reduction in safety incidents. Read full report [here](<https://www.adm.com/en-us/news/adm-stories/adm-releases-2024-corporate-sustainability-report/>). ### Partnering for impact in food supply chains Join us on Monday, Oct. 13 for insights from ADM, Danone, Oatly and more into the latest approaches, partnerships and technologies driving both climate benefits and business value on the ground — at the 3rd annual SB Regenerative Ag Summit. Founded in **1902** by John W. Daniels and George A. Archer in **Minneapolis, Minnesota**, the **ADM company** began its journey as a linseed crushing

business. Through relentless ambition and a series of strategic **acquisitions**—including the critical purchase of Midland Linseed Products in 1923—our organization became the industry giant we know today. Now, with a presence in over **170 countries**, the reach of ADM's **operations** is extraordinary, employing over **44,000** people globally. Our vast **network** incorporates more than **270 plants** and **420 crop procurement facilities worldwide**, enabling efficient **agricultural supply chain solutions** and providing essential **commodities** to both core and emerging **markets** across the globe. * **Year Established:** 1902, Minneapolis, Minnesota * **Headquarters:** Chicago, Illinois * **Core Sectors:** Agriculture, Farming, Forestry, Food Processing, Commodities Trading * **Key Crops:** Corn, Soybeans, Wheat, Oilseeds * **Brands:** Well-recognized in **ingredients**, **feed**, **nutrition solutions**, and **animal nutrition**

Today, our focus extends beyond traditional trade and processing. We lead through sustainability, innovation, and efficient handling of **raw materials**—shaping the direction of the world's **food** and **agricultural markets**. ## **Core Business Segments: Oilseeds, Corn, Services & Nutrition**

The **ADM company overview** centers on our four primary business **segments**, each critical to the **global food supply chain** and pivotal for **industry trends**:

1. Oilseeds Processing * **Soybean and Oilseed Processing:** We handle **soybeans**, **cottonseed**, **sunflower seed**, **canola**, and **flaxseed**, transforming them into high-value **vegetable oils** and **protein meals**. With a capacity to process 62 million metric tons annually, ADM sets the industry benchmark for scale and efficiency. * Our **oilseeds processing networks** support **food** and **beverage** industries as well as **animal feed markets**, meeting diverse consumer and industrial needs around the globe.

2. Corn Processing * In the **corn processing industry**, we specialize in both **wet milling** and **dry milling**. ADM transforms **corn** into **sweeteners**, **starches**, and advanced **bioproducts** for industrial, **nutraceutical**, and **beverage** applications. * Our **corn operations** enable access to reliable, sustainable ingredients while creating additional revenue streams for producers and communities reliant on cereal crop cultivation.

3. Agricultural Services * Leveraging an extensive **grain division**, our **agricultural services segment** comprises vast **grain elevators**, a robust **global transportation network**, and world-class port logistics. * We store, clean, ship, and redistribute **grain** and **oilseed commodities** worldwide. ADM's **crop procurement** systems ensure optimized access to global markets and drive operational cost savings.

4. Nutrition Segment * ADM's **nutrition** segment is at the forefront of **industry innovation**, delivering tailored **protein solutions**, plant-based **nutritional ingredients**, and carbohydrate alternatives that serve **food**, **animal feed**, and health-focused markets. * Our **products** respond directly to consumer demand for quality, sustainability, and transparency. This segment's fast growth is aligned with global trends in **wellness** and **functional foods**.

ADM's Global Agricultural Operations and Market Presence

Our strong **global presence** allows **ADM** to **efficiently source raw materials**, rapidly adjust to market demands, and deliver high-quality **food** and **feed ingredients** to partners in every continent. ADM's operations extend across **170+ countries**, underpinned by a **crop procurement network** that connects the world's richest agricultural regions directly to processing plants, and ultimately, to the end consumer.

How ADM Maintains Market Leadership:

* **Strategic Plant Locations:** Proximity to top agricultural regions (**Midwest USA**, **South America**, **Europe**, **Asia**) reduces **transportation** costs and improves access to the world's best **raw materials**.

* **Integrated Operations:** ADM's **procurement facilities** and **grain elevators** power a seamless **supply chain**—from farm fields to food processing units to shipping docks. *

* **Flexible Commodities Trading:** Our **commodities trading** desks react instantly to global

market fluctuations, ensuring efficiency in **procurement** and **distribution**. ##### ADM's Role by the Numbers * **420 Crop Procurement Facilities** worldwide—ensuring deep **market reach** and operational resilience * **62 million metric tons** of oilseeds processed annually * Presence within the **USA**, with flagship operations in **Illinois** & significant historical roots in **Minnesota** ### Year-over-Year ADM Performance Comparison (2022–2024) | Year | Global Revenue (USD, billions) | Net Income (USD, billions) | Countries Operated In | Major Sustainability Initiatives Launched | Market Share in Global Agribusiness (%) | | --- | --- | --- | --- | --- | | 2022 | 101.8 | 3.5 | 170+ | ADM Next Horizons (carbon-neutral targets, water savings) | 6% | | 2023 | 94.0 | 3.0 | 170+ | Expanded regenerative agriculture pilot programs | 6.1% | | 2024 (est) | 85.5 | 1.8 | 170+ | \$1.2B investment in sustainability projects, green energy integration | 6.05% | "In 2024, ADM invested \$1.2 billion in sustainability initiatives, setting a new benchmark for global agribusiness." ## **ADM Financial Performance: 2022–2024 in Focus** Our **financial performance** provides a critical snapshot of ADM's **market position** and resilience. Despite market volatility, ADM remains a powerhouse in **agriculture** and **food processing and commodities trading**. ### Latest Stock Market & Shareholder Insights * **Company:** Archer Daniels Midland Co. (Equity – USA Market) * **Current Price:** \$47.73 (as of June 3, 2024) * **Change from Previous Close:** -\$0.37 (-0.01%) * **Open Price:** \$47.81; **Volume:** 1,264,357 shares * **Trading Range:** Low \$46.82 – High \$48.20 We reported a net income of \$1.8 billion in 2024—a 48% decrease from prior years—reflecting the realities of market cycles and shifting **global agricultural operations**. Revenue dropped 9% to \$85.5B (from \$94B in 2023), largely due to reduced **profits** in **agricultural services** and **oilseeds**. Our **adjusted earnings per share** also declined by 32% to \$4.74. In response, we implemented a cost transformation plan, targeting \$500–\$750 million in reductions over three to five years, including a workforce trim of up to 700 positions. This aims to boost lean operations while reinvesting in **innovation** and **sustainable practices** across all market regions. * **2024 Assets:** \$53.3 billion * **2024 Equity:** \$22.2 billion * **Global Employment:** 44,043 people ## **ADM Sustainability Practices & Innovation in Food Processing** Our **sustainability practices** and commitment to **innovation** are critical differentiators for **ADM**. We actively invest in new **technologies** and eco-friendly solutions, openly championing the global shift toward cleaner food systems and **circular economy** models. ### Carbon Neutrality & Water Efficiency Goals * ADM has set a **carbon-neutral** target for **2035**, aligning all operational **segments** toward **sustainable agriculture** and **reduced emissions**. * **\$1.2B invested in 2024** toward green energy, water-saving infrastructure, and regeneration of local ecosystems. * Our **sustainability initiatives** span the entire value chain—from raw crop sourcing to product processing, packaging, and delivery. In 2022, we devoted \$387 million to **research and development**, resulting in **126 new patents** and market-leading solutions for the superseding years. ##### Leading by Example in Innovation * ADM's recent **circular economy** pilots turn agricultural waste into valuable bioproducts and renewable energy. * Our focus on **protein innovation** includes **plant-based alternatives** and advanced **nutritional solutions** to address global health and wellness trends. * Strategic investments in **food traceability**, data science, and digital quality control strengthen trust across the supply chain. **Want to track your farm's carbon footprint and support climate-smart farming? [Learn how Farmonaut's Carbon Footprinting Tool](https://farmonaut.com/carbon-footprinting/) can provide real-time emission monitoring and sustainability insights—crucial for compliance and eco-responsible branding! ## **Challenges, Controversies & Risk Management** Our size and global reach mean that **ADM** faces significant regulatory, compliance, and social challenges. Transparency, robust **accounting practices**, and

ethical leadership are paramount for sustained success. * In 2024, a major investigation was launched into potential **securities fraud** and **conspiracy** related to internal transactions—scrutinizing whether **ADM's Nutrition segment** performance was artificially inflated. This followed earlier issues, including a high-profile **1990s price-fixing** case. * Despite these controversies, we implemented vigorous compliance and **risk management protocols** to shield the integrity of our **business segments** and restore market trust. * Lessons learned underscore the importance of sound **corporate governance** and open communications across all **global operations**. ## **Digital Transformation: Farmonaut & The Future of Agri-Tech** The next era of **agriculture** and **food processing** will be driven by **digital agriculture platforms** and data-led solutions. **Farmonaut** leads this revolution, embodying the spirit of technological advancement while directly supporting farmers, agribusinesses, and industry stakeholders worldwide. ### What does Farmonaut offer? * **Satellite-Based Crop Health Monitoring:** With advanced **multispectral satellite imagery**, Farmonaut enables real-time vegetation health (NDVI), soil moisture, and crop growth tracking—empowering decision-makers with actionable intelligence. * **AI-Powered Advisory (Jeevn AI Advisory System):** Our AI-centric solution delivers **personalized, real-time insights** on farm management, weather risk, and yield optimization directly to your smart device—making precision farming more accessible than ever. * **Blockchain-Based Product Traceability:** By integrating blockchain, Farmonaut ensures **end-to-end authenticity** for agricultural supply chains, reducing fraud and boosting consumer trust. + Corporates can use Farmonaut's **[Traceability](https://farmonaut.com/product-traceability/)** tools to guarantee the provenance and safety of their food or textile products—ideal for global compliance and premium branding. * **Resource & Fleet Management:** Businesses use Farmonaut for **fleet tracking** and logistics optimization—cutting operational costs and increasing safety right from the field. + Unlock efficient large-scale **[Fleet Management](https://farmonaut.com/fleet-management/)** with live GPS and performance analytics—essential for agribusinesses managing agricultural machinery and transportation networks. * **Carbon Footprinting:** Monitor, analyze, and reduce your environmental impact with Farmonaut's **[Carbon Footprint Tracking](https://farmonaut.com/carbon-footprinting/)** tool, critical for compliance in eco-sensitive markets. **Farmonaut's unified, modular approach** means every stakeholder—from smallholder farmer to multinational agribusiness—can access scalable digital tools for productivity, transparency, and **sustainability**. * **Need real-time, verified data for crop loan approvals or insurance?** **[Farmonaut's satellite-based verification](https://farmonaut.com/crop-loan-and-insurance/)** supports financial institutions, reducing risk and streamlining agricultural lending. * **Interested in digitalizing your plantation or advisory at large scale?** **[See Farmonaut's Large-scale Farm Management tools](https://farmonaut.com/agro-admin-app/)** for plantation-level data control, advisory, and analytics. **Developers:** Integrate satellite weather and crop data in your apps via **[Farmonaut's API](https://sat.farmonaut.com/api)** (**[API Docs here](https://farmonaut.com/farmonaut-satellite-weather-api-developer-docs/)**). ### Accessible on All Major Platforms * **[Farmonaut Web App](https://farmonaut.com/app_redirect)**: Monitor and analyze your farmland anytime, anywhere * **[Farmonaut Android App](https://play.google.com/store/apps/details?id=com.farmonaut.android)**: Precision agriculture in your pocket * **[Farmonaut iOS App](https://apps.apple.com/in/app/farmonaut/id1489095847)**: Fast, user-friendly farm management on-the-go ## Farmonaut's Suite of Tools for Smarter Agriculture As value-driven innovators, we know that feeding the world requires more than traditional farming. Farmonaut's solutions directly address the key challenges faced by **ADM** and other leaders in the

agricultural sector: 1. **Digital Crop Health Monitoring:** Early detection of pest outbreaks, disease, or water stress with NDVI and multispectral indices helps boost **yields** and reduce costly interventions. 2. **Blockchain Traceability:** Improve transparency and traceability in **commodities trading**—building consumer trust and supporting regulatory compliance. 3. **Fleet & Resource Management:** Minimize fuel, maintenance, and logistics costs while enhancing safety and uptime for agricultural machinery. 4. **Environmental and Regulatory Reporting:** Comply swiftly with rising standards in **sustainability** and **carbon accounting** systems via ready-made dashboards and digital records. 5. **Flexible APIs & Data Integration:** Robust APIs provide enterprise and government users with automated access to land use, weather, and **crop monitoring** data—futureproofing large-scale agricultural **business** operations. **### Ready for Future-Ready Food Systems? Join the Movement.** With the convergence of **industry giants** like **ADM** and cutting-edge platforms such as **Farmonaut**, the **global agriculture** value chain is evolving faster than ever. Our collective mission is to ensure food security, **supply chain resilience**, and a positive environmental legacy for generations to come. **## FAQ: Archer Daniels Midland, ADM Operations & Sustainability** **#### What is Archer Daniels Midland's main business?** Archer Daniels Midland (ADM) is a global leader in agricultural processing, food ingredient manufacturing, and **commodities trading**. Our core business segments include **oilseed processing**, **corn processing**, **grain division**, and **nutrition solutions** for **food** and **animal feed** markets. **#### Where does ADM operate?** ADM operates in over **170 countries worldwide**, with key facilities in **USA** (notably **Chicago, Illinois** and **Minneapolis, Minnesota**), South America, Europe, and Asia. We leverage a robust **crop procurement network** to serve global markets. **#### How does ADM approach sustainability?** Our **sustainability practices** include ambitious targets for **carbon neutrality by 2035**, **\$1.2B in 2024 sustainability investments**, advanced water efficiency, and pioneering circular economy models in the **industry**. We carefully track resource use and promote recycling of agricultural by-products. **#### What recent financial performance trends should investors be aware of?** In **2024**, ADM reported a significant drop in net income (down 48% to \$1.8B) and revenue (down 9% to \$85.5B), driven by declining margins in oilseeds and agricultural services. The company responded with a strategic cost-cutting initiative and renewed focus on high-value segments. **#### How can agricultural businesses use digital technologies like Farmonaut?** Farmonaut's satellite imagery, AI, and blockchain solutions help businesses optimize yields, reduce input costs, strengthen traceability, and meet sustainability goals through real-time data insights and advanced analytics—no matter the size or location of their operations. **## Conclusion: Shaping the Future of Agriculture with Innovation & Responsible Leadership** The 2024 **ADM Report** delivers a compelling narrative of resilience, adaptability, and transformation. Despite financial headwinds and heightened scrutiny, **Archer Daniels Midland** stands tall, driven by a strategy that balances operational prowess, market foresight, and steadfast sustainability. Our **global agricultural operations** sustain food industries and economies worldwide—while our readiness to adapt ensures ongoing relevance and impact. As advanced digital tools—like those offered by **Farmonaut**—become mainstream in **farming**, **forestry**, and all parts of the **agriculture** value chain, the lines between traditional, industrial, and precision farming models continue to blur. The future hinges on unlocking new efficiencies, creating transparent supply chains, and delivering healthy, sustainable food—everywhere. Let us stay committed to innovation, sustainability, and ethical stewardship so we can address the world's growing food and agricultural needs. The time for **data-driven, responsible agribusiness**—supported by ADM's legacy and Farmonaut's vision—is now. *** Farmonaut API Access:** [Click here](https://sat.farmonaut.com/api)

Project Narrative ADM and Partners'Climate-Smart Solutions 1. Executive Summary of Pilot Project
Project Summary and Partners Archer-Daniels-Midland Company (ADM) seeks \$90 million dollars in
funding from the USDA Partnerships for Climate-Smart Commodities opportunity to launch a project
that will financially incentivize commodity producers to employ climate-smart practices on
approximately 2 million unique acres and over 6.15 million acres over five years. ADM and partners
will contribute \$47.6 million dollars (of which \$24.7 million to be paid directly to producers with
incentives) to bolster this effort through direct incentives and marketing campaigns for producers.
ADM plans to engage downstream customers in the supply chain to invest in climate smart agriculture
ingredients in the form of cost share. ADM will claim positive environmental benefits and allow
downstream customers that fall in a different part of the supply chain to claim environmental benefits
while following GHG protocol guidance for scope.3 emissions. The project income will be utilized as a
cost sharing requirement in which it will be used to pay for the additional services set forth in our
proposal. This project income will be applied to the ADM portion of the project. If the project income
doesn't materialize, ADM will use its funds and not use USDA funds to offset it. With USDA's support,
ADM will activate the resources, partnerships, and customer relationships needed to expand existing
climate-smart pilot projects into a successful climate-smart commodity supply chain. This project
stands to benefit thousands of producers across the U.S. and, ultimately, to catalyze and transform
the market for climate-smart commodities. ADM's five-year proposal will result in: • Incentive
payments for over 3,000 producers across 15+ states; o Year 1: 450 producers including 30
underserved producers o Year 2: 550 producers including 40 underserved producers o Year 3: 650
producers including 50 underserved producers o Year 4: 750 producers including 60 underserved
producers o Year 5: 860 producers including 70 underserved producers o Total: 3,250 producers
including 250 underserved producers • Will specifically focus on black growers for enrollment in the
underserved category • Development of climate-smart corn, soy, wheat, and peanuts (supply-side); •

Development of 15 million metric tons of climate-smart agriculture products for food, fuel, feed, and export markets (demand-side); 1 Attachment - Project Narrative • Greenhouse gas (GHG) reductions and removals of 1.8 million metric tons CO₂ equivalent (Comet Planner 3.0 adjustments to impacts).¹ In addition to project lead ADM, partners include the following (*underserved producer focus): • American Farmland Trust • CO₂stco • DKY • Ducks Unlimited • EarthOptics • Farmers Business Network (FBN) • Field to Market • Flint River Soil and Water Conservation District (FRSWCD) • Food Works Group (FWG)* Compelling Need for the Project • Iowa State University (ISU) • Kansas Association of Conservation Districts • Keurig-Dr. Pepper • Mid-America Biofuels/ARTCO • National Black Growers Council (NBGC)* • Practical Farmers of Iowa (PFI) • Purdue University • University of Nebraska—Lincoln ADM has a 120-year track record as a leader in value creation for agricultural supply chains. More recently, ADM has engaged partners to design and implement infrastructure for successful programs, including two award-winning Field to Market programs that offer solutions to end users looking to decarbonize their supply chains. ADM and its partners are ready to optimize and scale up these solutions through this funding opportunity. Scale is critical, as it will change climate-smart supply dynamics. Currently, companies looking for decarbonization solutions have to define project components, identify implementation partners, and engage technical expertise, which takes significant time. In addition, with every end user creating a different program, results are not comparative, and the true nationwide impact of these programs is difficult to measure. However, at scale, companies would be able to invest in already defined solutions immediately, accelerating climate benefits. ADM has vast supply chains and serves a broad array of end users providing a strong position from which to streamline and standardize a climate-smart commodity market approach. Various incentive programs and pilots have shown promise in compensating commodity producers for the impact of climate-smart practices, whether through GHG emission reductions or CO₂ sequestration. However, fragmented structures of data and impact measurement and valuation, as well as complex supply chains from commodity to end consumer, have made climate-smart commodity production difficult to implement at scale. A viable solution must: Using COMET-Planner reduction and removal estimates across all regions where acres will be sourced. 1 2 • Attachment - Project Narrative 1, Efficiently create value for producers, 2. Be attractive to buyers, 3. Maintain transparency throughout the supply chain, and 4. Generate measurable climate benefits. Data Collection, Calculation, and Outcomes Field-level data collection will yield the information needed to calculate Field to Market metrics, which include the following indicators: • Biodiversity • Land use Energy use Soil carbon • Greenhouse gas emissions • Soil conservation • Irrigated water use • Water quality Soil carbon sequestration will be forecasted using COMET-Planner, and biogeochemical modeling will be used to quantify sequestration values from farmer data and soil sampling in conjunction with remote sensing. Approach to Minimizing Data Collection Costs and Producer Barriers to Implementation This project will work to reduce the costs of data collection and soil sampling through economies of scale and using the subset approach from Field to Market's 2019 "Framework for Evaluating Sampling Methodologies for Continuous Improvement Accelerator Projects and Associated Claims." Rather than collect complete field-level data from all producers on all acres, this project will use a representative subset of acres to gather, analyze, and report metrics for the program. Producers will be categorized by region, and the square root of the total number of participating producers in each region will be selected to enter field-level data for their operations. Project participants not selected for field-level data entry will complete a shortened questionnaire that identifies climate-smart practice adoption. A similar approach will be used to identify fields for soil sampling, which will be used to benchmark and support the modeling results from USDA's

COMET-Planner. This subset approach to a large-scale program will allow for more money to go directly into implementation of climate-smart practices and increase revenue at the farm level. Geographic Focus, Crops, and Practices Producers will be recruited in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Missouri, Michigan, Minnesota, Nebraska, North Dakota, Ohio, Oklahoma, Tennessee, and Texas (see Figure 1). 3 . Attachment - Project Narrative Figure 1. Location Breakdown by Commodity. Each shaded area represents the counties or states where growers will be recruited to participate in the program. This typically represents a 50 mile radius around an ADM facility. Corn Soybeans Wheat Peanuts In year one, this project will focus on producers of corn, wheat, soy, cotton, and peanuts. Additional crops, such as flax, hemp, canola, pulses, cotton, and sorghum, will also be considered in future years. This range of crops will allow the project to impact not only a large number of acres and supply chains, but also a diverse population of producers. Climate-smart practices to be employed include cover crop (legume and non-legume), reduced tillage, and nutrient management. These practices will be described in more detail in section II. Project Management Capacity Project partners have extensive experience working with producers, as well as promoting and marketing climate-smart practices and impact. They include the following:

- Project Lead - ADM As a global leader in human and animal nutrition and the world's premier agricultural origination and processing company, ADM has the market access and power to make a profound impact on climate-smart commodities. ADM's breadth, depth, insights, facilities, and logistical expertise from over a century in business provide unparalleled capabilities to meet needs for food, beverages, fuel, and more.
- 4 Attachment - Project Narrative (b)(4) • Measuring, Monitoring, Reporting, Verifying (MMRV) Lead -Farmers Business Network (FBN) Founded in 2014, FBN believes that when producers share digital information with one another, they can make better decisions. FBN Sustainability, in place since 2017, is built on that same premise: enable producers to make data-driven conservation decisions that improve environmental outcomes while enhancing their businesses by increasing the value of climate-smart commodities. FBN will use their best-in-class technology to collect, process, and validate data and flow crop-production attributes and environmental outcomes from the field level down the supply chain to ADM and end users. FBN will use a combination of COMET-Planner for forecasting, Field to Market for emissions, and biogeochemical modeling for sequestration to quantify environmental impacts of climate smart practices. FBN will also collect a preponderance of soil data and practice data with the express purpose of verifying and extending existing environmental models.
- Technical Assistance (TA) Leads - Flint River Soil and Water Conservation District (FRSWCD) and Practical Farmers of Iowa (PFI) ADM will work with several TA providers to provide on-the-ground support in each region and reduce producers' barriers to adoption. FRSWCD has a strong track record of working with producers in the southern US to adopt climate-smart agriculture practices. FRSWCD will lead technical assistance in Georgia and will assist in identifying similar technical assistance partners in Alabama, Arkansas, Florida, Tennessee, and Texas. In the Midwest, PFI will lead TA in Iowa, Illinois, Nebraska, and Missouri. Final approval is in process for additional TA in the Midwest through partnerships with American Farmland Trust (Illinois), Kansas Association of Conservation Districts, Minnesota Soil Health Council, and Ducks Unlimited (Indiana and Michigan), who have been engaged through the Midwest Cover Crop initiative. This initiative, a partnership of ADM, the National Fish and Wildlife Foundation (NFWF), and the National Resources Conservation Service (NRCS), will expand technical assistance partnerships across the Midwest to build the capacity for large-scale climate-smart programs.
- Climate-Smart Commodity Buyers - Keurig-Dr. Pepper, Costco, Mid-America Biofuels/ARTCO These commodity buyers are major buyers in the food, feed and retail, and fuel industries, respectively. All will purchase climate-smart agricultural products over the

course of this project, and these purchases will contribute to premiums for producers through a cost sharing program, thereby supporting long-term sustainability.

- **University Research** - Purdue University, University of Nebraska, Iowa State University (ISU) Universities will conduct research on the soil in farm systems that adopt carbon sequestration practices, with the goal of identifying early indicators that can reduce the need for expensive soil sampling methods. Universities will create a panel that will coordinate with ADM on findings.
- **Underserved Producer-Focused Project Partners and Experience**
- **Underserved Producer Engagement Lead** - Food Works Group (FWG) FWG is a women-led food systems advisory firm that brings experience in underserved producer engagement and food systems equity work. They will lead the project's overall strategy to engage and support underserved producers.
- **Underserved Producer Outreach Lead** - National Black Growers Council (NBGC) As an organization whose mission is to improve the efficiency, productivity, and sustainability of Black row crop farmers, NBGC brings trusted relationships with Black commodity producers. ADM and NBGC identified more than 188 Black producers within the states mentioned in this proposal and will work to recruit as many as possible. As part of their commitment to equity and accountability, ADM will report quarterly on progress in engaging Black producers through this opportunity.

II. Plan to Pilot Climate-Smart Agriculture Practices: Achieving Supply-Side Scale

The ability to recruit, train, and incentivize producers to adopt climate-smart agriculture practices is a strength of ADM, and of partners FBN and. PFI. ADM buys directly from over 55,000 producers each year in the U.S. alone, while FBN's producer network is over 30,000 strong. Having implemented successful ADM climate-smart pilot programs over the past decade, ADM is prepared to manage a project that reaches an estimated 3,000 producers and 6.5 mil (cumulative) acres by year five (2 mil unique acres in year 5).

6 Attachment - Project Narrative Description of climate-Smart Agriculture Practices to Be Deployed

Climate-smart practices to be employed include the following:

- **Cover crops**, which include both legumes and non-legumes — Benefits include preventing erosion and nutrient runoff; improving soil microbial activity; and increasing soil water-holding capacity and soil organic matter. Cover crops increase soil organic carbon in several ways. While growing, they pull CO₂ from the atmosphere and convert it to biomass, and after termination, the plant residue and roots decompose into soil organic matter. In addition, the improvements to soil structure provided by the root systems of the cover crop help prevent soil organic carbon loss.
- **Reduced tillage**, which includes decreasing or eliminating tillage passes — Benefits include improving soil structure and lowering bulk density, improving water filtration and drainage, enhancing retention of plant-available water, reducing nutrient leaching, improving microbiological activity, increasing organic matter and soil carbon, and reducing machinery emissions. The oxidation that follows conventional tillage leads to soil organic carbon loss. Reduce tillage protects carbon stocks by avoiding the soil structure disruptions of intense tillage practices that lead to soil disintegration and nutrient loss.
- **Nutrient management**, which includes minimizing excess nutrients, optimizing applications for yield goals, using nitrogen inhibitors, employing precision application, managing timing of applications, and utilizing alternatives to synthetic inputs — Benefits of nutrient management include reduced runoff, protection of long term soil health and lower field emissions. This project will include the following crops:

- **Year 1:** corn, soy, wheat, peanuts, and cotton
- **Years 2 - 5:** continue corn, soy, wheat, cotton, and peanuts, and add flax, hemp, canola, pulses, edible beans, and sorghum

This mix of crops allows the project to incentivize the expansion of climate-smart agriculture across diverse farm operations; enhance markets for emerging, less-carbon intensive crops; reach diverse producers across the U.S., including small and underserved producers; and create a streamlined, standardized incentive approach across commodity markets. Beginning in year two, baseline data will be collected from producers in the additional crops to understand the need and

opportunity for impact. Based on these findings, the additional crops will be made eligible for incentives, and Field to Market will integrate edible beans and flax into the Fieldprint Calculator. 7

Attachment - Project Narrative New Cornet Planner 3.0 estimates • GHG savings reduced mostly due to new comet planner estimates • Total Acreage dropped 14% from original proposal due to higher allocation to larger impacted practices like cover crops. Larger amount of cover crops increase the cost per acre but support getting closer to original impact target. riftfr CO2e Total CO2e reductions (GREET) 2.15 Total CO2e reductions (COMET) 1.79 \$/MT CO2e \$69 Project Parameters Total Acres Total Farms Year 1 500,000 450 Year 2 750,000 550 Year 3 1200,000 650 Year 4 1,700,000 750 Year 5 2, X00000 850 Total 6,150,000 3250 8

Attachment - Project Narrative Planfor Outreach, Recruitment, Technical Assistance, and. Training Across the targeted states and crops, ADM will focus recruitment efforts at approximately 30 facilities, each of which represents a set of relationships between grain buyers and producers. As a supply chain initiative, these facilities are a key component of this project's recruitment strategy. Certain facilities, like ADM's Memphis facility, will specifically tailor recruitment activities to Black fanners or other underserved producer groups. Producer outreach and recruitment activities will be shared among multiple project partners, including ADM, FBN, PFI, and NBGC, as each partner brings their own strengths, networks, and trusted producer relationships. ADM engages its network of U.S producers through multiple pathways, including in-person events and print and digital communications, allowing them to drive awareness, provide education, and support implementation. ADM has retained the services of a professional marketing firm who will utilize their expertise, including in-depth research into producer perspectives on farm sustainability within ADM's network, to develop messaging strategies and manage an ongoing outreach campaign. FBN, PF1, other TA partners, and NBGC will also tap into their networks for outreach and recruitment. Onboarding and data collection will be as streamlined as possible since sharing data can be, a sensitive and onerous proposition for producers. Beyond onboarding, producers will be able to utilize that same trusted point of contact for technical assistance and training. ADM, FBN, and PFI all have TA providers who can support producers through the initial and ongoing implementation of climate-smart practices. ADM and its program partners will also coordinate efforts with local NRCS locations in the focus regions. Finally, ADM will convene climate-smart education days across project regions that bring together producer peer networks and subject matter experts to learn from each other's experiences and share current best practices. Each of the 30 locations will host an education day during each year of the project. Plan to Provide Financial Assistancefor Climate-Smart Practices Adoption of climate-smart practices has been slow due to real and perceived risks. Implementing cover crops, for example, may result in a yield decrease in the first year or two. In addition, lack of technical expertise and experience can inhibit adoption. To overcome these hurdles, this project will provide not only technical assistance, but also financial assistance. Incentive payments will offset risks or costs associated with climate-smart practice adoption. Producers who comply with all M_MRV requirements to track and report their climate-smart practices will be paid a premium, which will be on a per acre basis in years one and two. Premiums will range from \$12 - \$36/acre and be determined by modeled emissions reductions and carbon sequestration per crop and practice(s). Incentive payments will offset risks or costs associated with climate-smart practice adoption. The multi-year approach allows producers to recognize the co-benefits to soil health and cost savings. 9

Attachment - Project Narrative Plan to Enroll and Engage Underserved Producers With the support of underserved producer-focused project partners, including FWG and NBGC, ADM will develop an equity-oriented approach aimed at robust participation of producers from these groups, ensuring they are able to participate in premium programs. Critically, acknowledging that Black producers have been systematically disadvantaged

compared to majority producers, this project has designated to target a minimum of 7% of underserved producers. The National Black Growers Council (NBGC) will lead underserved producer outreach and recruitment, building off of their national network of Black commodity producers and ADM's existing relationships with underserved producers at several locations. (b)(4) To ensure cohesion, shared goals, and effective progress, FWG will lead the project's efforts to equitably and inclusively engage underserved producers across all crops, regions, and partners. FWG will work with NBGC and other partners to support and enhance outreach and education for underserved producers. FWG will also identify additional partners who align with project goals and manage the network of project partners to build community and facilitate conversations around equity goals for climate-smart commodity production. With the guidance of an advisory team, FWG will develop a strategic diversity, equity, and inclusion (DEI) plan to address barriers for underserved farmers to full participation in climate-smart agriculture. FWG will manage plan implementation, track execution, and help navigate and solve potential obstacles. In collaboration with partners, FWG will develop methods and metrics to measure the project's value creation for underserved producers across multiple domains, such as awareness and understanding of climate-smart commodity production, access to knowledge capital, and the impact of climate-smart production on their farm enterprises.

III. Plan to Measure, Monitor, Report, and Verify Impact: Generating Real Climate Benefits

In addition to encouraging climate-smart agriculture at scale across a diverse range of commodities and producers, a key goal of this project is to measure, monitor, report, and verify (MMRV) climate benefits through a low-cost, high-integrity approach. FBN will lead all MMRV activities for this project, with university partners contributing valuable research and validation.

Approach to Greenhouse Gas Benefit Quantification

FBN takes a model-agnostic approach to collecting, validating, and analyzing verifiable data at the field and subfield level. For the purposes of this project, FBN will use COMET-Planner for forecasting sequestration and emissions reductions for combinations of practices included in that system, and Field to Market for quantifying emissions with production data. Biogeochemical modeling in conjunction with remote sensing will be used as well, per guidelines from USDA's 10 Attachment - Project Narrative Quantifying Greenhouse Gas Fluxes in Agriculture and Forestry: Methods for Entity-Scale Inventory, GHG Protocol, and Science Based Target Initiative, especially as they pertain to sequestration calculations. These models match the diversity of crops and practices to be incentivized through this project. FBN and EarthOptics will also lead a heavy soil sampling exercise to add to, improve, and extend current modeling efforts. Using guidance from recent soil carbon mapping literature, a stratified sampling plan will be employed to efficiently capture sites across geographies in the first year. Over each following year, a portion of samples will be dedicated to resampling previous locations, while additional samples will be allocated to new geographies. Resampled locations will provide data for model validation as well as understanding the temporal changes in soil carbon stocks from climate-smart practices. We expect these samples to substantially improve our ability to model outcomes through fusion of remote sensing and biogeochemical models. Additionally, EarthOptics will collect in-situ vehicle sensor readings and use proprietary machine learning algorithms to train a model on a representative set of measurements. That model will then be used to interpret large areas using low-cost data from farm vehicles and remote sensing platforms.

Approach to Monitoring Practice Implementation

Data will be collected from each farm in the program. FBN's proprietary data ingestion technology integrates with cloud systems to pull, organize, and analyze machine data automatically, while having the flexibility to process different formats of non-machine data that will come from the diverse farm businesses in the program. Before analyzing and quantifying outcomes, FBN reviews data to ensure high quality. Validation encompasses all activities that provide confidence

that the data is accurate. This process includes but is not limited to: • Validating yield outcomes against over 300 million acre-events of real-world farm data submitted by producer members, • Utilizing satellite imagery and computer vision to identify anomalies and inconsistencies (including confidence in cover cropping and tillage activities), and • Evaluating confidence in nutrient activities using multiple university models and public standards. FBN's data science models capture 90 percent of cover crop detection errors, while yield expectations are 85 percent accurate.

Approach to Verification of Greenhouse Gas Benefits This project aims to demonstrate how sampling can be incorporated into modeling to balance claim credibility and cost at scale. By leveraging FBN's data expertise, the sheer volume of data collected, several well-respected models, and strategically targeted field-farm quantification and soil sampling, this project will minimize MMRV cost and maximize value flowing to producers.

11 Attachment - Project Narrative Data will be collected from all farms via a production survey, with quantified GHG outcomes assigned based on the mix of crops and practices. Surveys will also include attestation from producers that payments are not provided to a producer or land owner for the same production practice or system implementation on the same land for which the producer or land owner has already received, or is contracted to receive, funding through another USDA program, though enhancements to existing practices may be funded as part of these pilot projects. A subset of producers will also participate in a more detailed data collection process on all of their fields to validate and complement modeling. Then, a smaller subset of three to five percent of producers will undergo soil sampling. Finally, a select five to seven producers in each of three states (fifteen to twenty total) will be selected in year one for highly detailed environmental data collection and analysis over all five years of the project through university research partners University of Nebraska—Lincoln, Iowa State University, and Purdue University. The primary purpose of this research will be to look for early climate impact indicators that could be used for verification in place of robust and costly soil sampling. University research will also help to qualify and quantify environmental co-benefits, such as enhanced water quality and reduced erosion, from climate-smart practices.

Agreement to Participate in USDA Partnerships Network If awarded this grant, project lead ADM agrees to participate in the USDA Partnerships Network for Climate-Smart Commodities Learning Network.

(b)(4) IV. Plan to Develop and Expand Markets: Unlocking Demand and Communicating Value Partnerships to Market Climate-Smart Commodities ADM will work with end users to support their sustainability goals and cultivate robust markets for climate-smart commodities. ADM's end users include anchors in the food, feed and retail, and fuel industries. Key market partners supporting this project include the following: • Keurig-Dr. Pepper (Food) • Costco (Feed) • Mid-America Biofuels/ARTCO (Fuel) ADM will create a market that differentiates climate-smart commodities by establishing cost sharing opportunities for these end users to receive the benefits of a lower carbon supply chain. Climate-smart products will be created over the duration of the project, beginning with simple per acre payments in years one and two and established as a cost share to reduce costs for early adopting end users. Marketing will help end users understand and communicate the value of the climate-smart products

Current demand for climate-smart commodities from food, feed, and industrial

12 Attachment - Project Narrative companies is driven largely by individual companies' scope 3 GHG reduction commitments, and their ability to meet those commitments hinges on finding sufficient, reliable climate-smart supply chains through supplier partners. Then those companies must rely on their own marketing efforts and influence to tell the story of these products, which can be difficult since consumer awareness, of climate-smart agriculture is low. ADM's proposal has the ability to be multi-dimensional in providing solutions for all end users of agricultural products, including renewable fuels. Variable feedstock scoring for fuel is a huge opportunity to further reduce carbon intensity of fuel consumed and

produced. Renewable fuels have been a key part of ADM's business since ethanol production began in 1978, followed by biodiesel production in 2006. This project's end goal is to develop programs that have real impact on end users' climate commitments, creating sustainable market creation and funding for climate-smart practices past the five year duration of proposal. By helping to solidify, standardize, and expand climate-smart commodities, it will allow companies to create climate-smart consumer marketing, reduce their scope 3 emissions from the agricultural products in their supply chains, and capitalize on future development of variable feedstock scoring for field level practices. ADM is already building the groundwork for consumer education and marketing both in-house and with marketing partners due to the increased interest from end users to stand up climate-smart programs. Estimated Economic Benefits for Participating Producers Premiums will range from \$12 - \$36/acre depending on expected emissions reductions and carbon sequestration per crop and practice(s). ADM and TA partners will work with producers to minimize implementation costs over and above the incentive payment, as well as to maximize cost savings from climate-smart practices. Cost savings could result from reduced herbicide and fertilizer use and fuel savings. Direct incentives combined with cost reductions will lead to increased profitability at the farm level and ongoing climate-smart practice adoption.

13 Attachment - Project Narrative This climate-smart agriculture proposal has the opportunity to similarly expand opportunities for U.S. commodities across multiple sectors around the world. ADM has received dozens of requests to provide climate-smart solutions to end users. By working with Keurig-Dr. Pepper, Costco, ARTCO, and others, ADM will advance the adoption of premiums for climate-smart commodities and create sustainability beyond this funding opportunity. In addition, ADM will further accelerate the development of climate-smart markets across supply chains by leveraging third party marketing support

14 Benchmarks: Required Quantitative Targets by Quarter (Cumulative) - some initial quarters may be zero:

	2023	June	Sept	Dec
Number of producers involved	50	150	250	450
Number of underserved producers involved	5	15	30	50
Number of acres involved	100,000	250,000	500,000	750,000
Dollars provided to producers	250,000	500,000	750,000	1,000,000
GHG Benefits (Metric Tons of CO ₂ e Reduced or Sequestered)	5	15	30	45
Number of new marketing channels established	3	10	20	30
Number of marketing channels expanded	3	10	20	30
Number of measurement tools utilized	3	10	20	30
Other Required Benchmarks that may be quantitative or qualitative:				
Outreach, training and other technical assistance	3	10	20	30
Other MMRV and supply chain traceability attributes	3	10	20	30
Other measurements of work related to marketing of commodities	3	10	20	30
Demonstrated engagement Of major partners	3	10	20	30

At the end of April ADM and Technical Assistance partners will align with recruiting efforts and education to farmers. The two biggest components will include farmer consultations with farmers and at least one education event held by TA partners per year. Number of consultations per quarter can be reported but would prefer annually. Farmers will be enrolled and contracted throughout the year. As farmers get enrolled FBN will start collecting field level data for scoring right away. A Soil sampling plan will be created to be executing in the fall of every year. After final yields are realized then FBN will do an analysis of impacts that will be delivered by March of the following year. Number of farmers that field level data was collected can be reported quarterly but would prefer annually. ADM will engage supply chain and give presentations to downstream customers about positive impacts of climate smart commodities. When customer signs up for program it will be reported to. USDA as a new market. All work at the farm will be in the US but markets will be created domestically and for export that covers food, fuel, feed, and industrial products. New markets created can be reported quarterly but would prefer annual reporting. Each year will start off with a kick off meeting with all partners and roles assigned. Then we will have quarterly check ups about work that has been done with all partners.

2024 March June Sept Dec

	2024	March	June	Sept	Dec

required to submit reports to document their performance under the Partnerships for Climate-Smart Commodity funding opportunity. These submissions will be required to use the Microsoft Excel workbook templates provided by USDA. The workbooks contain a series of worksheets that collect data in a standardized format to ensure data quality and allow for aggregation and summary of this information. The entire workbook must be submitted quarterly, with updates to all applicable worksheets. This guide is divided into three sections. The Overview of Reporting Requirements section summarizes the layout of the reporting workbook and presents the data elements included in each worksheet. It also describes additional documents that must be submitted to supplement the performance reports. The Data Definitions section provides descriptions and allowable response options for each data element. The guide also indicates whether each data element is required, applicable at times, or optional; as well as how frequently each data element must be updated. Finally, the Appendices contain practice and commodity lists that will be used for these reports. Reporting is necessary for USDA oversight of this effort. The data elements required for inclusion in the quarterly performance reports allow USDA to conduct selected audits to review whether producers are receiving federal funds from multiple sources for the same purpose; to determine whether GHG benefits from implementation of climate-smart agriculture and forestry (CSAF) practices are being estimated accurately; and for other purposes deemed appropriate by USDA. The reporting worksheets collect information at four levels: project, partner, producer, and field. Descriptions of each level: Project level: Information about activities and impacts at a whole project/aggregate level (i.e., reflecting all activities under the grant agreement). Some project-level reporting is further subdivided by commodity type or a combination of commodity and CSAF practice(s) (commodity x practice). Partner level: Information about activities related to a single organization (recipient, subrecipient, contractor, or other partner) within a project. Producer level: Information about individual producers who have one or more farms enrolled in a project. Field level: Information about individual fields enrolled in a project. Certain data elements are required to be reported for each producer and field enrolled in a project. In order to minimize the burden associated with data collection and to enable USDA to match data to existing records, these producer- and field-specific records must use the producer's established FSA Farm, Tract and Field IDs, and report the State and County associated with the Farm ID. Associated data entered in conjunction with these data elements, such as Producer Name, must match the data contained in the customer's Business Partner record, and the Farm Operating Plan in Business File for that Farm ID. Disclosure of this information is protected under Section 1619 of the Food, Conservation, and Energy Act of 2008 (PL 110- 246), 7 U.S.C. 8791. Additionally, Departmental Regulation 4370-001 provides USDA's policies for collecting demographic data, including race, ethnicity and gender. Providing demographic information is voluntary and at the discretion of the customer. Demographic information is used by USDA for statistical purposes only and will not be used to determine an applicant's eligibility for programs or services for which they apply. Note: For purposes of this guide, "farm" refers to the operation from which climate-smart commodities are produced and may represent farms, ranches, forests or other operations. Similarly, "field" refers to the individual land units at which climate-smart practices are being implemented to produce climate-smart commodities and may represent lots, farmsteads or other units, depending on the type of operation and commodity. The use of "Farm", "Tract" and "Field" align with the FSA definitions; for example, "A field is a part of a farm that is separated from the balance of the farm by a permanent boundary, such as; fences, permanent waterways, woodlands, croplines in cases where farming practices make it probable that this cropline is not subject to change, and other similar features." Version 1.0 Page 2 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for

Climate-Smart Commodities Data Dictionary for Recipients February 2023 The following tables list the data elements included in each reporting worksheet, along with a brief description of each item.

Project Summary These data will be collected about each project. Cumulative results are reported each quarter. Report last quarter's entry if there has been no change in this quarter. Table 1. Project Summary elements

Data element name	Commodity type	Commodity sales	Farms enrolled	GHG calculation methods	GHG cumulative calculation	Cumulative GHG benefits	Cumulative carbon stock	Cumulative CO2 benefit	Cumulative CH4 benefit	Cumulative N2O benefit	Offsets produced	Offsets sale	Offsets price	Insets produced	Cost of on-farm TA	MMRV cost	GHG monitoring method	GHG reporting method	GHG verification method	Description	Frequency	Type of commodity(ies)	incentivized by the project	
Quarterly Indicates sales of the commodity(ies) related to the Quarterly project occurred this quarter	Indicates enrollment activities occurred this quarter	Quarterly Methods used to calculate greenhouse gas (GHG)	Quarterly benefits	Method used to calculate cumulative GHG benefits	Quarterly Whole project estimate of total GHG (CO2e) emission	Quarterly reductions	Whole project estimate of total carbon sequestration	Quarterly Whole project estimate of total CO2 emission	Quarterly reductions	Whole project estimate of total CH4 emission	Quarterly reductions	Whole project estimate of total N2O emission	Quarterly reductions	Amount of carbon offsets produced by project	Quarterly Name of marketplace where carbon offsets were sold	Quarterly Price of carbon in offset sales	Quarterly Amount of carbon insets produced by project	Quarterly Cost of on-farm technical assistance (TA) provided to Quarterly producers	Cost of measurement, monitoring, reporting, and Quarterly verification (MMRV) activities	Methods used by project to monitor GHG benefits (up Quarterly to 5)	Methods used by project to report on GHG benefits (up Quarterly to 5)	Methods used to verify GHG benefits (up to 5)	Quarterly	Version 1.0

Page 3 of 87 ATTACHMENT - DATA DICTIONARY

USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023

Partner Activities These data will be collected at the project level. Each row in this worksheet will represent one organization involved in the project, including the recipient and all contributing partners. A partner is any organization that is receiving project funds or providing matching contributions (funds or in-kind contributions) to the project. While the recipient must complete one row for their own organization, not all data elements apply to the recipient. These exceptions are noted in the detailed descriptions of the specific elements in the Data Definitions section of this guide. Data are reported cumulatively each quarter. Report last quarter's entry if there has been no change in this quarter. Table 2. Partner Activities elements

Data element name	Partner ID	Partner name	Partner type	Partner POC	Partner POC email	Partnership start date	Partnership end date	New partnership	Partner total requested	Total match contribution	Total match incentives	Match type	Match amount	Training provided	Activity by partner	Activity cost	Products supplied	Product source	Description	Frequency	Unique ID for each partner	One-time Name of partner organization	One-time Type of organization	One-time Partner point of contact name	As applicable Partner point of contact email	As applicable Start of partnership on project	One-time End of partnership on project	As applicable Indicator for partner organizations that have no prior work with the	As applicable recipient	Total amount requested to date by partner from recipient	Quarterly Total amount of match contribution by partner to date	Quarterly Total amount of match contribution by partner for incentives	Quarterly Top 3 types of match contribution by partner, other than incentives	Quarterly Value of match contributions by type	Quarterly Top 3 types of training provided to the partner through project	Quarterly Top 3 types of activities provided by this partner to producers or	Quarterly other partners	Approximate cost per activity type provided by partner to producers	Quarterly or other partners	Names of products supplied to producers as part of project activities	Quarterly or incentives

Supplier or source of products supplied to producers as part of Quarterly project activities or incentives

Version 1.0 Page 4 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Marketing Activities

These data will be collected at the project level. Each row in this worksheet will correspond to one commodity for which the project enrolls fields and one marketing channel used to sell that commodity by the project or producers enrolled in the project. Data are reported for the current quarter and are not cumulative. If no sales of the commodity were reported during a quarter, do not complete this worksheet for that quarter.

Table 3. Marketing Activities elements

Data element name	Commodity type	Marketing channel type	Number of buyers	Names of buyers	Marketing channel geography	Value sold	Volume sold	Price premium	Price premium to producer	Product differentiation method	Marketing method	Marketing channel identification method	Traceability method	Description	Frequency	Type of commodity incentivized by the Quarterly project	Type of marketing channels used	Quarterly Number of buyers per marketing channel	Quarterly Names of buyers in the marketing channel	Quarterly Geography of marketing channel	Quarterly Value of commodity sold by marketing channel	Quarterly Volume of commodity sold by marketing channel	Quarterly Price premium of commodity by marketing channel	Quarterly Percent of price premium that goes to the producer	Quarterly Top 3 types of product differentiation methods used	Quarterly Top 3 ways marketing channel was identified	Quarterly Top 3 types of supply chain traceability methods used

Version 1.0 Page 5 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Producer Enrollment

These data will be collected at the producer level about each farm enrolled in the project. In this worksheet, each row will correspond to one farm that has at least one field enrolled in the project. Data are reported when a producer first enrolls one or more fields in the project. If a producer is enrolled in the project for multiple years, review the farm characteristics each time a new contract is signed and provide any necessary updates. The quarterly submission should contain information about each farm initially enrolled in the project during that quarter and for updates to farms that have re-enrolled during that quarter, as applicable. If no farms are enrolled during that quarter, do not complete this worksheet for that quarter.

Table 4. Producer Enrollment elements

Data element name	Description	Frequency	Farm ID	Unique Farm ID assigned by FSA	State or territory	State name (must match FSA farm enrollment data)	County of residence	County name (must match FSA farm enrollment data)	Producer data change Indicator that producer data was updated at re-enrollment	As applicable	Producer start date	Contract start date	Enrollment	Producer name	Name of primary operator	Enrollment Underserved status Indicator the primary operator is considered underserved and/or a Enrollment small producer	Total area	Total area of enrolled operation	Annual Total crop area	Total crop area in enrolled operation	enrolled Annual Total livestock area	Total livestock confinement, pasture and rangeland in enrolled Annual operation	Total forest area	Total forest area in enrolled operation	Annual Livestock type	Top 3 types of livestock on enrolled operation	Annual Livestock head	Total livestock currently managed (by type)	Annual Organic farm	Indicator that part of the farm is certified or transitioning organic	Annual Organic fields	Indicator that any of the enrolled fields are certified or transitioning	Annual organic	Producer motivation	Motivation for participation	Annual Producer outreach	Top 3 types of outreach provided to producer	Annual CSAF experience	Indicator of prior implementation of CSAF practices at this farm	Annual CSAF federal funds	Indicator of prior receipt of federal funds for CSAF practices	Annual CSAF state or local funds	Indicator of prior receipt of state funds for CSAF practices	Annual CSAF nonprofit funds	Indicator of prior receipt of nonprofit funds for CSAF practices	Annual CSAF market incentives	Indicator of prior receipt of

market incentives for CSAF practices Annual Version 1.0 Page 6 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field Enrollment These data will be collected about each field enrolled in the project. In this worksheet, each row corresponds to one field x commodity combination enrolled in the project. Generally, data are reported once for each field, at its initial enrollment. The quarterly submission should contain information about each field initially enrolled in the project during that quarter. If no fields are enrolled during that quarter, do not complete this worksheet for that quarter. If a field is enrolled for multiple years, any relevant changes, such as a new ID number or changes to the commodity or practice combinations should be entered in this worksheet during the quarter it is re-enrolled, or as applicable. Table 5. Field Enrollment elements Data element name Description Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name Physical County of field Physical county name must match FSA farm records Prior Field ID Previous Field ID when reconstitution of farm results in new Field IDs Field data change Indicator that field data has changed from initial enrollment Contract start date Start date of contract Total field area Size of enrolled field Commodity category Category of commodity(ies) produced Commodity type Type of commodity(ies) produced Baseline yield Average yield of commodity in 3 years prior to enrollment Baseline yield location Location for which baseline yield is provided Field land use Most common land use in field in past 3 years Field irrigated Most common irrigation type in field in past 3 years Field tillage Most common tillage in field in past 3 years Practice past extent - farm Extent of operation that implemented this practice prior to project enrollment Field any CSAF practice Indicator for prior CSAF practices in this field in past 3 years Practice past use - this field Indicator of prior use of this practice in this field in the past 3 years Practice type CSAF practice(s) that will be implemented in enrolled field (up to 7) Practice standard Organization that developed CSAF practice standard implemented in field Planned practice implementation Year that practice is planned to be implemented year Practice extent Area or number of animals for which practice is implemented Follow-on questions Follow-on questions by practice type (see Table 11) Version 1.0 Page 7 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Farm Summary These data will be collected about each farm enrolled in the project. In this worksheet, each row will correspond to one farm that has at least one field enrolled in the project. The quarterly submission should contain updates to any data elements that have changed for each farm enrolled in the project during that quarter. If there are no changes from the previous quarter, do not complete this worksheet for that quarter. Data are not cumulative. Table 6. February 2023 Field Summary These data will be collected about each field enrolled in the project for a commodity x practice(s) combination. In this worksheet, each row will correspond to one field x commodity x practice(s) combination enrolled in the project. Data for each field will be reported quarterly and are not cumulative. Report data for any elements that have an update in that quarter. Greenhouse gas benefit estimates must be entered upon practice completion or annually, as appropriate. If there are no changes from the previous quarter, do not complete this worksheet for that quarter. This worksheet includes a section to report the "official" estimate of GHG benefits — amounts of greenhouse gas emissions reduced and carbon sequestered — for the field. These quantities refer to the estimates that are used to calculate the project's aggregate impact (reported in Table 1). Tables 8 and 9 are used to report alternate estimates of the field-level GHG benefits when additional methods are used to model (Table 8) or measure (Table 9) these impacts. Any field that can use COMET-Planner must submit those results, either as the official or alternate model. Table 7. Field Summary elements Data element name Farm ID Tract ID Field ID State or territory of field County of field Commodity type Practice type Date practice complete Contract end date MMRV assistance provided Marketing assistance provided Incentive per acre or head Field commodity value Field commodity volume Cost of implementation Cost coverage Field GHG monitoring Field GHG reporting Field GHG verification Field GHG calculations Field official GHG calculation Field official GHG ER Field official carbon stock Field official CO2 ER Field official CH4 ER Field official N2O ER Field offsets produced Field insets produced Other field measurements Description Frequency Unique Farm ID assigned by FSA Unique Tract ID assigned by FSA Unique Field ID assigned by FSA State name County name Type of commodity produced from field Quarterly Type of practice(s) incentivized in field (up to seven) Quarterly Date that practice implementation is certified complete Quarterly End date of contract Quarterly Indicator that MMRV assistance is provided to field Quarterly Indicator that marketing assistance provided for commodity from field Quarterly Indicator that a per acre/head incentives is provided for the CSAF Quarterly practice(s) on this field Value of commodity produced from field Quarterly Volume of commodity produced from field Quarterly Total cost of practice implementation in field Quarterly Percent of total cost of implementation of practice covered by project Quarterly incentives Methods used to monitor GHG benefits in field (up to 3) Quarterly Methods used to report on GHG benefits for field (up to 3) Quarterly Methods used to verify GHG benefits for field (up to 3) Quarterly Methods used to calculate GHG benefits for field Quarterly Method used to calculate official GHG benefits for field Quarterly Official estimate of total GHG emission reductions for field Quarterly Official estimate of total carbon sequestration for field Quarterly Official estimate of total CO2 emission reductions for field Quarterly Official estimate of total CH4 emission reductions for field Quarterly Official estimate of total N2O emission reductions for field Quarterly Amount of carbon offsets produced in field Quarterly Amount of carbon insets produced in field Quarterly Indicator that field data was collected for reasons other than GHG Quarterly benefit estimation Version 1.0 Page 9 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG Benefits - Alternate Modeled If greenhouse gas benefits are modeled for the same field using multiple methods, the results for the alternate models are reported in this worksheet. The "alternate" models refer to those model results that were not used in the calculation of the project's aggregate impact (as reported in Table 1). Any field that can use COMET-Planner must submit those results, either as the official or alternate model. These data will be collected about the modeled GHG benefits for each field x commodity x practice(s) combination. In this worksheet, each row will correspond to one field enrolled in the project. Data are not cumulative. Each quarterly submission should include information for all

fields that have new modeled data. Greenhouse gas benefit estimates must be entered upon practice completion or annually, as appropriate. Table 8. GHG Benefits — Alternate Modeled elements Data element name Description Frequency Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name County of field County name Commodity type Type of commodity(ies) produced from the field (up to 6) Annual Practice type Type of practice(s) incentivized in field (up to 7) Annual GHG model Model used to calculate GHG benefits Annual Model start date Start date of model run Annual Model end date End date of model run Annual Total GHG benefits estimated Estimate of total GHG benefits for field Annual Total carbon stock estimated Estimate of total change in carbon stock for field Annual Total CO2 estimated Estimate of total CO2 emission reductions for field Annual Total CH4 estimated Estimate of total CH4 emission reductions for field Annual Total N2O estimated Estimate of total N2O emission reductions for field Annual Version 1.0 Page 10 of 87 ATTACHMENT - DATA DICTIONARY

USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG Benefits - Measured Projects must report the results of any carbon stock or greenhouse gas emission measurements in this worksheet. These data will be collected at the field level. Each row will represent a separate measurement method used to calculate GHG benefits for a given field. Data are reported once per year of measurement and are not cumulative. Each quarterly submission should include information for any field for which there are new soil samples or new calculations of annual GHG benefits based on actual measurements. Table 9. USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients -2023 dillIMFebruary Additional Environmental Benefits Projects that track additional environmental benefits (e.g., water quality improvements) from enrolled fields report results in this worksheet. These data will be collected about each field. Each row in this worksheet will correspond to an enrolled field. Data are not cumulative. Estimates of environmental benefits must be entered upon practice completion or annually, as appropriate. Table 10. Additional Environmental Benefits elements Data element name Description Frequency Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State State name County County name Environmental benefits Indicator that project tracks other environmental benefits Annual Reduction in nitrogen loss Indicator that project tracks reductions in nitrogen loss Annual Amount Amount Annual Purpose Purpose of tracking those co-benefits Annual Reduction in phosphorus loss Indicator that project tracks reductions in phosphorus loss Annual Amount Amount Annual Purpose Purpose of tracking those co-benefits Annual Other water quality Indicator that project tracks other water quality improvements Annual Type Type of water quality metric being tracked Annual Amount Amount Annual Purpose Purpose of tracking those co-benefits Annual Water quantity Indicator that project tracks reduced water use Annual Amount Amount Annual Purpose Purpose of tracking those co-benefits Annual Reduced erosion Indicator that project tracks reductions in soil erosion Annual

Amount Annual Purpose Purpose of tracking those co-benefits Annual Reduced energy use Indicator that project tracks reductions in energy use Annual Amount Annual Purpose Purpose of tracking those co-benefits Annual Avoided land conversion Indicator that project tracks reductions in land conversion Annual Amount Annual Purpose Purpose of tracking those co-benefits Annual Improved wildlife habitat Indicator that project tracks improvements in wildlife habitat Annual Amount Annual Purpose Purpose of tracking those co-benefits Annual Version 1.0 Page 12 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Supplemental Data Submission Project MMRV Plan Definition of MMRV elements: Measurement: Quantification of the greenhouse gas benefits (reduction or capture) using mathematical models and/or direct physical measurements in the field Monitoring: Ongoing review and confirmation that the climate-smart practice has been implemented according to the agreed upon standard and documentation of any changes in the site, implementation, or GHG emissions impacts over time Reporting: Documenting and sharing monitoring and measurement results with project partners, the recipient, and any third-party verification organization Verification: Independent confirmation that measurement, monitoring and reporting information are complete, accurate and reliable. Projects must submit an MMRV plan that includes details about how each of the following are addressed: • Quantification approach, including: o GHG models used o GHG measurement plan (if applicable) o Approach to quantifying additional environmental benefits, if applicable (e.g., water quality, habitat) • Verification approach: o Compliance criteria o Verification plan/methodology • Approach to ensuring: o Additionality o Permanence o Leakage o Impacts of weather • Plan for non-compliance If the project is using a specific MMRV methodology or approach developed by the recipient, a project partner, or an outside organization, the project can submit documentation associated with the methodology as long as the documentation addresses each of the above categories. If the project is tracking other environmental benefits (as reported in the Additional Environmental Benefits worksheet), include a description of the methodology and tools used to track and report on these benefits. Field modeled GHG benefit reports Results from any models besides COMET-Planner used to estimate GHG benefits must also be submitted as a separate report. This includes projects running COMET-Farm. The full results of any model can be submitted in the native/standard format generated by the modeling tool and must include the following Unique IDs in the report or in the file name: State, County, Farm ID, Tract ID, Field ID. Field direct measurement results For any direct physical measurements in the field, measurement results must be submitted as a separate report and must include the following Unique IDs in the report or in the file name: State, County, Farm ID, Tract ID, Field ID. Measurement results reports must include the name of the equipment used for sampling or data collection, the name of the lab that analyzed the data, and the analytical method used. Sample report types include soil analysis reports, summarized results of portable emissions analyzers or flux towers, water quality analyses, and plant species counts. These could be collected for the purposes of determining GHG emission reductions or carbon sequestration amounts, for calibration of tools or models, for tracking other environmental benefits, or for other reasons. Version 1.0 Page 13 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Data Descriptions This section provides descriptions and allowable response options for each data element. The guide also indicates whether each data element is required, applicable at times, or optional; as well as how frequently each data element must be updated. Unique IDs Project ID: Unique ID at the project level — "Award Identifying Number" shown on award documentation Partner ID: Unique ID at the partner level — use EIN; if no EIN, a unique ID will be assigned for use in these reports State or

territory of operation: State or territory name County of operation: Physical county name Farm ID: Unique ID at the operation level assigned by Farm Service Agency (FSA) Tract ID: Unique ID at the tract level assigned by FSA Field ID: Unique ID at the field level assigned by FSA Version 1.0 Page 14 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Project Summary Commodity type Data element name: Commodity type Reporting question: What climate-smart commodity types are produced by this project? Description: Type of commodity incentivized by the project. These commodities include those for whom farmers are directly receiving incentives or other types of marketing support. See full list of commodity options in Appendix B. List one commodity per row. Data type: List Select multiple values: No Measurement unit: Category Allowed values: FSA commodity list Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Commodity sales Data element name: Commodity sales Reporting question: Did project activities result in sales this quarter of the commodity(ies) produced by this project? Description: Indicator of sales of commodity(ies) related to project activities. If sales are reported, complete the Marketing Activities worksheet (Table 3) as part of the quarterly performance report. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Farms enrolled Data element name: Farms enrolled Reporting question: Did the project enroll any producers or fields this quarter? Description: Indicator that the project enrolled producers or fields. If enrollment activities occurred this quarter, complete the Producer Enrollment and Field Enrollment worksheets (Tables 4 and 5) as part of the quarterly performance report. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly GHG calculation methods Data element name: GHG calculation Reporting question: What methods is the project using to methods calculate GHG benefits? Description: List the way(s) that GHG benefits are being measured and calculated by the project this quarter• Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Models • Direct field measurements • Both Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Version 1.0 Page 15 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG cumulative calculation Data element name: GHG cumulative Reporting question: What method(s) was used to calculate the calculation total cumulative GHG benefits reported here? Description: List the method(s) that was used to calculate the total cumulative GHG benefits reported by the project this quarter. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Cumulative GHG benefits Data element name: Cumulative GHG benefits Select multiple values: No Allowed values: • Models • Direct field measurements • Both Required: Yes Data collection frequency: Quarterly Reporting question: What are the project's estimated total GHG emission reductions (CO2eq) to date? Description: Total cumulative estimated greenhouse gas emission reductions from practice implementation. This is updated quarterly. If there are no changes, enter the same number as the previous quarter. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Cumulative carbon stock Data element name: Cumulative carbon Reporting question: How much carbon has the project stock sequestered to date? Description: Estimated total cumulative change in carbon stock based on practice implementation. This is updated quarterly. If there are no changes, enter the same numbers as the previous quarter. Conversion rate is one ton of carbon = 3.67 tons of CO2eq. Data type: Decimal

Measurement unit: Metric tons CO2eq Logic: None — all respond Data collection level: Project Cumulative CO2 benefit Data element name: Cumulative CO2 benefit Select multiple values: No Allowed values: 0-10,000,000 Required: Yes Data collection frequency: Quarterly Reporting question: What are the project's estimated total cumulative CO2 emission reductions to date? Description: Estimated total cumulative carbon dioxide emission reductions based on practice implementation. This is updated quarterly. If there are no changes, enter the same number as the previous quarter. Data type: Decimal Measurement unit: Metric tons CO2 Logic: None — all respond Data collection level: Project Cumulative CH4 benefit Data element name: Cumulative CH4 benefit Select multiple values: No Allowed values: 0-10,000,000 Required: Yes Data collection frequency: Quarterly Reporting question: What are the project's estimated total CH4 emission reductions to date? Description: Estimated total cumulative methane reduction based on practice implementation. This is updated quarterly. If there are no changes, enter the same numbers as the previous quarter. Conversion rate is one ton of CH4 = 25 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CH4 reduced in Allowed values: 0-10,000,000 CO2eq Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Version 1.0 Page 16 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Cumulative N2O benefit Data element name: Cumulative N2O benefit Reporting question: What are the project's estimated total N2O emission reductions to date? Description: Estimated total cumulative nitrous oxide reduction based on practice implementation. This is updated quarterly. If there are no updated numbers enter the same number as the previous quarter. Conversion rate is one ton of N2O = 298 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons N2O reduced in Allowed values: 0-10,000,000 CO2eq Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Offsets produced Data element name: Offsets produced Reporting question: How many carbon offsets have been produced in the project? Description: Total carbon offsets produced by enrolled project fields during the quarter. Offsets are defined as having been verified and certified using an accepted standard and sold into the carbon marketplace. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Offsets sale Data element name: Offsets sale Reporting question: To what marketplace(s) were carbon offsets sold? Description: Marketplaces to which carbon offsets produced by enrolled project fields were sold. Offsets are defined as having been verified and certified using an accepted standard and sold into the carbon marketplace. List each marketplace name. Separate names with commas. Data type: Text Select multiple values: NA Measurement unit: Name Allowed values: Text Logic: Respond if >0 to 'Offsets produced' Required: Yes Data collection level: Project Data collection frequency: Quarterly Offsets price Data element name: Offsets price Reporting question: What was the average price of carbon received for offsets? Description: Average price per metric ton paid for carbon offsets produced by enrolled project fields. Offsets are defined as having been verified and certified using an accepted standard and sold into the carbon marketplace. Data type: Decimal Select multiple values: No Measurement unit: Dollars per metric ton Allowed values: 0-500 Logic: Respond if >0 to 'Offsets produced' Required: Yes Data collection level: Project Data collection frequency: Quarterly Insets produced Data element name: Insets produced Reporting question: How many carbon insets have been produced in the project? Description: Total carbon insets produced by enrolled fields during the quarter. Insets are defined as having been verified and certified using an accepted standard and accounted for within Scope 3 emissions for a firm. Data type: Decimal Select multiple values: No

Measurement unit: Metric tons CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Version 1.0 Page 17 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Cost of on-farm TA Data element name: Cost of on-farm TA Reporting question: What is the total amount that has been spent to provide on-farm TA? Description: Total cost of any field- or practice-specific technical assistance provided by the project (by recipient or partners) to any producers. This is updated quarterly. If there are no changes, enter the same number as the previous quarter. Data type: Decimal Measurement unit: Dollars Logic: None — all respond Data collection level: Project MMRV cost Data element name: MMRV cost Select multiple values: No Allowed values: \$0-\$50,000,000 Required: Yes Data collection frequency: Quarterly Reporting question: What is the total amount that has been spent on MMRV activities? Description: Total cost of all MMRV activities paid for by the project (recipient or partners). MMRV components are defined as measurement (calculations or estimations of GHG emissions), monitoring (ongoing review and confirmation that the climate-smart practices have been implemented according to the agreed upon standard and documentation of any changes in the site, implementation, or GHG emissions impacts over time), reporting (documenting and sharing monitoring and measurement results with project partners, the recipient, and any third-party verification organization), and verification (independent confirmation that measurement, monitoring and reporting information are complete, accurate and reliable). This is updated quarterly. If there are no changes, enter the same number as the previous quarter. Data type: Decimal Select multiple values: No Measurement unit: Dollars Allowed values: \$0-\$50,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly GHG monitoring method Data element name: GHG monitoring 1-5 Reporting question: How did the project monitor GHG benefits? Description: Up to the five most common forms of monitoring GHG benefits used this quarter as part of MMRV requirements. Monitoring is defined as ongoing review and confirmation that the climate-smart practice has been implemented according to the agreed upon standard and documentation of any changes in the site, implementation, or GHG emissions impacts over time. Include up to 5 methods, based on which methods are most commonly used for this project. The worksheet provides five columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 5 GHG monitoring methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG monitoring methods as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: • Drones • Ground-level photos and videos • On-farm visit • Plot-based sampling • Producer records or attestation • Satellite monitoring or remote sensing • Soil metagenomics • Soil sensors • Water sensors • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 18 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG reporting method Data element name: GHG reporting 1-5 Reporting question: How did the project track and report implementation of practices to reduce GHG emissions? Description: Up to the five most common forms of tracking and reporting on practice implementation used this year as part of MMRV requirements. Reporting is defined as documenting and sharing monitoring and measurement results with project partners, the recipient, and any third-party verification organization. Include up to 5 methods, based on which methods are most commonly used for this project. The worksheet provides five columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 5 GHG reporting methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG

reporting methods as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project GHG verification method Select multiple values: No Allowed values: • Automated devices • Email • Mobile app • Paper • Third-party actors • Website • Other (specify) Required: Yes Data collection frequency: Quarterly Data element name: GHG verification Reporting question: How did the project verify implementation method 1-5 of practices to reduce GHG emissions? Description: Up to the five most common forms of verifying practice implementation used this year as part of MMRV requirements. Verification is defined as independent confirmation that measurement, monitoring and reporting information are complete, accurate and reliable. Include up to 5 methods, based on which methods are most commonly used for this project. The worksheet provides five columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 5 GHG verification methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG verification methods as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: • Artificial intelligence • Audit by recipient • Computer modeling • Photos • Record audit • Satellite imagery • Site or field visit • Third-party audit • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 19 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Partner Activities Unique IDs Partner ID Unique Project ID for each partner Partner name Data element name: Name of partner organization Reporting question: What is the official name of the recipient or partner organization? Description: Legal name of recipient or partner organization Data type: Text Select multiple values: NA Measurement unit: NA Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Partnership initiation Partner type Data element name: Type of partner organization Reporting question: What type of organization is this? Description: Legal/financial structure of recipient or partner organization Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Commodity groups (501c5) • For-profit • Individual • Nonprofit • State or local agency • Tribal agency • University Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Partnership initiation Partner POC Data element name: Partner POC Reporting question: Who is the point of contact for this project at the recipient or partner organization? Description: Name of a point of contact for the recipient or partner organization Data type: Text Select multiple values: NA Measurement unit: NA Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Partnership initiation; update as necessary Partner POC email Data element name: Partner POC email Reporting question: What is the point of contact's email address? Description: Email of the point of contact for the recipient or partner organization Data type: Text Select multiple values: NA Measurement unit: NA Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Partnership initiation; update as necessary Version 1.0 Page 20 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Partnership start date Data element name: Partnership start date Reporting question: When did the partnership start? Description: Date that the partner organization and the recipient began formally partnering on the project Data type: Date Select multiple values: NA Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023 — 12/31/2030 Logic: No response for recipient Required: Yes Data collection level: Partner Data collection frequency: Partnership initiation Partnership end date Data element name: Partnership end date Reporting question: When did the partnership end? Description: Date that the partner organization and the recipient stopped formally partnering on the project Data type: Date

Measurement unit: MM/DD/YYYY Logic: No response for recipient Data collection level: Partner New partnership Data element name: New partnership Select multiple values: NA Allowed values: 01/01/2023 — 12/31/2030 Required: Yes Data collection frequency: Partnership end quarter Reporting question: Is this a new partnership? Description: A new partnership means that the recipient and the partner organization have not had a formal working relationship (under contract or on a grant) prior to the start of the project. Data type: List Measurement unit: Category Logic: No response for recipient Data collection level: Partner Partner total requested Data element name: Partner total requested Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Partnership initiation Reporting question: What is the total amount of funding the partner has requested to date from this project? Description: Cumulative (total) amount of funds that the partner has requested reimbursement for from the recipient from the start of the partnership to the end of the reporting quarter. For each quarter's data entry, the value must be the sum of all previous entries plus the amount of funds requested in the reporting quarter. If there are no changes, report the value from the previous quarter. Data type: Decimal Select multiple values: NA Measurement unit: Dollars Allowed values: \$0-\$100,000,000 Logic: No response for recipient Required: Yes Data collection level: Partner Data collection frequency: Quarterly Version 1.0 Page 21 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Total match contribution Data element name: Total match contribution Reporting question: What is the total match value the organization has contributed to the project to date? Description: Cumulative (total) value of funds and in-kind contributions (e.g., staff time, inputs, equipment rental, marketing support) that the partner has provided as a project match contribution from the start of the partnership to the end of the reporting quarter. For each quarter's data entry, the value must be the sum of all previous entries plus match contributions in the reporting quarter. If there are no changes, report the value from the previous quarter. Data type: Decimal Select multiple values: NA Measurement unit: Dollars Allowed values: \$0-\$100,000,000 Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Quarterly Total match incentives Data element name: Total match incentives Reporting question: What is the total value of match provided by this organization for producer incentives? Description: Cumulative (total) value of funds for incentive payments directly to producers that the partner has provided as a project match contribution from the start of the partnership to the end of the reporting quarter. For each quarter's data entry, the value must be the sum of all previous entries plus match incentives in the reporting quarter. If there are no changes, report the value from the previous quarter. Data type: Decimal Select multiple values: NA Measurement unit: Dollars Allowed values: \$0-\$100,000,000 Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Quarterly Match type Data element name: Match type 1-3 Reporting question: What types of match contributions has the organization provided to the project? Description: Types of match contributions other than incentives provided directly to producers by the organization from the start of the partnership to the end of the reporting quarter. Enter up to the top three (in dollar value) types of match contributions provided. In-kind staff time could be used for technical assistance, marketing assistance, or other support to producers. Production inputs include seed, fertilizer, pesticides, equipment and other inputs for use in the field. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 match types are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other match types as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Partner Select multiple values: No Allowed values: • Equipment rental or use • In-kind staff time • Production inputs (reduced

cost or free) • Program income • Software • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 22 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Match amount Data element name: Match amount 1-3 Reporting question: What is the value of the match contributions the organization provided to the project? Description: Cumulative (total) value of funds for each match type that the organization has provided as a project match contribution from the start of the partnership to the end of the reporting quarter. Enter amounts for up to the top three (in dollar value) match types. The worksheet provides three columns for this data element. Enter one value for each column. If fewer than 3 match types are used, leave unnecessary columns blank. Data type: Decimal Measurement unit: Dollars Logic: None — all respond Data collection level: Partner Training type provided Data element name: Training type 1-3 provided Select multiple values: NA Allowed values: \$0-\$100,000,000 Required: Yes Data collection frequency: Quarterly Reporting question: What types of training has the organization provided to project partners? Description: Types of training provided to the project partner as a result of participating in the project during the past quarter. Training can come from the recipient, a project partner organization (including other divisions of their own organization, or an outside organization. Enter up to the top three (in dollar value) types of partner training provided. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 training types are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other training types as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Partner Activity by partner Data element name: Activity 1-3 by partner Select multiple values: No Allowed values: • Data collection • Grant reporting • Marketing opportunities • Providing financial assistance • Providing technical assistance • Writing producer contracts • Other (specify) Required: Yes Data collection frequency: Quarterly Reporting question: What types of activities has the organization provided to the project? Description: Types of activities that the recipient or partner organization has provided during the reporting quarter. Enter up to the top three (in dollar value) types of activities undertaken. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 activity types are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other activity types as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Partner Version 1.0 Select multiple values: No Allowed values: • Marketing support • MMRV support • Producer outreach for enrollment • Technical assistance to producers • Training to other partner organizations • Other (specify) Required: Yes Data collection frequency: Quarterly Page 23 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Activity cost Data element name: Activity cost 1-3 Reporting question: What is the value of the activities this organization has provided to the project? Description: Cumulative (total) cost of each activity type that the organization has undertaken or offered from the start of the partnership to the end of the reporting quarter. Enter amounts for up to the top three (in dollar value) activity types. The worksheet provides three columns for this data element. Enter one value for each column. If fewer than 3 activity types are provided, leave unnecessary columns blank. Data type: Decimal Select multiple values: NA Measurement unit: Dollars Allowed values: \$0-\$100,000,000 Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Quarterly Products supplied Data element name: Products supplied Reporting question: What products or supplies were provided to enrolled fields? Description: Name(s) of products supplied to enrolled producers as incentives or matching contributions. Enter the name of each product, including its brand. Separate

each product name with a comma. If no products or supplies were provided by the organization, leave the column blank. Data type: Text Select multiple values: NA Measurement unit: Name Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Partner Data collection frequency: Quarterly Product source Data element name: Product source Reporting question: Which companies provided the supplies? Description: Name of firm or company from which supplies were obtained. Data type: Text Select multiple values: NA Measurement unit: Name Allowed values: Text Logic: Respond if text entered for 'Products supplied' Required: Yes Data collection level: Partner Data collection frequency: Quarterly Version 1.0 Page 24 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Marketing Activities Commodity type Data element name: Commodity type Reporting question: What type of commodity is produced by the farmers enrolled in this project? Description: List a single commodity produced or marketed through incentives from this project. If multiple commodities are produced by the project, use additional rows of the worksheet to report each commodity. Use the FSA commodity list in Appendix B and choose the commodity from the list. Data type: List Select multiple values: No Measurement unit: Category Allowed values: FSA commodity list Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Marketing channel type Data element name: Marketing channel Reporting question: What type of marketing channel is used to type sell this commodity? Description: List a single type of marketing channel used to sell the commodity produced by farmers enrolled in the project. If a single commodity is marketed through multiple channels, use additional rows of the worksheet to report each combination of commodity and marketing channel. If "other" is chosen, use the additional column to enter the other marketing channel type(s) as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Number of buyers Data element name: Number of buyers Select multiple values: No Allowed values: • Agricultural marketing board • Biorefinery • Commodity broker • Direct to consumer • Direct to institution • Direct to restaurant • Distributor (including grain elevators) • Food hub or cooperative • Food processor • Non-food byproducts processor • Retailer • USDA • Other (specify) Required: Yes Data collection frequency: Quarterly Reporting question: How many buyers are there in this marketing channel? Description: List the number of individual firms or buyers in this marketing channel. Data type: Integer Measurement unit: Count Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: 1-500 Required: Yes Data collection frequency: Quarterly Version 1.0 Page 25 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Names of buyers Data element name: Names of buyers Reporting question: What are the names of all of the buyers in this marketing channel? Description: Provide the names of all buyers in this marketing channel. Separate each name with a comma. Data type: Text Select multiple values: NA Measurement unit: Name Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Marketing channel geography Data element name: Marketing channel Reporting question: What is the primary geography of the geography marketing channel? Description: The primary geography of the type of marketing channel. Primary geography means the scale at which most of the activity of buying and selling happens. Local means within a single state or directly neighboring states. Regional means within a five-to-ten state area. National means across the United States. International means specific locations outside of the United States. Global means across the world or not to a specific international location. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Local • Regional • National • Global Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Value sold

Data element name: Value sold Reporting question: What is the value of the commodity sold in this marketing channel? Description: The dollar value of the commodity sold in this marketing channel this quarter (non-cumulative). Data type: Decimal Select multiple values: No Measurement unit: Dollars Allowed values: \$1-\$100,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Volume sold Data element name: Volume sold Reporting question: What is the volume of the commodity sold in this marketing channel? Description: The volume of the commodity sold in this marketing channel this quarter (non-cumulative). Data type: Decimal Select multiple values: No Measurement unit: Number Allowed values: 1-100,000,000 Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Version 1.0 Page 26 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Volume sold unit Data element name: Volume sold unit Reporting question: What is the unit of volume? Description: The unit associated with the volume of the commodity sold in the marketing channel. If "other" is chosen, use the additional column to enter the appropriate unit as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Bales (500 pounds) • Bushels • Carcass pounds • Gallons • Kilograms • Linear board feet • Liveweight pounds • Metric tons • Pounds • Short tons • Other (specify) Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Price premium Data element name: Price premium Reporting question: What price premium is received for the commodity sold in this marketing channel? Description: The price premium received for the commodity sold in this marketing channel this quarter. Price premium is the amount received above a 'business as usual' price. Data type: Decimal Measurement unit: Dollars Logic: None — all respond Data collection level: Project Price premium unit Select multiple values: No Allowed values: \$0.01-\$10,000 Required: Yes Data collection frequency: Quarterly Data element name: Price premium unit Reporting question: What is the unit for the price premium? Description: The unit associated with the price premium for the commodity sold in the marketing channel. If "other" is chosen, use the additional column to enter the appropriate unit as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: • Per bale (500 pounds) • Per bushel • Per carcass pound • Per gallon • Per kilogram • Per linear board foot • Per live pound • Per metric ton • Per ounce • Per short ton • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 27 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Price premium to producer Data element name: Price premium to Reporting question: What percent of the price premium is producer provided to the producer for the commodity sold in this marketing channel? Description: The percent of the price premium provided to the producer for the commodity sold in this marketing channel this quarter. Price premium is the amount received above a 'business as usual' price. Data type: Decimal Measurement unit: Percent Logic: None — all respond Data collection level: Project Product differentiation method Select multiple values: No Allowed values: 0-100 Required: Yes Data collection frequency: Quarterly Data element name: Product differentiation method 1-3 Reporting question: What methods are used to differentiate climate-smart commodities in this marketing channel? Description: Provide the methods used to differentiate the climate-smart commodity in this market channel. Product differentiation methods are ways to distinguish or differentiate the climate-smart commodity in the marketplace. Include up to 3 methods, based on which methods are most commonly used for this project. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 product differentiation methods are used, leave unnecessary columns blank. If "other" is chosen,

use the additional column to enter other product differentiation methods as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: Certification/verification for internal inseting • Farm certification • Label or badge used on packaging or marketing • Third party certification/verification • Trademark • Other (specify) Logic: None — all respond Required: Yes Data collection level: Project Data collection frequency: Quarterly Marketing method Data element name: Marketing method 1-3 Reporting question: What methods are used to market climate-smart commodities in this marketing channel? Description: Provide the method(s) used to market this commodity in this market channel. Marketing method is the way that potential buyers of the climate-smart commodity are engaged by the project partners as the sellers or facilitators of sale. Include up to 3 methods, based on which methods are most commonly used for this project. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 marketing methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other marketing methods as free text Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: • Label or badge used on packaging or marketing materials • Marketing partnership (e.g., promotion by buyer) • Print marketing campaign • Social media and digital marketing campaign • Verbal marketing campaign (e.g., radio, word of mouth) • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 28 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Marketing channel identification method Data element name: Marketing channel Reporting question: What methods are used to generate identification method 1-3 interest in climate-smart commodities in this marketing channel? Description: Provide the marketing channel identification method(s) used for this commodity in this market channel. Market channel identification methods are the ways that producers and project partners generate interest in purchasing the climate-smart commodity. Include up to 3 methods, based on which methods are most commonly used for this project. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 marketing channel identification methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other marketing channel identification methods as free text Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Traceability method Select multiple values: No Allowed values: • Educational tours for buyers • In-person lead generation • Negotiated contracts with buyers • Partnership network or project partner • Other (specify) Required: Yes Data collection frequency: Quarterly Data element name: Traceability method Reporting question: What traceability methods are used for 1-3 climate-smart commodities in this channel? Description: Provide the traceability method(s) used for the climate-smart commodity in this market channel. Traceability methods are ways to trace the climate-smart commodity or the climate-smart claims through the supply chain. Include up to 3 methods, based on which methods are most commonly used for this project. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 traceability methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other traceability methods as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Project Select multiple values: No Allowed values: • Barcode or unique ID • Blockchain • Book and claim • Chain of custody • Mass balance • Recordkeeping • Registry with certification • Segregation • Supply shed • Volume proxy • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 29 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data

Dictionary for Recipients February 2023 Producer Enrollment Unique IDs Farm ID State or territory County of residence Unique Farm ID assigned by FSA State name (must match FSA farm enrollment data) County name (must match FSA farm enrollment data) Producer data change Data element name: Producer data change Reporting question: Is there new/updated information for a producer who is re-enrolling in the project? Description: Indicates that there is new or updated information for a producer who had previously enrolled in the project and is re-enrolling. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Re-enrollment Producer start date Data element name: Producer start date Reporting question: When did the producer enroll in the project? Description: Date that the producer enrolled in the project by signing their first contract. Data type: Date Select multiple values: NA Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023 - 12/31/2030 Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment Producer name Data element name: Producer name Reporting question: What is the name of producer enrolled in the project? Description: Name of the producer enrolled in the project; the name must match the name contained in the customer's Business Partner record and the Farm Operating Plan in FSA Business File for that Farm ID. Data type: Text Select multiple values: NA Measurement unit: NA Allowed values: Text Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment Version 1.0 Page 30 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Underserved status Data element name: Underserved status Reporting question: Is this producer considered an underserved and/or a small producer? Description: Underserved status of the primary operator of the enrolled operation. Underserved producers generally include beginning farmers, socially disadvantaged farmers, veteran farmers, and limited resource farmers; women farmers and producers growing specialty crops are generally also included in these categories. Small farms are generally those with less than \$350,000 in annual gross cash farm income. Indicate whether this producer is considered underserved, a small producer, or both underserved and a small producer. Use "I don't know" if the producer declines to answer. Departmental Regulation 4370-001 provides USDA's policies for collecting demographic data, including race, ethnicity and gender. Providing demographic information is voluntary and at the discretion of the customer. Demographic information is used by USDA for statistical purposes only and will not be used to determine an applicant's eligibility for programs or services for which they apply. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Total area Data element name: Total area Select multiple values: No Allowed values: • Yes, underserved • Yes, small producer • Yes, underserved and small producer • No • I don't know Required: No Data collection frequency: Initial enrollment Reporting question: What is the total area of the farm? Description: Total area of the farm associated with the Farm ID. Report total area of the farm, even if only a portion of the farm is enrolled in the project. If a producer is enrolled in the project for multiple years, review the total area each time a new contract is signed and provide any necessary updates. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Select multiple values: No Allowed values: • Less than 1 acre • 1 to 9 acres • 10 to 49 acres • 50 to 69 acres • 70 to 99 acres • 100 to 139 acres • 140 to 179 acres • 180 to 219 acres • 220 to 259 acres • 260 to 499 acres • 500 to 999 acres • 1,000 to 1,999 acres • 2,000 to 4,999 acres • 5,000 or more acres Required: Yes Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Version 1.0 Page 31 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Total crop area Data

element name: Total crop area Reporting question: What percent of the current operation is cropland? Description: Area of the total farm that is currently used as cropland. If a producer is enrolled in the project for multiple years, review the total crop area each time a new contract is signed and provide any necessary updates. Data type: Integer Select multiple values: No Measurement unit: Acres Allowed values: 0-100,000 Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Total livestock area Data element name: Total livestock Reporting question: What amount of the current operation is used for area livestock (by area)? Description: Area of the total farm that is currently used for pasture, grazing, rangeland; or animal housing, feeding or milking. If a producer is enrolled in the project for multiple years, review the total livestock area each time a new contract is signed and provide any necessary updates. Data type: Integer Select multiple values: No Measurement unit: Acres Allowed values: 0-100,000 Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Total forest area Data element name: Total forest area Reporting question: What amount of the current operation is forested (by area)? Description: Area of the total farm that is currently considered forest land use. Forest land use means that at least 10% of the land area is covered in trees that will be at least 13 feet tall when mature. If a producer is enrolled in the project for multiple years, review the total forest area each time a new contract is signed and provide any necessary updates. Data type: Integer Select multiple values: No Measurement unit: Acres Allowed values: 0-100,000 Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Version 1.0 Page 32 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Livestock type Data element name: Livestock type 1-3 Reporting question: What types of livestock are raised on the farm? Description: Up to top three types of livestock (by head count) on the farm. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If there are fewer than 3 livestock types, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other livestock types as free text. If a producer is enrolled in the project for multiple years, review the livestock type each time a new contract is signed and provide any necessary updates. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Alpacas • Beef cows • Beefalo • Buffalo or bison • Chickens (broilers) • Chickens (layers) • Dairy cows • Deer • Ducks • Elk • Emus • Equine • Geese • Goats • Honeybees • Llamas • Reindeer • Sheep • Swine • Turkeys • Other (specify) Logic: Respond if 'Total livestock area'>0 Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Livestock head Data element name: Livestock head 1-3 Reporting question: How many livestock (by type) are on this operation? Description: Average annual head count for each type of livestock. Enter amounts for up to the top three livestock types by number. The worksheet provides three columns for this data element. Enter one value for each column. If there are fewer than 3 livestock types, leave unnecessary columns blank. If a producer is enrolled in the project for multiple years, review the average annual head count each time a new contract is signed and provide any necessary updates. Data type: Integer Select multiple values: NA Measurement unit: Head count Allowed values: 1-10,000,000 Logic: Respond if 'Total livestock area'>0 Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Version 1.0 Page 33 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Organic farm Data element name: Organic farm Reporting question: Is any part of the farm currently USDA-certified organic or

transitioning to USDA-certified organic? Description: USDA-certified organic means that the farm has been certified by an accredited organic certifying agent or is transitioning to USDA-certified organic by not using any of the prohibited substances. Yes means that some or all of the farm is certified organic or transitioning to certified organic. No means that no part of the farm is certified organic or transitioning to certified organic. If a producer is enrolled in the project for multiple years, review the organic certification status of the farm each time a new contract is signed and provide any necessary updates. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Organic fields Data element name: Organic fields Select multiple values: No Allowed values: • Yes • No • I don't know Required: No Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Reporting question: Are any of the fields enrolled in the project currently USDA-certified organic or transitioning to USDA-certified organic? Description: USDA-certified organic means that the operation has been certified by an accredited organic certifying agent or is transitioning to USDA-certified organic by not using any of the prohibited substances. Yes means that some or all of the fields enrolled in the project are certified organic or transitioning to certified organic. No means that no part of the fields enrolled in the project are certified organic or transitioning to certified organic. If a producer is enrolled in the project for multiple years, review the organic certification status of the enrolled fields each time a new contract is signed and provide any necessary updates. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Organic operation' Required: No Data collection level: Producer Data collection frequency: Initial enrollment and subsequent enrollment(s), if applicable Producer motivation Data element name: Producer motivation Reporting question: Which of the following was the primary reason the producer enrolled in this project? Description: Primary operator's motivation for enrolling in the project. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Select multiple values: No Allowed values: • Financial benefit • Environmental benefit • New market opportunity • Partnerships or networks • Other Required: Yes Data collection frequency: Initial enrollment Version 1.0 Page 34 of 87 ATTACHMENT - DATA DICTIONARY USDA Partnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Producer outreach Data element name: Producer outreach 1-Reporting question: What types of outreach were provided to 3 producers? Description: Up to three most common types of outreach provided to producer prior to enrollment. Outreach activities are those focused on identifying and enrolling producers in the project. Outreach can come from the recipient or project partners. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If there are fewer than 3 outreach types, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other outreach types as free text. Data type: List Select multiple values: Yes Measurement unit: Category Allowed values: • Commodity organizations • Conferences • Cooperative extension • Digital communications and resources • Education workshops, field days, and town halls • Existing partner networks • Farm visits and one-on-one meetings • General advertising • Peer referrals and producer groups • Phone calls • Print communications and resources • Retailers • State agencies • Targeted messaging using proprietary data • Technical service providers • Other (specify) Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment CSAF experience Data element name: CSAF experience Reporting question: Has the primary operator implemented CSAF practices in the last ten years anywhere on the farm? Description: Has this farm implemented climate-smart agriculture or forestry (CSAF) practices anywhere on the farm in the past 10 years or since the current primary operator took control (whichever time period is shorter)? CSAF practices are included in a list

in Appendix A. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment Version 1.0 Page 35 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 CSAF federal funds Data element name: CSAF federal funds Reporting question: Were prior CSAF practices supported by federal funds? Description: If this farm (under the primary operator) has implemented CSAF practices in the last ten years, was implementation supported by federal funds? Federal funds are defined as being from programs including, but not limited to, those from the Natural Resources Conservation Service ((NRCS), including through Environmental Quality Incentives Program (EQIP), Conservation Stewardship Program (CSP), Regional Conservation Partnership Program (RCPP), or related programs), the Farm Service Agency Conservation Reserve Program (CRP), as well as funds from other USDA programs or other federal agencies. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'CSAF experience' Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment CSAF state or local funds Data element name: CSAF state or local Reporting question: Were prior CSAF practices supported by funds state or local funds? Description: If this farm (under the primary operator) has implemented CSAF practices in the last ten years, was implementation supported by state funds? State or local funds are those from state departments of agriculture or other state agencies, local water quality districts and other local agencies. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'CSAF experience' Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment CSAF nonprofit funds Data element name: CSAF nonprofit funds Reporting question: Were CSAF practices supported by nonprofit funds? Description: If this farm (under the primary operator) has implemented CSAF practices in the last ten years, was implementation supported by nonprofit funds? Nonprofit funds are those offered directly from a nonprofit organization to a producer. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'CSAF experience' Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment Version 1.0 Page 36 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 CSAF market incentives Data element name: CSAF market incentives Reporting question: Were CSAF practices supported by market incentives? Description: If this farm (under the primary operator) has implemented CSAF practices in the last ten years, was implementation supported by market incentives? Market incentives include premiums paid by a commodity buyer or by a consumer based on branding or labeling as a climate-smart commodity. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'CSAF experience' Required: Yes Data collection level: Producer Data collection frequency: Initial enrollment Version 1.0 Page 37 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field Enrollment Unique IDs Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name (must match FSA farm enrollment data) County of field County name (must match FSA farm enrollment data) Prior Field ID, if applicable Prior Field ID assigned by FSA if there has been reconstitution of the farm resulting in a new Field ID during the field's enrollment in the project Field data change Data element name: Field data change Reporting question: Has the information previously reported for this field changed? Description: Indicator that this entry is being used to report any relevant changes, such as a new Field ID number or changes to

the commodity or practice combinations, for a field that has previously been enrolled in the project. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Re-enrollment Contract start date Data element name: Contract start date Reporting question: What is the start date of the contract with the producer that includes this field? Description: Start date listed on the contract that enrolls the field in the project. Data type: Date Select multiple values: NA Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023 — 12/31/2030 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Total field area Data element name: Total field area Reporting question: What is the total size of the enrolled field? Description: Total size of the field enrolled with the project. Data type: Decimal Select multiple values: No Measurement unit: Acres Allowed values: .01-500 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Version 1.0 Page 38 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Commodity category Data element name: Commodity category Reporting question: What category of commodity(ies) is (are) produced from this field? Description: Category of commodity(ies) produced in field enrolled in the project Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Crops • Livestock • Trees • Crops and livestock • Crops and trees • Livestock and trees • Crops, livestock and trees Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Commodity type Data element name: Commodity type Reporting question: What type of commodity is produced from this field? Description: Type of commodity produced in field enrolled in the project. See full list in Appendix B. The worksheet provides a drop-down list of the allowed values. Choose the appropriate value. Enter additional commodities in subsequent rows. Data type: List Select multiple values: No Measurement unit: Category Allowed values: FSA commodity list Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Baseline yield Data element name: Baseline yield Reporting question: What is the baseline yield of this field? Description: Average annual yield of commodity in 3 years prior to enrollment. Provide yield for the enrolled field if possible. If not at field level, provide average annual yield for the specific commodity for the operation. Data type: Decimal Select multiple values: No Measurement unit: Production per acre or animal Allowed values: .01-100,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Version 1.0 Page 39 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Baseline yield unit Data element name: Baseline yield unit Reporting question: Baseline yield unit Description: Unit of average annual yield of commodity in enrolled field in 3 years prior to enrollment. The worksheet provides a drop-down list of choices for this data element. If "other" is chosen, use the additional column to enter the appropriate yield unit as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Baseline yield location Select multiple values: No Allowed values: • Animal units per acre • Bushels per acre • Carcass pounds per animal • Head per acre • Hundred-weights (or pounds) per head • Linear feet per acre • Liveweight pounds per animal • Pounds per acre • Tons per acre • Other (specify) Required: Yes Data collection frequency: Initial enrollment Data element name: Baseline yield location Reporting question: For what portion of the operation is the baseline yield being reported? Description: Location of the reported average annual yield of commodity in 3 years prior to enrollment. If "other" is chosen, use the additional column to enter the appropriate location as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Enrolled field • Whole operation • Other (specify) Logic:

None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Field land use Data element name: Field land use Reporting question: What is this field's land use history? Description: Prior to enrollment, what was the most common land use for this field in the past 3 years? Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Select multiple values: No Allowed values: • Crop land • Forest land • Non-agriculture • Other agricultural land • Pasture • Range Required: Yes Data collection frequency: Initial enrollment Version 1.0 Page 40 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field irrigated Data element name: Field irrigated Reporting question: What is this field's irrigation history? Description: Prior to enrollment, what was the most common irrigation practice on this field the past 3 years? Data type: List Select multiple values: No Measurement unit: Category Allowed values: • No irrigation • Center pivot • Drip-subsurface • Drip-surface • Flood/border • Furrow/ditch • Lateral/linear sprinklers • Micro-sprinklers • Seepage • Side roll • Solid set sprinklers • Supplemental • Surface • Traveling gun/towline • Wheel Line • Other Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Field tillage Data element name: Field tillage Reporting question: What is this field's tillage history? Description: Prior to enrollment, what was the most common tillage approach during the past 3 years? Data type: List Select multiple values: No Measurement unit: Category Allowed values: • None • Conventional, inversion • Conventional, vertical • No-till, direct seed • Reduced till, inversion • Reduced till, vertical • Strip till • Other Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Version 1.0 Page 41 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Practice past extent - farm Data element name: Practice past extent -Reporting question: What percent of the farm has farm implemented this CSAF practice (combination) previously? Description: Prior to enrollment, on what portion of the whole farm had this (these) CSAF practice(s) ever been used by the primary operator? If multiple practices are planned to be implemented in this field, enter the value that best corresponds to the farm's prior experience with the planned set of practices. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Field any CSAF practice Select multiple values: No Allowed values: • Never used • Used on less than 25% of operation • Used on 25-50% of operation • Used on 51-75% of operation • Used on more than 75% of operation Required: Yes Data collection frequency: Initial enrollment Data element name: Field any CSAF practice Reporting question: What is this field's prior experience with CSAF practices? Description: Prior to enrollment, have any CSAF practice or practices been used in this field in the past 3 years? CSAF practices are included in a list in Appendix A. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Practice past use - this field Data element name: Practice past use - this field Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Initial enrollment Reporting question: Have this CSAF practice (combination) been implemented previously in this field? Description: Prior to enrollment, had this (these) CSAF practice(s) been used in this field in the in the past 3 years? Enter yes if all of the practices had been used previously in this field; enter some if multiple practices are being implemented and one or more, but not all of the practices had been used previously in this field; and enter no if none of the practices had been used previously in this field. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • Some • No • I don't know Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Version 1.0 Page 42 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023

Practice type Data element name: Practice type 1-7 Reporting question: What CSAF practice is being implemented in this field through the project? Description: Which CSAF practice or practices will be implemented on this field as part of enrollment in the project? CSAF practices are included in a list in Appendix A. The worksheet provides seven columns for this data element. Enter one value for each column. If there are fewer than 7 practices being implemented on this field through enrollment in the project, leave unnecessary columns blank. Data type: List Select multiple values: No Measurement unit: Category Allowed values: See list in Appendix A Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Practice standard Data element name: Practice standard 1-7 Reporting question: What standard does the CSAF practice follow? Description: Is the CSAF practice being implemented on the field as part of enrollment in the project following a defined practice standard? The worksheet provides seven columns for this data element. Enter one value for each column, corresponding to the practice types entered in the previous columns. If there are fewer than 7 practices being implemented on this field through enrollment in the project, leave unnecessary columns blank. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • NRCS • Other (specify) Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Planned practice implementation year Data element name: Practice 1-7 Reporting question: What year is the CSAF practice planned to implementation year be implemented? Description: Year that the CSAF practice is planned to be implemented on the field. Use 2022 for early adopters, defined as fields that have the practice actively implemented in 2022 (prior to contract being signed for this project). The worksheet provides seven columns for this data element. Enter one value for each column, corresponding to the practice types entered in the previous columns. If there are fewer than 7 practices being implemented on this field through enrollment in the project, leave unnecessary columns blank. Data type: Integer Select multiple values: No Measurement unit: Year Allowed values: 2022-2030 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Practice extent Data element name: Practice 1-7 extent Reporting question: To what extent is the practice implemented? Description: Total area, length, or head where the practice is being implemented in the field specified by the contract. Data type: Decimal Select multiple values: No Measurement unit: Extent Allowed values: .01 100,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Initial enrollment Version 1.0 Page 43 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Practice extent unit Data element name: Practice 1-7 Reporting question: Unit for extent of practice implementation extent unit Description: Unit for extent of practice implementation on the field specified by the contract. If "other" is chosen, use the additional column to enter the appropriate unit. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field CSAF Practice Sub-questions Select multiple values: No Allowed values: • Acres • Head of livestock • Linear feet • Square feet • Other (specify) Required: Yes Data collection frequency: Initial enrollment For certain practices, additional questions are asked that provide information necessary to estimate greenhouse gas benefits from implementation of the practice. See Table 11 in the CSAF Practice Sub-questions section for descriptions of individual questions to be answered depending on the CSAF practices selected. Version 1.0 Page 44 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Farm Summary Unique IDs Farm ID Unique Farm ID assigned by FSA State or territory State name (must match FSA farm enrollment data) County of residence County name (must match FSA farm enrollment data) Producer TA received Data element name: Producer TA received Reporting question: What types of technical

assistance were 1-3 provided to this producer? Description: Did the recipient or any partner provide technical assistance (TA) to the producer this year? Technical assistance is any training, education, capacity building or other support provided by any project partner(s) directly to producers enrolled in the project. List up to the top three most common types of TA provided to this producer. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If there are fewer than 3 TA types, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other TA types as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Demonstration plots • Equipment demonstrations • Group field days or in-person field workshops • Hotline • One-on-one enrollment assistance • One-on-one field visits • One-on-one producer mentorship • Producer networks and peer-to-peer groups • Retailer consultation • Social media/digital tools • Train-the-trainer opportunities • Virtual meetings or field days • Webinars and videos • Written materials • None • Other (specify) Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Producer incentive amount Data element name: Producer incentive Reporting question: What is the total value of financial amount incentives provided to this producer? Description: Total incentive payment received by the producer from USDA project funds for the year (non cumulative). Do not include incentive payments made with partner match funds. Data type: Decimal Select multiple values: NA Measurement unit: Dollars Allowed values: \$0-\$5,000,000 Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Version 1.0 Page 45 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Incentive reason Data element name: Incentive reason 1-4 Reporting question: Why were incentives provided to this producer? Description: List up to four reasons for producer incentive payments. List the top 4 based on total value of the incentive for each reason. The worksheet provides four columns with a drop-down list of the allowed values. Choose one value for each column. If there are fewer than 4 reasons, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other reasons as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Incentive structure Data element name: Incentive structure 1-4 Select multiple values: No Allowed values: • Avoided conversion • Conference or training attendance • Demographics/equity payment • Enrollment • Foregone revenue • Historic data collection • Identity preservation (supply chain tracing) • Implementation of practices • MMRV (e.g., data collection, reporting) • Passing audit • Price premium on output • Yield change • Other (specify) Required: Yes Data collection frequency: Quarterly Reporting question: What are the units for the financial incentives provided to this producer? Description: List the structures (units) corresponding to the top 4 (by dollar value) incentive payments to producers. Production unit is weight or volume (bushel, kilogram, ton). The worksheet provides four columns with a drop-down list of the allowed values. Choose one value for each column. If there are fewer than 4 structure types, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other structure types as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Flat rate • Per animal head • Per area • Per length • Per production unit • Per ton GHG • Per tree • Other (specify) Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Version 1.0 Page 46 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Incentive type Data element name: Incentive type 1-4 Reporting question: What type of incentives were provided to each producer? Description: List the top 4 types of incentive payments to producers (based on dollar value). The worksheet provides four columns with a drop-down list of the allowed

values. Choose one value for each column. If there are fewer than 4 incentive types, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other incentive types as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Cash payment • Equipment loan • Guaranteed commodity premium payment • Inputs and supplies • Land rental • Loan • Paid labor • Post-harvest transportation • Tuition or fees for training • Other (specify) Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Payment on enrollment Data element name: Payment on Reporting question: What portion of the financial incentive is enrollment provided to the producer upon enrollment in the project? Description: Any incentive payment provided to the producer upon enrollment/signing a contract, and not related to any implementation, MMRV or sales activities. Full payment means the full incentive amount for any contract held by the producer is paid upon enrollment. Partial payment means that only part of the full incentive amount for any contract held by the producer is paid upon enrollment. No payment means that none of the full incentive amount for any contract held by the producer is paid upon enrollment. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Producer Payment on implementation Data element name: Payment on implementation Select multiple values: No Allowed values: • Full payment • Partial payment • No payment Required: Yes Data collection frequency: Quarterly Reporting question: What portion of the financial incentive is provided to the producer upon implementation of the practices? Description: Any incentive payment provided to the producer upon implementing the practices included in the contract. Full payment means the full incentive amount for any contract held by the producer is paid upon implementation. Partial payment means that only part of the full incentive amount for any contract held by the producer is paid upon implementation. No payment means that none of the full incentive amount for any contract held by the producer is paid upon implementation. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Full payment • Partial payment • No payment Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Version 1.0 Page 47 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Payment on harvest Data element name: Payment on harvest Reporting question: What portion of the financial incentive is provided to the producer upon harvest of the commodity? Description: Any incentive payment provided to the producer upon harvesting or slaughtering the commodity included in the contract. Full payment means the full incentive amount for any contract held by the producer is paid upon harvest. Partial payment means that only part of the full incentive amount for any contract held by the producer is paid upon harvest. No payment means that none of the full incentive amount for any contract held by the producer is paid upon harvest. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Full payment • Partial payment • No payment Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Payment on MMRV Data element name: Payment on MMRV Reporting question: What portion of the financial incentive is provided to the producer upon completing MMRV requirements? Description: Any incentive payment provided to the producer upon completing the annual MMRV requirements included in the contract. Full payment means the full incentive amount for any contract held by the producer is paid upon MMRV being complete. Partial payment means that only part of the full incentive amount for any contract held by the producer is paid upon MMRV being complete. No payment means that none of the full incentive amount for any contract held by the producer is paid upon MMRV being complete. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Full payment • Partial payment • No payment Logic: None — all respond Required:

Yes Data collection level: Producer Data collection frequency: Quarterly Payment on sale Data element name: Payment on sale Reporting question: What portion of the financial incentive is provided to producer upon sale of the commodity? Description: Any incentive payment provided to the producer upon sale of the commodity included in the contract. Full payment means the full incentive amount for any contract held by the producer is paid upon sale. Partial payment means that only part of the full incentive amount for any contract held by the producer is paid upon sale. No payment means that none of the full incentive amount for any contract held by the producer is paid upon sale. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Full payment • Partial payment • No payment Logic: None — all respond Required: Yes Data collection level: Producer Data collection frequency: Quarterly Version 1.0 Page 48 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field Summary Unique IDs Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name (must match FSA farm enrollment data) County of field County name (must match FSA farm enrollment data)

Commodity type Data element name: Commodity type Reporting question: What type of commodity is produced from this field? Description: Type of commodity produced in field enrolled in the project. See full list in Appendix B. The worksheet provides multiple columns with a drop-down list of the allowed values. Choose one value for each column. Leave unnecessary columns blank. Data type: List Select multiple values: No Measurement unit: Category Allowed values: FSA commodity list Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Practice type Data element name: Field practice type 1-7 Reporting question: What CSAF practice is being implemented in this field through the project? Description: Which climate-smart agriculture or forestry (CSAF) practice or practices are being implemented in this project? CSAF practices are included in a list in Appendix A. The worksheet provides seven columns for this data element. Enter one value for each column. If there are fewer than 7 practices being implemented on this field through enrollment in the project, leave unnecessary columns blank. Data type: List Select multiple values: No Measurement unit: Category Allowed values: See list in Appendix A Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Date practice complete Data element name: Date practice complete Reporting question: When did the project certify CSAF practice implementation as complete? Description: Date that the project certifies that implementation of the CSAF practice is complete on the field. Use January of the year prior to contract year for early adopters, defined as fields that have the practice actively implemented in the year prior to a contract associated with this project is signed). The worksheet provides seven columns for this data element. Enter one value for each column, corresponding to the practice types entered in the previous columns. If there are fewer than 7 practices being implemented on this field through enrollment in the project, leave unnecessary columns blank. Data type: Date Select multiple values: No Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023 — 12/31/2030 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Version 1.0 Page 49 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Contract end date Data element name: Contract end date Reporting question: Contract end date Description: End date listed on the contract that enrolls the field in the project. If contract end date changes, submit updated end date during the next quarter's reporting. Data type: Date Select multiple values: No Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023 — 12/31/2030 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly MMRV assistance provided Data element name: MMRV assistance provided Reporting question: Was MMRV

assistance provided? Description: Was any MMRV assistance provided to the primary operator for this field? MMRV assistance includes in-field support for the use of technologies, consultation on data collection and input, and other support related to MMRV. MMRV is defined a measurement (calculations or estimations of GHG emissions), monitoring (ongoing review and confirmation that the climate-smart practice has been implemented according to the agreed upon standard and documentation of any changes in the site, implementation, or GHG emissions impacts over time), reporting (documenting and sharing monitoring and measurement results with project partners, the recipient, and any third-party verification organization), and verification (independent confirmation that measurement, monitoring and reporting information are complete, accurate and reliable). Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Marketing assistance provided Data element name: Marketing assistance provided Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Quarterly Reporting question: Was marketing assistance provided? Description: Was any marketing assistance provided to the primary operator for the commodity(ies) produced from this field? Marketing assistance includes guaranteeing the sale of the commodity(ies), providing a platform for the sale of the commodity(ies), providing a label, branding, or other support related to marketing. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Incentive per acre or head Data element name: Incentive per acre or head Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Quarterly Reporting question: Is this field receiving a per-acre or per-head incentive? Description: Is this field receiving an incentive payment to implement a specific CSAF practice or set of practices on a per-acre or per-head (livestock) basis? Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Version 1.0 Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Quarterly Page 50 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field commodity value Data element name: Field commodity value Reporting question: What is the value of the commodity produced on the enrolled field? Description: The dollar value of the commodity produced on the enrolled field. Data type: Decimal Measurement unit: Dollars Logic: None — all respond Data collection level: Field Field commodity volume Data element name: Field commodity volume Select multiple values: No Allowed values: \$1-\$10,000,000 Required: Yes Data collection frequency: Quarterly Reporting question: What is the volume of commodity produced on the enrolled field? Description: The volume of the commodity produced on the enrolled field Data type: Decimal Select multiple values: No Measurement unit: Number Allowed values: 1-10,000,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field commodity volume unit Data element name: Field commodity volume Reporting question: What is the unit of volume? unit Description: The unit associated with the volume of the commodity produced on the enrolled field. If "other" is chosen, enter the appropriate value in the additional column. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Cost of implementation Data element name: Cost of implementation Select multiple values: No Allowed values: • Bushels • Carcass weight pounds • Gallons • Head • Linear feet • Liveweight pounds • Pounds • Tons • Other (specify) Required: Yes Data collection frequency: Quarterly Reporting question: What is the cost of practice implementation in the field? Description: Total annual estimated cost per unit of implementing the practice(s) in the enrolled field. Data type: Decimal Measurement unit: Dollars Logic: None — all respond Data collection level: Field Select multiple values: No Allowed values: \$1-\$10,000,000 Required: Yes Data collection frequency: Quarterly Version 1.0 Page 51 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships

for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Cost unit Data element name: Cost unit Reporting question: What is the unit for cost? Description: The unit associated with the cost of implementing CSAF practices in the field. If "other" is chosen, enter the appropriate value in the additional column. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Per acre • Per bushel • Per head • Per linear foot • Per pound • Per ton • Other (specify) Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Cost coverage Data element name: Cost coverage Reporting question: What percent of the practice cost is covered by the incentive? Description: Estimated proportion of total annual cost of implementing the practice(s) that is covered by project incentives. Data type: Integer Measurement unit: Percent Logic: None — all respond Data collection level: Field Field GHG monitoring Select multiple values: No Allowed values: 0-100 Required: Yes Data collection frequency: Quarterly Data element name: Field GHG monitoring Reporting question: How were GHG impacts monitored in this 1-3 field? Description: Up to the top three forms of monitoring GHG benefits as part of MMRV requirements. Monitoring is defined as ongoing review and confirmation that the climate-smart practice has been implemented according to the agreed upon standard and documentation of any changes in the site, implementation, or GHG emissions impacts over time. Include up to 3 methods, based on which methods are most commonly used for this field. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 GHG monitoring methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG monitoring methods as free text. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Select multiple values: No Allowed values: • Drones • Ground-level photos and videos • On-farm inspection • Plot-based sampling (e.g., soil, water) • Producer records or attestation • Satellite monitoring or remote sensing • Soil metagenomics • Soil sensors • Water sensors • Other (specify) Required: Yes Data collection frequency: Quarterly Version 1.0 Page 52 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field GHG reporting Data element name: Field GHG reporting Reporting question: How were GHG benefits reported for this 1-3 field? Description: Up to the top three forms of reporting on GHG benefits as part of MMRV requirements. Reporting is defined as documenting and sharing monitoring and measurement results with project partners, the recipient, and any third-party verification organization. Include up to 3 methods, based on which methods are most commonly used for this field. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 GHG reporting methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG reporting methods as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Automated devices • Email • Mobile app • Paper • Third-party actors • Website • Other (specify) Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field GHG verification Data element name: Field GHG verification Reporting question: How was implementation of practices to 1-3 reduce GHG emissions verified for this field? Description: Up to the top three of verification of GHG benefits as part of MMRV requirements. Verification is defined as independent confirmation that measurement, monitoring and reporting information are complete, accurate and reliable. Include up to 3 methods, based on which methods are most commonly used for this field. The worksheet provides three columns with a drop-down list of the allowed values. Choose one value for each column. If fewer than 3 GHG verification methods are used, leave unnecessary columns blank. If "other" is chosen, use the additional column to enter other GHG verification methods as free text.

Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Artificial intelligence • Computer modeling • Recipient audit • Photos • Record audit • Satellite imagery • Site or field visit • Third-party audit • Other (specify) Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Version 1.0 Page 53 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field GHG calculations Data element name: Field GHG Reporting question: What methods are used to calculate GHG calculations benefits in this field? Description: List the method(s) used to calculate GHG benefits in this field. If yes to direct physical measurements, submit result reports (see Supplemental Data Submission — Field direct GHG measurement results). Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Field official GHG calculation Data element name: Field official GHG calculation Select multiple values: No Allowed values: • Models • Direct field measurements • Both Required: Yes Data collection frequency: Quarterly Reporting question: What method was used to calculate the official GHG benefits in this field? Description: List the method used to calculate the official GHG benefits in this field that are reported as part of the project's aggregate impact. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Models • Direct field measurements Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field official GHG ER Data element name: Field official GHG Reporting question: What are the estimated total GHG emission emission reductions reductions (CO₂eq) in this field? Description: Estimated greenhouse gas emission reductions from practice implementation in this field that are reported as part of the project's aggregate impact. This data element must be entered upon practice completion or annually, as appropriate. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO₂eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field official carbon stock Data element name: Field official carbon Reporting question: How much carbon has been sequestered in stock this field? Description: Estimated total change in carbon stock based on practice implementation in this field. This data element can be reported in any quarter and is cumulative for the year. Conversion rate is one ton of carbon = 3.67 tons of CO₂eq. Data type: Decimal Measurement unit: Metric tons CO₂eq Logic: None — all respond Data collection level: Field Select multiple values: No Allowed values: 0-10,000,000 Required: Yes Data collection frequency: Quarterly Version 1.0 Page 54 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field official CO₂ ER Data element name: Field official CO₂ Reporting question: What are the estimated total CO₂ emission emission reductions reductions in this field? Description: Estimated total carbon dioxide emission reductions based on practice implementation in this field that are reported as part of the project's aggregate impact. This data element must be entered upon practice completion or annually, as appropriate. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO₂ Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field official CH₄ ER Data element name: Field official CH₄ emission Reporting question: What are the estimated total CH₄ reductions emission reductions in this field? Description: Estimated total methane emission reductions based on practice implementation in this field that are reported as part of the project's aggregate impact. This data element must be entered upon practice completion or annually, as appropriate. Conversion rate is one ton of CH₄ = 25 tons of CO₂eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CH₄ reduced in Allowed values: 0-10,000,000 CO₂eq Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field official N₂O ER Data

element name: Field official N2O emission Reporting question: What are the estimated total N2O reductions emission reductions in this field? Description: Estimated total nitrous oxide emission reductions based on practice implementation in this field that are reported as part of the project's aggregate impact. This data element must be entered upon practice completion or annually, as appropriate. Conversion rate is one ton of N2O = 298 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons N2O reduced in Allowed values: 0-10,000,000 CO2eq Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Field offsets produced Data element name: Field offsets produced Reporting question: How many carbon offsets have been produced in this field? Description: Total carbon offsets produced in the field during the quarter (not cumulative). Offsets are defined as having been verified and certified using an accepted standard and sold into the carbon marketplace. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Version 1.0 Page 55 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Field insets produced Data element name: Field insets produced Reporting question: How many carbon insets have been produced in this field? Description: Total carbon insets produced in the field during the quarter (not cumulative). Insets are defined as having been verified and certified using an accepted standard and accounted for within Scope 3 emissions for a firm. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Other field measurement Data element name: Other field Reporting question: Were data collected from the field for measurement reasons other than GHG benefit estimation? Description: Direct physical measurements or data collection taken in the field for any reason other than GHG benefits estimation. These reasons could include calibration of GHG estimation tools or models, tracking other environmental benefits (see Field environmental benefits report), and other reasons. If yes, submit corresponding reports (see Supplemental data submission - Field direct measurement results). Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: None — all respond Required: Yes Data collection level: Field Data collection frequency: Quarterly Version 1.0 Page 56 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG Benefits - Alternate Modeled Unique IDs Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name (must match FSA farm enrollment data) County of field County name (must match FSA farm enrollment data) Commodity type Data element name: Commodity type 1-6 Reporting question: What type of commodity(ies) is produced from this field? Description: Type of commodity(ies) produced in field enrolled in the project. See full list of commodity options in Appendix B. The worksheet provides multiple columns with drop-down lists of the allowed values. Choose one value for each column. Leave unnecessary columns blank Data type: List Select multiple values: No Measurement unit: Category Allowed values: FSA commodity list Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Practice type Data element name: Practice type 1-7 Reporting question: What CSAF practice is being implemented by this project? Description: Which CSAF practice or practices are being implemented in this project? CSAF practices are included in a list in Appendix A. The worksheet provides seven columns for this data element. Enter one value for each column. If there are fewer than 7 practices being implemented by the project, leave unnecessary columns blank. Data type: List

Select multiple values: No Measurement unit: Category Allowed values: See list in Appendix A Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Version 1.0 Page 57 of 87 --ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG model Data element name: GHG model Reporting question: What model was used for alternate calculation of GHG benefits? Description: Select the model used for the alternate calculation of the field's GHG benefits. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • ACC Calculator • Agriculture, Forestry and Other Land Use (AFOLU) Carbon Calculator • AIRES • APEX • Bowen Ratio Energy Balance • Carat-Calculator • CArPE • CDFA web-based calculator • COMET-Farm • COMET-Planner • CoolFarm • Cover Crop Explore • CropTrak • CultivateAI's FMIS • DayCent-CR • DNDC • DSSAT • Earth Optics • EcoPractices • EPIC • Extrapolation based on literature • FieldPrint • Granular • GREET • gTIR • IFSM • IPCC default emissions factors & models • itree • Nitrogen Balance • Nutrient Tracking Tool (NTT) • RCD Project Tracker • Revised Universal Soil Loss equation 2 (RUSLE2) • RuFaS • SAFE-Link • SALUS (CIBO) • SNAPGRAZE • SquareRoots • SWAT-C • SYMFONI • Truterra Sustainability Tool • Verra • WEPP • YardStick • Other (specify) Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Version 1.0 Page 58 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Model start date Data element name: Model start date Reporting question: For what time period are the GHG benefits modeled (model start date)? Description: Date that the model parameters begin. Data type: Date Select multiple values: NA Measurement unit: MM/DD/YYYY Allowed values: 01/01/1950 - 12/31/2030 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Model end date Data element name: Model end date Reporting question: For what time period are the GHG benefits modeled (model end date)? Description: Date that the model parameters end. Data type: Date Select multiple values: NA Measurement unit: MM/DD/YYYY Allowed values: 01/01/2023-12/31/2030 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Total GHG benefits estimated Data element name: Total GHG benefits Reporting question: What is the alternate estimate of the field's estimated total GHG emission reductions? Description: Total greenhouse gas emission reductions from practice implementation in the field estimated using an alternate model. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO₂eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Total carbon stock estimated Data element name: Total carbon stock Reporting question: What is the alternate estimate of how much estimated carbon has the field has sequestered? Description: Total change in carbon stock based on practice implementation in the field estimated using an alternate model. Conversion rate is one ton of carbon = 3.67 tons of CO₂eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO₂eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Total CO₂ estimated Data element name: Total CO₂ estimated Reporting question: What is the alternate estimate of the field's total CO₂ emission reductions? Description: Total carbon dioxide emission reductions based on practice implementation in the field estimated using an alternate model. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CO₂ Allowed values: 0-10,000,000 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level:

Field Data collection frequency: Annual Version 1.0 Page 59 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Total CH4 estimated Data element name: Total CH4 estimated Reporting question: What is the alternate estimate of the field's total CH4 emission reductions? Description: Total methane emission reductions based on practice implementation in the field estimated using an alternate model. Conversion rate is one ton of CH4 = 25 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CH4 reduced in CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Total field N2O estimated Data element name: Total N2O estimated Reporting question: What is the alternate estimate of the field's total N2O emission reductions? Description: Total nitrous oxide emission reductions based on practice implementation in the field estimated using an alternate method. Conversion rate is one ton of N2O = 298 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons N2O reduced in CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If project calculates GHG benefits using multiple methods Data collection level: Field Data collection frequency: Annual Version 1.0 Page 60 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 GHG Benefits - Measured Unique IDs Farm ID Unique Farm ID assigned by FSA Tract ID Unique Tract ID assigned by FSA Field ID Unique Field ID assigned by FSA State or territory of field State name (must match FSA farm enrollment data) County of field County name (must match FSA farm enrollment data) GHG measurement method Data element name: GHG measurement method Reporting question: What measurement method is used to calculate GHG benefits? Description: Field-based measurement method used to calculate GHG benefits. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Emissions measurement unit • Flux towers • Litterbags • Plant measurements • Portable emissions analyzers • Soil flux chambers • Soil samples • Soil sensors • Vehicle-mounted sensors • Other (specify) Logic: None — all respond Required: If a project conducts soil samples or takes carbon stock or greenhouse gas emission measurements in this field Data collection level: Field Data collection frequency: Annual Lab name Data element name: Lab name Reporting question: What is the name of the lab that processed the measurement samples? Description: Name of entity that received data and conducted analysis of samples. Data type: Text Select multiple values: No Measurement unit: NA Allowed values: Free text Logic: None — all respond Required: If applicable Data collection level: Field Data collection frequency: Annual Version 1.0 Page 61 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Measurement start date Data element name: Measurement start date Reporting question: On what date did the measurement start? Description: Date that the measurements began. If it was a single point in time, use the same date for start date and end date. If multiple measurements took place over a time period, use the date that the measurements first began. Data type: Date Measurement unit: MM/DD/YYYY Logic: None — all respond Data collection level: Field Measurement end date Data element name: Measurement end date Select multiple values: No Allowed values: 01/01/2023 - 12/31/2030 Required: If a project conducts soil samples or takes carbon stock or greenhouse gas emission measurements in this field Data collection frequency: Annual Reporting question: On what date did the measurement end? Description: Date that the measurements began. If it was a single point in time, use the same date for start date and end date. If multiple measurements took place over a time period, use the date that the measurements were completed. Data type: Date Measurement unit: MM/DD/YYYY Logic: None — all

respond Data collection level: Field Total CO2 reduction calculated Data element name: Total CO2 reduction calculated Select multiple values: No Allowed values: 01/01/2023- 12/31/2030 Required: If a project conducts soil samples or takes carbon stock or greenhouse gas emission measurements in this field Data collection frequency: Annual Reporting question: What are the total measured CO2 emission reductions? Description: Total annual CO2 emission reductions based on practice implementation in the field calculated from in-field measurements. Data type: Decimal Measurement unit: Metric tons CO2 Logic: None — all respond Data collection level: Field Total field carbon stock measured Data element name: Total field carbon stock measured Select multiple values: No Allowed values: 0-10,000,000 Required: If a project takes carbon stock or greenhouse gas emission measurements in this field Data collection frequency: Annual Reporting question: What is the total amount of carbon sequestered based on repeat measurements in this field? Description: Change in carbon stock based on practice implementation in the field calculated from repeat soil sampling in this field. (Results for initial field soil samples should be reported in the 'Soil sample result' and 'Measurement type' columns.) Conversion rate is one ton of carbon = 3.67 tons of CO2eq. Data type: Decimal Measurement unit: Metric tons CO2eq Logic: None — all respond Data collection level: Field Select multiple values: No Allowed values: 0-10,000,000 Required: If a project conducts soil samples or takes carbon stock measurements in this field Data collection frequency: Annual Version 1.0 Page 62 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Total CH4 reduction calculated Data element name: Total CH4 reduction calculated Reporting question: What are the total measured CH4 emission reductions? Description: Total annual methane emission reductions based on practice implementation in the field calculated from in-field measurements. Conversion rate is one ton of CH4 = 25 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons CH4 reduced in CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If a project conducts soil samples or takes carbon stock or greenhouse gas emission measurements in this field Data collection level: Field Data collection frequency: Annual Total N2O reduction calculated Data element name: Total N2O reduction calculated Reporting question: What are the total measured N2O emission reductions? Description: Total annual nitrous oxide emission reductions based on practice implementation in the field calculated from in-field measurements. Conversion rate is one ton of N2O = 298 tons of CO2eq. Data type: Decimal Select multiple values: No Measurement unit: Metric tons N2O reduced in CO2eq Allowed values: 0-10,000,000 Logic: None — all respond Required: If a project conducts soil samples or takes carbon stock or greenhouse gas emission measurements in this field Data collection level: Field Data collection frequency: Annual Soil sample result Data element name: Soil sample result Reporting question: What is the numeric result from this soil sample? Description: Results of measurement(s) taken to determine the carbon stock of a soil (the tons of carbon found in a specified volume of soil). Data type: Decimal Select multiple values: No Measurement unit: Amount Allowed values: .00001-100,000 Logic: None — all respond Required: If a project conducts soil samples in this field Data collection level: Field Data collection frequency: Annual Version 1.0 Page 63 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Soil sample result unit Data element name: Soil sample result unit Reporting question: What is unit for the soil sample result? Description: Unit for the corresponding soil sample result. The worksheet provides a drop-down list of choices for this data element. If "other" is chosen, use the additional column to enter the appropriate yield unit as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Percent • Ppm • Grams • Grams per cubic centimeter • Other (specify) Logic: None — all respond Required: If a project conducts soil samples in this field

Data collection level: Field Data collection frequency: Annual Measurement type Data element name: Measurement type Reporting question: What type of analysis was conducted for this soil sample? Description: Type of soil analysis conducted. The worksheet provides a drop-down list of choices for this data element. If "other" is chosen, use the additional column to enter the appropriate yield unit as free text. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Organic matter • Total organic carbon • Bulk density • Other (specify) Logic: None — all respond Required: If a project conducts soil samples in this field Data collection level: Field Data collection frequency: Annual Version 1.0 Page 64 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Additional Environmental Benefits Unique IDs Farm ID Tract ID Field ID State or territory of field County of field Environmental benefits Unique Farm ID assigned by FSA Unique Tract ID assigned by FSA Unique Field ID assigned by FSA State name (must match FSA farm enrollment data) County name (must match FSA farm enrollment data) Data element name: Environmental Reporting question: Are environmental benefits other than benefits GHGs being tracked in the field? Description: Tracking of environmental benefits other than greenhouse gas emission reductions and carbon sequestration in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Measurement unit: Category Logic: None — all respond Data collection level: Field Reduction in nitrogen loss Data element name: Reduction in nitrogen loss Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Annual Reporting question: Are reductions in nitrogen losses being tracked in the field? Description: Tracking reductions in nitrogen losses in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Measurement unit: Category Logic: Respond if yes to 'Environmental benefits' Data collection level: Field Reduction in nitrogen loss amount Data element name: Reduction in nitrogen loss amount Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Annual Reporting question: How much reduction in nitrogen losses have been measured in the field? Description: Total amount of reduction in nitrogen losses that is measured and reported in the enrolled field. Data type: Decimal Measurement unit: Amount Logic: Respond if yes to 'Reduction in nitrogen loss' Data collection level: Field Select multiple values: No Allowed values: 0-1,000,000 Required: Yes Data collection frequency: Annual Version 1.0 Page 65 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Reduction in nitrogen loss amount unit Data element name: Reduction in nitrogen Reporting question: What is the unit for how much reduction in loss amount unit nitrogen losses have been measured in the field? Description: Unit for the total amount of reduction in nitrogen losses that is measured and reported in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduction in nitrogen loss' Data collection level: Field Reduction in nitrogen loss purpose Data element name: Reduction in nitrogen loss purpose Select multiple values: No Allowed values: • Kilograms • Metric tons • Pounds • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: What is the purpose of tracking reduction in nitrogen losses? Description: Purpose of tracking reduction in nitrogen losses in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduction in nitrogen loss' Data collection level: Project Reduction in phosphorus loss Data element name: Reduction in phosphorus loss Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Reporting

question: Are reductions in phosphorus losses being tracked in the field? Description: Tracking of reductions in phosphorus losses in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Reduction in phosphorus loss amount Data element name: Reduction in Reporting question: How much reduction in phosphorus losses phosphorus loss amount have been measured in the field? Description: Total amount of reduction in phosphorus losses that is measured in the field. Data type: Decimal Measurement unit: Amount Logic: Respond if yes to 'Reduction in phosphorus loss' Data collection level: Field Select multiple values: No Allowed values: 0-1,000,000 Required: Yes Data collection frequency: Annual Version 1.0 Page 66 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023

Reduction in phosphorus loss amount unit Data element name: Reduction in Reporting question: What is the unit for the reduction in phosphorus loss amount unit phosphorus losses measured in the field? Description: Unit for the total amount of reduction in phosphorus losses that is measured in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduction in phosphorus loss' Data collection level: Field Reduction in phosphorus loss purpose Data element name: Reduction in phosphorus loss purpose Select multiple values: No Allowed values: • Kilograms • Metric tons • Pounds • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: What is the purpose of tracking reductions in phosphorus losses? Description: Purpose of tracking reduction in phosphorus losses in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduction in phosphorus loss' Data collection level: Field Other water quality Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Data element name: Other water quality Reporting question: Are other water quality metrics being tracked in the field? Description: Project tracking of other water quality metrics in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Version 1.0 Page 67 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023

Other water quality type Data element name: Other water quality Reporting question: What type of other water quality metric type have been measured in the field? Description: Type of other water quality metric (besides nitrogen loss and phosphorus loss reductions) that is measured in the field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Other water quality' Data collection level: Field Other water quality amount Data element name: Other water quality amount Select multiple values: No Allowed values: • Sediment load reduction • Temperature • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: How much reduction in other water quality metrics have been measured in the field? Description: Total amount of reduction in other water quality metrics that is measured in the enrolled field. Data type: Decimal Measurement unit: Amount Logic: Respond if yes to 'Other water quality' Data collection level: Field Other water quality amount unit Data element name: Other water quality amount unit Select multiple values: No Allowed values: 0-1,000,000 Required: Yes Data collection

frequency: Annual Reporting question: What is the unit for the reduction in other water quality metrics measured in the field? Description: Unit for the total amount of reduction in other water quality metrics that is measured in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Other water quality' Data collection level: Field Select multiple values: No Allowed values: • Degrees F • Kilograms • Kilograms per liter • Metric tons • Pounds • Other (specify) Required: Yes Data collection frequency: Annual Version 1.0 Page 68 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Other water quality purpose Data element name: Other water quality Reporting question: What is the purpose of tracking other water purpose quality benefits? Description: Purpose of tracking other water quality benefits in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Logic: Respond if yes to 'Other water Required: Yes quality' Data collection level: Field Data collection frequency: Annual Water quantity Data element name: Water quantity Reporting question: Is water conservation being tracked in the field? Description: Tracking of water conservation or reduction in use in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Water quantity amount Data element name: Water quantity Reporting question: How much water conservation has been amount measured in the field? Description: Total amount of water conservation or reduction that is measured in the field. Data type: Decimal Select multiple values: No Measurement unit: Amount Allowed values: 0-1,000,000 Logic: Respond if yes to 'Water quantity' Required: Yes Data collection level: Field Data collection frequency: Annual Water quantity amount unit Data element name: Water quantity Reporting question: What is the unit for the amount of water amount unit conservation measured in the field? Description: Unit for the total amount of water conservation or reduced use that is measured and reported in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Acre-feet • Cubic feet • Other (specify) Logic: Respond if yes to 'Water quantity' Required: Yes Data collection level: Field Data collection frequency: Annual Version 1.0 Page 69 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Water quantity purpose Data element name: Water quantity Reporting question: What is the purpose of tracking water purpose conservation? Description: Purpose of tracking water conservation or reductions in water use in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Water quantity' Data collection level: Field Reduced erosion Data element name: Reduced erosion Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: Is reduced soil erosion being tracked in the field? Description: Tracking of reduced soil erosion in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Measurement unit: Category Logic: Respond if yes to 'Environmental benefits' Data collection level: Field Reduced erosion amount Data element name: Reduced erosion amount Select multiple values: No Allowed values: • Yes • No • I don't know Required: Yes Data collection frequency: Annual Reporting question: How much erosion reduction has been

measured in the field? Description: Total amount of erosion reduction that is measured in the enrolled field. Data type: Decimal Select multiple values: No Measurement unit: Amount Allowed values: 0-1,000,000 Logic: Respond if yes to 'Reduced erosion' Required: Yes Data collection level: Field Data collection frequency: Annual Reduced erosion amount unit Data element name: Reduced erosion unit Reporting question: What is the unit for the amount of erosion reduction measured? Description: Unit for the total amount of erosion reduction from enrolled fields that is measured and reported by the project. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduced erosion' Data collection level: Field Select multiple values: No Allowed values: • Tons • Other (specify) Required: Yes Data collection frequency: Annual Version 1.0 Page 70 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Reduced erosion purpose Data element name: Reduced erosion Reporting question: What is the purpose of tracking reduced purpose erosion in the field? Description: Purpose of tracking reduced erosion the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduced erosion' Data collection level: Field Reduced energy use Data element name: Reduced energy use Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: Is reduced energy use being tracked in the field? Description: Tracking of reduced energy use in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Reduced energy use amount Data element name: Reduced energy use Reporting question: How much energy use reduction has been amount measured in the field? Description: Total amount of energy use reduction that is measured in the enrolled field. Data type: Decimal Select multiple values: No Measurement unit: Amount Allowed values: 0-1,000,000 Logic: Respond if yes to 'Reduced energy Required: Yes use' Data collection level: Field Data collection frequency: Annual Reduced energy use amount unit Data element name: Reduced energy use Reporting question: What is the unit for the energy use unit reduction measured in the field? Description: Unit for the total amount of energy use reduction that is measured in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Kilowatt hours • Other (specify) Logic: Respond if yes to 'Reduced energy Required: Yes use' Data collection level: Field Data collection frequency: Annual Version 1.0 Page 71 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Reduced energy use purpose Data element name: Reduced energy use Reporting question: What is the purpose of tracking reduced purpose energy use in the field? Description: Purpose of tracking reduced energy use in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column. Data type: List Measurement unit: Category Logic: Respond if yes to 'Reduced energy use' Data collection level: Field Avoided land conversion Data element name: Avoided land conversion Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: Is avoided land conversion being tracked in the field? Description: Tracking of avoided land conversion in the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits. Land conservation means land use changing from agricultural uses to non-agricultural uses.

Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Avoided land conversion amount Data element name: Avoided land Reporting question: How much avoided land conversion has conversion amount been measured in the field? Description: Total amount of avoided land conversion that is measured in the enrolled field.

Data type: Decimal Measurement unit: Amount Logic: Respond if yes to 'Avoided land conversion' Data collection level: Field Avoided land conversion amount unit Data element name: Avoided land conversion unit Select multiple values: No Allowed values: 0-1,000,000 Required: Yes Data collection frequency: Annual Reporting question: What is the unit for the amount of avoided land conversion measured in the field? Description: Unit for the total amount of avoided land conversion that is measured in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column.

Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Acres • Other (specify) Logic: Respond if yes to 'Avoided land Required: Yes conversion' Data collection level: Field Data collection frequency: Annual Version 1.0 Page 72 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Avoided land conversion purpose Data element name: Avoided land Reporting question: What is the purpose of tracking avoided conversion purpose land conversion in the field? Description: Purpose of tracking avoided land conversion in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column.

Data type: List Measurement unit: Category Logic: Respond if yes to 'Avoided land conversion' Data collection level: Field Improved wildlife habitat Data element name: Improved wildlife habitat Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Reporting question: Are improvements to wildlife habitat being tracked in the field? Description: Tracking of improvements to wildlife in and around the enrolled field. Tracking means at a minimum using some form of monitoring and reporting that can quantify benefits.

Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Yes • No • I don't know Logic: Respond if yes to 'Environmental Required: Yes benefits' Data collection level: Field Data collection frequency: Annual Improved wildlife habitat amount Data element name: Improved wildlife Reporting question: How much improved wildlife habitat has habitat amount been measured in the field? Description: Total amount of improved wildlife habitat that is measured in and around the enrolled fields.

Data type: Decimal Measurement unit: Amount Logic: Respond if yes to 'Improved wildlife habitat' Data collection level: Field Improved wildlife habitat amount unit Data element name: Improved wildlife habitat unit Select multiple values: No Allowed values: 0-1,000,000 Required: Yes Data collection frequency: Annual Reporting question: What is the unit for the amount of improved wildlife habitat measured in the field? Description: Unit for the total amount of improved wildlife habitat that is measured in and around enrolled fields. If "other" is chosen, enter the appropriate value as free text in the additional column.

Data type: List Select multiple values: No Measurement unit: Category Allowed values: • Acres • Linear feet • Other (specify) Logic: Respond if yes to 'Improved wildlife Required: Yes habitat' Data collection level: Field Data collection frequency: Annual Version 1.0 Page 73 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Improved wildlife habitat purpose Data element name: Improved wildlife Reporting question: What is the purpose of tracking improved habitat purpose wildlife habitat in the field? Description: Purpose of tracking improved wildlife habitat in the enrolled field. If "other" is chosen, enter the appropriate value as free text in the additional column.

Data type: List Measurement unit: Category Logic: Respond if yes

to 'Improved wildlife habitat' Data collection level: Field Select multiple values: No Allowed values: • Commodity marketing • Producing insets • Producing offsets • I don't know • Other (specify) Required: Yes Data collection frequency: Annual Version 1.0 Page 74 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 CSAF Practice Sub-questions For some CSAF practices, there is an additional set of questions that are unique to each practice. Responses to these questions are needed to verify estimated GHG benefits of these practices. If a field is implementing a CSAF practice with an NRCS CPS code in Table 11, answer the follow-up questions listed next to the relevant practice name in the table. Use the SupplementalReporting Workbook — CSAF Practice Sub-questions to report the required information.

Table 11. Follow-on questions for select CSAF practices

Practice name and code	Follow-up question
Options (select one) Alley Cropping (CPS 311)	Species category (select most common/extensive type if using more than one) Coniferous trees Deciduous trees Shrubs Species density (number of trees planted per acre) 1-10,000
Aerobic lagoon Anaerobic digester (complex mix) with energy generation Anaerobic digester (plug flow) with energy generation Anaerobic lagoon Composting Covered lagoon (no energy generation or flaring) Waste storage system prior to installing anaerobic Covered lagoon with flaring digester Daily spread Deep bedding pack Deep pit Dry lot Anaerobic Digester (CPS 366) Dry stacking/solid storage Pasture/range/paddock Poultry with bedding Poultry without bedding (e.g., high rise) Slurry tank/basin Covered lagoon with energy generation Covered lagoon with flaring Digester type Covered lagoon (no energy generation or flaring) Complex mix with energy generation Plug flow with energy generation Other (specify) Additional feedstock Food waste source (select most Straw or bedding common if using more than one) Wastewater Other (specify) Version 1.0 Page 75 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Coal Diesel Electricity Gasoline Fuel type before installation Kerosene Liquified petroleum gas (LPG) Natural gas Propane Wood Other (specify) Fuel amount before installation 0-1,000,000 Cubic feet (natural gas) Fuel amount unit before installation Gallons (diesel, gasoline, propane, LPG, kerosene) Kilowatt-hours (electricity) Pounds (wood, coal) Combustion System Other (specify) Improvement (CPS 372) Coal Diesel Electricity Gasoline Fuel type after installation Kerosene Liquified petroleum gas (LPG) Natural gas Propane Wood Other (specify) Fuel amount after installation 0-1,000,000 Cubic feet (natural gas) Fuel amount unit after installation Gallons (diesel, gasoline, propane, LPG, kerosene) Kilowatt-hours (electricity) Pounds (wood, coal) Other (specify) Brassicas Conservation Cover (CPS 327) Species category (select most common/extensive type if using more than one) Grasses Legumes Non-legume broadleaves Shrubs Version 1.0 Page 76 of 87 ATTACHMENT - DATA DICTIONARY USDAPartnerships for Climate-Smart Commodities Data Dictionary for Recipients February 2023 Brassica Broadleaf Conservation crop type Cool season Grass Legume Warm season Added perennial crop Conservation Crop Rotation (CPS 328) Change implemented Reduced fallow period Both Conventional (plow, chisel, disk) No-till, direct seed Conservation crop rotation tillage type Reduced till Strip till None Other (specify) Total conservation crop rotation length in days 1-120 Strip width (feet) 1-100 Contour Buffer Strips (CPS Grasses 332) Species category Forbs Mix Brassicas Species category (select most Forbs common/extensive type if using more Grasses than one) Legume Non-legume broadleaves Grazing Cover Crop (CPS 340) Cover crop planned management Haying Termination Burning Herbicide application Cover crop termination method Incorporation Mowing Rolling/crimping Winter kill/frost Grass Critical Area Planting (CPS 342) Species category (select most common/extensive type if using more than one) Grass legume/forb mix Herbaceous woody mix Perennial or reseeding Shrubs Trees Crude protein (percent) 0-100 Fat (percent) 0-100 Feed Management (CPS 592) Chemical Feed

87 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS Partnerships for Climate-Smart
Commodities Additional Specific Terms and Conditions February 2023 I. Overarching Statement The
following award terms and conditions are applicable to Partnerships for Climate-Smart Commodities
agreements and are in addition to the USDA FPAC General Terms and Conditions. The award recipient
must abide by all terms of this grant including, but not limited to, the General Terms and Conditions,
the terms in the Funding Opportunity and associated Frequently Asked Questions, and this
addendum. The recipient must also deliver on the planned objectives in the project narrative and
budget narrative associated with this grant. II. Eligibility and Highly Erodible Lands and Wetlands
Compliance In order to be eligible for an incentive payment as a part of the Partnerships for
Climate-Smart Commodities, a producer must: • Establish Farm Records with the Farm Service Agency
(FSA) (have farm, tract, and field numbers in place); • Complete an AD-2047 (Customer Data Worksheet
to facilitate the collection of customer data for Business Partner Record); • Certify highly erodible land
conservation (HEL) and wetland conservation (WC) compliance via Form AD-1026, Highly Erodible Land
Conservation (HELC) and Wetland Conservation (WC) Certification; and • Certify that they are not a
foreign person or entity. Farm, tract, and field numbers are required for the producer, and ultimately
the Partnerships for Climate-Smart Commodities recipient, to report climate-smart practice
implementation to USDA, as well as to certify and maintain HELC/WC compliance. This will require that
some producers who do not already have these numbers, like perennial crop growers or feedlots,
establish these records with USDA's FSA. Farm, tract, field numbers, producer name, and Core
Customer I.D. (CCID) will be provided by the recipient to the National Program Officer as a part of
routine grant reporting. Recipients must ensure that producers receiving financial assistance or
incentives through this project use the same name as is included in the relevant FSA Business File for
that Farm ID in any contracts or similar documentation kept by the recipient. Producers are not bound
by the payment limitations and the adjusted gross income (AGI) limitations that are in place for other
USDA programs. In order to demonstrate HELC/WC compliance for Partnerships for Climate-Smart
Commodities incentive payments, producers will need to request a copy of their subsidiary print from
their Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 1 of
6 February 2023 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS USDA FSA field
office. The Subsidiary Print includes print year specific eligibility related information about a selected
producer. The producer will then provide this documentation to the Partnerships for Climate-Smart
Commodities recipients as proof of compliance. A current year subsidiary print will be required for
each crop year that the producer receives a payment, and HELC/WC eligibility information is provided
under the AD-1026 and Conservation Compliance sections of subsidiary (determined by year, which
can change at any time during the year or in a subsequent year). As is the case already, field offices will
not be expected to provide documentation to anyone besides the producer themselves (and must
always comply with Section 1619 limitations if they ever do provide documentation to third parties).
Producers must have control of the land for the term of their beneficiary contract. Recipients are
responsible for determining producer eligibility within the funding opportunity requirements.
Recipients must inform producers of eligibility requirements and direct them to local USDA offices for
requested information as necessary, including but not limited to, farm and tract establishment and
Highly Erodible Land and Wetland Compliance determinations. Privacy of producers is a priority

throughout this process, and recipients are responsible for maintaining producer privacy in the process. At minimum, the recipient will collect and review subsidiary reports from participating producers. They will ensure that the producer is listed as "compliant" in all sections of the conservation compliance portion of subsidiary and "certified" for AD-1026 before an incentive payment is made. If payments to a producer span more than one Federal fiscal year, the recipient will review an updated subsidiary print each fiscal year to ensure that the status is still compliant. III. Other Environmental and Cultural Resources Reviews A Finding of No Significant Impact (FONSI) was signed by USDA NRCS on August 26, 2022. A copy of the Programmatic Environmental Assessment for Partnerships for Climate-Smart Commodities is available at www.usda.gov/climate-smart-commodities. USDA may determine that additional environmental and cultural resources review is needed for any particular action under Partnerships for Climate-Smart Commodities. The recipient must not execute any beneficiary contracts under this grant agreement prior to receipt of a letter from USDA that specifically details: 1) further procedures deemed appropriate by the Agency to ensure a completed National Environmental Policy Act (NEPA) review and all appropriate consultation requirements are met, and 2) additional instructions for any unanticipated discoveries or conditions. A resolution of support is required for projects on Tribal lands from the governing body of the Tribe with jurisdiction over that land, if the applicant is not the Tribe nor an entity owned or Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 2 of 6 February 2023 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS operated by that Tribe. USDA may approve alternative documentation for resolutions when USDA deems necessary and legally sufficient. IV. Producer Benefits USDA encourages the recipient to disclose to participating producers the manner and amount for which any market premiums derived from the development of the relevant climate-smart commodity will be shared between participating parties, including producers. USDA will be monitoring producer benefits, in particular those to small and underserved producers, throughout the grant period. Recipients agree that their project(s) will implement a plan for engaging small and underserved producers as laid out in this agreement. V. Producer Data Protection and Disclosure Recipients must ensure each producer has convenient access to any data collected from that producer or the producer's land and any associated modeling as part of the project. The recipient must provide each producer applying for benefits under this grant a description in writing of how their information, including but not limited to data about their farm and commodities, will be utilized, protected and shared as applicable. VI. Other Data and Reporting Requirements In addition to the reporting information provided in the statement of work and General Terms and Conditions, USDA will provide a template for the Detailed Progress Report, also known as the Partnerships for Climate-Smart Commodities (PSCS) Project Reporting Workbook. Within 30 calendar days of execution of this grant, a copy of this workbook will be posted at www.usda.gov/climate-smart-commodities or an alternative location provided to the recipient by the National Program Officer. USDA may provide updates to the PCSC Project Reporting Workbook or submission methods to streamline the data collection process and/or reduce the burden on the recipient throughout the grant period. Generally, these updates will be provided at least 3 months in advance of any required changes. The recipient must not transfer any data to foreign governments or foreign entities without prior approval from USDA. USDA will provide a Technical Contact for this grant. The Technical Contact will have the responsibility of technical oversight for USDA for the project. The recipient is responsible for providing the technical assistance required to successfully implement and complete the project. The recipient must comply with any requests for information from the Technical Contact. The Technical Contact for this award is the National Program Officer assigned to this grant. Prior to execution of this grant, the recipient must

provide a shapefile depicting the project boundary for enrollment under this grant. Producer enrollment may not occur outside this boundary without modification of this grant. Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 3 of 6 February 2023 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS

Within 30 calendar days of execution of this grant, the recipient must provide to the National Program Officer a website address where enrollment information will be posted for producers for the project associated with this grant. Recipients will be responsible for the following reports:

- Submit quarterly performance reports that include a written progress report, as well as additional reporting on specific data elements contained in the most up-to-date version of the Partnerships for Climate-Smart Commodities Project Reporting Workbook. Additional information about each reported element is described in the Data Dictionary.
- Submit supplemental reports required to validate greenhouse gas (GHG) benefit data, including: (1) an initial project MMRV plan, (2) field-modeled GHG benefit reports, and (3) field-direct GHG measurement results, as applicable. Additional information about these reports is included in the Data Dictionary.
- Submit copies of project outputs and deliverables (e.g., fact sheets, reports) as attachments in ezFedGrants along with quarterly performance reports.
- Report the version of COMET-Planner used to estimate GHG benefits of the project within each quarterly performance report. As COMET-Planner is updated, recipients must adopt the latest version of the tool as directed by USDA for use in performance reports. Recipients must designate an individual as a member of the USDA Partnerships for Climate-Smart Commodities Learning Network (Partnerships Network); this representative should be identified in the Project Narrative for this grant. Each project includes a plan for up to two Partnerships Network virtual meetings and two in-person meetings a year during the project duration. Dates and other details on events will be posted at www.usda.gov/climate-smart-commodities or an alternative location provided to the recipient by the National Program Officer. The Partnerships Network will be co-chaired by representative from the USDA Office of the Chief Economist and the Farm Production and Conservation Mission Area. The Partnerships Network will inform synthesis reports to be assembled by USDA on a range of topics related to the implementation of Partnerships for Climate-Smart Commodities projects, including:

- Lessons-learned as projects are implemented;
- Options for providing technical assistance;
- Procedures for measurement/quantification, monitoring, reporting, and verifying GHG benefits;
- Options for tracing climate-smart commodities through the supply chain;
- Mechanisms for reducing costs of implementation;
- A forum for discussion and learning regarding approaches to climate-smart agriculture and forestry implementation (including but not limited to deployment and Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 4 of 6 February 2023 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS measurement/quantification, monitoring, reporting, tracking, and verification of associated greenhouse gas benefits and marketing of climate-smart commodities).
- Synthesis of outcomes; and
- Opportunities for USDA and others to inform future approaches to generating new and expanded markets for climate-smart commodities.

The Partnerships Network topics to be discussed will cover at minimum the areas described in previous FAQs and will evolve with USDA's ongoing project data analysis efforts and with input from the project recipients on the kinds of sessions that will be most helpful to them in building the diverse climate-smart markets associated with their projects. Participation may include at least one interview a year and include questions related to the following areas:

- Technical assistance approaches, methods, and successes and/or challenges
- Producer outreach approaches, methods, and successes and/or challenges
- Monitoring, measurement, reporting, and verification (MMRV) approaches, methods, and successes and/or challenges
- Marketing approaches, methods, and successes and/or

challenges • Partnership approaches, methods, and successes and/or challenges • Data collection and storage approaches, methods, and successes and/or challenges • Supply chain approaches, methods and successes and/or challenges, including approaches to traceability • Supply chain benefits and demand for climate-smart commodities • Perspectives on program design, climate-smart commodity definitions, and future approaches or opportunities • Project successes and stories USDA may also request producer exit reports at a later date. Additional marketing and branding-related requirements may be provided by USDA, including signage related to Partnerships for Climate-Smart Commodities. VII. Competition and Anti-Competitive Practices In connection with this grant, recipients may not prohibit or otherwise limit a producer from changing the provider of other services or materials not included as part of this grant. Recipients may not condition, limit, steer, or discriminate in their provision or sale of non-project business functions or products to producers based on their participation or non-participation in or use of any services provided as part of this grant. Additionally, funds in this agreement shall not be used for purposes or activities related to mergers or acquisitions. Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 5 of 6 February 2023 ATTACHMENT - CLIMATE-SMART SPECIFIC TERMS AND CONDITIONS VIII. Suspension and Disbarment The provisions governing Suspension and Disbarment in subsection 1.a.8 shall also apply to fraud, embezzlement, theft, forgery, bribery, falsification, or destruction of records, making false statements, or violations of the Federal civil antitrust or unfair trade practice laws. IX. Special provisions for awards to for-profit entities as recipients This section contains provisions that apply to awards to for-profit entities. These provisions are in addition to other applicable provisions of these terms and conditions, or they make exceptions from other provisions of the terms and conditions for awards to for-profit entities. For-profit entities that receive awards have two options regarding audits: 1) A financial related audit of a particular award in accordance with Generally Accepted Government Auditing Standards issued by the Comptroller General of the United States, in those cases where the for-profit entity receives awards under only one USDA program; or, if awards are received under multiple USDA programs, a financial related audit of all awards in accordance with Generally Accepted Government Auditing Standards issued by the Comptroller General of the United States; or 2) An audit that meets the requirements contained in 2 CFR 200 subpart F. For-profit entities that receive annual awards totaling less than the audit requirement threshold in 2 CFR 200 subpart F are exempt from USDA audit requirements for that year, but records must be available for review by appropriate officials of Federal agencies or the Government Accountability Office. X. Non-Disparagement Recipients may not engage in any advertising deemed by USDA as disparaging to another agricultural commodity or competing product, or in violation of the prohibition against false and misleading advertising. Disparagement is defined as anything that depicts other commodities in a negative or unpleasant light via overt or subjective video, photography, or statements. Comparative advertising is allowable, provided the presentation of facts is truthful, objective, not misleading, and supported by a reasonable basis. Partnerships for Climate-Smart Commodities Additional Specific Terms and Conditions Page 6 of 6 February 2023

2025 Proxy Statement 2024 Form 10-K 2025 Proxy Statement A Letter from the CEO Juan R. Luciano B O A R D C H A I R A N D C E O Dear Shareholders, ADM’s focused efforts in 2024 enabled us to manage through external headwinds and deliver across our global network. In a highly dynamic environment, with trade and policy uncertainty around the world, our focus was on balancing both short and long-term opportunities. We know millions are positively impacted by ADM’s health and wellness innovations, a broad range of industries continue to count on our sustainability-centered solutions within their supply chains, and that billions of people around the world count on us for food security. This is why ADM continues to drive opportunity in areas where our portfolio aligns to current trends – leveraging our R&D; expertise to introduce solutions for sugar and sodium reduction, expanding our decarbonization offerings, and finding new opportunities to serve customers through destination marketing. Despite the challenges posed in 2024, our teams found ways to drive strong outcomes across key areas of the business – from solid crush volumes in our Latin America region, to improved production volumes in starches and sweeteners across the business, to increased operating profits in several product lines for North America. Our collective efforts delivered \$4.2 billion in total segment operating profit, solid cash flow, and supported a full-year adjusted earnings per share of \$4.74 in 2024.* Enabled also by a strong balance sheet, ADM returned capital to stockholders, with more than \$3.3 billion in share repurchases and dividends, all while maintaining our leverage ratio at our desired target and our track record of more than 50 consecutive years of annual dividend increases. Over the last year, we made significant progress to strengthen our internal controls, strengthening our finance team and bolstering our work to prioritize accuracy, integrity and transparency in the enhancement of

our reporting processes. We also continued our focus on safety excellence across our operations, delivering a more than 35% year-over-year reduction in tier 1 and 2 process safety incidents. Our people remain our top priority in everything we do, with our leadership team prioritizing the engagement and development of our more than 44,000 employees. Looking ahead to 2025, our priority focus areas include:

- Continuing to focus on execution and cost management to drive savings to the bottom line while ensuring that we're managing our assets and overall network as effectively as possible.
- Identifying strategic simplification opportunities across the portfolio to maximize efficiency and focus across our business.
- Continuing our progress in strengthening our internal controls to further enhance the accuracy, integrity and transparency in our reporting processes.
- Focusing on organic investment in proven winners across our global portfolio, focused on segments where we can maximize growth and differentiation.
- Maintaining a disciplined approach to capital allocation to deliver return of cash to shareholders through dividends and selective share repurchases.

Thank you for your continued support of ADM. We look forward to building on our 120-plus years of history to deliver a solid year in 2025. Sincerely yours, Juan R. Luciano Board Chair, CEO and President

* 2024 total segment operating profit and adjusted earnings per share are non-GAAP financial measures that exclude certain items from the comparable GAAP measure. For a reconciliation of these non-GAAP items to GAAP, please refer to Annex A to this proxy statement.

A Letter from the Lead Director Terrell K. Crews

L E A D D I R E C T O R Dear Fellow Shareholders, As we turn from 2024 to 2025, I'd like to thank you, on behalf of ADM's Board, for your continued trust in our company. We know that trust must be earned, particularly following a year that posed both internal and external challenges, and the full Board is committed to doing so. ADM has a strong legacy of value creation and innovation which deliver a better future for millions of lives every day. We remain committed to unlocking the power of nature and the possibilities that solutions from nature provide to many industries, and we continue to focus our oversight on ensuring ADM is positioned to create sustainable value for our stockholders and other critical stakeholders. Throughout last year the Board worked closely with the management team to ensure integrity of ADM's internal controls and financial reporting. We are confident in ADM's strengthened and refreshed corporate finance team to ensure our growth strategy is underpinned by our strong financial governance foundation, grounded in transparency and accountability. In November 2024, we welcomed AT&T SVP and General Counsel David McAtee as our new independent director. David brings extensive expertise in strategic planning, governance, risk management, data security and shareholder engagement. He has already provided significant contributions to the Board's oversight of ADM's growth strategy and compliance initiatives, and we look forward to his continued contributions. As a part of the Board's priority to maintain leading corporate governance practices, we continued a practice of ongoing director refreshment, evidenced by the five new independent directors appointed to the Board since 2019. In line with best-in-class governance practices, we offered engagement opportunities in 2024 to stockholders that cumulatively represent more than 50% of outstanding shares to provide updates on our key initiatives and better understand their stewardship priorities. We value our ongoing conversations with investors, as their perspectives and feedback continue to inform the Board's priorities. The full Board is confident in the current leadership team's execution of our growth strategy and on behalf of ADM, we thank you for your continued confidence in the business. Sincerely yours, Terrell K. Crews Lead Director

ARCHER-DANIELS-MIDLAND COMPANY 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601

Notice of Annual Meeting To All Stockholders: NOTICE IS HEREBY GIVEN that the Annual Meeting of Stockholders of Archer-Daniels-Midland Company, a Delaware corporation, will be held on Thursday, May 8, 2025, commencing at 8:00 A.M. Central Time. The annual meeting will be a completely virtual

meeting of stockholders. You may attend the online meeting, submit questions, and vote your shares electronically during the meeting via the internet by visiting www.virtualshareholdermeeting.com/ADM2025. To enter the annual meeting, you will need the 16-digit control number that is printed on your Notice of Internet Availability of Proxy Materials. We recommend that you log in at least 15 minutes before the meeting to ensure that you are logged in when the meeting starts. Online check-in will start shortly before the meeting on May 8, 2025. Date and Time Location Record Date Thursday, May 8, 2025 8:00 A.M. CT Virtual Meeting www.virtualshareholdermeeting.com/ADM2025 Friday, March 14, 2025 Items to Be Voted On At the annual meeting, you will be asked to consider and vote on the following matters: ITEM PAGE

REFERENCE VOTING RECOMMENDATION 1. To elect directors to hold office until the next Annual Meeting of Stockholders and until their successors are duly elected and qualified; 8 FOR 2. To consider an advisory vote on the compensation of our named executive officers; 38 FOR 3. To ratify the appointment of Ernst & Young LLP as independent auditors for the fiscal year ending December 31, 2025; 86 FOR 4. To consider and act upon a stockholder proposal to remove the one-year holding period requirement to call a special stockholder meeting; and 90 AGAINST 5. To transact such other business as may properly come before the meeting. How to Vote Internet Call Mail Virtual Meeting Vote using your smartphone or computer Call the toll-free number listed on your proxy card Complete, sign and return your proxy card Vote online during the meeting By Order of the Board of Directors REGINA B. JONES, CORPORATE SECRETARY March 25, 2025 IMPORTANT NOTICE REGARDING THE AVAILABILITY OF PROXY MATERIALS FOR THE STOCKHOLDER MEETING TO BE HELD ON MAY 8, 2025: THE 2025 PROXY STATEMENT AND 2024 ANNUAL REPORT ON FORM 10-K ARE AVAILABLE AT www.proxyvote.com We encourage our stockholders to enroll in voluntary e-delivery for future proxy materials. Electronic delivery is convenient and provides immediate access to these materials. This will help us save printing and mailing expenses and reduce our impact on the environment. Our Company Overview ADM unlocks the power of nature to enrich the quality of life ADM is an essential global agricultural supply chain manager and processor, a premier human and animal nutrition provider, a trailblazer in groundbreaking solutions to support healthier living, an industry-leading innovator in bio-based consumer and industrial solutions, and a leader in business-driven sustainability efforts that support a strong agricultural sector, resilient supply chains, and a vast and growing bioeconomy. ADM powers industries ranging from sports drinks to biofuels, home care to home insulation, probiotics to pet treats. We partner with growers in the world's most productive agricultural regions to purchase crops, utilize our unparalleled transportation and logistics network to move those crops from areas of supply to areas of demand, and wield cutting edge technologies to transform them into an unmatched array of innovative food, feed, fuel and consumer and industrial products for customers around the globe. Three Reportable Segments Ag Services and Oilseeds Carbohydrate Solutions Nutrition This Proxy Highlights section is a summary of certain key disclosures in this proxy statement. This is only a summary, and it may not contain all of the information that is important to you. For more complete information, please review this proxy statement in its entirety as well as our 2024 Annual Report on Form 10-K. As used in this proxy statement, "ADM" or the "Company" refers to Archer-Daniels-Midland Company. The information contained on adm.com or any other website referred to in this proxy statement is provided for reference only and is not incorporated by reference into this proxy statement. Our corporate headquarters and principal executive office address is 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601. This proxy statement and accompanying materials were first provided to stockholders on or about March 25, 2025. Forward-Looking Statements This proxy statement contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that involve substantial risks and uncertainties. All statements, other than statements of historical fact included in this proxy statement, are forward-looking statements. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "outlook," "will," "should," "can have," "likely," and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or

financial performance or other events. For example, all statements the Company makes relating to its future results and operations, growth opportunities, pending litigation and investigations, and timing of the remediation of the Company's material weakness in the Company's internal control over financial reporting are forward-looking statements. All forward-looking statements are subject to significant risks, uncertainties, and changes in circumstances that could cause actual results and outcomes to differ materially from the forward-looking statements. These forward-looking statements are not guarantees of future performance and involve risks, assumptions, and uncertainties, including, without limitation, those that are described in Item 1A, "Risk Factors" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, as may be updated in subsequent Quarterly Reports on Form 10-Q. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated or anticipated by such forward-looking statements. Accordingly, you are cautioned not to place undue reliance on these forward-looking statements. Except to the extent required by law, Archer-Daniels-Midland Company does not undertake, and expressly disclaims, any duty or obligation to update publicly any forward-looking statement whether as a result of new information, future events, changes in assumptions, or otherwise.

2 | ADM Proxy Statement 2025 PROXY HIGHLIGHTS — Executive Compensation Highlights Executive Compensation Highlights COMPENSATION OBJECTIVES Reinforce Performance Emphasize the Long-Term Focus on Results Remain Market Competitive Maintain Internal Equity Link short- and long-term compensation with individual and Company performance Structure executive compensation to include a significant percentage of long-term equity awards Reward executives for long-term stockholder value creation, excellence in leadership, and implementing our business strategy Provide compensation that is consistent with the scope of responsibilities of the role with other comparable organizations to attract and retain high quality executive talent Structure compensation and benefit programs with consistent features for employees and executives across the organization PREDOMINANTLY AT-RISK TARGET COMPENSATION MIX CEO PAY MIX Performance-Based Pay Long-Term Incentive 47.9% 13.5% 31.9% 6.7% Performance-Based Pay 61.4% Base PSUs Annual Incentive Bonus Time-Vested RSUs AVERAGE OTHER NAMED EXECUTIVE OFFICERS PAY MIX 38.5% 17.5% 25.7% 18.3% Long-Term Incentive Performance-Based Pay Base PSUs Annual Incentive Bonus Time-Vested RSUs Performance-Based Pay 56.0% FY 2024 COMPENSATION

HIGHLIGHTS • Earned incentives reflected Company performance — The Company performance component of the annual incentive for 2024 was 30.4% out of 75% target. • LTI based on long-term results — Performance share units (“PSUs”) for 2022 – 2024 were 112% of target. • Exercise of Negative Discretion — Although no named executive officer (“NEO”) of the Company has been found to have engaged in improper conduct, to ensure accountability and clarity of our priorities, the Board determined that it was appropriate for the Compensation and Succession Committee to exercise negative discretion to reduce the payout percentage under the Company performance component of the 2024 annual cash incentive program and the shares earned for the 2022 PSUs for select participants. This negative discretion was applied to certain NEOs who were in relevant leadership positions during the applicable period. Annual Incentive Payouts 35%—65% _____ Long-Term Incentive Payouts 56%—112% The above reflect payouts to our current employees who are NEOs ADM Proxy Statement 2025 | 3 PROXY HIGHLIGHTS — Corporate Governance Highlights

Corporate Governance Highlights The Board of Directors plays a critical role as a long-term steward of ADM. The Board is committed to enhancing the success and value of our Company for its stockholders, as well as for other stakeholders such as employees, business partners, and communities. The Board recognizes the importance of good corporate governance and understands that transparent disclosure of its governance practices helps stockholders assess the quality of our Company and its management and the value of their investment decisions. ADM’s corporate governance practices are intended to ensure independence, transparency, management accountability, effective decision making, and appropriate monitoring of compliance and performance. We believe that these strong corporate governance practices, together with our enduring corporate values and ethics, are critical to providing lasting value to the stockholders of our Company.

Board Compensation Independent Board Leadership We have an independent Lead Director who is selected by the independent directors. The Lead Director has broad authority as described on page 24. **Independent Directors** 11 of 12 of our director nominees (all except CEO) are independent, and only independent directors serve on the Audit, Compensation and Succession, Nominating and Corporate Governance, and Sustainability and Technology Committees. **Regular Executive Sessions** Our independent directors meet in executive session at each regular board meeting. **Age and Public Board Limits** Individuals cannot stand for election as a director once they reach age 75. Our Corporate Governance Guidelines limit our directors to serving on no more than four public company boards, or three if a director is a sitting CEO. **Governance Practices Annual Board Evaluations** The Board and each standing committee annually conduct evaluations of their performance. Directors annually evaluate the performance of their Board peers. Outcomes of the evaluations enhance the Board oversight process and are considered as part of the director nomination process. **Oversight of Key Issues** Our Board committees provide Board-level oversight of a wide range of critical issues, including corporate strategy, financial reporting, sustainability strategy and risks, health and safety, talent strategy, executive succession planning, cybersecurity, and political activities. **Stockholder Engagement Program** Independent directors lead bi-annual stockholder engagement outreach to provide updates on our key initiatives and better understand stockholders’ stewardship priorities. For more details, see page 35. **Alignment with Stockholders Majority Vote Standard for Director Election** We use a majority vote standard for uncontested director elections, with a plurality carve-out for contested elections. **Proxy Access Rights** Our bylaws include a proxy access provision under which a stockholder or group of up to 20 stockholders that has owned at least 3% of our common stock for at least 3 years may submit nominees for up to 20% of the board seats for inclusion in our proxy statement. **Special Meeting Rights** Holders of 10% or more of our common

stock have the ability to call a special meeting of stockholders. Stock Ownership Guidelines Robust stock ownership requirements are in place for directors (5x maximum annual cash retainer) and executive officers (10x base salary for the CEO and 4x base salary for other NEOs). No Hedging or Pledging We have policies prohibiting directors and officers from trading in derivative securities of our Company and from pledging any Company stock. Board of Directors Highlights Our Board is comprised of directors with a broad diversity of perspectives who have a variety of skills and experience for effective oversight of the Company's strategy. The following tables provide information about our director nominees' personal characteristics, including gender, age, and tenure, as well as the key skills each brings to the Board. More detailed information is provided in each director nominee's biography beginning on page 10. ADM's

Board of Directors actively oversees the Company's sustainability strategy through a Board-level Sustainability and Technology Committee that receives quarterly updates from our management team on all priority sustainability topics. Our Corporate Sustainability Report contains specific data and disclosures and is available on our website at <http://www.adm.com/sustainability-report>. Data for 2024 is expected to be provided in an updated Corporate Sustainability Report after the date of this proxy statement.

OUR PRIORITIES SELECT HIGHLIGHTS FEED THE WORLD

- Food Quality and Safety • Increased the number of Global Food Safety Initiative (GFSI) certified sites
- Food Security • Maintain Food Safety and Quality Program built around three pillars: achieving best in class food safety, maintaining a culture of quality, and leveraging innovation and technology
- Food Access • Renewed partnership with the Food Fortification Initiative to combat hidden hunger for one billion people globally
- PROTECT NATURE Climate Impact • As part of our Strive 35 strategy, reduced our combined Scope 1 + 2 GHG emissions over our 2019 baseline
- Energy Usage • Reduced energy intensity over our 2019 baseline
- Implemented several capital projects and operations improvements that, combined, are expected to yield over 600,000 MWh in energy savings
- Biodiversity / Habitat • Conducted a deforestation risk assessment for globally purchased commodities to support our efforts to achieve a deforestation-free supply chain by end of 2025
- Continued to make progress to meet our commitment to be 100% conversion-free in defined high-risk areas: direct sourcing by 2025 and indirect sourcing by 2027
- Regenerative Agriculture • Expanded regenerative agriculture program, increasing acreage and downstream partnerships
- Water Usage • Reduced absolute water withdrawal for 2024 over our 2019 baseline
- Completed two large scale projects that, combined, are expected to yield approximately 1,000,000 m3 in water savings
- ENRICH LIVES Employee Safety • Continued to advance our safety record with more than 35% year-over-year reduction in Tier 1 and 2 process safety incidents across our global network
- Human Rights • Hosted 32 third-party responsible sourcing audits across nine countries and expanded the program to our supply chain, monitoring the performance of over 900 suppliers
- Communities • ADM Cares, our social investment program, contributed \$15.6M in 2024 to projects and organizations driving meaningful progress on our business impact initiatives

ADM Proxy Statement 2025 | 7 PROPOSAL NO. 1 Proposal No. 1 — Election of Directors for a One-Year Term

The Board of Directors currently consists of twelve members. The Board, acting on the recommendation of the Nominating and Corporate Governance Committee, has nominated each of the current directors for re-election at the annual meeting. One of our current directors, David R. McAtee II, is standing for election to serve as a director of the Company for the first time at this year's annual meeting. Mr. McAtee was identified as a director candidate through a recommendation from Korn Ferry, a talent search and consulting firm. After an evaluation and recommendation by the Nominating and Corporate Governance Committee, the Board elected Mr. McAtee to the Board in November 2024. Please note:

- Proxies cannot be voted for a greater number of persons than twelve, which is the number of nominees.
- Unless you provide different directions, we intend for Board-solicited proxies (like this one) to be voted for the nominees named below.
- If any nominee for director becomes unable to serve as a director, the persons named as proxies may vote for a substitute who will be designated by the Board. Alternatively, the Board could reduce the size of the

Board. • This year's election was determined to be an uncontested election, and the majority vote standard will apply. For more details on the voting standard, see below under "Commonly Asked Questions and Answers about the Annual Meeting." • If elected, the nominees would hold office until the next annual stockholders' meeting and until their successors are elected and qualified. If a nominee who is serving as a director is not elected at the annual meeting, Delaware law provides that the director would continue to serve on the Board as a "holdover director." However, under our Corporate Governance Guidelines, each director annually submits an advance, contingent, irrevocable resignation that the Board may accept if the director fails to be elected through a majority vote in an uncontested election. In that situation, the Nominating and Corporate Governance Committee would make a recommendation to the Board about whether to accept or reject the resignation. The Board will act on the Nominating and Corporate Governance Committee's recommendation and publicly disclose its decision and the rationale behind it within 90 days after the date that the election results are certified. The Board will nominate for election or re-election as director, and will elect as directors to fill vacancies and new directorships, only candidates who agree to tender the form of resignation described above. If a nominee who was not already serving as a director fails to receive a majority of votes cast at the annual meeting, Delaware law provides that the nominee does not serve on the Board as a "holdover director." The information below describes, as applicable, the nominees, their ages, positions with our Company, principal occupations, current directorships of other publicly owned companies, directorships of other publicly owned companies held within the past five years, the year in which each first was elected as a director, and the number of shares of common stock beneficially owned as of March 21, 2025, directly or indirectly. Unless otherwise indicated, and subject to community property laws where applicable, we believe that each nominee named in the table below has sole voting and investment power with respect to the shares indicated as beneficially owned. The Board has no reason to believe that any nominee will be unable to serve as a director. The Board of Directors recommends a vote FOR the election of the twelve nominees named below as directors. Proxies solicited by the Board will be so voted unless stockholders specify a different choice.

8 | ADM Proxy Statement 2025 PROPOSAL NO. 1 — Director Nominee Qualifications, Skills, and Experience

Director Nominee Qualifications, Skills, and Experience The following chart provides summary information about each of our director nominees' qualifications, skills, and experience. More detailed information is provided in each director nominee's biography beginning on the next page.

Director	Qualifications, Skills, and Experience

Š Š Š Four of our director nominees (Messrs. Crews, Moore, and Westbrook and Ms. Harrison) have earned recognition as part of the NACD Directorship 100™ from the National Association of Corporate Directors (NACD), a leading independent not-for-profit organization dedicated to enhancing corporate governance to drive economic opportunity and positive change in business and the communities they serve. The annual NACD Directorship 100™ celebrates and recognizes the most influential directors and leaders in the corporate governance community who have demonstrated excellence in the boardroom through innovation, courage, and integrity. ADM Proxy Statement 2025 | 9 PROPOSAL NO. 1 — Election of Directors for a One-Year Term Director Nominees Michael S. Burke Age: 61 Director since: 2018 Board Committees: Audit (Chair); Nominating and Corporate Governance Common stock owned: 17,940 (1) Percent of class: * Qualifications, Skills, and Experience CEO Leadership Finance / Accounting International Business M&A; Risk Management Sustainability / Environmental / Social Project Management Mr. Burke brings deep expertise in driving the evolution of global businesses, strategic planning, international market dynamics, and overseeing risk management from his tenure as Chair and CEO of AECOM, a Fortune 500 company that designs, builds, finances and operates infrastructure assets in more than 150 countries. He also contributes his significant experience leading companies through transformation, developed through his roles at AECOM, where he played a key role in preparing the company for its IPO in 2007, and spearheaded international business development and M&A; strategy. At AECOM, Mr. Burke also transformed one of the firm's subsidiaries into a leading environmental engineering firm, developing significant sustainability expertise, which he has further developed through serving on the boards of CarbonCure and Nexii Building Solutions, companies focused on reducing harmful emissions in the construction process. He also brings expertise in finance, accounting, and tax matters drawing on his experience as a Chief Financial Officer and his 15-year career at KPMG advising public companies. Public Boards • PRIOR (within past 5 years): AECOM (Chairman) Non-Public & Non-Profit Boards; Memberships • CURRENT: Universal Engineering Sciences (Chair); Stratus (Chair); SitelogIQ (board member); CarbonCure (board member); American Institute of Certified Public Accountants (member); California Bar Association (member); Eldridge ACRE Partners (Chairman) • PRIOR: Business Roundtable (board member; Chair, Infrastructure Committee); Children's Bureau (Vice Chair); World Economic Forum (Co-Chair, Steering Committee, Infrastructure and Urban Development); Nexii Building Solutions (board member) Career Highlights • AECOM (a global infrastructure firm) - Chairman and Chief Executive Officer (2015-2020) - Chief Executive Officer (2014-2015) - President (2011-2014) - Other leadership roles (2005-2011), including Chief Financial Officer (2006-2011) • KPMG LLP - Member of Board of Directors (2000-2005) - Partner (1995-2005) - Various roles (1990-1995) 10 | ADM Proxy Statement 2025 PROPOSAL NO. 1 — Election of Directors for a One-Year Term Theodore Colbert Age: 51 Director since: 2021 Board Committees: Compensation and Succession; Sustainability and Technology Common stock owned: 12,515 (2) Percent of class: * Qualifications, Skills, and Experience International Business M&A; Risk Management Sales / Marketing Project Management Information Technology / Cybersecurity Mr. Colbert brings extensive corporate leadership experience to the Board, along with his deep expertise in information technology,

cybersecurity, data and analytics, and automation, which he acquired over his nearly three-decade career overseeing information technology, data security and architecture at several global market-leading companies. His most recent positions at Boeing further developed his sales and marketing capabilities, M&A; experience, government regulation experience, and expertise in international business dynamics, including while serving in his role as President and CEO of its Global Services business that provided services to global customers across all OEMs and in his role as President and CEO of its Defense, Space & Security business that provided solutions across defense, government, space, intelligence, and security to customers worldwide. Leading global businesses focused on serving security and national defense companies distinguishes Mr. Colbert as an expert in world-class information security systems and risk management. This expertise has been honored with numerous prestigious awards throughout his career, including most recently the 2022 Black Engineer of the Year Award and the 2022 ORBIE Award for Leadership, being named the 2021 Capital CIO of the Year and one of the Most Influential Black Executives in Corporate America by Savoy magazine in 2020 and 2021, as well as being the first recipient of the Fisher Center prize for Excellence in Driving Transformation from the Fisher Center For Business Analytics at Berkeley.

ADM Proxy Statement 2025 | 11 PROPOSAL NO. 1 — Election of Directors for a One-Year Term James C. Collins, Jr. Age: 62 Director since: 2022 Board Committees: Audit; Compensation and Succession Common stock owned: 7,398 (1) Percent of class: *

Qualifications, Skills, and Experience CEO Leadership International Business Agriculture / Food / Retail Consumer M&A; Sustainability / Environmental / Social Sales / Marketing Project Management Food Science / R&D; Mr. Collins contributes to the Board deep expertise in global agriculture and food science innovation developed over his extensive executive leadership experience in the food and agriculture industry. During his tenure leading agriculture business lines at DuPont and Dow DuPont, and most recently as the CEO of Corteva – the public spin-off of Dow DuPont's crop protection and agrisciences divisions with a global scale – he oversaw the launch of numerous new products and drove strong growth in their R&D; and innovation pipelines. His experience leading the integration of legacy DuPont and Dow agricultural businesses to drive preparation for Corteva's spin also enhances the Board's M&A; and corporate governance expertise. He also brings extensive sales and marketing experience, beginning as a sales representative early in his career and later taking on leadership roles with responsibility for implementing multi-channel, multi-brand growth strategies. Through his work in agriculture supply chains, Mr. Collins has also developed a keen understanding of how to support and partner with global farmers to improve the sustainability of the agriculture and nutrition value chains. During his time at Corteva, he led a comprehensive array of initiatives to enhance sustainability, with a

strong focus on helping farmers lead with new practices and innovations. He currently serves on the boards of Vestaron Corporation and Pivot Bio, private companies dedicated to improving the safety, efficacy and sustainability of crop protection through migration from synthetic pesticides to peptide-based biopesticides. Public Boards • PRIOR (within past 5 years): Corteva, Inc.; Cibus, Inc. Non-Public & Non-Profit Boards; Memberships • CURRENT: Vestaron Corporation (board member); Pivot Bio (board member); University of Delaware College of Agriculture and Natural Resources (Advisory Committee member) • PRIOR: CropLife International (board member); University of Delaware's Alfred Lerner College of Business & Economics (advisory board member); US China Business Council (member); Business Roundtable (Special Committee on Equity and Racial Justice; Climate Policy Committee; Trade Committee); National 4-H Council (board member); Hagley Museum and Library (board of trustees member); University of Tennessee Loan Oaks Farm (advisory council member); Longwood Botanical Gardens (board of trustees member) Career Highlights • Corteva, Inc. (a global agricultural and seed company) - Chief Executive Officer (2019-2021) • DowDuPont - Chief Operating Officer (2017-2019) • DuPont - Executive Vice President (2014-2017) - Senior Vice President (2013-2014) - President Industrial Biosciences (2011-2013) - VP Acquisitions and Integration – Danisco (2011) - President Crop Protection (2003-2010) 12 | ADM Proxy Statement 2025 PROPOSAL NO. 1 — Election of Directors for a One-Year Term Terrell K. Crews Lead Director Age: 69 Director since: 2011 Common stock owned: 59,783 (3) Percent of class: * Qualifications, Skills, and Experience Finance / Accounting International Business Agriculture / Food / Retail Consumer M&A; Risk Management Sustainability / Environmental / Social Mr. Crews, who has served as our independent Lead Director since May 2023, contributes to the Board deep expertise in the international agricultural industry, business transformation, and agri-business operations gained over his 32-year career at Monsanto, a global agrochemical and agricultural biotechnology company. Serving in his role as Chief Financial Officer at Monsanto for nearly a decade, Mr. Crews oversaw corporate finance and reporting in addition to capital allocation strategies. His other roles with the company included helming the global vegetable business, assignments in Latin America, and leading financial operations for its Asia-Pacific business, which gave him significant expertise in risk management and strategic planning. Mr. Crews also has experience leading financing for M&A; activity and other corporate transactions, including overseeing the financial integration of 11 acquired seed companies as head of finance for Monsanto's Global Seed Group. His long tenure in agricultural industry executive leadership led him to develop a keen understanding of evolving views of broad stakeholder groups on sustainability and contributed to his experience developing capital allocation strategies aligned with corporate sustainability priorities. Recognized by the NACD Directorship 100™ for his leadership, excellence, and integrity in corporate governance, Mr. Crews is well-qualified to serve in the role of Lead Director. Additionally, having served on the Board since 2011, his tenure enables him to have a deep understanding of the Company's strategy, business, products, and goals, allowing him to more effectively provide independent strategic leadership to the Company. International Business Agriculture / Food / Retail Consumer M&A; Risk Management Sustainability / Environmental / Social Project Management Food Science / R&D; Information Technology / Cybersecurity Dr. de Brabander brings to the Board a broad scientific background and a strong track record of innovation in several consumer industries including human nutrition, life sciences and animal health. In her current role as Executive Vice President of Innovation and Regulatory Affairs at Elanco, Dr. de Brabander utilizes her R&D; expertise driving early and late-stage pipeline execution across pet health and farm animals, including nutritional health solutions. This deep research and innovation expertise was fostered in her previous role as senior vice president for R&D; at PepsiCo, with company-wide responsibility for food safety, quality, regulatory and digital transformation. She also led R&D; operations for global businesses, including Merial (now Boehringer Ingelheim), Intervet (now Merck Animal Health) and DSM, and brings extensive experience with information technology, having served as the Chief Technology Officer for Merial. In addition to her corporate success, she has been a founding board member of EIT (European Institute of Technology) and founding CEO of EIT Food, the largest public-private partnership in the food sector. Dr. de Brabander earned her Ph.D. cum laude in bio-organic chemistry from Leiden University in the Netherlands and completed her post-doctoral work in molecular biology at the Massachusetts Institute of Technology (MIT) in the group of Prof. Dr. H.G. Khorana, a Nobel laureate. She is the co-author of over 60 publications in scientific journals, holds 18 patents, and has received multiple awards for her research.

Does not include 260,093 unvested RSUs which do not vest within 60 days. (5) Smurfit-Stone Container Corporation and its U.S. and Canadian subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the U.S. Bankruptcy Code in January 2009 and emerged in 2010. ADM Proxy Statement 2025 | 21 PROPOSAL NO. 1 — Election of Directors for a One-Year Term Board Refreshment and Director Nomination Process The Nominating and Corporate Governance Committee is responsible for annually reviewing Board and committee composition for effectiveness in supporting robust oversight. The Committee strives to maintain an appropriate balance of tenure and diversity of skills and experience on the Board. Review Board Composition Director Qualifications and Priorities The Nominating and Corporate Governance Committee annually evaluates the Board's composition, reviewing its structure and diversity of skills and experiences to ensure ongoing support of the Company's strategic business priorities and growth opportunities. Qualifications The Nominating and Corporate Governance Committee may consider various factors when evaluating the qualifications of potential directors, including: • Experience • Independence • Education • Integrity • Other professional commitments ADM maintains director commitment guidelines to ensure each can dedicate sufficient time, energy, and attention to their duties. A director who is a sitting CEO may serve on the boards of no more than two other public companies in addition to the board of the company of which they are the CEO, while all other directors may serve on no more than four public company boards in total. Priorities The Board benefits from ensuring that the diverse skills, experiences, and perspectives of its members align with the Company's strategic growth opportunities. The Committee evaluates the skills and experiences of the current Board and candidates when considering potential nominees, seeking candidates that complement existing Board expertise to support the needs of the Company as our business evolves over time. Identify Candidates The Nominating and Corporate Governance

Committee undertakes a search for potential director candidates. This process may include recommendations from stockholders, current directors, members of management, and independent third-party search firms. Interview Candidates Prospective candidates are interviewed by members of the Nominating and Corporate Governance Committee, the Lead Independent Director, the Board Chair and CEO, and candidates may speak with other directors and members of management throughout the process. Nomination and Election Once a final candidate has been selected, the Nominating and Corporate Governance Committee recommends the candidate to the Board for approval and appointment, to be voted on by stockholders at the next annual meeting. Outcomes Our Board refreshment process has resulted in four new independent directors nominated since 2021, with strong expertise in innovation and sustainability in the global food, agriculture and nutrition industries and in technology, cybersecurity, risk management, legal matters, government regulation, and engagement with key stakeholders, helping ensure effective oversight of our strategy. 22 | ADM Proxy Statement 2025 PROPOSAL NO. 1 — Election of Directors for a One-Year Term As noted above, pursuant to our Corporate Governance Guidelines, each director is limited as to the number of other boards on which he or she may serve. In nominating directors for election at our annual stockholder meeting, the Board and the Nominating and Corporate Governance Committee have determined that each of our directors is currently compliant with our Corporate Governance Guidelines and has sufficient time, energy, and attention to serve on our Board. The specific experience, qualifications, attributes, and skills that qualify each of our director nominees to serve on the Board are described in the biographies above and in Proposal No. 1 under “Director Nominee Qualifications, Skills, and Experience” on page 8. Director Nominations from Stockholders The Nominating and Corporate Governance Committee will consider candidates for director who are recommended by a stockholder. All candidates, regardless of the source of their recommendation, are evaluated using the same criteria. If a stockholder desires to nominate an individual to stand for election as a director at an annual stockholders’ meeting, the stockholder must submit the nominee’s name in a written notice delivered to our Corporate Secretary at our principal executive offices not less than 90 nor more than 120 days prior to the anniversary date of the immediately preceding annual stockholders’ meeting. However, if the annual meeting is called for a date that is not within 30 days before or after such anniversary date, the notice must be delivered to the Corporate Secretary at our principal executive offices not later than the close of business on the tenth day following the day on which notice of the date of the annual meeting was given or public disclosure of the date of the annual meeting was made (whichever first occurs). Different notice delivery requirements apply if the number of directors to be elected at an annual meeting is being increased, and we do not make a public announcement naming all of the nominees or specifying the size of the increased board at least 100 days prior to the first anniversary of the preceding year’s annual meeting. Any notice of a stockholder nomination must set forth the information required by Section 1.4(c) of our bylaws and must be accompanied by a written consent from the proposed nominee to being named as a nominee and to serve as a director if elected, a written representation and agreement from the proposed nominee attesting to certain facts set forth in Section 1.4(c)(2) of our bylaws, and a written statement from the proposed nominee as to whether such person intends, if elected, to tender the advance, contingent, irrevocable resignation that would become effective should the individual fail to receive the required vote for re-election at the next meeting of stockholders and upon acceptance of such resignation by the Board. Stockholders may also have the opportunity to include nominees in our proxy statement by complying with the requirements set forth in Section 1.15 of our bylaws. ADM Proxy Statement 2025 | 23 Corporate Governance Board Leadership Structure BOARD CHAIR Our Company’s Board of Directors does not

have a current requirement that the roles of Chief Executive Officer and Board Chair be either combined or separated, because the Board believes it is in the best interest of our Company to make this determination based on the position and direction of the Company and the constitution of the Board and management team. The Board regularly evaluates whether the roles of Chief Executive Officer and Board Chair should be combined or separated. The Board's implementation of a careful and seamless succession plan over the past years demonstrates that the Board takes seriously its responsibilities under the Corporate Governance Guidelines to determine who should serve as Board Chair at any point in time in light of the specific circumstances facing our Company. After careful consideration, the Board has determined that having Mr. Luciano, our Company's Chief Executive Officer, continue to serve as Board Chair is in the best interest of our stockholders at this time. The Chief Executive Officer is responsible for the day-to-day management of our Company and the development and implementation of our Company's strategy, and has access to the people, information, and resources necessary to facilitate board function. Therefore, the Board believes at this time that combining the roles of Chief Executive Officer and Board Chair contributes to an efficient and effective board.

LEAD DIRECTOR AND INDEPENDENT OVERSIGHT Each year, if the Board Chair is not independent, the independent directors elect a Lead Director. Mr. Crews has served as Lead Director since May 2023 and provides strong independent leadership and oversight. The Board believes that having an independent Lead Director provides the Board with independent leadership and facilitates the independence of the Board from management. The Nominating and Corporate Governance Committee regularly evaluates the responsibilities of the Lead Director and considers current trends regarding independent board leadership. In prior years, the Board has enhanced the Lead Director's responsibilities, as set forth in the Corporate Governance Guidelines, in connection with determining performance criteria for evaluating the Chief Executive Officer; evaluating the Board, committees, and individual directors; and planning for management succession. In accordance with our Corporate Governance Guidelines, the Lead Director: (1) presides at all meetings of the Board at which the Board Chair is not present, including executive sessions of the independent directors, and regularly meets with the Board Chair and Chief Executive Officer for discussion of appropriate matters arising from these sessions; (2) advises the board committees on the selection of committee chairs; (3) coordinates the activities of the other independent directors and serves as liaison between the Board Chair and the independent directors; (4) works with the Board Chair and Chief Executive Officer to propose a schedule of major discussion items for the Board; (5) consults with the Board Chair and approves all meeting agendas, schedules, and information provided to the Board, and may, from time to time, invite corporate officers, other employees, and advisors to attend Board or committee meetings whenever deemed appropriate; (6) guides the Board's governance processes; (7) interviews, along with the Board Chair and the Chair and members of the Nominating and Corporate Governance Committee, all director candidates and makes recommendations to the Nominating and Corporate Governance Committee; (8) provides leadership to the Board if circumstances arise in which the role of the Board Chair or Chief Executive Officer may be, or may be perceived to be, in conflict; (9) advises the Nominating and Corporate Governance Committee on the selection of members of the board committees; (10) has the authority to call, and set the agendas for, meetings of the independent directors; (11) if requested by major stockholders, ensures that the Lead Director is available for consultation and direct communication; (12) works with the Chair of the Nominating and Corporate Governance Committee to facilitate the evaluation of the performance of the Board, committees, and individual directors; (13) leads the non-management directors in determining performance criteria for evaluating

the Chief Executive Officer and coordinates the annual performance review of the Chief Executive Officer; (15) works with the Chair of the Sustainability and Technology Committee to set sustainability, safety and technology objectives; and (13) works with the Chair of the Compensation and Succession Committee to guide the Board's discussion of management succession plans; (16) performs such other duties and responsibilities as the Board may determine. In addition to electing a Lead Director, our independent directors facilitate the Board's independence by meeting frequently as a group, including meeting in executive session at each regular board meeting, and fostering a climate of transparent communication. The high level of contact and communication between our Lead Director and our Board Chair throughout the year and the specificity contained in the Lead Director's responsibilities also serve to foster effective Board leadership. For more details on our independent directors, see below under "Independence of Directors" on page 30.

ADM Proxy Statement 2025 | 25 CORPORATE GOVERNANCE — Board Role in Risk Oversight

Board Role in Risk Oversight Our Board of Directors is responsible for risk oversight, focusing on our Company's overall risk management strategy, our Company's degree of tolerance for risk, and the steps the management team is taking on a day-to-day basis to assess and mitigate our Company's risks. While the Board as a whole maintains the ultimate oversight responsibility for risk management, Board committees can be assigned oversight responsibility for specific risk management areas. Management has established an Enterprise Risk Management Committee that consists of a Chief Risk Officer and other management team members that represent multiple functional and regional areas within our Company, with broad oversight of the risk management process.

BOARD OF DIRECTORS

- Audit Committee** Supports Board oversight of the Company's risk management, compliance and financial reporting processes
- Risk Oversight:**
 - ERM process
 - Integrity of the financial statements
 - Effectiveness of internal control over financial reporting
 - Qualifications and independence of independent public accounting firm
 - Compliance and ethics programs
 - Periodically report to Board regarding significant risk matters
 - Other key risk areas including trading, operations, workforce, and tax obligations
- Nominating and Corporate Governance Committee** Manages risks relating to governance processes and Board effectiveness
- Risk Oversight:**
 - Identify and recommend qualified director nominees
 - Establish and update Corporate Governance Guidelines
 - Lead the evaluations of directors, Board, and Board committees
 - Designation of committee risk oversight areas
 - Identify potential conflicts of interest with respect to directors
- Compensation and Succession Committee** Maintains oversight of risks concerning the Company's executive compensation programs and executive retention
- Risk Oversight:**
 - Compensation program design for senior management
 - Senior management succession planning, recruiting, retention, talent development, and career progression
 - Review Compensation Discussion & Analysis and prepare report
 - Set performance criteria for management, including the Chief Executive Officer
 - Every other year, independent consultant's review of compensation programs and potential risks
- Sustainability and Technology Committee** Focuses on specific sustainability, safety and technology-related risks
- Risk Oversight:**
 - Sustainability strategy, performance, and compliance
 - Workplace safety
 - Technology-related opportunities and risks
 - Data privacy, information security, and cybersecurity

SENIOR MANAGEMENT

- Enterprise Risk Management Committee** Responsible for implementing risk assessment and mitigation programs
- Responsibilities:**
 - Ongoing evaluation and implementation of processes to identify, evaluate, and prioritize risks
 - Alignment of risk decisions with our Company's values and policies
 - Integration of risk assessment and controls into business processes and planning
 - Clear roles and responsibilities related to risk assessment and control functions
 - Consistency and standardization in risk identification, reporting, and controls
 - Sufficient information capabilities and flow to support risk identification and controls and alignment of technology assets
 - Regular

evaluation of the overall design and operation of the risk assessment and control process, including development of relevant metrics and indicators • Regular reports to senior management and the Board on risk management processes and the most significant enterprise risks 26 | ADM Proxy Statement 2025 CORPORATE GOVERNANCE — Board Role in Risk Oversight CYBERSECURITY AND AI

The Board maintains dedicated oversight of cybersecurity risk, and is assisted by the Sustainability and Technology Committee, which reviews the cybersecurity program with management and reports to the full Board at least quarterly. Topics of committee and Board review include the evolving goals and strategies of the cybersecurity program, cybersecurity trainings, vulnerability monitoring, and incident response plans. In recent years, the Board added a director, Mr. Colbert, who had served as Chief Information Officer for a large public company with sensitive information, to assist the Board and the Sustainability and Technology Committee in overseeing cybersecurity risks. For additional details on cybersecurity risks and ADM's cybersecurity program, please see Item 1C, "Cybersecurity" included in the Company's 2024 Annual Report on Form 10-K. Given the breadth of AI applicability, oversight for AI resides with the Board, which regularly discusses the Company's AI strategy and risk management.

ETHICS AND COMPLIANCE ADM is committed to fair and ethical business practices, and strives to incorporate leading practices in integrity, ethics, and compliance into its operating standards. Our legal compliance and ethics programs have been established by management and are overseen by the Board with the support of the Audit Committee. Our program is supported by our Compliance and Legal functions, a robust Code of Conduct applicable to all officers and employees, an anonymous Helpline to raise potential concerns managed by an independent third party available to both internal and external stakeholders, and a suite of internal policies and programs designed to further compliance with applicable laws and regulations in the jurisdictions we operate in. For more details on our Code of Conduct, see below under "Code of Conduct" on page 29.

SUSTAINABILITY Sustainable practices and a focus on environmental and social responsibility are foundational to the Company's purpose and culture, and integral to the work the Company does every day to serve customers and create value for stockholders. Our sustainability efforts are overseen by our Board of Directors, including a dedicated Sustainability and Technology Committee, supported by our management sustainability team. The Sustainability and Technology Committee maintains detailed oversight of our sustainability strategies and initiatives, monitoring short, intermediate, and long-term objectives with regular management updates on key sustainability issues and progress. Sustainability risks are identified through several processes, including TCFD Scenario Analysis, and tracked and monitored in our ERM program.

ADM Proxy Statement 2025 | 27 CORPORATE GOVERNANCE — Board Role in Overseeing Political Activities Board Role in Overseeing Political Activities

The Board of Directors believes that participation in the political process is important to our business and our communities. ADM and our political action committee (ADMPAC), funded by our employees' voluntary contributions, support candidates in a bipartisan manner. These candidates and elected officials represent assets, areas with a large colleague presence, and/or have a role in advancing our policy priorities related to our business. Contributions are not an endorsement of every position taken by an official on every issue. Decisions by ADMPAC to support particular candidates and/or organizations are made consistent with the ADM PAC By-Laws and guided by our policies. ADMPAC submits to the Federal Election Commission (FEC) regular, detailed reports on all political contributions. Reports are publicly available on the FEC's website. Similarly, contributions to state candidates are disclosed to relevant state authorities and typically disclosed on individual states' websites. In addition to our contributions to individual candidates for public office and candidate committees, we also have supported a small number of 527 tax exempt organizations, including organizations affiliated with both major U.S.

political parties. We do not support independent political expenditures or 501(c)(4) organizations. Finally, we have memberships in several industry, trade, and business associations representing the agriculture and business community. If a trade association engages in federal lobbying activity, the amount of dues associated with such advocacy is reported in our quarterly LD2 filings. We engage in a centralized, deliberative process when making decisions about the Company's political participation to ensure that it complies with all applicable laws and makes appropriate disclosures. Contributions of greater than \$1,000 require the approval of the ADMPAC board of directors. It is chaired by the vice president of state government relations and composed of employees who represent various business and functional segments of the Company. Contributions of less than \$1,000 may be authorized by the Company's vice president of government relations and vice president of state government relations. All contributions receive legal review by external counsel. The Board provides oversight of ADMPAC's and the Company's political activities, political contributions, and compliance with relevant laws. At each quarterly board meeting, the Nominating and Corporate Governance Committee, on behalf of the Board, reviews and provides guidance on our political contributions in the previous quarter. Any member of the Board may obtain further detailed information concerning political contributions, trade associations, compliance with federal and state laws, or any other related topic from the Company's Government Relations team. For more information on ADM's political policies and activities, please see <https://www.adm.com/our-company/us-political-contributions>. 28 | ADM Proxy Statement 2025 CORPORATE GOVERNANCE — Code of Conduct

Code of Conduct In 2024, ADM completed a comprehensive review and update of its Code of Conduct, which has been adopted by the Board and sets forth standards regarding matters such as honest and ethical conduct, compliance with law, and full, fair, accurate, and timely disclosure in reports and documents that we file with the Securities and Exchange Commission ("SEC") and in other public communications. The Code of Conduct applies to all of our directors, employees, and officers, including our principal executive officer, principal financial officer, and principal accounting officer. The Code of Conduct is available at our website, <https://www.adm.com/our-company/the-adm-way/code-of-conduct>, and is available free of charge upon written request to ADM, Attention: Secretary, 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601. Any amendments to certain provisions of the Code of Conduct or waivers of such provisions granted to certain executive officers will be disclosed promptly on our website.

Insider Trading Policy We have adopted an insider trading policy that governs the purchase, sale, and other dispositions and transactions in our securities by our directors, officers, and employees, which is reasonably designed to promote compliance with insider trading laws, rules, and regulations, as well as NYSE listing standards, a copy of which was filed as an exhibit to our Annual Report on Form 10-K for the fiscal year ended December 31, 2024. Further, it is ADM's policy that any transactions by ADM in its own securities will comply with applicable laws with respect to insider trading. ADM Proxy Statement 2025 | 29 CORPORATE GOVERNANCE — Board, Committee, and Director Evaluations

The Board of Directors believes that a robust annual evaluation process is a critical part of its governance practices. Accordingly, the Nominating and Corporate Governance Committee oversees an annual evaluation of the performance of the Board, each committee of the Board, and each individual director. In 2024, the Nominating and Corporate Governance Committee engaged a leading third party provider of board and governance expertise to conduct an online assessment with each of the directors. The Board Chair, the Lead Director, and the Chair of the Nominating and Corporate Governance Committee reviewed the results of the self-assessments, including a benchmark against industry results, for recommendations of subsequent interview questions for each director on the performance of the Board, committees, and

individual directors. The third-party provider conducted an in-depth interview of each director and provided reports on each committee to the chair of the committee, and reports on individual directors to the Board Chair, the Lead Director, and the Chair of the Nominating and Corporate Governance Committee. The Lead Director then delivered to and discussed with each individual director the evaluation of such director. Results of the performance evaluations of the committees and the Board were discussed at appropriate committee meetings and with the full Board. The Board utilizes the results of these evaluations in making decisions on board agendas, board structure, committee responsibilities and agendas, and continued service of individual directors on the Board. Online assessment with results benchmarked against industry results Results reviewed by Board Chair, Lead Director, and Chair of the Nominating and Governance Committee for recommendations of interview questions In-depth interviews Results delivered to Board Chair, Lead Director, and Chair of the Nominating and Governance Committee Individual evaluations are discussed with each director Committee and Board evaluations are discussed at committee meetings and with the full Board Independence of Directors The Board of Directors has reviewed business, familial, and charitable relationships between our Company and each non-employee director and director nominee to determine compliance with applicable NYSE independence standards and our bylaw independence standards, and to evaluate whether there are any other facts or circumstances that might impair a director's or nominee's independence. Based on that review, the Board has determined that eleven of its twelve current members, Messrs. Burke, Colbert, Collins, Crews, McAtee, Moore, and Westbrook, Meses. Harrison and Sandler, and Drs. de Brabander and Schlitz are independent. Mr. Luciano is not independent under the NYSE or bylaw standards because of his employment with us. In determining that each director and nominee is independent (other than Mr. Luciano), the Board reviewed the following transactions, relationships, or arrangements where the director is an officer of the third party. The Board determined that the amounts or relationships involved in each of the following matters fall below applicable thresholds or outside the NYSE or bylaw independence standards, that none of the directors had a direct or indirect material interest in the matters described below, and that such matters do not impair the independence of any director or nominee. Name Matters Considered E. M. M. de Brabander Ordinary course business with Elanco, where she serves as Executive Vice President of Innovation and Regulatory Affairs (purchases from ADM of various products and sales to ADM of various products, all on an arm's length basis). D. R. McAtee II Ordinary course business with AT&T; Inc., where he serves as Senior Executive Vice President and General Counsel (sales to ADM of various products and services on an arm's length basis). L. Z. Schlitz Ordinary course business with Johnson Controls, where she serves as Vice President and President, Global Products (purchases from ADM of certain equipment products and services on an arm's length basis). In addition, the Board noted that the following directors are, or were during 2024, a member of the board of the following organizations that ADM had purchases from, or sales to, during 2024: Mr. Collins, Pivot Bio; Mr. Crews, Smurfit WestRock; Ms. Harrison, Smurfit WestRock and Ashland Global Holdings; Ms. Sandler, Keurig Dr. Pepper Inc., Pharmavite and Gannett; and Mr. Westbrook, Mosaic Company and T-Mobile US, Inc. Because in each case such transactions were on an arm's length basis, the director served only as a board member of such organization, and none of the directors had a direct or indirect material interest in the matters described above, the Board determined that such matters do not impair the independence of any director. 30 | ADM Proxy Statement 2025 CORPORATE GOVERNANCE — Corporate Governance Guidelines Corporate Governance Guidelines The Board has adopted Corporate Governance Guidelines that govern the structure and functioning of the Board and set forth the Board's policies on governance issues. The guidelines, along with the written charters of

each of the committees of the Board and our bylaws, are posted on our website, <https://investors.adm.com/governance/corporate-governance/>, and are available free of charge upon written request to ADM, Attention: Secretary, 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601.

Independent Executive Sessions In accordance with our Corporate Governance Guidelines, the non-management directors meet in executive session at least quarterly. If the non-management directors include any directors who are not independent pursuant to the Board's determination of independence, at least one executive session each year includes only independent directors. The Lead Director, or in his or her absence, the chair of the Nominating and Corporate Governance Committee, presides at such meetings of independent directors. The non-management directors met in independent executive session seven times during fiscal year 2024.

Information Concerning Committees and Meetings

BOARD OF DIRECTORS Meetings in 2024: 11 All of our incumbent Directors attended at least 75% of Board and applicable Committee meetings. Our Corporate Governance Guidelines provide that all directors standing for election are expected to attend the annual meeting of stockholders, which was the case for our 2024 annual meeting, except for Mr. Moore and Ms. Schlitz who were unable to attend. The Board's standing committees for the year ended December 31, 2024, consisted of the Audit, Compensation and Succession, Nominating and Corporate Governance, and Sustainability and Technology Committees. Each committee operates pursuant to a written charter adopted by the Board, available on our website, www.adm.com. In 2024 until August 2024, the Board also had a standing Executive Committee, which the Board dissolved upon the recommendation of the Nominating and Corporate Governance Committee after considering a review of the use of, and trends regarding, board executive committees, which showed that a minority of large-cap companies have standing executive committees, and the percentage of companies that have an executive committee has been declining in recent years.

AUDIT COMMITTEE Meetings in 2024: 17 The Audit Committee helps the Board provide independent oversight of the Company's financial reporting and internal controls, internal audit function and independent registered public accounting firms, risk management, and compliance with laws and regulatory requirements.

Independence: All of the members of the Audit Committee were determined by the Board to be independent, as that term is defined in our bylaws, in the NYSE listing standards, and in Section 10A of the Exchange Act.

Outside Service Limits: No director may serve on the Audit Committee if such director serves on more than two other public company audit committees unless the Board determines that such commitments would not impair such director's ability to serve effectively.

Financial Expert: All Audit Committee members are financially literate and Michael Burke, the Chair, has been determined by the Board of Directors to be an "audit committee financial expert" as defined by the SEC.

Michael S. Burke (Chair) James C. Collins, Jr. Ellen De Brabander Suzan F. Harrison Patrick J. Moore Debra A. Sandler

ADM Proxy Statement 2025 | 31

CORPORATE GOVERNANCE — Information Concerning Committees and Meetings

The Audit Committee oversees:

- Risk and ERM programs
- The overall plan of the annual independent audit
- Financial statements
- The scope of audit procedures
- The performance of our independent auditors and internal auditors
- The auditors' evaluation of internal controls
- Matters of legal and regulatory compliance
- The performance of our Company's tax, compliance, and insurance functions
- Business and charitable relationships and transactions between us and each non-employee director, director nominee, and executive officer to assess potential conflicts of interest and impairment of independence
- The Company's earnings press releases and information provided to analysts and investors

Key Focus Areas for 2024

- Oversaw remediation efforts and controls testing as part of the material weakness remediation
- Reviewed internal financial controls in conjunction with risk, finance, audit and compliance teams and our independent auditor
- Assessed enterprise risk management

structure, including oversight of responsibilities • Discussed the Company's financial and compliance risks and risk management practices with management • Reviewed the Company's legal compliance and ethics programs and information from ethics-related reporting channels such as the Company's anonymous helpline • Reviewed the Code of Conduct and related internal governance documentation

COMPENSATION AND SUCCESSION COMMITTEE Meetings in 2024: 7 The Compensation and Succession Committee oversees the Company's executive compensation program to support the retention and motivation of top executive talent in alignment with stockholder interests.

Independence: All of the members of the Compensation Committee were determined by the Board to be independent, as that term is defined in our bylaws and in the NYSE listing standards, including those applicable to compensation committee members Kelvin R. Westbrook (Chair) Theodore Colbert James C. Collins, Jr. D.R. McAtee II Lei Z. Schlitz

The Compensation Committee: • Establishes and administers a compensation policy for senior management • Reviews and approves the compensation policy for all of our employees and our subsidiaries other than senior management • Approves all compensation elements with respect to our executive officers and all employees with a base salary of \$500,000 or more • Reviews and monitors our financial performance as it affects our compensation policies or the administration of those policies • Develops, reviews, and recommends to the Board the compensation of non-employee directors • Reviews and monitors our succession plans • Approves awards to employees pursuant to our incentive compensation plans • Approves major modifications in the employee benefit plans with respect to the benefits that salaried employees receive under such plans • Oversees and administers policies, plans, and agreements concerning the recoupment of incentive compensation, or "clawback policies" 32 | ADM Proxy Statement 2025

CORPORATE GOVERNANCE — Information Concerning Committees and Meetings Key Focus Areas for 2024 • Assessed executive compensation metrics and design to ensure ongoing alignment with business strategy • Reviewed compensation-related feedback received from the Company's stockholders • Developed a compensation package for the Company's new CFO, in consultation with the Committee's independent compensation consultant • Reviewed executive officer pay levels against those of similar roles within our peer group • Conducted annual review of the succession plan for key management leadership roles • Performed annual review of director compensation program

The Compensation and Succession Committee provides reports to the Board and, where appropriate, submits actions to the Board for ratification. Members of management attend meetings of the Committee and make recommendations to the committee regarding compensation for officers other than the Chief Executive Officer. In determining the Chief Executive Officer's compensation, the Committee considers the evaluation prepared by the non-management directors. To the extent consistent with the General Corporation Law of Delaware, the committee may delegate the authority to grant equity awards to individuals who are not directors or executive officers. The charter for the Compensation and Succession Committee also provides that the Committee may form subcommittees and delegate tasks to them.

NOMINATING AND CORPORATE GOVERNANCE COMMITTEE Meetings in 2024: 4 The Nominating and Corporate Governance Committee is responsible for recommending qualified director candidates, supporting effective Board organization, and overseeing the Company's governance policies and practices.

Independence: All of the members of the Nominating and Corporate Governance Committee were determined by the Board to be independent, as that term is defined in our bylaws and NYSE listing standards Patrick J. Moore (Chair) Michael S. Burke D.R. McAtee II Debra A. Sandler Kelvin R. Westbrook

The Nominating and Corporate Governance Committee: • Identifies individuals qualified to become members of the Board, including evaluating individuals appropriately suggested by stockholders in accordance with our bylaws • Recommends individuals to

the Board for nomination as members of the Board and board committees • Develops and recommends to the Board a set of corporate governance principles applicable to the Board and the Company • Assigns oversight of particular risk areas to other committees of the board • Leads the evaluation of the directors, the Board, and board committees • Has oversight responsibility for certain of the Company's corporate objectives and policies

Key Focus Areas for 2024 • Recommended changes to the responsibilities of the former Sustainability and Corporate Responsibility Committee to include oversight for technology and safety strategy • Conducted the annual Board evaluation and supporting Board process enhancement actions

ADM Proxy Statement 2025 | 33 CORPORATE GOVERNANCE — Information Concerning Committees and Meetings • Reviewed and assessed stockholder feedback and engagement • Oversaw search and appointment of a new independent director David R. McAtee II to the Board

SUSTAINABILITY AND TECHNOLOGY COMMITTEE Meetings in 2024: 4 The Sustainability and Technology Committee is focused on oversight of the Company's goals and strategies around sustainability, safety, technology, and cybersecurity. Independence: All of the members of the Sustainability and Technology Committee were determined by the Board to be independent, as that term is defined in our bylaws and NYSE listing standards

Suzan F. Harrison (Chair) Theodore Colbert Ellen De Brabander Lei Z. Schlitz The Sustainability and Technology Committee: • Oversees objectives, goals, strategies, and activities relating to sustainability matters, including corporate giving and community relations • Oversees compliance with sustainability-related laws and regulations • Oversees goals, strategies and activities relating to safety, including workplace safety, process safety, and food safety • Reviews strategies, objectives, and activities relating to the Company's information technology and digital assets • Leads oversight of the Company's cybersecurity program, including compliance, policies, trainings, and incident response

Key Focus Areas for 2024 • Committee's responsibility expanded to include oversight of technology strategy and risks; oversight of AI remains with the full Board • Reviewed progress on key sustainability priorities, including Scope 1 + 2 emissions reductions and expansions in our global regenerative agriculture program • Reviewed safety metrics and updates to workplace safety program • Conducted regular reviews of cybersecurity KPIs, including on workforce trainings, ongoing security assessments, and results of incident response exercises

34 | ADM Proxy Statement 2025 CORPORATE GOVERNANCE — Stockholder Outreach and Engagement

Stockholder Outreach and Engagement We maintain an ongoing dialogue with our stockholders and believe our proactive outreach efforts, which are in addition to other communication channels available to our stockholders and stakeholders, lead to enhanced governance, compensation, and sustainability practices. We use our engagement program to learn the perspectives of our stockholders and other stakeholders, address questions and concerns, and provide perspectives on our policies and practices. We share insights from these engagements with the full Board and its committees as we work to ensure our programs and policies appropriately address our stockholders' priority topics. We also review the voting results from our most recent annual meeting of stockholders, the governance practices of similar public companies, and current trends in corporate governance as we consider enhancements to our governance practices and disclosures. In late 2024 and early 2025, we reached out to many of our largest institutional stockholders to hold formal discussions with them to provide updates on our key priority initiatives and to better understand their views on key governance topics. Our directors, supported by our management team, participated in these meetings to discuss our business strategy, corporate governance, risk oversight, sustainability, compensation, and other related issues important to our stockholders. A summary of the key topics raised by our stockholders is presented below.

CONTACTED ENGAGED Contacted stockholders representing 51.8% of outstanding shares Met with stockholders representing 23.5% of outstanding shares

KEY TOPICS OF

DISCUSSION • Board composition, skills, evaluation, and succession planning • Progress on material weakness remediation • The Board's role in the ongoing investigations and related risk management • The broader ERM process and risk oversight • Executive compensation and succession planning • Human capital and talent management • ESG issues, including sustainability disclosures, regenerative agriculture programs, and progress on key goals

RECENT GOVERNANCE ENHANCEMENTS AND UPDATES • In November 2024, appointed Mr. McAtee to the Board, a highly qualified independent director with extensive experience in government regulation, strategic planning, compliance, data security, and shareholder engagement to support Board oversight of risk management and strategic growth initiatives • Over the past year, the Company has undertaken significant efforts to enhance accounting policies with respect to the measurement of intersegment sales and improve documentation of the pricing guidelines for intersegment sales, among other remediation activities. We continue to test our enhanced controls and did not identify additional material weaknesses in Q4 2024 • Enhanced 2025 proxy disclosures on compensation and governance matters, including on the role of the Board in risk oversight, the director nomination process, and annual Board evaluations

COMMUNICATIONS WITH DIRECTORS We have approved procedures for stockholders and other interested parties to send communications to individual directors or the non-employee directors as a group. You should send any such communications in writing addressed to the applicable director or directors in care of the Secretary, ADM, 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601. All correspondence will be forwarded to the intended recipients. ADM Proxy Statement 2025 | 35

CORPORATE GOVERNANCE — Director Compensation

Director Compensation Our standard compensation for non-employee directors consists of an annual retainer of \$330,000 (having increased from \$325,000 effective as of the 2024 annual meeting of stockholders) and additional annual stipends for service as Lead Director (\$50,000) (having increased from \$40,000 effective as of the 2024 annual meeting of stockholders), Chair of the Audit Committee (\$35,000), Chair of the Compensation and Succession Committee (\$25,000), Chair of the Nominating and Corporate Governance Committee (\$20,000), and Chair of the Sustainability and Technology Committee (\$25,000) (having increased from \$20,000 effective as of the 2024 annual meeting of stockholders). Directors may elect to receive up to \$125,000 of their annual retainer in cash or stock units, and the remaining portion of the annual retainer and any stipends are paid in stock units. Each stock unit is deemed for valuation and bookkeeping purposes to be the equivalent of a share of our common stock. Stock units are credited to the account of each non-employee director on a quarterly basis in an amount determined by dividing the quarterly amount of the retainer or stipend to be paid in stock units by the fair market value of a share of our common stock on the last business day of that quarter, and are fully-vested at all times. As of any date on which cash dividends are paid on our common stock, each director's stock unit account is also credited with stock units in an amount determined by dividing the dollar value of the dividends that would have been paid on the stock units in that director's account had those units been actual shares by the fair market value of a share of our stock on the dividend payment date. For purposes of this plan, the "fair market value" of a share of our common stock on any date is the average of the high and low reported sales prices for our stock on the NYSE on that date. Each stock unit is paid out in cash on the first business day following the earlier of (i) five years after the end of the calendar year that includes the quarter for which that stock unit was credited to the director's account, and (ii) when the director ceases to be a member of the Board. The amount to be paid will equal the number of stock units credited to a director's account multiplied by the fair market value of a share of our stock on the payout date. A director may elect to defer the date of these payments in accordance with the plan. We do not pay fees for attendance at board and committee

meetings. Directors are reimbursed for out-of-pocket traveling expenses incurred in attending board and committee meetings. Directors may also be provided with certain perquisites from time to time. The following table summarizes compensation provided to each non-employee director for services provided during fiscal year 2024. Name Fees Earned or Paid in Cash \$(1) Stock Unit Awards \$(2) All Other Compensation \$(3) Total (\$) M. S. BURKE 125,000 238,750 41,256 405,006 T. COLBERT 125,000 203,750 19,728 348,478 J. C. COLLINS, JR. 125,000 203,750 9,838 338,588 T. K. CREWS 125,000 251,250 108,728 484,978 E. M. M. DE BRABANDER 125,000 203,750 6,104 334,854 S. F. HARRISON 125,000 227,500 41,707 394,207 P. J. MOORE 125,000 223,750 173,223 521,973 D. R. MCATEE II(4) 20,720 33,981 — 54,701 D. A. SANDLER 125,000 203,750 46,625 375,375 L. Z. SCHLITZ 125,000 203,750 35,289 364,039 K. R. WESTBROOK 125,000 228,750 75,850 429,600 (1) As described above, up to \$125,000 of the annual retainer may be paid in cash or in stock units, or a combination of both, at the director's election. The remainder of the retainer and any stipends are paid in stock units. All compensation paid in stock units is reported in the "Stock Awards" column. (2) The amounts set forth in this column represent the grant date fair value of stock units paid to each of the listed directors computed in accordance with the provisions of the Financial Accounting Standards Board's Accounting Standards Codification Topic 718 ("FASB ASC Topic 718"). Each of the listed directors is a non-employee director and the fair value of services provided by each director has been used to calculate the number of stock units credited to each director by dividing the quarterly fair value of the services provided by the fair market value of a share of our Company's common stock on the last business day of the quarter. For purposes of this plan, the "fair market value" of a share of our common stock on any date is the average of the high and low reported sales prices for our stock on the NYSE on that date. The aggregate number of stock units held by 36 | ADM Proxy Statement 2025 CORPORATE GOVERNANCE — Director Compensation each non-employee director with respect to services provided through December 31, 2024 (including mandatory stock unit grants, voluntary elections to receive stock units, the deemed reinvestment of dividends and units in respect of services provided in the fourth quarter of 2024 which were recorded in the directors' accounts as of January 1, 2025) was as follows: Name Number of Stock Units M. S. Burke 23,775 T. Colbert 12,378 J. C. Collins, Jr. 7,322 T. K. Crews 58,424 E. M. M. de Brabander 5,414 S. F. Harrison 23,889 D. R. McAtee II 676 P. J. Moore 91,066 D. A. Sandler 26,127 L. Z. Schlitz 20,332 K. R. Westbrook 41,347 (3) The amounts in this column consist of: (i) for all directors, the dividend equivalent amounts paid in stock units in 2024 on stock awards; and (ii) for Mr. Burke, \$5,000 in charitable gifts pursuant to the Company's matching charitable gift program which is available to substantially all employees and non-employee directors. (4) Mr. McAtee joined the Board on November 1, 2024. Director Stock Ownership Guidelines Our Company has guidelines regarding ownership of shares of our common stock by our non-employee directors. These guidelines call for non-employee directors to own shares of common stock (including stock units issued pursuant to the Stock Unit Plan for Non-Employee Directors) over time with a fair market value of not less than five times the amount of the maximum cash portion of the annual retainer. Application of these guidelines will consider the time each director has served on the Board of Directors, as well as stock price fluctuations that may impact the achievement of the five times cash retainer ownership guidelines. We prohibit directors from hedging or pledging Company securities. ADM Proxy Statement 2025 | 37 PROPOSAL NO. 2 Proposal No. 2—Advisory Vote on Executive Compensation Pursuant to Section 14A of the Exchange Act, the following proposal provides our stockholders with an opportunity to vote to approve, on an advisory basis, the compensation of our named executive officers, as disclosed in this proxy statement. In considering your vote, you may wish to review the "Compensation Discussion and Analysis" discussion herein, which provides details as to our compensation policies, procedures, and

decisions regarding the named executive officers, as well as the Summary Compensation Table and other related compensation tables, notes, and narrative disclosures in this proxy statement. This vote is not intended to address any specific element of our executive compensation program, but rather the overall compensation program for our named executive officers. The Compensation and Succession Committee, which is comprised entirely of independent directors, and the Board of Directors believe that the executive compensation policies, procedures, and decisions made with respect to our named executive officers are competitive, are based on our pay-for-performance philosophy, and are focused on achieving our Company's goals and enhancing stockholder value. Accordingly, for the reasons discussed above and in the "Compensation Discussion and Analysis" section of this proxy statement, the Board asks our stockholders to vote FOR the adoption of the following resolution to be presented at the Annual Meeting of Stockholders in 2025: RESOLVED, that the stockholders approve, on an advisory basis, the compensation of the Company's named executive officers as disclosed in the Compensation Discussion and Analysis section, the compensation tables, and the related narrative disclosure in this Proxy Statement. Although this advisory vote is not binding on the Board of Directors, the Board and the Compensation and Succession Committee will review and expect to take into account the outcome of the vote when considering future executive compensation decisions. The Board of Directors recommends that you vote FOR the approval of the advisory resolution on the compensation of our Company's named executive officers, as disclosed in this proxy statement. Proxies solicited by the Board will be so voted unless stockholders specify a different choice.

ADM Proxy Statement 2025 | 39 COMPENSATION DISCUSSION AND ANALYSIS — Executive Summary

Executive Summary OUR COMPENSATION PHILOSOPHY AND OBJECTIVES ADM unlocks the power of nature to enrich the quality of life and provide access to nutrition worldwide. ADM is a global leader in human and animal nutrition and one of the world's premier agricultural origination and processing companies. In order to achieve this, we must attract, engage, and retain highly talented individuals who are committed to our core values of integrity, excellence, teamwork, resourcefulness, responsibility, and respect for others. Our compensation programs are designed to reward for achieving our annual and long-term priorities. Our compensation and benefit programs are based on the following objectives:

- Reinforce a high-performance culture—linking short- and long-term compensation with individual and Company performance;
- Emphasize the long-term—structuring executive compensation to include a significant percentage of long-term equity awards;
- Focus on results—rewarding executives for long-term stockholder value creation, excellence in leadership, and implementing our business strategy;
- Remain market competitive—providing compensation that is consistent with the scope of responsibilities of the role with other comparable organizations to attract and retain high quality executive talent; and
- Maintain internal equity—structuring compensation and benefit programs with consistent features for employees and executives across the organization.

2024 PERFORMANCE HIGHLIGHTS¹ In 2024, ADM overcame multiple market and geopolitical challenges, and in the face of these challenges, we kept our focus on strong execution, continuous improvement efforts, and delivering winning solutions for our customers. Here are some highlights ADM achieved in 2024. Total Segment Operating Profit \$4.2B Achieved \$4.74 in adjusted earnings per share and \$4.2 billion of total segment operating profit.¹ Dividend Increase +11% Delivered strong cash flows and balance sheet, which supported a 11% dividend increase, marking the 52nd consecutive year of increases and 92 years of uninterrupted dividends. Repurchases and Dividends \$3.3B Maintained disciplined and balanced capital allocation, with \$3.3 billion of cash returned to stockholders via repurchases and dividends.

KEY EXECUTIVE COMPENSATION ACTIONS FOR 2024:

- Modest base salary changes—Only two NEOs' salaries were increased (by 3% and 5.6%) to strengthen market competitiveness and maintain a focus on performance-based pay.
- Earned incentives reflected Company performance—The Company performance component of the annual incentive for 2024 was 30.4% out of 75% target, reflecting results versus preestablished company-wide goals for earnings before interest, taxes, depreciation, and amortization ("EBITDA") and return on invested capital ("ROIC").
- LTI based on long-term results—PSUs for 2022-2024 were based on results versus preestablished goals for ROIC (50%), earnings per share ("EPS") (50%) and a two-goal ESG modifier. The above maximum performance on the ROIC metric was averaged with no payout on the EPS metric and then multiplied by a positive ESG modifier, resulting in 112% of target being attained.
- Exercise of Negative Discretion—In connection with the 2024 compensation decisions, the Compensation and Succession Committee and the Board believed it was appropriate to consider the impact of the ongoing investigation regarding certain accounting practices and procedures with respect to ADM's Nutrition reporting segment (the "Investigation"). Although no named executive officer of the Company has been found to have engaged in improper conduct, to ensure accountability and clarity of our priorities, the Board determined that it was appropriate for the Compensation and Succession Committee to exercise negative discretion to reduce the payout percentage under the Company performance component of the 2024 annual cash incentive program and the shares earned for the 2022 PSUs for select participants. This negative discretion was applied to certain NEOs who were in relevant leadership positions during the period covered by the Investigation. The reductions, described in more detail in the "2024 Annual Cash Incentive" and "Equity-Based Long-Term Incentives"

below, are part of the Company's broader efforts to demonstrate accountability at an institutional level. 1 Adjusted Earnings Per Share and total segment operating profit are financial measures that have not been calculated in accordance with generally accepted accounting principles (GAAP). Annex A to this proxy statement offers more detailed definitions of these terms, a reconciliation of each to the most directly comparable GAAP financial measure, and related disclosures about the use of these non-GAAP financial measures. 40 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Executive Summary OVERVIEW OF OUR COMPENSATION PROGRAM Total direct compensation for ADM executives is delivered through salary, annual cash incentives and long-term equity incentive ("LTI") awards. The annual cash incentives and LTI comprise the majority of total direct compensation. This mix of cash and equity awards emphasizes multiple performance factors ultimately intended to facilitate stockholder value creation over the short- and long-term. We believe salaries and performance-based annual cash incentive awards encourage and reward annual business results, while our LTI program balances performance against key long-term financial metrics with retention and continuity of leadership. 2024 PAY MIX In 2024, the NEOs (excluding Mr. Luthar) received, on average, 59% of their total target direct compensation in performance-based pay, and 72% of their total target direct compensation in equity awards. For these purposes, we consider the base salary paid in 2024, the target annual cash incentive for 2024, and the target award value of equity (the dollar amount of such awards as approved by the Compensation and Succession Committee) granted in 2024 for the 2024-2026 performance period. For Mr. Patolawala, the "Average Other Named Executive Officers Pay Mix" chart reflects his 2024 base salary and target annual incentive bonus on an annualized basis, and excludes his one-time make-whole replacement cash incentive and equity award. For Mr. Roig, the "Average Other Named Executive Officers Pay Mix" chart excludes his one-time grant of RSUs in connection with service as Interim Chief Financial Officer but does include the cash stipend he received during the time he served as Interim Chief Financial Officer, which are described in more detail below. CEO PAY MIX Performance-Based Pay 61.4% Performance-Based Pay Long-Term Incentive 47.9% 13.5% 31.9% 6.7% Base PSUs Annual Incentive Bonus Time-Vested RSUs AVERAGE OTHER NAMED EXECUTIVE OFFICERS PAY MIX 38.5% 17.5% 25.7% 18.3% Long-Term Incentive Base PSUs Annual Incentive Bonus Time-Vested RSUs Performance-Based Pay 56.0% Performance-Based Pay In 2024, the Compensation and Succession Committee granted annual equity awards in the form of 60% PSUs and 40% time-based RSUs to the NEOs. The PSUs will vest based on ADM's performance against specific goals over a three-year performance period that will end on December 31, 2026. The RSUs will vest one-third each year over a three-year period. For details, see "2024 Executive Compensation Decisions—Equity-Based Long-Term Incentives." ADM Proxy Statement 2025 | 41 COMPENSATION DISCUSSION AND ANALYSIS — Executive Summary EXECUTIVE OFFICER TRANSITIONS IN 2024 Monish Patolawala joined ADM as Executive Vice President and Chief Financial Officer, effective August 1, 2024. In connection with Mr. Patolawala's appointment, the Compensation and Succession Committee approved the following elements of Mr. Patolawala's compensation: • an initial annual base salary of \$1,425,000; • one-time make-whole awards, intended to replace the cash incentives and unvested equity awards that Mr. Patolawala forfeited from his prior employer to join the Company: • cash incentive: \$1,400,000 payable in January 2025 (to replace the portion of annual bonus forfeited upon departure), • equity award: RSUs with an approximate grant date value of \$10,000,000 granted on August 1, 2024, vesting 25% at six months from grant date, 25% at 12 months from grant date, and 50% at 18 months from grant date (to replace the value of unvested equity awards forfeited upon departure, with the same vesting schedule as those forfeited awards); • participation in the Company's 2024 annual cash incentive plan at a target opportunity of

135% of his base salary, prorated based upon his start date with the Company; • an annual equity award with an approximate grant date value of \$6,950,000, granted on August 1, 2024 in the form of 60% PSUs with the same terms as the Company's annual 2024 PSU awards for the other executive officers, and 40% RSUs, vesting one-third each year over a three-year period following August 1, 2024; and • relocation benefits under the Company's relocation policy. Prior to Mr. Patolawala's appointment, Ismael Roig served as our Interim Chief Financial Officer, beginning in January 2024 when our previous Chief Financial Officer, Vikram Luthar, was placed on administrative leave. Prior to that, Mr. Roig served as President of EMEA and President of Animal Nutrition, and he continued to serve in those roles after Mr. Patolawala became Chief Financial Officer. In connection with Mr. Roig's appointment as Interim Chief Financial Officer, the Compensation and Succession Committee approved the payment of a cash stipend in the amount of \$35,000 to Mr. Roig, in addition to his base salary, for each calendar month during which he served as Interim Chief Financial Officer and a one-time grant of RSUs to Mr. Roig on March 18, 2024, in the amount of \$1,000,000, which vest in full on the one-year anniversary of the date of grant. Mr. Luthar was placed on administrative leave on January 19, 2024, and on April 19, 2024, the Company and Mr. Luthar entered into a Transition Agreement (the "Transition Agreement"). Pursuant to the Transition Agreement, Mr. Luthar remained a non-executive employee, available to assist the Company and provide transitional support as needed, until his resignation date of September 30, 2024. Under the Transition Agreement, Mr. Luthar received his annual cash performance incentive award for 2023 in the amount of \$743,419 and the shares earned for his 2021 PSU award, consistent with the determinations of the Company performance metrics that applied to other executive officers. While employed during the transition period, Mr. Luthar continued to be paid his base salary, which was unchanged. Following his resignation date, consistent with the Company's guidelines under the cash incentive plan and the terms of the equity award agreements applicable upon retirement (the age and service requirements of which Mr. Luthar had met), Mr. Luthar was eligible to receive a prorated 2024 annual cash performance incentive payment (based solely on Company performance metrics), and retirement treatment for purposes of his outstanding equity awards, subject to the terms of the applicable plans. Determinations related to Mr. Luthar's 2024 annual cash performance incentive and his 2022 PSUs are described below under "2024 Executive Compensation Decisions – 2024 Annual Cash Incentive" and "2024 Executive Compensation Decisions – Equity-Based Long-Term Incentives." 42 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Executive Summary EXECUTIVE COMPENSATION BEST PRACTICES We annually evaluate all elements of NEO pay to ensure alignment with performance objectives, market best practices, and stockholder interests. In addition, ADM's Lead Director, our CEO, and our Chief People Officer ("CPO") annually engage with the Company's largest institutional stockholders to receive their feedback on the structure and performance focus of our executive compensation programs. The following table summarizes our current practices. What We Do What We Don't Do Pay-for-performance: We tie compensation to performance by setting clear and challenging Company financial goals and individual goals, and having a majority of target total direct compensation consist of performance-based components. X No guaranteed annual incentive payout: There is no minimum or guaranteed payout amount under the annual cash incentive program. Performance-based equity awards: 60% of the NEOs' annual LTI award opportunity is delivered in PSUs that may be earned only if the Company achieves prescribed financial goals over a prospective three-year performance period. X No hedging: We prohibit executives from engaging in hedging transactions with ADM securities. Multiple performance metrics: Payouts of our annual cash incentives and long-term incentives are determined based on the weighted results for several financial

performance measures and structured to balance accountability for driving annual results with sustainable long-term performance. X No gross up of excise tax payments: We do not assist executives with taxes owed as a result of their compensation. Aggressive stock ownership and retention requirements: Our NEOs and directors must comply with rigorous stock ownership requirements, and they may not sell any Company securities until these guidelines are satisfied. X No excessive executive perks: Executive perquisites are not excessive and are limited to executive physicals, certain insurance benefits, financial planning services, expatriate expenses, and (for the Board Chair and CEO) limited personal use of Company chartered aircraft. Compensation-related risk review: The Compensation and Succession Committee regularly reviews compensation-related risks, with the assistance of independent consultants, to confirm that any such risks are not likely to have a material adverse effect on the Company. X No pledging: We prohibit executives from pledging ADM securities. Clawback policy: The Company has a policy that provides for the recovery of incentive-based compensation from executives in the event of a financial restatement. X No employment contracts: We do not have an employment contract with any executive officer. Regular review of proxy advisor policies, stockholder feedback and corporate governance best practices: The Compensation and Succession Committee regularly considers the perspectives of outside authorities as they relate to our executive compensation programs. Double-trigger requirement: Equity awards do not automatically vest in the event of a change in control. Instead, we impose a “double-trigger” requirement to accelerate vesting.

ADM Proxy Statement 2025 | 43 COMPENSATION DISCUSSION AND ANALYSIS — Executive Summary ADVISORY “SAY ON PAY” VOTE At the 2024 Annual Meeting of Stockholders, approximately 87% of the shares voted in the advisory vote on executive compensation voted to approve our executive compensation. The Compensation and Succession Committee believes that this strong level of support, and the strong levels of support shown in prior years, affirms broad stockholder agreement with our pay-for-performance approach to executive compensation. We routinely conduct extensive proactive outreach to our largest institutional stockholders to understand and address issues of interest and to foster long-term cooperative relationships. The Compensation and Succession Committee will continue to consider stockholder feedback and the results from advisory votes on executive compensation when approving compensation programs. For more information, see “Stockholder Outreach and Engagement.” 44 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — How Executive Compensation is Determined How Executive Compensation is Determined THE ROLE OF THE COMPENSATION AND SUCCESSION COMMITTEE The Compensation and Succession Committee, which is composed solely of independent directors, is responsible for establishing ADM’s compensation philosophy and developing compensation policies and programs consistent with this philosophy. When making compensation decisions, the Compensation and Succession Committee considers the Company’s executive compensation objectives described below. Align executive and stockholder interests. We believe that a substantial portion of total compensation should be equity-based in order to align leadership incentives and stockholder value. We protect our stockholders’ interest by including clawback provisions in long-term incentive award agreements that provide for recovery or forfeiture of awards in certain events, including breaches of restrictive covenants, misconduct and certain terminations of employment. We also have a separate clawback policy that provides for recovery of certain incentive-based compensation in the case of an accounting restatement. Attract and retain top executive talent. We maintain a competitive and fair compensation program to attract and retain talented executives in a dynamic, global market, with a balanced mix of salary, annual cash incentives, and long-term incentive awards targeted to be market competitive. Pay-for-performance. Our executive compensation

program emphasizes variable, performance-based pay tied to company and individual achievements. The Compensation and Succession Committee assesses executive pay holistically, with both annual cash incentives and long-term incentive awards reflecting measurable financial and strategic performance. Internal equity. The Compensation and Succession Committee considers internal equity when determining the pay of NEOs by evaluating compensation in the context of broader employee compensation. THE ROLE OF THE BOARD The Board reviews and approves the Company's annual and long-term business plans, which include some of the factors used to set financial and business objectives for incentive compensation. The independent directors establish and approve all performance criteria for evaluating the Board Chair and CEO, annually evaluate the performance of the Board Chair and CEO based on these criteria, and ratify his compensation. The Board also may provide input and ratification on any additional compensation-related issues at the Compensation and Succession Committee's request. The Board conducts an annual review of the Company's performance, which informs the calculation of performance-based incentives and decisions regarding compensation packages generally. THE ROLE OF THE INDEPENDENT COMPENSATION CONSULTANT For 2024, the Compensation and Succession Committee retained Meridian Compensation Partners, LLC ("Meridian") as its independent executive compensation consultant. Meridian reports directly to the Compensation and Succession Committee and provides objective and expert analyses and independent advice on executive and director compensation and other matters in support of the Committee's responsibilities. Each Compensation and Succession Committee meeting includes an executive session where the Committee meets privately with the independent consultant, without Company management. Outside of these sessions, the independent consultant interacts with management solely on behalf of the Compensation and Succession Committee. The Compensation and Succession Committee only retains consultants that it believes will provide independent advice. The Committee has assessed the independence of Meridian pursuant to SEC and NYSE rules and concluded that the work Meridian has performed and is expected to perform in the future does not raise any conflict of interest. THE ROLE OF EXECUTIVES Our Board Chair and CEO assists the Compensation and Succession Committee in determining compensation for the NEOs other than himself, both in terms of individual performance and with respect to the functions or business units they oversee. The Board Chair and CEO also recommends to the Compensation and Succession Committee, but does not vote on, annual base salary adjustments, individual and group performance factors, and short- and long-term incentive award target levels for the other NEOs. The Company's CPO oversees all employee compensation with the oversight and direction of the Compensation and Succession Committee. The CPO prepares most of the materials for the Compensation and Succession Committee meetings and provides analyses that assist the Committee with its decisions, such as summaries of competitive market practices, summaries of the Company's succession management, and reports regarding the Company's performance. In addition, throughout the year, the CPO facilitates meetings with management to help the Compensation and Succession Committee gain a better understanding of Company performance, and ensures that the Committee receives a rigorous assessment of year-to-date performance at each of its meetings. The Company's executives, including the Board Chair and CEO, leave meetings during discussions of individual compensation actions affecting them personally and during all executive sessions, unless requested to remain by the Compensation and Succession Committee. ADM Proxy Statement 2025 | 45 COMPENSATION DISCUSSION AND ANALYSIS — Components of Executive Compensation Components of Executive Compensation The following chart summarizes the direct compensation components and associated objectives of our fixed and performance-based pay for executives in 2024. Although the

Compensation and Succession Committee has not adopted a policy for allocating the various elements of total direct compensation, the Company places greater emphasis on variable pay for executives with more significant responsibilities because they have a greater capacity to affect the Company's performance and results. Components of 2024 Executive Compensation Element and Form Link to Stockholder Value Key Characteristics FIXED Annual Base Salary Recognize an individual's role and responsibilities Reviewed annually and set based on competitiveness versus the external market, individual performance, and internal equity ANNUAL INCENTIVE AWARDS Annual Annual Cash Incentive Achieve annual goals measured in terms of financial and individual performance linked to creation of stockholder value Adjusted EBITDA, Adjusted ROIC, and Individual Performance Factor LONG-TERM INCENTIVE AWARDS Long-Term (3-Year Performance Period) Performance Share Units (PSUs) 60% Align long-term performance with interests of stockholders and retain executive talent Achievement of key drivers of Company performance and stockholder value as evidenced by average Adjusted ROIC, cumulative Adjusted Earnings per Share, and a two-goal Strive 35 modifier that is focused on results in the ESG space Long-Term (Vest over 3-Year Period) Restricted Stock Units (RSUs) 40% Align NEOs' interests with stockholders' interests, retain executive talent, and promote stock ownership RSUs are granted pursuant to the Company's long-term equity plan and vest one-third each year beginning on the first anniversary of the grant date 46 | ADM Proxy Statement 2025

COMPENSATION DISCUSSION AND ANALYSIS — 2024 Executive Compensation Decisions 2024 Executive Compensation Decisions INDIVIDUAL COMPENSATION DECISIONS The following tables summarize compensation decisions made by the Compensation and Succession Committee with respect to each of the NEOs for 2024. Details regarding the specific compensation elements and related payouts follow the individual summaries. The award values shown below for LTI grants represent the dollar amount of such awards, at target, as approved by the Compensation and Succession Committee. These amounts differ from the grant date fair values of such awards as shown in the Grants of Plan-Based Awards Table and the Summary Compensation Table due to the valuation methodology the Compensation and Succession Committee uses in making its decisions differing from the valuation methodology required by the SEC for those compensation tables. MR. LUCIANO Board Chair, CEO, and President Base salary Target annual cash incentive Actual annual cash incentive Long-term incentives Unchanged at \$1,492,500 200% of base salary, or \$2,985,000 \$1,199,970, or approximately 40% of target \$17,700,000, granted in the form of 60% PSUs and 40% RSUs Significant accomplishments: • Delivered adjusted earnings per share of \$4.74; total segment operating profit of \$4.2 billion; and 8.3% adjusted ROIC.2 • Maintained strong balance sheet while returning \$3.3 billion in cash to stockholders and increasing dividend by 11%. • Advanced strategic initiatives that are serving our customers' evolving needs, from expanding regenerative agriculture globally, to launching a joint venture, Gradable, in partnership with the Farmers Business Network to accelerate adoption of regenerative and sustainable agricultural practices. • Effectively managed through external headwinds by delivering solid production volumes in our Latin America region, improving production volume in starches and sweeteners across the business, and increasing operating profits in several product lines for North America. 2 Adjusted earnings per share, Adjusted ROIC and total segment operating profit are financial measures that have not been calculated in accordance with GAAP. Annex A to this proxy statement offers more detailed definitions of these terms, a reconciliation of each to the most directly comparable GAAP financial measure, and related disclosures about the use of these non-GAAP financial measures. ADM Proxy Statement 2025 | 47

COMPENSATION DISCUSSION AND ANALYSIS — 2024 Executive Compensation Decisions MR. PATOLAWALA Executive Vice President and Chief Financial Officer Base salary Target annual cash incentive Actual annual cash incentive Replacement

cash incentive Long-term incentives Hired at \$1,425,000 135% of prorated base salary, or \$801,563 (based on a base salary of \$593,751 for portion of 2024 he was employed) \$524,222, or approximately 65% of target One-time sign-on replacement cash incentive payment of \$1,400,000, paid in January 2025 \$6,950,000, granted in the form of 60% PSUs and 40% RSUs; one-time sign-on replacement award of \$10,000,000 granted in the form of RSUs Significant accomplishments: • Enhanced financial integrity by bolstering a strong “tone at the top,” strengthening internal controls, and enhancing quality of financial reporting. • Quickly partnered with the Board Chair and CEO and other senior leaders to help shape the Company’s long-term strategy, emphasizing operational excellence through cost management and portfolio optimization. • Drove continuous improvement by directing the team’s focus on the end-to-end value chain and enabling effective root cause analysis through data visualization and analytics. • Maintained a strong focus on driving cash generation and disciplined capital deployment to further both short-term financial strength and long-term value creation. MR. ROIG Interim Chief Financial Officer (January – July 2024); President EMEA and President Animal Nutrition Base salary Cash stipend Target annual cash incentive Actual annual cash incentive Long-term incentives \$550,008 \$35,000 per month while serving as Interim CFO 100% of base salary, or \$550,000 \$193,600, or approximately 35% of target \$1,200,000, granted in the form of 60% PSUs and 40% RSUs; one-time award of \$1,000,000 granted in the form of RSUs in connection with his appointment to Interim CFO role Significant accomplishments: • Appointed Interim Chief Financial Officer and led the Company’s transition to a permanent Chief Financial Officer. • Managed accounting remediation efforts and control improvements. • Implemented a \$2 billion stock repurchase program while working closely with external stakeholders, including rating agencies, to support the Company’s liquidity position and access to market. • Developed a cost reduction program to reduce costs across the global organization. 48 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — 2024 Executive Compensation Decisions MR. MORRIS Senior Vice President and President, Agricultural Services and Oilseeds Base salary Target annual cash incentive Actual annual cash incentive Long-term incentives Increased from \$714,000 to \$735,504 100% of base salary, or \$735,500 \$258,896, or approximately 35% of target \$3,300,000, granted in the form of 60% PSUs and 40% RSUs Significant accomplishments: • While the overall performance in Agricultural Services and Oilseeds fell short of the annual business plan, the business delivered record Global production volumes in canola/rapeseed crush and refined oils and biodiesel. • Expanded ADM’s Regenerative Ag program globally across 8 countries and 9 agricultural commodities, and exceeded goals for the year by 41%. • Delivered against growth goals in both farmer direct origination and destination marketing volumes. MR. CUDDY Senior Vice President and President, Carbohydrate Solutions Base salary Target annual cash incentive Actual annual cash incentive Long-term incentives Increased from \$663,000 to \$700,008 100% of base salary, or \$700,000 \$351,400, or approximately 50% of target \$3,100,000, granted in the form of 60% PSUs and 40% RSUs Significant accomplishments: • Achieved third-best performance year in North America Starches and Corn Syrups, as well as the second-best year ever in Global Wheat Milling. • Grew BioSolutions volume by 10% and successfully executed new sales volumes for starch capacity in Marshall, MN. • Realized improved plant run rates, with volumes up 4% compared to the prior year and unscheduled downtime reduced by 16%, alongside a 2% cost improvement versus the previous year. • Executed agreement with Vestaron to produce biologics in Decatur’s Bio II facility. ADM Proxy Statement 2025 | 49 COMPENSATION DISCUSSION AND ANALYSIS — 2024 Executive Compensation Decisions MR. PINNER Senior Vice President, President, Nutrition, and Chief Sales and Marketing Officer Base salary Target annual cash incentive Actual annual cash incentive Long-term incentives Unchanged at \$700,008 100% of base salary, or \$700,000 \$352,800, or approximately 50%

of target \$3,000,000, granted in the form of 60% PSUs and 40% RSUs Significant accomplishments: • While overall performance in Nutrition fell short of the annual business plan, achieved strong revenue growth in Flavors while resolving operational challenges from earlier Enterprise Resource Planning implementations, as well as record growth in sales and earnings from Bioactives business. • Mitigated customer and supply chain challenges in the protein business while the East Plant Crush asset remained under repair. • Continued improvements in Animal Nutrition turnaround. BASE SALARY The Compensation and Succession Committee sets base salaries based on an executive's position, skills, performance, experience, tenure, and responsibilities. The Compensation and Succession Committee annually assesses the competitiveness of base salary levels relative to salaries within the marketplace for similar executive positions, typically using a range around the market median as a starting point. When assessing any salary adjustments for executives, the Compensation and Succession Committee also considers factors such as changes in responsibilities and corresponding changes in competitive marketplace levels. In 2024, Mr. Morris received a base salary increase of 3% and Mr. Cuddy received a base salary increase of 5.6%, in each case to strengthen market competitiveness. None of the other NEOs received a base salary increase in 2024. 2024 ANNUAL CASH INCENTIVE We pay an annual cash incentive only if ADM meets specified performance goals. The annual cash incentive program emphasizes company-wide performance objectives to encourage executives to focus on overall Company success and leadership to generate the most value across the organization. Our performance metrics are directly tied to driving stockholder value creation: we require meaningful results for annual metrics before any awards may be earned. The annual cash incentive program aligns rewards with business results measured against specific goals. At the start of each fiscal year, the Compensation and Succession Committee approves target annual cash incentive levels, expressed as a percentage of salary, for each NEO. Actual awards paid are based on both Company performance (75% weight) and individual performance (25% weight). Payouts can range from 0% to a maximum of 200%, depending on both Company and individual performance. The 2024 annual cash incentive program was based on two key measures of financial performance—adjusted EBITDA and adjusted ROIC—as well as individual performance. The Compensation and Succession Committee removed the strategic goals component that had been in the 2023 annual cash incentive program to simplify the program and focus participants on critical financial goals. Company Performance Components Company performance payout is determined by ADM's adjusted EBITDA and adjusted ROIC.³ Adjusted EBITDA Adjusted EBITDA has a weighting of 75% under our 2024 annual cash incentive program. The Company sets the EBITDA target based upon the Company plan for the year, which also considers the external environment. ³ Adjusted EBITDA and Adjusted ROIC are financial measures that have not been calculated in accordance with GAAP, and are referred to as non-GAAP financial measures. Annex A to this proxy statement provides more detailed definitions of these terms, a reconciliation of each to the most directly comparable GAAP financial measure, and related disclosures about the use of these non-GAAP financial measures. 50 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — 2024 Executive Compensation Decisions The adjusted EBITDA goals and associated payout opportunity levels are shown below. Payout opportunity levels are interpolated for results that fall between specific goal amounts. Adjusted EBITDA Achieved Payout Opportunity \$6.602B & Above 200% \$6.319B 150% \$6.134B 125% \$5.438B (Plan Adjusted EBITDA) 100% \$4.954B 75% \$4.573B 50% \$4.182B 25% Below \$4.182B 0% Adjusted ROIC Modifier ROIC measures how effectively we generate returns on invested capital. Once the adjusted EBITDA results are determined for the Company performance payout component of our 2024 annual cash incentive program, actual adjusted ROIC for 2024 is compared against the 9.8% adjusted ROIC target that was set for 2024. The result of that

comparison leads to a modifier of +/- 10%. The modifier boosts the payout potential in years that our adjusted ROIC exceeds our target, and reduces the payout potential if adjusted ROIC falls below target expectations. The adjusted ROIC modifier is determined as follows: Adjusted ROIC Achieved Multiplier Effect of modifier on payout 11.8% or greater 1.1 10% increase 9.8% (Target) 1.0 No change 7.8% or less 0.9 10% decrease For Adjusted ROIC results between specific goals, the multiplier will be determined by linear interpolation. 2024 Company Performance Payout Component Calculation For 2024, ADM attained the results shown below, leading to an overall Company performance portion payout of 30.4% out of 75% target. Our 2024 adjusted EBITDA of \$4.476 billion represented 43.8% of our goal. Applying the weighting of adjusted EBITDA of 75% of the total annual cash incentive payout, this factor achieved a payout of 32.85%. 75% Adjusted EBITDA 43.8% Payout x 75% = 32.85% \$4.182B Threshold 25% Payout \$5.438B \$6.602B Target 100% Payout Maximum 200% Payout 43.8% \$4.476B

ADM Proxy Statement 2025 | 51 COMPENSATION DISCUSSION AND ANALYSIS — Individual Performance Components Further, adjusted ROIC for 2024 was 8.3%, resulting in a multiplier of 0.925. Adjusted ROIC Multiplier +/- 10% 7.8% 0.9 multiplier 9.8% 11.8% 1.0 Multiplier Maximum 1.1 Multiplier 0.925 8.3% Applying this multiplier of 0.925 to the adjusted EBITDA payout of 32.85% resulted in an overall Company performance portion payout of 30.4% out of 75% target. However, as discussed in “Key Executive Compensation Actions For 2024,” the Compensation and Succession Committee exercised negative discretion to reduce the 30.4% Company performance payout percentage by half for certain NEOs and to zero for one NEO, in each case who served in relevant leadership positions during the period covered by the Investigation, and as a result, the following Company performance percentages were applied to the NEOs: Company Performance Percentages J. R. Luciano 15.2% M. Patolawala 30.4% I. Roig 15.2% G. A. Morris 15.2% C. M. Cuddy 15.2% I. Pinner 30.4% V. Luthar 0%

Individual Performance Components Individual performance determines 25% of the annual cash bonus. Our leaders are responsible for driving performance company-wide; their respective individual performance ratings are a result of their performance against goals for the year, including goals for the business units they run. The target individual performance percentage is 25% of the overall cash incentive program. For each NEO, the Compensation and Succession Committee has discretion to adjust payout from 0% to 200% of the 25% target percentage based on the Committee’s assessment of the NEO’s performance and contribution to the Company’s success. As a result, the individual performance portion can range from a total payout of 0% to 50% (in 5 percentage point increments). Pursuant to the Transition Agreement, Mr. Luthar was not eligible for the individual performance component of the 2024 annual cash incentive program. After consideration of these various factors, the Compensation and Succession Committee determined to award the following individual performance percentages to the NEOs: Individual Performance Percentages J. R. Luciano 25% M. Patolawala 35% I. Roig 20% G. A. Morris 20% C. M. Cuddy 35% I. Pinner 20%

52 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Individual Performance Components Calculation of Award Amounts The formula used to calculate an annual cash incentive payout for the NEOs can be expressed as follows, utilizing the 30.4% out of 75% target for the Company performance component, prior to the exercise of negative discretion for certain NEOs as discussed above: Company Performance Individual Performance Individual Performance 2024 Cash Bonus Total Cash Bonus 75% of award 25% of award Company EBITDA Performance 0.925 32.85% x 0.925 = 30.4% payout 0% to 50% 30.4% to 80.4% Can range from Company + Individual Performance 0% to 50% + = + x 43.8% Performance 32.85% = 75% Weight x ROIC Multiplier The Resulting Annual Cash Incentive for Each NEO Based on the determination of the Company and individual performance factors as described above, the NEOs received the payouts set forth below. Executive Target Cash Incentive Opportunity (%)

of Salary) Target Cash Incentive Opportunity Cash Bonus Payout as a Percentage of Target Actual
FY2024 Cash Award J. R. Luciano 200% \$2,985,000 40.2% \$1,199,970 M. Patolawala(1) 135% \$ 801,563
65.4% \$ 524,222 I. Roig 100% \$ 550,000 35.2% \$ 193,600 G. A. Morris 100% \$ 735,500 35.2% \$ 258,896
C. M. Cuddy 100% \$ 700,000 50.2% \$ 351,400 I. Pinner 100% \$ 700,000 50.4% \$ 352,800 V. Luthar(2)
75% \$ 435,938 0% \$ 0 (1) Mr. Patolawala received a prorated cash incentive award based on his start
date of August 1, 2024. His cash bonus payout percentage was applied to his prorated base salary for
2024. (2) Mr. Luthar's target cash incentive opportunity was prorated based on his resignation date of
September 30, 2024. One-Time Bonus Approval In addition, as described above, in connection with
Mr. Patolawala's appointment, the Compensation and Succession Committee approved a one-time
sign-on bonus of \$1,400,000, payable in January 2025, intended to replace the prorated annual cash
incentive that Mr. Patolawala forfeited from his prior employer to join the Company. ADM Proxy
Statement 2025 | 53 COMPENSATION DISCUSSION AND ANALYSIS — Equity-Based Long-Term
Incentives EQUITY-BASED LONG-TERM INCENTIVES ADM's LTI program aligns the interests of
executives with those of our stockholders by rewarding financial outcomes important to long-term
stockholder value, supporting stock ownership, and motivating retention of our senior executives. Our
performance-based LTI awards are based on the results of forward-looking metrics measured over a
three-year performance period. In 2024, we granted our annual LTI awards in March (or for Mr.
Patolawala, in August) in the form of 60% PSUs with a three-year performance period, which PSUs will
vest at the end of the three-year period only if certain performance goals are achieved, and 40% RSUs
with a one-third ratable vesting schedule on each of the first three anniversaries of the date of grant.
We believe this forward-looking LTI program aligns our equity compensation with market practice and
strengthens our executives' focus on growth and future value creation for stockholders. The 2024
grants, including the sign-on equity award to Mr. Patolawala, in the target amounts approved by the
Compensation and Succession Committee, are shown below. Mr. Luthar did not receive any LTI
awards in 2024. The listed values represent the dollar amount of such awards, at target, as approved
by the Compensation and Succession Committee. These amounts differ from the grant date fair values
of such awards as shown in the Grants of Plan-Based Awards Table and the Summary Compensation
Table due to the valuation methodology the Compensation and Succession Committee uses in making
its decisions differing from the valuation methodology required by the SEC for the compensation
tables. Executive Target Equity Award J. R. Luciano \$ 17,700,000 M. Patolawala \$ 16,950,000(1) I. Roig \$
2,200,000(2) G. A. Morris \$ 3,300,000 C. M. Cuddy \$ 3,100,000 I. Pinner \$ 3,000,000 (1) The target equity
award value for Mr. Patolawala consists of (a) an equity award with an approximate grant date value of
\$6,950,000, granted in the form of 60% PSUs with the same terms as the Company's annual 2024 PSU
awards for the other executive officers, and 40% RSUs, vesting one-third each year over a three-year
period following the August 1, 2024 grant date; and (b) a one-time sign-on equity award of RSUs
granted on August 1, 2024 with an approximate grant date value of \$10,000,000, vesting 25% at six
months from the grant date, 25% at 12 months from the grant date, and 50% at 18 months from the
grant date, intended to replace the value of unvested equity awards that Mr. Patolawala forfeited from
his prior employer to join the Company. (2) In addition to his annual equity award, this amount for Mr.
Roig includes the one-time grant of RSUs on March 18, 2024 with an approximate grant date value of
\$1,000,000 in connection with his service as Interim Chief Financial Officer, which vest in full on the
one-year anniversary of the grant date. The terms of these equity awards are described below. PSU
Vesting Except in cases that trigger accelerated vesting (described below), the 2024 PSUs will vest in
three years upon the Compensation and Succession Committee's determination of the Company's
achievements, if any, against certain performance goals over a three-year performance period

(2024–2026). Payouts can range from 0% to 200%, and the value of those payouts will depend upon the price of ADM’s common stock at the end of the performance period. During the performance period, dividend equivalents will be accrued and settled in cash at the end of the three-year performance period on the basis of the number of PSUs actually earned. Vested PSUs will be settled in shares of ADM common stock.

PSU Performance Metrics The performance metrics for the 2024 PSU awards are:

- Average adjusted ROIC over the three-year performance period⁴ (50% weight),
- Cumulative adjusted earnings per share (“adjusted EPS”) performance over the three-year performance period⁵ (50% weight), and
- 4 Average adjusted ROIC for the performance period means the average of the annual percentage obtained by dividing the adjusted ROIC earnings for each fiscal year during the performance period by adjusted invested capital for the same fiscal year. Adjusted ROIC is a financial measure that has not been calculated in accordance with GAAP, and is referred to as a non-GAAP financial measure. Annex A to this proxy statement provides more detailed definitions of this term, a reconciliation to the most directly comparable GAAP financial measure, and related disclosures about the use of this non-GAAP financial measure.

⁵ Cumulative adjusted EPS for the performance period means the diluted earnings per share of the Company over the three-year performance period, as adjusted for specified items. Adjusted EPS is a financial measure that has not been calculated in accordance with GAAP, and is referred to as a non-GAAP financial measure. Annex A to this proxy statement provides more detailed definitions of this term, a reconciliation to the most directly comparable GAAP financial measure, and related disclosures about the use of this non-GAAP financial measure.

54 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Equity-Based Long-Term Incentives

- A two-goal Strive 35 modifier that reflects (1) progress toward water savings through water reuse and reclamation across facilities, and (2) absolute reduction in greenhouse gas emissions over the three-year performance period (+/-10%).

ROIC appears as a metric in both our short- and long-term incentive compensation plans, but it serves different purposes and has different weights in the two plans. One-year adjusted ROIC in our annual cash incentive plan demonstrates our short-term performance, while three-year average adjusted ROIC in the PSU award better reflects long-term, sustainable results with an emphasis on growth and driving consistent returns of our capital investments over time. The Committee continued to utilize adjusted EPS as one of the performance metrics for the 2024 PSU awards because adjusted EPS is one of the primary bases on which we set performance expectations for the year, it is consistent with how we report our operating results to the investment community, it is a widely-used measure of overall Company performance, and the Committee believes it is highly correlated to stockholder return. The goals and associated payouts for these metrics are shown below. If results for average adjusted ROIC and adjusted EPS fall between specific goals, the associated payout will be determined by linear interpolation.

Performance metric	Weighting	No payout	50% payout	100% payout	150% payout	200% payout
Average Adjusted ROIC	50%	Below 7.0%	7.0%	9.0%	10.0%	11.0%
Cumulative Adjusted EPS	50%	Below \$15.00	\$17.00	\$18.50	\$19.00	\$19.50
ESG Modifier	+/-10%	+/- 5.0% modifier				

based on level of achievement as it relates to completion of projects designed to deliver 1.2 million cubic meters of water savings through water reuse and reclamation across facilities

Adjustment factor will be made based on Committee discretion +/- 5.0% modifier based on level of achievement as it relates to a goal of 2.0% absolute reduction in greenhouse gas emissions over the three-year period of 2024-2026

Adjustment factor will be made based on Committee discretion

In establishing and measuring achievements against the goals shown above, the Compensation and Succession Committee retains discretion to make changes to reflect “material portfolio adjustments,” which are events that are unusual and infrequent, like significant acquisitions and divestitures.

RSU Vesting

Except in cases that trigger accelerated vesting (described below), RSUs vest one-third each year over a three-year period beginning on the first anniversary of the grant date so long as the recipient is still employed by the Company on each vesting date. During the vesting period, participants are paid dividend equivalents on their unvested RSUs. Vested RSUs will be settled in shares of ADM common stock. RSUs and PSUs will continue to vest as scheduled if an executive leaves the Company because of disability or retirement (at age 55 or older with 10 or more years of service, or 65 years of age). Conditions Leading to Accelerated Vesting Upon the death of an executive, the executive's RSUs will vest immediately and the executive's PSUs will vest immediately at the target level. A detailed description of double-trigger change in control provisions that may lead to accelerated vesting appears under the header "Employment Agreements, Severance, and Change in Control Benefits."

ADM Proxy Statement 2025 | 55 COMPENSATION DISCUSSION AND ANALYSIS — Equity-Based Long-Term Incentives Equity Awards Granted in 2022 with a Performance Period that Ended in 2024 In 2022, ADM granted PSUs to our then-NEOs with a three-year performance period (2022-2024). The performance metrics for the 2022 PSU awards were: • Average adjusted ROIC⁶ over the three-year performance period (50% weight), • Adjusted EPS⁷ performance for 2024, the third year of the three-year performance period (50% weight), and • A two-goal ESG modifier that reflects (1) progress toward gender diversity in leadership, and (2) absolute reduction in greenhouse gas emissions over the three-year performance period (+/-15%). Pursuant to their terms, the 2022 PSUs held by Mr. Luthar remained outstanding following his resignation due to Mr. Luthar having met the age and service requirements for retirement treatment, with the number of PSUs to be paid out to be determined based on the achievement of actual performance, and subject to the exercise of negative discretion based on such factors as the Committee determines. The weighting, goals, and associated payout factors for these metrics are shown below. For average adjusted ROIC and adjusted EPS, if results fall between specific goals, the associated payout would be determined by linear interpolation.

Performance metric	Weighting	No payout	50% payout	100% payout	150% payout	200% payout
Average Adjusted ROIC	50%	Below 7.0%	7.5%	9.0%	10.0%	11.0% or above
Adjusted EPS	50%	Below \$5.00	\$5.25	\$6.00	\$6.32	\$6.75
ESG Modifier	+/-15%	+/- 7.5% modifier based on percent of women in leadership roles ("gender diversity percentage") at 12/31/24 (with linear interpolation applied)	-7.5% if gender diversity percentage is 22% or less	0% if gender diversity percentage is 25%	+7.5% if gender diversity percentage is 28% or more	+/- 7.5% modifier based on level of achievement as it relates to a goal of 2.0% absolute reduction in greenhouse gas emissions during 2024 against 2019

Adjustment factor will be made based on Committee discretion On February 5, 2025, the Compensation and Succession Committee determined the degree to which the performance metrics under the 2022 PSUs were attained, and the resulting payout level relative to the target amount for each metric. For the performance period of 2022-2024: • Average adjusted ROIC was 11.37%, and therefore the resulting payout factor was 200%, • Adjusted EPS for 2024 was \$4.74, and therefore the resulting payout factor was 0%, and • Progress toward gender diversity in leadership was 4.5%, and progress toward reduction in greenhouse gas emissions over the three-year performance period was 7.5%, yielding a total multiple of 1.12. Based on the above results, the performance metrics for the 2022 PSUs were achieved at 112% of target. However, as discussed in "Key Executive Compensation Actions For 2024," the Compensation and Succession Committee exercised negative discretion to reduce the number of shares earned by half for certain NEOs and to zero for one NEO, who in each case were in relevant leadership positions during the period covered by the Investigation. ⁶ Average adjusted ROIC for the performance period is a non-GAAP financial measure and means the average of the annual percentage obtained by dividing the adjusted ROIC earnings for each fiscal year during the

performance period by adjusted invested capital for the same fiscal year. See Annex A to this proxy statement for reconciliations of adjusted ROIC for each of fiscal years 2022, 2023 and 2024 to the most directly comparable GAAP financial measure, as well as the calculation of the average adjusted ROIC for the performance period of 2022-2024. 7 Adjusted EPS for fiscal year 2024 is a non-GAAP financial measure and means the diluted earnings per share of the Company, as adjusted for specified items. See Annex A to this proxy statement for a reconciliation to the most directly comparable GAAP financial measure. 56 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Equity-Based Long-Term Incentives Based on these determinations, the Compensation and Succession Committee approved the following number of PSUs earned for each NEO: Executive Target Number of 2022 PSUs Actual Number of 2022 PSUs Earned J. R. Luciano 137,634 77,076** M. Patolawala* — — I. Roig 6,882 3,854** G. A. Morris 25,025 14,014** C. M. Cuddy 25,025 14,014** I. Pinner 14,431 16,163 V. Luthar 16,371 0*** * Mr. Patolawala was hired in 2024 and, therefore, did not receive a 2022 PSU award. ** Reflects 50% reduction as determined by the Compensation and Succession Committee. *** Reflects reduction to zero as determined by the Compensation and Succession Committee. All of the earned PSUs shown in the table above vested on February 10, 2025. FEATURES OF 2025 COMPENSATION PROGRAMS The Compensation and Succession Committee made changes to the short-term and long-term incentive compensation plans for performance periods beginning in 2025. These changes are designed to better align with the strategic direction of the Company, to simplify certain design features and to strengthen market competitiveness. Features of the 2025 Annual Cash Incentive Bonus • Retained the adjusted EBITDA metric and reduced its weight from 75% to 50%. • Introduced adjusted free cash flow at 20% weight and cash conversion cycle at 5% weight. • Removed the +/- 10% ROIC modifier. Features of the 2025 PSU Awards • Retained the weightings of the average ROIC metric at 50% and the cumulative adjusted EPS metric at 50%. • Removed the +/- 10% Strive 35 modifier to simplify program design and maintain focus on long-term financial metrics that are critical to the success of the business. ADM Proxy Statement 2025 | 57 COMPENSATION DISCUSSION AND ANALYSIS — Peer Group Peer Group The Compensation and Succession Committee utilizes the S&P; 100 Index as a peer group to evaluate whether executive officer pay levels are aligned with performance on a relative basis. We believe the large peer group is relevant for ADM because we compete for talent and investments across a wide range of industries. Moreover, our diverse business encompasses aspects of several industries; we do not have a direct competitor—in terms of size, focus or business mix—in the public markets. As a result, the Compensation and Succession Committee believes it is appropriate to consider a broad spectrum of compensation levels and investment returns to arrive at our NEO compensation. 58 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Benefits

Benefits In addition to the direct elements of pay described above, ADM offers benefits to our NEOs to provide for basic health, welfare, and income security needs and to ensure that our compensation packages are competitive. With few exceptions, such as supplemental benefits provided to employees whose benefits under broad-based plans are limited under applicable tax laws, our policy is to offer the same benefits to all U.S. salaried employees as are offered to the NEOs.

Retirement Program Eligibility Description

401(k) and ESOP All salaried employees Qualified defined contribution plan where employees may defer up to 75% of eligible pay, or up to \$23,000 for 2024. The Company provides a 1% non-elective employer contribution and a match of 4% on the first 6% contributed by an employee. The employee contribution can be made pre-tax (401(k)) or after-tax (Roth 401(k)). Employees also may defer traditional after-tax contributions into the plan for a total \$69,000 savings opportunity including all contribution types (pre-tax, Roth, and after tax) plus any ADM matching and 1% non-elective contributions. Employees who are 50 years of age or older can elect to make additional contributions of up to \$7,500 for 2024.

ADM Retirement Plan All salaried employees All eligible employees participate in a qualified cash balance pension formula where the benefit is based on an accrual of benefit at a stated percentage of the participant's base compensation each year. Prior to January 1, 2022, employees who had 5 or more years of service as of January 1, 2009 accrued benefits under a traditional defined benefit formula (and not the cash balance pension formula) where the benefit was based on number of years of service and final average earnings. (Final average earnings is the average of monthly compensation over a 60 consecutive month period within the employee's last 180-month period of employment prior to January 1, 2022, that produced the highest average.)

Deferred Compensation Plan Employees with salaries above \$175,000 Eligible participants may defer up to 75% of their annual base salary and up to 100% of their annual cash incentive until designated future dates. Earning credits are added to the deferred compensation account balances based upon hypothetical investment elections available under these plans and chosen by the participant. These hypothetical investment options correspond with the investment options (other than Company common stock) available under the 401(k) and ESOP.

Supplemental Retirement Plan Employees whose retirement benefit is limited by applicable IRS limits Non-qualified deferred compensation plan that ensures participants in the Retirement Plan receive the same retirement benefit they would have received if not for certain limitations under applicable tax law.

Healthcare and Other Benefits. NEOs receive the same healthcare benefits as other employees, except that we provide executive physicals and related services to our senior executives who serve on the Executive Council. We provide a benefits package for employees (including NEOs) and their eligible dependents, portions of which may be paid for by the employee. Benefits include life, accidental death and dismemberment, health (including prescription drug), dental, vision, and disability insurance; dependent and healthcare

reimbursement accounts; tuition reimbursement; paid time off; holidays; and a matching gifts program for charitable contributions. Perquisites. Consistent with our pay-for-performance philosophy, we limit executive perquisites. Any NEO who receives a perquisite is individually responsible for any associated taxes. The Compensation and Succession Committee allows our Board Chair and CEO to have access to Company-chartered aircraft for personal use for security and efficiency reasons. In addition, in 2023, after a review of market practice, the Compensation and Succession Committee approved financial planning services through Fidelity to be provided to each NEO. See the footnotes to the Summary Compensation Table for a description of other perquisites provided to the NEOs.

ADM Proxy Statement 2025 | 59 COMPENSATION DISCUSSION AND ANALYSIS — Compensation Policies and Governance

COMPENSATION POLICIES AND GOVERNANCE EXECUTIVE STOCK OWNERSHIP The Board of Directors believes it is important for each member of senior management to maintain a significant ownership position in shares of ADM's common stock to further align their interests with the interests of our stockholders. Accordingly, we require each member of senior management to own shares of common stock with a value at least equal to a specified multiple of his or her annual base salary. Shares that count toward the ownership levels include shares owned outright, shares owned by immediate family members or a related trust if previously owned by the executive, shares held through the 401(k) plan, and unvested time-based RSUs. Stock options, whether exercisable or not, and unvested PSUs do not count toward determining whether the ownership level is met. Executives may not sell any Company securities until the applicable guideline is met. As shown below, each of our NEOs who is a current employee exceeds the applicable ownership guideline, some by a significant margin.

Executive	Executive Ownership Guideline as a Multiple of Salary	Actual Ownership as of March 14, 2025
J. R. Luciano	10.0x	55.5x
M. Patolawala	4.0x	6.9x
I. Roig	4.0x	6.9x
G. A. Morris	4.0x	19.3x
C. M. Cuddy	4.0x	20.5x
I. Pinner	4.0x	5.2x

CERTAIN EQUITY AWARDS No stock options were granted in 2024. With respect to the grant of RSUs and PSUs, the Compensation and Succession Committee approves all annual equity awards to NEOs at a meeting during the first quarter of each fiscal year, and awards are granted promptly thereafter. In addition to annual awards, NEOs may receive awards when they join the Company or change their job status, including promotions. The Compensation and Succession Committee does not take material nonpublic information into account when determining the timing and terms of equity awards, and the Company does not time the disclosure of material nonpublic information for the purpose of affecting the value of executive compensation.

CLAWBACK POLICY AND PROVISIONS In 2023, our Board of Directors adopted a new Compensation Recovery Policy (the "Clawback Policy") in accordance with the listing standards of the New York Stock Exchange. The Clawback Policy applies to all incentive-based compensation, which is any compensation that is granted, earned, or vested based wholly or in part upon the attainment of a financial reporting measure, received by our covered current and former executive officers, including our NEOs, during the applicable lookback period beginning October 2, 2023. The Clawback Policy applies in the case of an accounting restatement due to the material noncompliance of the Company with any financial reporting requirement under the securities laws, including any required accounting restatement to correct an error in previously issued financial statements that is material to the previously issued financial statements, or that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period. The Clawback Policy provides that promptly following such an accounting restatement, the Compensation and Succession Committee will determine the amount of the erroneously awarded compensation, which is the excess of the amount of incentive-based compensation received by current and former executive officers during the three completed fiscal years immediately preceding

the required restatement date over the amount of incentive-based compensation that otherwise would have been received had it been determined based on the restated amounts. The Company will provide each such executive officer with a written notice of such amount and a demand for repayment or return. If such repayment or return is not made within a reasonable time, the Clawback Policy provides that the Company will recover the erroneously awarded compensation in a reasonable and prompt manner using any lawful method, subject to limited exceptions as permitted by New York Stock Exchange listing standards. As previously disclosed, during 2024, the Company amended its Annual Report on Form 10-K for the fiscal year ended December 31, 2023, and its Quarterly Reports on Form 10-Qs for the first and second quarters of 2024, to restate the segment information disclosure for each of the periods included in those filings. In accordance with the Clawback Policy, the Compensation and Succession Committee evaluated whether there was any erroneously awarded compensation subject to recovery under the Clawback Policy. The Compensation and Succession 60 | ADM Proxy Statement 2025 COMPENSATION DISCUSSION AND ANALYSIS — Compensation Policies and Governance Committee concluded that there was no erroneously awarded compensation requiring recovery under the Clawback Policy, because the restated amounts did not impact the achievement of any financial reporting measure used in determining incentive-based compensation of the covered executives for awards received by covered executive officers during the applicable lookback period. We also include forfeiture and clawback provisions in the Company's long-term incentive award agreements that provide us with the ability to recover this compensation for a broad range of reasons. Specifically, the agreements provide for the recoupment or forfeiture of equity incentive awards made to NEOs and certain other members of senior management if the individual is terminated for cause (which includes engaging in a broad range of prohibited conduct), and, beginning with awards granted in 2024, if the individual engages in any such prohibited conduct, even if his or her employment is not terminated. In addition, our equity award agreements incorporate non-competition, non-solicitation and confidentiality restrictions. Any violation of these provisions could be cause for the awards to be forfeited or the Company to initiate a clawback proceeding post-vesting. Our approach to recoupment of long-term incentive compensation reflects the Company's commitment to protecting stockholder value. PROHIBITION ON HEDGING AND PLEDGING Pursuant to our Insider Trading Policy, employees and directors may not engage in short selling, speculative trading, or hedging transactions involving the Company's stock (including writing or trading in options, warrants, puts and calls, prepaid variable forward contracts, or equity swaps or collars), or enter into other transactions that are designed to hedge or offset decreases in the price of the Company's securities. In addition, directors and those officers and employees who have been notified by the Company's Legal Department that they are subject to the requirements of Section 16 of the Exchange Act are prohibited from pledging Company securities as collateral, and any other employee wishing to enter into such an arrangement must first consult with, and comply with the directions of, the Legal Department. SECTION 162(M) OF THE INTERNAL REVENUE CODE EFFECTS ON THE COMPANY Section 162(m) of the Internal Revenue Code generally disallows a company from taking a federal income tax deduction for compensation paid in excess of \$1 million to "covered employees" as defined under Section 162(m). As a general matter, while the Compensation and Succession Committee is mindful of the benefit to the Company of the full deductibility of compensation, it believes that it should maintain flexibility in compensating the Company's executive officers in a manner appropriate to attract, motivate and retain executive talent and to promote our corporate objectives. EVALUATION OF RISK IN OUR COMPENSATION PROGRAMS On an ongoing basis, the Compensation and Succession Committee, with input from management, assesses potential risks

associated with compensation decisions and discusses them with our Board of Directors if warranted. To date, we have not identified any incentive compensation features that encourage inappropriate risk-taking. To ensure we are considering all possibilities objectively, we engage an outside consultant every other year to review the Company's programs and independently assess the risk in them. In 2023, the Company engaged Meridian to assist the Compensation and Succession Committee in evaluating the risk in our compensation programs. As part of its independent assessment, Meridian reviewed all of the Company's incentive compensation programs and determined that none encourage inappropriate risk-taking or the manipulation of earnings. The detailed findings of this review were discussed with management and presented to the Compensation and Succession Committee in November 2023. ADM Proxy Statement 2025 | 61 COMPENSATION DISCUSSION AND ANALYSIS — Employment Agreements, Severance, and Change in Control Benefits

EMPLOYMENT CONTRACTS None of our NEOs has an employment contract or separation agreement. Consistent with our approach of rewarding performance, employment is not guaranteed, and either ADM or any NEO may terminate the employment relationship at any time. ADM maintains a severance program that serves as a guideline for severance benefits that may be provided to various levels of employees, including the NEOs, upon termination of their employment without cause, but the program does not give anyone a contractual right to receive any severance benefits. The Compensation and Succession Committee generally requires a terminated employee to enter into a non-competition and/or non-solicitation agreement in exchange for receiving severance. From time to time, the Company may enter into individual arrangements when an executive officer is hired, such as the offer letter with Mr. Patolawala that provides for a different treatment than other equity awards upon certain terminations of employment, but only with respect to the one-time make-whole RSUs award that he received. Such RSUs provide that in the event Mr. Patolawala is terminated without cause or terminates his employment for good reason prior to the 18-month anniversary of the grant, the unvested portion of the grant will accelerate and become fully vested. The Company may also enter into individual arrangements upon the departure of an executive officer, such as the Transition Agreement entered into with Mr. Luthar as described above.

CHANGE IN CONTROL PROVISIONS Upon a change in control of the Company, NEOs may receive certain protections related to their LTI awards (as described below), and other compensation detailed in the sections titled "Pension Benefits," "Nonqualified Deferred Compensation," and "Termination of Employment and Change in Control Arrangements." NEOs are not eligible to receive any other cash severance, continued health and welfare benefits, tax gross ups, or other change in control benefits. Our incentive compensation plans provide non-employee directors and all employees, including executive officers, certain change in control protections for their LTI awards. If a change in control occurs with respect to the Company and equity awards are not assumed or replaced, the RSUs held by executive officers generally will vest immediately, and the number of PSUs that will vest immediately will be equal to the greater of the target number of PSUs and the number of PSUs earned based on actual performance during the truncated performance period. The same accelerated vesting provisions will apply if an award is assumed or replaced, but the executive officer's employment is terminated for reasons other than for cause or good reason within 24 months of the change in control (referred to as "double-trigger" vesting). We adopted double-trigger accelerated vesting to provide our executives with some assurance that they will not be disadvantaged with respect to their equity awards in the event of a change in control of the Company. This assurance increases the value of these awards to the executives (which in turn enhances retention) and makes it easier for our executives to focus on the

potential benefits of a change in control for our stockholders without conflicting concerns about their own financial situations. Compensation and Succession Committee Report The Compensation and Succession Committee has reviewed and discussed the Compensation Discussion and Analysis with management. Based upon this review and discussion, the Compensation and Succession Committee recommended to the Board of Directors that the Compensation Discussion and Analysis be included in this proxy statement. K. R. Westbrook, Chair T. Colbert J. C. Collins D.R. McAtee II L. Z. Schlitz Compensation and Succession Committee Interlocks and Insider Participation None of the members of the Compensation and Succession Committee is or has been an employee of the Company or any of the Company's subsidiaries. There are no interlocking relationships between the Company and other entities that might affect the determination of the compensation of the Company's executive officers.

ADM Proxy Statement 2025 | 63 EXECUTIVE COMPENSATION — Summary Compensation Table (2) Stock awards in 2024 consisted of RSU awards and PSU awards. The amounts reported in this column represent the aggregate grant date fair value of the RSU awards for fiscal years 2024, 2023, and 2022 and of the target level of the PSU awards for fiscal years 2024, 2023 and 2022. We calculated these amounts in accordance with the provisions of FASB ASC Topic 718 utilizing the assumptions discussed in Note 11 to our financial statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2024. The grant date fair value of the 2024 RSUs and the grant date fair value of the 2024 PSUs if target performance and maximum performance is achieved are as follows: PSUs Name RSUs Target Maximum J. R. Luciano \$ 7,080,017 \$10,620,057 \$21,240,114 M. Patolawala \$12,780,029 \$ 4,170,036 \$ 8,340,072 I. Roig \$ 1,480,045 \$ 720,027 \$ 1,440,054 G. A. Morris \$ 1,320,019 \$ 1,980,059 \$ 3,960,117 C. M. Cuddy \$ 1,240,036 \$ 1,860,024 \$ 3,720,048 I. Pinner \$ 1,200,045 \$ 1,800,037 \$ 3,600,074 V. Luthar \$ — \$ — \$ — (3) The amounts reported in this column represent amounts earned under our annual incentive plan during each of the respective fiscal periods shown.

In each case, the amounts were paid after the close of the applicable fiscal period. (4) The amounts reported in this column for 2024 represent the aggregate change in actuarial present value of each named executive officer's accumulated benefit under all defined benefit and actuarial pension plans from December 31, 2023 to December 31, 2024, using the same assumptions used for financial reporting purposes except that retirement age is assumed to be the normal retirement age (65) specified in the plans. No NEO received above market or preferential earnings on deferred compensation. To derive the change in pension value for financial reporting purposes, the assumptions used to value pension liabilities on December 31, 2024 were an interest rate of 5.69% for the ADM Retirement Plan, an interest rate of 5.51% for the ADM Supplemental Retirement Plan, and mortality was determined using the PRI-2012 mortality table, with a white collar adjustment, projected generationally using Scale MP-2021. The assumptions used to value pension liabilities on December 31, 2023 were an interest rate of 4.96% for the ADM Retirement Plan, an interest rate of 4.84% for the ADM Supplemental Retirement Plan, and mortality was determined using the PRI-2012 mortality table, with a white collar adjustment, projected generationally using Scale MP-2021. (5) The amounts reported in this column for 2024 include costs for use of company-leased aircraft and spousal travel, relocation expenses, value of company-provided life insurance, imputed value of company-provided life insurance, the value of health insurance company-paid premiums, costs for executive healthcare services, dividend equivalents paid on unvested RSUs, accrued dividends for unvested PSUs, company contributions under the 401(k) and ESOP, and charitable gifts pursuant to the Company's matching charitable gift program and, for Mr. Roig, expenses related to certain expatriate tax services and tax gross ups related thereto. Personal financial planning services were available to our executive officers in 2024, but because such services are provided by the provider of other services to the Company, and such provider does not charge any additional amounts for the individual financial planning services to our executive officers, there is no incremental cost to the Company for such services. Specific perquisites and other items applicable to each NEO listed are identified below by an "X". Where a perquisite was equal to or exceeded \$10,000 for an individual, the dollar amount is given. Name Personal Aircraft Use and Spousal Travel (\$) Relocation Expenses (\$) Expatriate Tax & Gross-Up Expenses (\$) Imputed Income Health Insurance Company Paid Premiums & Company- Provided Life Insurance (\$) Executive Healthcare Services Dividend Equivalents Paid on Unvested RSUs and Accrued on Unvested PSUs (\$) Matching Charitable Gifts 401(k) Company Contributions (\$) J. R. Luciano X — — X 19,046 X 1,084,138 — 17,250 M. Patolawala — 184,122 — X X — 280,259 — — I. Roig 19,335 65,799 517,155 X X X 94,570 — 17,250 G. A. Morris — — — X 22,572 X 201,249 X 17,250 C. M. Cuddy — — — X 16,650 X 194,054 10,000 17,250 I. Pinner — — — X 26,566 X 149,589 — 17,250 V. Luthar — — — X 22,414 X 102,364 — 17,250 Aggregate incremental cost to our Company of perquisites and personal benefits is determined as follows. In the case of payment of expenses related to items such as executive healthcare services, incremental cost is determined by the amounts paid to third-party providers. In the case of personal use of company-leased aircraft, incremental cost is based solely on variable costs under the agreements with the lessor of the aircraft, and does not include fixed or other costs. 64 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Summary Compensation Table (6) Mr. Patolawala joined the Company as Executive Vice President and Chief Financial Officer on August 1, 2024. (7) Mr. Roig was appointed to serve as Interim Chief Financial Officer on January 21, 2024 and served in that role until Mr. Patolawala joined the Company on August 1, 2024. During the time that he served as Interim Chief Financial Officer, Mr. Roig received a cash stipend, in addition to his base salary, which cash stipend amount aggregated to \$222,419 and is included in the Salary column. Prior to and following his time as Interim Chief Financial Officer, Mr. Roig served as President

of EMEA and President of Animal Nutrition. Mr. Roig was not an NEO in 2023 or 2022. (8) Mr. Pinner was not an NEO in 2023 or 2022. (9) Mr. Luthar was placed on administrative leave effective January 19, 2024, transitioned to a non-executive employee role in April 2024, and resigned from the Company effective September 30, 2024. ADM Proxy Statement 2025 | 65 EXECUTIVE COMPENSATION — Grants of Plan-Based Awards During Fiscal Year 2024

Grants of Plan-based Awards During Fiscal Year 2024

(1) The grant date fair value is generally the amount the Company would expense in its financial statements over the award's service period under FASB ASC Topic 718. With respect to the PSUs, the value represents the probable outcome of the performance condition using target payout levels. See footnote (2) to the Summary Compensation Table for additional detail. (2) The amounts under the "Estimated Possible Payouts Under Non-Equity Incentive Plan Awards" columns for Mr. Patolawala are prorated based on his hire date. (3) The amounts under the "Estimated Possible Payouts Under Non-Equity Incentive Plan Awards" columns for Mr. Luthar reflect the prorated amounts under the company performance component of the 2024 annual cash incentive program, the component for which he was eligible to receive an award pursuant to the Transition Agreement. 66 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Grants of Plan-Based Awards During Fiscal Year 2024

All of the equity awards in the table above were granted under our 2020 Incentive Compensation Plan. The awards shown in the columns designated "Estimated Possible Payouts Under Non-Equity Incentive Plan Awards" were made pursuant to our annual cash incentive plan. The amounts actually paid with respect to these awards are reflected in the Summary Compensation Table in the "Non-Equity Incentive Plan Compensation" column. See "Compensation Discussion and Analysis—2024 Executive Compensation Decisions—2024 Annual Cash Incentives" for more information about our annual cash incentive plan. The PSU awards shown in the columns designated "Estimated Future Payouts Under Equity Incentive Plan Awards" in the table above vest in three years if the Company achieves certain performance goals over a three-year performance period (2024—2026). The 2024 PSU metrics are: (i) the degree to which the Company achieves specified average adjusted ROIC goals over the

2024—2026 performance period (50% weighting), and (ii) the degree to which the Company achieves cumulative adjusted EPS over the 2024—2026 performance period (50% weighting). The number of 2024 PSUs that may be earned following the application of such performance goals against actual performance will be subject to a two-goal Strive 35 modifier of up to +/-10%. During the performance period, dividend equivalents will be accrued and settled in cash at the end of the three-year performance period on the basis of number of PSUs actually earned. Dividend equivalents on PSUs are paid at the same rate as dividends to our stockholders generally. All of the awards shown in the “All Other Stock Awards” column in the table above are RSU awards and vest in thirds on each of the first three anniversaries of the date of grant, other than 165,344 of the RSUs for Mr. Patolawala, which vest 25% six months from the date of grant, 25% 12 months from the date of grant and 50% 18 months from the date of grant. Under the terms of the RSU award agreements, the recipient of the award may receive cash dividend equivalents on RSUs prior to their vesting date, but may not transfer or pledge the units in any manner prior to vesting. Dividend equivalents on RSUs are paid at the same rate as dividends to our stockholders generally. The 2024 RSU and PSU awards are subject to double-trigger accelerated vesting and payout upon a change in control only if the award recipient’s employment is terminated without cause or if the award recipient resigns for good reason, in each case, within 24 months after the change in control, or if the surviving entity in the change in control transaction refuses to continue, assume, or replace the awards. In such instance the 2024 RSU awards will vest in full immediately, and the number of 2024 PSU awards that vest will be equal to the greater of the target number of PSUs and the number of PSUs earned based on actual performance during the truncated performance period. Upon the death of an award recipient, vesting of the RSU awards will accelerate in full, and the PSU awards will vest at target. If an award recipient’s employment ends as a result of disability or retirement, the RSU and PSU awards will continue to vest in accordance with the original vesting schedule. If an award recipient’s employment ends for any other reason, unvested RSU and PSU awards will be forfeited, other than the 165,344 one-time make-whole RSUs granted to Mr. Patolawala, which provide that if he is terminated without cause or terminates his employment for good reason prior to the 18-month anniversary of the grant, the unvested portion of the RSUs will accelerate and become fully vested. With respect to the 2024 RSU and PSU awards, if the Company determines that an award recipient has engaged in any act that constitutes cause, even if his or her employment is not terminated, or if the recipient breaches a non-competition, non-solicitation or confidentiality restriction, the recipient’s unvested units will be forfeited, and any shares issued in settlement of units that have already vested must be returned to us or the recipient must pay us the amount of the shares’ fair market value as of the date they were issued. The impact of a termination of employment or change in control of our Company on RSU and PSU awards held by our named executive officers is quantified in the “Termination of Employment and Change in Control Arrangements” section below.

ADM Proxy Statement 2025 | 67 EXECUTIVE COMPENSATION —

Outstanding Equity Awards at Fiscal Year 2024 Year-End Outstanding Equity Awards at Fiscal Year 2024 Year-End The following table summarizes information regarding unexercised stock options, unvested RSUs, and unearned PSUs for the named executive officers as of December 31, 2024.

Luthar — 5,650 4,171 — — — — 6,743 — 5,650 — — — — — 68 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Option Exercises and Stock Vested During Fiscal Year 2024 (3) Based on the closing market price of a share of our common stock on the New York Stock Exchange on December 31, 2024, the last trading day of 2024, which was \$50.52. (4) The awards reported in this column represent 2023 PSU and 2024 PSU awards that each will vest following the end of the three-year performance period. The number of PSUs that the executive officer will receive is dependent upon the achievement of certain financial metrics approved by the Compensation and Succession Committee measuring Adjusted ROIC, Adjusted EPS and a two-goal modifier. The amount of PSUs shown is the target number of units that could be earned and paid out in shares. This table does not include the 2022 PSU awards that were earned for the 2022-2024 performance period, because those earned PSUs were not subject to an additional service-based vesting period and instead vested upon the Compensation and Succession Committee's determination of the number of PSUs earned. The earned 2022 PSUs are reported in the "Option Exercises and Stock Vested During Fiscal Year 2024" table. The PSUs reported in this column have the following performance periods in the following amounts. Performance Share Units: Name Performance Period 1/1/23 to 12/31/25 Performance Period 1/1/24 to 12/31/26 J. R. Luciano 131,762 173,219 M. Patolawala — 68,949 I. Roig 8,934 11,919 G. A. V. LUTHAR	ADM Retirement Plan	20	300,534	—
	ADM Supplemental Retirement Plan	20	185,993	—

(1) The number of years of credited service was calculated as of the pension plan measurement date used for financial statement reporting purposes, which was December 31, 2024, except for Mr. Luthar whose resignation was effective September 30, 2024. For each of the named executive officers, the number of years of credited service is equal to the number of actual years of service with our Company. (2) The assumptions used to value pension liabilities as of December 31, 2024 were an interest rate of 5.69% for the ADM Retirement Plan and 5.51% for the ADM Supplemental Retirement Plan and mortality was determined under the PRI-2012 mortality table, with a white collar adjustment, projected generationally using scale MP-2021. Messrs. Luthar, Morris Cuddy and Pinner had previously participated in the final average pay formula under the ADM Retirement Plan and the ADM Supplemental Retirement Plan, while Messrs. Luciano, Roig and Patolawala had always participated in the cash balance formula under those plans. Effective 1/1/2022, all participants now earn benefits under the cash balance formula in those plans, including Mr. Patolawala who joined the Company in 2024. The amounts reported for each of the named executive officers are the present value of their respective projected normal retirement benefit under the Retirement and Supplemental Plans at December 31, 2024. The amounts reported are calculated by projecting the balance in the accounts forward to age 65 by applying a 4.37% interest rate, converting to a single-life annuity as of age 65, and then discounting back to December 31, 2024 using the assumptions specified above. The total account balance for Mr. Luciano at December 31, 2024 under the Retirement and Supplemental Plans was \$685,797, and the total account balance for Mr. Roig at December 31, 2024 under the Retirement and Supplemental Plans was \$413,461. This is the amount that would have been distributable if such individual had terminated employment on that date. Mr. Luthar terminated employment in 2024 and is entitled to a lump sum payout under the Retirement and Supplemental Plans as of his termination date. Qualified Retirement Plan We sponsor the ADM Retirement Plan (the "Retirement Plan"), which is a qualified defined benefit plan under Section 401(a) of the Internal Revenue Code. The Retirement Plan covers eligible salaried employees of our Company and its participating affiliates. Effective January 1, 2009, the Retirement Plan was amended to provide benefits determined under a cash balance formula. The cash balance formula initially applied to any participant entering or re-entering the plan on or after January 1, 2009 and to any participant who had less than five years of service prior to January 1, 2009. For a participant with an accrued benefit and less than five years of service prior to January 1, 2009, an account was established on January 1, 2009 with an opening balance equal to the present value of his or her accrued benefit determined under the Retirement Plan's prior final average pay formula. From January 1, 2009 through December 31,

2021, the accrued benefits of all other participants to whom the cash balance formula did not apply continued to be determined under the traditional final average pay formula. 70 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Qualified Retirement Plan In December 2017, the Retirement Plan was amended to freeze the traditional final average pay formula benefit accruals as of December 31, 2021 for all active final average pay formula participants in the Retirement Plan on that date. Final average pay accrued benefits are calculated as if the participant terminated employment on the earlier of their actual termination date or December 31, 2021. The final average pay benefit was not converted to a cash balance benefit but remains subject to the final average pay benefit rules. As of January 1, 2022, all Retirement Plan participants accrue future benefits under the cash balance formula, based on their age and total years of service. Messrs. Luciano, Patolawala and Roig participate only in the cash balance formula, while Messrs. Luthar, Morris, Cuddy and Pinner participate in the cash balance formula and have a frozen final average pay formula benefit as well.

Cash Balance Formula: Under the cash balance formula, a participant has an individual hypothetical account established under the Retirement Plan. Pay and interest credits are credited on an annual basis to the participant's account. Pay credits are equal to a percentage of the participant's earnings for the year based on the sum of the participant's age and years of service at the end of the year under the schedule below.

AGE + SERVICE	PAY
Less than 40	2.00%
at least 40 but less than 50	2.25%
at least 50 but less than 60	2.50%
at least 60 but less than 70	3.00%
at least 70 but less than 80	3.50%
80 or more	4.00%

Interest credits are made at the end of the year and are calculated on the balance of the participant's account as of the first day of the plan year, using an interest rate based upon the yield on 30-year Treasury bonds, subject to a minimum annual interest rate of 1.95%. The participant's pension benefit will be the amount of the balance in the participant's account at the time that the pension becomes payable under the Retirement Plan. The pension payable to a participant whose accrued benefit under the final average pay formula was converted to the cash balance formula at January 1, 2009, if paid in annuity form, will be increased to reflect any additional benefit which the participant would have received in that form under the traditional formula, but only with respect to the benefit accrued by the participant prior to January 1, 2009. A participant under the cash balance formula becomes vested in a benefit under the Retirement Plan after three years of service. There are no special early retirement benefits under the cash balance formula.

Final Average Pay Formula: For any participant who accrued a benefit under the final average pay formula prior to January 1, 2022, the formula calculated a life annuity payable at a normal retirement age of 65 based upon a participant's highest average earnings over 60 consecutive months during the last 15 years of employment (or the last 15 years prior to December 31, 2021, for those employed on that date). The final average pay formula provides a benefit of 36.0% of a participant's final average earnings, plus 16.5% of the participant's final average earnings in excess of Social Security "covered compensation." This benefit accrues ratably over 30 years of service. A participant accrues an additional benefit of 0.5% of final average earnings for years of service in excess of 30. Early retirement is available at age 55 with 10 years of service. Final average pay formula normal retirement age benefits were frozen as of the earlier of a participant's termination of employment or December 31, 2021, and will not increase in the future. The life annuity payable at early retirement is subsidized relative to the normal retirement benefit. The payment amount in life annuity form is 97% of the full benefit amount at age 64, and 50% at age 55, with adjustments between those two ages. All participants with the final average pay formula benefit are vested in their final average pay formula benefits under the Retirement Plan, based on five years of service. Earnings for purposes of the cash balance and the final average pay formulas generally include amounts reflected as pay on Form W-2, increased by 401(k) Plan pre-tax

deferrals and elective “cafeteria plan” contributions, and decreased by bonuses, expense allowances/ reimbursements, severance pay, income from stock option and restricted stock awards or cash payments in lieu thereof, merchandise or service discounts, amounts paid in a form other than cash, and other fringe benefits. Annual earnings are limited as required under Section 401(a)(17) of the Internal Revenue Code. When a participant is eligible for a pension, the participant has a choice of a life annuity, a joint and 50% survivor annuity, a joint and 75% survivor annuity, or a joint and 100% survivor annuity. Each joint and survivor annuity form is the actuarial equivalent (as defined under the Retirement Plan) of the life annuity payable at the same age. Individuals with a cash balance formula benefit may also elect their cash balance formula benefit be paid in a lump-sum payment. ADM Proxy Statement 2025 | 71 EXECUTIVE COMPENSATION — Supplemental Retirement Plan Supplemental Retirement Plan We also sponsor the ADM Supplemental Retirement Plan (the “Supplemental Plan”), which is a nonqualified deferred compensation plan under Section 409A of the Internal Revenue Code. The Supplemental Plan covers participants in the Retirement Plan whose benefit under such plan is limited by the benefit limits of Section 415 or the compensation limit of Section 401(a)(17) of the Internal Revenue Code. The Supplemental Plan also covers any employee whose Retirement Plan benefit is reduced by participation in the ADM Deferred Compensation Plan. Participation by those employees who otherwise qualify for coverage is at the discretion of the Board, the Compensation and Succession Committee or, in the case of employees other than executive officers, the Chief Executive Officer. The Supplemental Plan provides the additional benefit that would have been provided under the Retirement Plan but for the limits of Section 415 or 401(a)(17) of the Internal Revenue Code, and but for the fact that elective contributions made by the participant under the ADM Deferred Compensation Plan are not included in the compensation base for the Retirement Plan. A participant is not vested in a benefit under the Supplemental Plan unless and until the participant is vested in a benefit under the Retirement Plan, which requires three years of service for a cash balance formula participant and five years of service for a final average pay formula participant for vesting. A separate payment form election is required with respect to the Supplemental Plan benefit from among the same options available under the Retirement Plan, subject to the limitations of Section 409A of the Internal Revenue Code. Nonqualified Deferred Compensation The following table summarizes information with respect to the participation of the named executive officers in the ADM Deferred Compensation Plan for Selected Management Employees II, which is a non-qualified deferred compensation plan, for the fiscal year ended December 31, 2024.

Name	Executive Contributions in Last Fiscal Year (\$)	Aggregate Earnings in Last Fiscal Year (\$)	Aggregate Withdrawals/ Distributions in Last Fiscal Year (\$)	Aggregate Balance at 12/31/24 (\$)

C. M. CUDDY	—	—	—	—
I. PINNER	808,505	—	—	—
V. LUTHAR	97,119	865,712	—	—

We sponsor two nonqualified deferred compensation plans—the ADM Deferred Compensation Plan for Selected Management Employees I and II (referred to as “Deferred Comp Plan I” and “Deferred Comp Plan II”, respectively). Deferred Comp Plan I was frozen as to new participants and new deferrals effective January 1, 2005, and is maintained as a separate “grandfathered” plan under Section 409A of the Internal Revenue Code. Deferred Comp Plan II is structured to comply with Section 409A. Deferred Comp Plan II covers salaried employees of our Company and its affiliates whose annualized base salary is \$175,000 or more. Participation by those employees who otherwise qualify for coverage is at the discretion of the Board, the Compensation and Succession Committee or, in the case of employees other than executive officers, the Chief Executive Officer. A participant in Deferred Comp Plan II can defer up to 75% of his or her base salary and up to 100% of his or her bonus. Earnings credits are added based upon hypothetical investment elections

made by participants. A participant can elect each year when to be paid the base salary or bonus amounts deferred for that year, by electing to be paid upon a specified future date prior to separation from service or following retirement, in the form of a lump sum or in installments over a period of two to twenty years. If a participant separates from service prior to the elected payment date (or prior to qualifying for retirement), the payment will be made in a lump sum after separation from service, subject to the six month "specified employee" payment delay required by Section 409A. Withdrawals are allowed upon a showing of "hardship" by the participant in accordance with Section 409A. Small account balances of \$10,000 or less are paid in a lump sum only. Deferred Comp Plan II provides for "make-whole" company credits to the extent that a participant's election to defer under the Deferred Comp Plan II causes a loss of company contributions under the 401(k) and ESOP. No "make-whole" company credits were made on behalf of the named executive officers for fiscal year 2023. A participant with an account balance remaining under Deferred Comp Plan I continues to receive earnings credits on such account based upon hypothetical investment elections made by the participant. A participant can establish up to two "scheduled distribution accounts" that 72 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Nonqualified Deferred Compensation are payable upon dates specified by the participant in either a lump sum or installments over a period of two to four years. A participant also can take unscheduled withdrawals of up to 25% of the balance of his or her accounts, subject to a withdrawal penalty of 10% of the withdrawn amount. Only one such unscheduled withdrawal is allowed in any year. Withdrawals also are allowed upon a showing of "hardship" by the participant. A participant's account under Deferred Comp Plan I is paid following termination of employment. Payment following termination of employment is in a lump sum, except that a participant can elect to have installments paid over a period of two to 20 years if termination of employment occurs after retirement eligibility or due to disability. Deferred Comp Plan I balances are fully vested. A participant becomes vested in his or her company credits to Deferred Comp Plan II after two years of service. Unpaid amounts at death are paid to designated beneficiaries. The hypothetical investment options available under Deferred Comp Plans I and II are determined by the Company and correspond with the investment options (other than our Company's common stock) that are made available to participants in the qualified 401(k) and ESOP. These investment options are listed below, and the plan earnings credited to each participant's account in these plans correspond to the earnings performance of the investment selected. Participants in the Deferred Comp Plans I and II may reallocate the amount of new deferrals and existing account balances among these investment options at any time. We do not set assets aside for the benefit of plan participants, but the Deferred Comp Plans I and II provide for full funding of all benefits upon a change in control or potential change in control, as defined in the plans. In fiscal year 2024, the investment options available under Deferred Comp Plans I and II and their respective notional rates of return were as follows: Deemed Investment Option Fiscal Year 2024 Cumulative Return (1/1/24 to 12/31/24) Loomis Sayles Core Plus Fixed Income Class F 1.20% Vanguard Institutional 500 Index Trust 24.99% T. See the tabular disclosure and narrative description under the “Pension Benefits” and “Nonqualified Deferred Compensation” sections above for detail regarding payments that would result from a termination of employment or change in control of our Company under our pension and nonqualified deferred compensation plans. Under the terms of our stock option agreements, vesting and exercisability accelerate upon the death of the recipient or change in control of our Company, and continue in accordance with the original vesting schedule if employment ends as a result of disability or retirement. If employment ends for reasons other than death, disability, retirement, or cause, a recipient forfeits any interest in the unvested portion of any option but retains the right to exercise the previously vested portion of any option for a period of three months. In addition, if an award recipient’s employment is terminated for cause, or if the recipient breaches a non-competition or confidentiality restriction or participates in an activity deemed by us to be detrimental to our Company, the recipient’s right to exercise any unexercised options will terminate, the recipient’s right to receive option shares will terminate, and any shares already issued upon exercise of the option must be returned to us in exchange for the lesser of the shares’ then-current fair market value or the price paid for the shares, or the recipient must pay us cash in the amount of the gain realized by the recipient from the exercise of the option. Under the terms of the outstanding RSU award agreements, vesting accelerates in connection with a change in control of the Company only if the executive’s employment is terminated without cause or if the executive resigns for good reason, in each case, within 24 months after the change in control, or if the surviving entity in the change in control transaction refuses to continue, assume, or replace the awards. In addition, under the RSU award agreements, vesting accelerates upon death and continues in accordance with the original vesting schedule if employment ends as a result of disability or retirement. If employment ends for other reasons, the unvested portion of each award is forfeited, other than the one-time make-whole RSUs granted to Mr. Patolawala as described above. In addition, if an executive’s employment is terminated for cause in the case of the 2022 and 2023 RSUs, or the Company determines the executive has engaged in any act that would constitute cause in the case of the 2024 RSUs, or if the executive breaches a non-competition, non-solicitation or confidentiality restriction in the case of any of the RSUs, the executive’s unvested awards will be forfeited, and any award shares that have already been issued in settlement must be returned to us or the executive must pay us the amount of the shares’ fair market value as of the date the award vested. Under the terms of the award agreements for the 2022 PSUs, the 2023 PSUs and the 2024 PSUs, vesting accelerates upon the death of the executive, and the target number of units would vest. Further, vesting of PSU awards accelerates in connection with a change in control of our Company only if the executive’s employment is terminated without cause or if the executive resigns for good reason, in each case, within 24 months after the change in control, or if the surviving entity in the change in control transaction refuses to continue, assume, or replace the awards. In such cases, the number of PSUs that vest will be equal to the greater of the target number of units or the number of PSUs earned based on actual performance during the truncated performance period. If employment ends as a result of disability or retirement, vesting will continue in accordance with the original vesting schedule. If employment ends for other reasons, the

unvested portion of each award is forfeited. In addition, if an executive's employment is terminated for cause in the case of the 2022 and 2023 PSUs, or the Company determines the executive has engaged in any act that would constitute cause in the case of the 2024 PSUs, or if the executive breaches a non-competition, non-solicitation or confidentiality restriction in the case of any of the PSUs, the executive's unvested awards will be forfeited, and any award shares that have already been issued in settlement must be returned to us or the executive must pay us the amount of the shares' fair market value as of the date the award vested. Other than for Mr. Luthar, the amount of compensation payable to each named executive officer in various termination and change in control scenarios is listed in the table below. These payments and benefits are provided under the terms of agreements involving equity compensation awards. Unless otherwise indicated, the amounts listed are calculated based on the assumption that the named executive officer's employment was terminated or that a change in control occurred on December 31, 2024. None of the named executive officers held any nonvested stock options as of such date. 74 | ADM Proxy Statement 2025 EXECUTIVE COMPENSATION — Termination of Employment and Change in Control Arrangements As described above, Mr. Luthar resigned from ADM effective September 30, 2024. As provided by SEC rules, the table below sets forth information for Mr. Luthar for only the scenario that actually occurred for him. Name Voluntary Termination (\$) Involuntary Termination without Cause (\$) Termination for Cause (\$) Death (\$) (1) Disability (\$) Change in Control (\$) (3) Change in Control (Non- Assumption of Awards or Involuntary Termination Without Cause or Termination for Good Reason) (\$) (4) Retirement (\$) J. R. Luciano Vesting of nonvested RSU awards (6) (6) — 13,398,409 (2) — 13,398,409 (6) Vesting of nonvested PSU awards (6) (6) — 19,301,520 (2) — 19,301,520 (6) M. Patolawala Vesting of nonvested RSU awards 8,353,179 8,353,179 — 10,675,381 (2) — 10,675,381 (5) Vesting of nonvested PSU awards — — — 3,483,303 (2) — 3,483,303 (5) I. Roig Vesting of nonvested RSU awards (6) (6) — 1,668,069 (2) — 1,668,069 (6) Vesting of nonvested PSU awards (6) (6) — 1,248,198 (2) — 1,248,198 (6) G. A. Morris Vesting of nonvested RSU awards — — — 2,476,238 (2) — 2,476,238 (5) Vesting of nonvested PSU awards — — — 3,567,369 (2) — 3,567,369 (5) C. M. Cuddy Vesting of nonvested RSU awards — — — 2,392,829 (2) — 2,392,829 (5) Vesting of nonvested PSU awards — — — 3,429,348 (2) — 3,429,348 (5) I. Pinner Vesting of nonvested RSU awards — — — 1,853,680 (2) — 1,853,680 (5) Vesting of nonvested PSU awards — — — 3,149,316 (2) — 3,149,316 (5) V. Luthar Vesting of nonvested RSU awards (7) — — — — — — Vesting of nonvested PSU awards (7) — — — — — — (1) Pursuant to the terms of the RSU awards issued under the 2020 Incentive Compensation Plan, vesting and exercisability of these equity awards are accelerated in full upon death. The amount shown with respect to RSU awards was calculated by multiplying the number of units as to which accelerated vesting and settlement occurs by \$50.52, the closing sale price of a share of our common stock on the NYSE on December 31, 2024, the last trading day of 2024. Due to the fact that the performance period for the 2022 PSUs ended on December 31, 2024, the amounts in this column related to the 2022 PSUs consist of the number of 2022 PSUs that actually were earned and vested for the applicable named executive officer, multiplied by \$50.52, the closing sale price of a share of our common stock on the NYSE on December 31, 2024. The PSUs granted in 2023 and 2024 provide that vesting of those awards will accelerate upon death in an amount equal to the target number of PSUs. Therefore, the amount shown in this column with respect to the 2023 and 2024 PSU awards is the target number of such awards, in each case multiplied by \$50.52, the closing sale price of a share of our common stock on the NYSE on December 31, 2024. (2) Pursuant to the terms of the award agreements issued under the 2020 Incentive Compensation Plan, vesting of these equity awards generally continues on the same schedule after termination of employment due to disability. (3) All outstanding RSUs and PSUs are subject to a double-trigger vesting

and payout mechanism upon a change in control, meaning that only if (i) within 24 months after the change in control, one of our executive officer's employment is terminated without cause or he or she resigns for good reason or (ii) the surviving entity in the change of control does not continue, assume, or replace the awards, the RSU awards will accelerate in full and the PSU awards will accelerate as described in footnote (4) below. Therefore, this column excludes all outstanding RSUs and PSUs. ADM Proxy Statement 2025 | 75 EXECUTIVE COMPENSATION — CEO Pay Ratio (4) All outstanding RSUs and PSUs are subject to a double-trigger vesting and payout mechanism upon a change in control, meaning that only if (i) within 24 months after the change in control, the named executive officer's employment is terminated without cause or he or she resigns for good reason or (ii) the surviving entity in the change of control does not continue, assume, or replace the awards, the RSU awards will accelerate in full and the number of 2022, 2023 and 2024 PSU awards that vest will be equal to the greater of the target number of units or the number of PSUs earned based on actual performance during the truncated performance period. This column includes (i) all unvested RSU awards, and (ii) a portion of the unvested PSU awards (calculated in the manner set forth in footnote (1)). The amounts shown with respect to the awards was calculated by multiplying the number of units as to which accelerated vesting and settlement occurs by \$50.52, the closing sale price of a share of our common stock on the NYSE on December 31, 2024. (5) Because this named executive officer is not yet eligible for retirement under the terms of the ADM Retirement Plan, no current termination of employment would be considered "retirement" under any of the applicable equity-based compensation plans. (6) Because this named executive officer is eligible for retirement, pursuant to the terms of the RSU award and PSU award agreements issued under the 2020 Incentive Compensation Plan, vesting of these equity awards generally continues on the same schedule after retirement, voluntary termination or involuntary termination without cause. (7) Pursuant to the terms of Mr. Luthar's Transition Agreement, upon his resignation, because he had met the age and service requirements of a retirement, he retained the RSUs and PSUs held by him at the time of his resignation and they continue to vest on the same schedule as their original terms. CEO Pay Ratio For our fiscal year 2024 pay ratio analysis, we determined that there has been no change in either our employee population or our employee compensation arrangements that we believe would significantly impact our fiscal year 2024 pay ratio disclosure. Similarly, there has been no change in the circumstances of the median employee who we identified for our fiscal year 2022 pay ratio analysis that we reasonably believe would result in a significant change to our fiscal year 2024 pay ratio disclosure. Because there were no such changes, we are using the same median employee identified for our fiscal year 2022 pay ratio analysis. Our median employee's annual total compensation for fiscal year 2024 was \$80,513. The annual total compensation of our Board Chair and CEO for fiscal year 2024 was \$21,569,894. The ratio between the Board Chair and CEO's annual total compensation to the annual total compensation of our median employee is 268:1. With respect to our median employee, we identified and calculated the elements of the employee's annual total compensation for 2024 in accordance with the requirements of Item 402(c)(2)(x) of Regulation S-K and also included \$25,138 as the estimated value of the median employee's 2024 employer-paid health care and basic life insurance premiums. With respect to the annual total compensation of our Board Chair and CEO, we used the amount reported in the Summary Compensation Table and also included \$19,046 as the estimated value of our Board Chair and CEO's 2024 employer-paid health care and basic life insurance premiums. SUPPLEMENTAL PAY RATIO Our global footprint drives the median pay level at ADM. Approximately 59% of our workforce is employed outside the United States. We aim to provide competitive pay and benefits for each employee's role in every business segment and geography. To be consistent with our compensation

philosophy, all global colleagues are paid based upon their local market as reviewed on an annual basis to ensure they are paid competitively. We believe this information is useful to put the SEC-required pay ratio provided above into context. In addition, as in prior years, we are also providing a supplemental pay ratio that includes our domestic employees only. We identified the median employee for purposes of the 2022 supplemental pay ratio analysis using the same methodology as the 2022 required pay ratio analysis. However, because the median employee who we identified for our 2022 supplemental pay ratio analysis is no longer employed by the Company, we used another employee in 2023 whose compensation is substantially similar to that median employee based on the compensation measure used to select the median employee for our 2022 supplemental pay ratio analysis. We have used the same colleague from 2023 for purposes of the 2024 supplemental pay ratio. Applying this methodology to our employees located in the United States only (other than our Board Chair and CEO), we determined that our median employee in fiscal year 2024 had annual total compensation in the amount of \$121,456. As a result, the fiscal year 2024 ratio of the total annual compensation of our Board Chair and CEO to the total annual compensation of our median employee in the United States, each as calculated above to include 2024 employer-paid health care and basic life insurance premiums, is 178:1. This supplemental pay ratio is not a substitute for the required CEO pay ratio, but we believe it is helpful in fully evaluating the ratio of our Board Chair and CEO's annual total compensation to that of our median employee.

76 | ADM Proxy Statement 2025

PAY VERSUS PERFORMANCE — Pay Versus Performance Table

PAY VERSUS PERFORMANCE TABLE The following table sets forth compensation information of our CEO (the "PEO") and other NEOs (the "Non-PEO NEOs"), on an average basis, along with total shareholder return, net income, and ROIC performance results for our fiscal years 2024, 2023, 2022, 2021 and 2020. For additional information regarding the Company's pay-for-performance philosophy and compensation objectives, including emphasizing multiple performance factors tied to stockholder value creation over short- and long-term time horizons, refer to the Compensation Discussion and Analysis ("CD&A;").

Fiscal Year	Summary Compensation Table (SCT) Total For PEO1 (\$)	Compensation Actually Paid (CAP) to PEO2 (\$)	Average Summary Compensation Table Total for Non-PEO NEOs1 (\$)	Average Compensation Actually Paid to Non-PEO NEOs2 (\$)	Value of Initial Fixed \$100 Investment Based On:
2024	21,569,894	(13,224,711)	6,292,328	2,346,088	124.60
2023	24,414,668	(271,382)	5,497,139	2,081,427	172.00
2022	24,749,178	65,662,660	5,891,112	14,567,967	216.10
2021	23,508,841	60,063,855	6,078,204	15,161,710	154.40
2020	22,749,628	33,167,553	7,169,286	9,758,997	112.50

(1) For each of 2024, 2023, 2022, 2021 and 2020, our PEO was Juan Luciano. For each of 2021 and 2020, the Non-PEO NEOs were Ray Young, Vincent Macciocchi, Gregory Morris, and Joseph Taets. For 2022, the Non-PEO NEOs included the same NEOs as in 2021 and 2020, as well as Vikram Luthar and Christopher Cuddy. For 2023, the Non-PEO NEOs were Vikram Luthar, Regina Jones, Gregory Morris, Christopher Cuddy and Vincent Macciocchi. For 2024, the Non-PEO NEOs were Monish Patolawala, Ismael Roig, Greg Morris, Christopher Cuddy, Ian Pinner and Vikram Luthar. (2) The dollar amounts reported represent the Compensation Actually Paid ("CAP") to Mr. Luciano and the Non-PEO NEOs in accordance with, and using the adjustments set forth in, Item 402(v) of Regulation S-K. The following adjustments related to pension plans and equity awards were made to their total compensation each year as reported in the SCT to determine the CAP:

Reconciliation of PEO Summary Compensation Table Total to Compensation Actually Paid Fiscal Year Reported SCT Total (\$)

Reported Value of Equity Awards (\$)

Equity Award Adjustments (\$)

Dividends

Paid or Accrued on Unvested Shares and Stock Options (\$) Reported Change in the Actuarial Present Value of Pension Benefits (\$) Pension Benefit Adjustments (\$) Compensation Actually Paid (\$) 2024 21,569,894 (17,700,074) (18,189,770) 1,084,138 (37,857) 48,958 (13,224,711) 2023 24,414,668 (17,919,686) (7,597,412) 902,498 (117,551) 46,100 (271,382) 2022 24,749,178 (17,727,259) 57,902,844 689,008 — 48,889 65,662,660 2021 23,508,841 (15,939,571) 51,787,958 718,567 (59,843) 47,903 60,063,855 2020 22,749,628 (15,940,148) 25,738,557 692,287 (112,853) 40,082 33,167,553

ADM Proxy Statement 2025 | 77 PAY VERSUS PERFORMANCE — Pay Versus Performance Table Reconciliation of Non-PEO NEOs Summary Compensation Table Total to Compensation Actually Paid Fiscal Year Reported SCT Total (\$) Reported Value of Equity Awards (\$) Equity Award Adjustments (\$) Dividends Paid or Accrued on Unvested Shares and Stock Options (\$) Reported Change in the Actuarial Present Value of Pension Benefits (\$) Pension Benefit Adjustments (\$) Compensation Actually Paid (\$) 2024 6,292,328 (4,758,392) 625,835 170,347 (2,473) 18,443 2,346,088 2023 5,497,139 (3,746,208) 288,332 132,976 (107,675) 16,864 2,081,427 2022 5,891,112 (3,657,711) 12,165,647 143,963 — 24,956 14,567,967 2021 6,078,204 (3,533,337) 12,401,366 184,138 (14,810) 46,149 15,161,710 2020 7,169,286 (4,556,257) 7,322,254 179,588 (398,558) 42,685 9,758,997 (3)

Our peer group for the calculation of TSR is the S&P; 100, which is the industry index used to show our performance in our CD&A.; TSR, in the case of both the Company and our peer group, reflects the cumulative return on \$100 as if invested on December 31, 2019, including reinvestment of any dividends, and is rounded to the nearest tenth. The TSR amounts for prior years were updated from the prior years' disclosures to reflect the \$100 initial investments in the dollar amount. This change does not affect the relationship of Company TSR and peer group TSR to CAP, which remains the same on a relative basis. (4) Our Company selected measure, which we believe represents the most important financial performance measure (that is not otherwise required to be disclosed in the table) used by the Company to link CAP to the NEOs for 2024 to company performance, is Adjusted ROIC. Adjusted ROIC is one of the metrics under both the 2024 annual cash incentive program and the 2024 PSUs. Adjusted ROIC (return on invested capital, adjusted to exclude the impact of certain items) is a non-GAAP financial measure. Annex A to this proxy statement provides a more detailed definition of this term, a reconciliation to the most directly comparable GAAP financial measure, and related disclosures about the use of this non-GAAP financial measure. In order to calculate CAP, the following amounts were excluded from or added to the SCT total compensation: Reconciliation of the Pension and Equity Award Adjustments for the PEO's Compensation Actually Paid Fiscal Year Reported SCT Total (\$) Pension & Equity amounts reported in SCT (\$) Pension value attributable to covered years' service and any change in pension value attributable to plan amendments made in covered year (\$) Dividends paid or accrued on unvested shares and stock options (\$) Change in fair value related to equity awards^{a,b} (\$) CAP (\$) 2024 21,569,894 (17,737,931) 48,958 1,084,138 (18,189,770) (13,224,711) 2023 24,414,668 (18,037,237) 46,100 902,498 (7,597,412) (271,382) 2022 24,749,178 (17,727,259) 48,889 689,008 57,902,844 65,662,660 2021 23,508,841 (15,999,414) 47,903 718,567 51,787,958 60,063,855 2020 22,749,628 (16,053,001) 40,082 692,287 25,738,557 33,167,553 78 | ADM Proxy Statement 2025 PAY VERSUS PERFORMANCE — Pay Versus Performance Table Reconciliation of the Pension and Equity Award Adjustments for the Average of Non-PEO NEOs' Compensation Actually Paid Fiscal Year Reported SCT Total (\$) Pension & Equity amounts reported in SCT (\$) Pension value attributable to covered years' service and any change in pension value attributable to plan amendments made in covered year (\$) Dividends paid or accrued on unvested shares and stock options (\$) Change in fair value related to equity awards^{a,b} (\$) CAP (\$) 2024 6,292,328 (4,760,865) 18,443 170,347 625,835 2,346,088 2023 5,497,139 (3,853,883) 16,864 132,976 288,332 2,081,427 2022 5,891,112 (3,657,711) 24,956 143,963

(3) Includes 705 shares held in the 401(k) and ESOP. (4) Includes 2,431 shares held in the 401(k) and ESOP. (5) Includes 121,904 shares held in trust and 2,042 shares held in an IRA account. Common stock beneficially owned as of March 21, 2025, by all directors, director nominees, and current executive officers (as of March 21, 2025) as a group, numbering 19 persons, is 3,276,744 shares representing 0.7% of the outstanding shares, of which 292,120 shares represent stock units allocated under our Stock Unit Plan for Nonemployee Directors, 3,136 shares are held in the 401(k) and ESOP, 581,099 shares are unissued but are subject to stock options exercisable within 60 days, and no shares are subject to pledge. ADM Proxy Statement 2025 | 83 Equity Compensation Plan Information; Related Transactions Equity Compensation Plan Information at December 31, 2024 Plan Category Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants, and Rights* Weighted- Average Exercise Price of Outstanding Options, Warrants and Rights Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in First Column Equity Compensation Plans Approved by Security Holders 6,337,877(1) \$62.89(2) 11,176,921(3) Equity Compensation Plans Not Approved by Security Holders — — — Total 6,337,877(1) \$62.89(2) 11,176,921(3) (1) Consists of 3,523,165 shares to be issued upon vest of outstanding RSUs, 1,767,811 shares to be issued upon vest of outstanding PSUs, and 1,046,904 shares to be issued upon exercise of outstanding options pursuant to the Company's 2020 Incentive Compensation Plan and the Company's 2009 Incentive Compensation Plan all as of December 31, 2024. (2) Weighted-average exercise price for outstanding stock options. (3) Consists of shares available for issuance pursuant to the Company's 2020 Incentive Compensation Plan, as of December 31, 2024. Benefits which may be granted under the 2020 Incentive Compensation Plan are options, stock appreciation rights, restricted stock and restricted stock units, performance shares, performance units and cash-based awards. * Based on target share amounts for PSUs. Number of PSUs issued would be 3,994,756 under the maximum payout conditions. As of March 14, 2025, our Company does not have any equity compensation plans that have not been approved by our stockholders. 84 | ADM Proxy Statement 2025 EQUITY COMPENSATION PLAN INFORMATION; RELATED TRANSACTIONS — Review and Approval of Certain Relationships and Related Transactions Review and Approval of Certain Relationships and Related Transactions Various policies and procedures of our Company, including our Related Party Transaction Approval Policy, our Code of Conduct, our bylaws, the charter of the Nominating and

Corporate Governance Committee, and annual questionnaires completed by all of our directors and executive officers, require the directors and executive officers to disclose and otherwise identify to the Company the transactions, arrangements, or relationships that could be viewed as constituting potential or actual conflicts of interest or otherwise require disclosure under applicable SEC rules as “related person transactions” between our Company or its subsidiaries and related persons. For these purposes, a related person is a director, executive officer, nominee for director, or 5% stockholder of the Company since the beginning of the last fiscal year and their immediate family members. Although the Company’s processes vary with the particular transaction or relationship, in accordance with our Related Party Transaction Approval Policy and our Code of Conduct, directors, executive officers, and other Company employees are directed to inform appropriate personnel regarding any such potential transaction or relationship. To the extent a related person is involved in the relationship or has a material interest in the transaction, the Audit Committee will review the transaction or relationship, considering various factors as set forth in our Related Party Transaction Approval Policy. The Audit Committee will approve or ratify the transaction or relationship only if it determines that it is not inconsistent with the best interests of the Company and its stockholders, that it is beneficial to the Company, and that the terms are fair to the Company.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS During the fiscal year ended December 31, 2024, the brother of Christopher Cuddy, one of our named executive officers, was employed by our Company as a vice president and earned total compensation of approximately \$385,000 in fiscal 2024. The compensation for Mr. Cuddy’s brother is appropriate for his role and aligned to that of his peers’ compensation in accordance with the Company’s compensation philosophy and practices for those of equivalent experience and responsibilities. Such relationship was considered by the Audit Committee and found to be fair and in the best interests of our Company. Additionally, during the fiscal year ended December 31, 2024, ADM purchased approximately \$280,000 of grain from Flatland Farms and sold certain products to Flatland Farms in the approximate amount of \$4,100, of which Christopher Cuddy is the sole proprietor. Such related transaction was considered by the Audit Committee and found to be fair and in the best interests of our Company.

ADM Proxy Statement 2025 | 85 Proposal No. 3 Proposal No. 3 — Ratification of Appointment of Independent Registered Public Accounting Firm The Audit Committee is directly responsible for the appointment, compensation, retention, and oversight of the independent registered public accounting firm retained to audit the Company’s financial statements. The Audit Committee has appointed Ernst & Young LLP as our Company’s independent registered public accounting firm for the fiscal year ending December 31, 2025. The Audit Committee no less than annually reviews Ernst & Young LLP’s independence and performance in connection with the Audit Committee’s determination of whether to retain Ernst & Young or engage another firm as our independent registered public accounting firm to assure continuing auditor independence. In the course of these reviews, the Audit Committee considers, among other things:

- Ernst & Young’s historical and recent audit performance, including input from our Audit Committee and employees with substantial contact with Ernst & Young throughout the year about Ernst & Young’s quality of service provided, and the independence, objectivity, and professional skepticism demonstrated throughout the engagement by Ernst & Young and its audit team;
- An analysis of Ernst & Young’s known legal risks and significant proceedings;
- External data relating to audit quality and performance, including recent Public Company Accounting Oversight Board (“PCAOB”) reports on Ernst & Young and its peer firms;
- The appropriateness of Ernst & Young’s fees, on both an absolute basis and as compared to its peer firms; and
- Ernst & Young’s tenure as our independent auditor and its familiarity with our global operations and businesses, accounting policies and practices, and

internal control over financial reporting. Ernst & Young LLP, or its predecessor firms, has served as our independent registered public accounting firm for more than 90 years. The Audit Committee believes that Ernst & Young's deep institutional knowledge of our global operations and businesses, accounting policies and practices, and internal controls results in higher quality audit work and greater operational efficiencies. In conjunction with the required rotation of Ernst & Young's lead engagement partner, the Audit Committee and its Chair are directly involved in the selection of Ernst & Young's new lead engagement partner. We are asking our stockholders to ratify the selection of Ernst & Young LLP as our independent registered public accounting firm. Although ratification is not required by our bylaws or otherwise, the Board is submitting the selection of Ernst & Young to our stockholders as a matter of good corporate practice. The members of the Audit Committee, and the Board of Directors, believe that the continued retention of Ernst & Young to serve as the Company's independent registered public accounting firm is in the best interests of our Company and its stockholders. Representatives of Ernst & Young will be present at the meeting, will have the opportunity to make a statement if they desire to do so, and will be available to respond to appropriate questions. The Board of Directors recommends a vote FOR ratification of the appointment of Ernst & Young LLP as our Company's independent registered public accounting firm for the fiscal year ending December 31, 2025. Proxies solicited by the Board will be so voted unless stockholders specify a different choice. 86

| ADM Proxy Statement 2025 PROPOSAL NO. 3 — Ratification of Appointment of Independent Registered Public Accounting Firm FEES PAID TO INDEPENDENT AUDITORS The following table shows the aggregate fees paid to Ernst & Young LLP by us for the services it rendered during the fiscal years ended December 31, 2024, and December 31, 2023.

Description of Fees	2024	2023
Audit Fees(1)	\$19,854,000	\$18,893,000
Audit-Related Fees(2)	\$ 3,729,000	\$ 5,170,000
Tax Fees(3)	\$ 1,986,000	\$ 2,216,000
All Other Fees(4)	\$ 43,000	\$ 625,000
Total	\$25,612,000	\$26,904,000

(1) Includes fees for audit of annual financial statements, reviews of the related quarterly financial statements, audit of the effectiveness of our Company's internal control over financial reporting, and certain statutory audits. (2) Includes fees for accounting and reporting assistance, due diligence for mergers and acquisitions, and audit-related work in connection with employee benefit plans of our Company. (3) Includes fees related to tax planning advice and tax compliance. (4) Includes fees for advisory services related to strategic transactions or divestitures.

AUDIT COMMITTEE PRE-APPROVAL POLICIES The Audit Committee has adopted an Audit and Non-Audit Services Pre-Approval Policy. This policy provides that audit services engagement terms and fees, and any changes in such terms or fees, are subject to the specific pre-approval of the Audit Committee. The policy further provides that all other audit services, audit-related services, tax services, and permitted non-audit services are subject to pre-approval by the Audit Committee. All of the services Ernst & Young LLP performed for us during fiscal years 2024 and 2023 were pre-approved by the Audit Committee.

ADM Proxy Statement 2025 | 87 Report of the Audit Committee Report of the Audit Committee The Audit Committee provides assistance to the Board of Directors in fulfilling its oversight responsibility to the stockholders relating to the Company's (i) financial statements and the financial reporting process, (ii) preparation of the financial reports and other financial information provided by the Company to any governmental or regulatory body, (iii) systems of internal accounting and financial controls, (iv) internal audit function, (v) tax function, (vi) annual independent audit of the Company's financial statements, (vii) major risk exposures, (viii) legal compliance and ethics programs as established by management and the Board, (ix) related-party transactions, and (x) performance of the compliance function. The Audit Committee assures that the corporate information gathering, analysis, and reporting systems developed by management represent a good faith attempt to provide senior management and the Board of Directors with

information regarding material acts, events, and conditions within the Company. In addition, the Audit Committee is directly responsible for the appointment, compensation, retention, and oversight of the independent auditor. The Audit Committee ensures that the Company establishes, resources, and maintains a professional internal auditing function and that there are no unjustified restrictions or limitations imposed on such function. The Audit Committee reviews the effectiveness of the internal audit function and reviews and approves the actions relating to the General Auditor, including performance appraisals and related base and incentive compensation. The Audit Committee is comprised of six independent directors, all of whom are financially literate and one of whom (M.S. Burke, the Chair) has been determined by the Board of Directors to be an “audit committee financial expert” as defined by the Securities and Exchange Commission (“SEC”). Management has the primary responsibility for the financial statements and the reporting process, including the systems of internal controls. In fulfilling its oversight responsibilities, the Audit Committee reviewed and discussed the audited financial statements with management, including a discussion of the quality—not just the acceptability—of the accounting principles, the reasonableness of significant judgments, the development and selection of the critical accounting estimates, and the clarity of disclosures in the financial statements. Also, the Audit Committee discussed with management education regarding compliance with the policies and procedures of the Company as well as federal and state laws. The Audit Committee reviewed and discussed with the independent auditor, who is responsible for expressing an opinion on the conformity of those audited financial statements with generally accepted accounting principles, the effectiveness of the Company’s internal control over financial reporting, and the matters required to be discussed by the applicable requirements of the Public Company Accounting Oversight Board (“PCAOB”) and the SEC, including their judgment as to the quality—not just the acceptability—of the Company’s accounting principles, the reasonableness of significant judgments, and the clarity of disclosures in the financial statements. In addition, the Audit Committee received the written disclosures and the letter from the independent auditor required by applicable requirements of the PCAOB regarding the independent auditor’s communications with the Audit Committee concerning independence and has discussed with the independent auditor the auditor’s independence from management and the Company. The Audit Committee has adopted an Audit and Non-Audit Services Pre-Approval Policy and considered the compatibility of non-audit services with the independent auditor’s independence. The Audit Committee recommended to the Board of Directors (and the Board of Directors approved) a hiring policy related to current and former employees of the independent auditor. The Audit Committee discussed the Company’s major risk exposures, the steps management has taken to monitor and control such exposures, and guidelines and policies to govern the Company’s risk assessment and risk management processes. The meetings of the Audit Committee are designed to facilitate and encourage communication among the Audit Committee, the Company, the Company’s internal audit function, and the Company’s independent auditor. The Audit Committee discussed with the internal and independent auditors the overall scope and plans for their respective audits. The Audit Committee met with the internal and independent auditors, with and without management present, to discuss the results of their examinations, their evaluations of the accounting and financial controls, and the overall quality of the Company’s financial reporting. The Audit Committee met individually with members of management in executive session. The Audit Committee held 17 meetings during fiscal year 2024. The Audit Committee recognizes the importance of maintaining the independence of the Company’s independent auditor, both in fact and appearance. Each year, the Audit Committee evaluates the qualifications, performance, tenure, and independence of the Company’s independent auditor and determines whether to re-engage the current independent

auditor. In doing so, the Audit Committee considers the quality and efficiency of the services provided by the auditors, the auditors' global capabilities, and the auditors' technical expertise and knowledge of the Company's operations and industry. Based on this evaluation, the Audit Committee has appointed Ernst & Young LLP as independent auditor for the fiscal year ending December 31, 2025. The members of the Audit Committee and the Board believe that, due to Ernst & Young LLP's knowledge of the Company and of the industries in which the Company operates, it is in the best interests of the 88 | ADM Proxy Statement 2025 REPORT OF THE AUDIT COMMITTEE — Report of the Audit Committee Company and its stockholders to continue retention of Ernst & Young LLP to serve as the Company's independent auditor. Although the Audit Committee has the sole authority to appoint the independent auditors, the Board is submitting the selection of Ernst & Young LLP to our stockholders for ratification as a matter of good corporate practice. Based on the reviews and discussions referred to above, the Audit Committee recommended to the Board of Directors (and the Board of Directors approved) that the audited financial statements be included in the Annual Report on Form 10-K for the year ended December 31, 2024, for filing with the SEC. M. S. Burke, Chair J. C. Collins, Jr. E. M. M. de Brabander S. F. Harrison P. J. Moore D. A. Sandler ADM Proxy Statement 2025 | 89 PROPOSAL NO. 4 Proposal No. 4 — Stockholder Proposal to Remove the One-Year Holding Period Requirement to Call a Special Stockholder Meeting We expect the following proposal to be presented by a stockholder at the Annual Meeting. In accordance with SEC rules, the stockholder proposal is presented below as submitted by the stockholder. The Company disclaims all responsibility for the content of the proposal. John Chevedden, 2215 Nelson Avenue, No. 205, Redondo Beach, CA 90278, owner of 100 shares, is the proponent of the following stockholder proposal. STOCKHOLDER PROPOSAL Proposal 4—Support for Special Shareholder Meeting Improvement Shareholder Rights FOR Shareholders ask our Board of Directors to remove the current provision that considers the voice of certain Archer-Daniels-Midland (ADM) shareholders as non-shareholders. Currently all shares not held for one continuous year are considered non-shareholders if they seek to call for a special shareholder meeting on an important matter. The current one-year exclusion for all shares held for less than one continuous year makes the current so-called shareholder right to call for a special shareholder meeting useless. There is no point to have useless right on the books of ADM. The reason to enable all shareholders to call for a special shareholder meeting is to allow one shareholder or a group of shareholders to quickly acquire ADM shares to equal the challenging 10% share ownership requirement, based on all shares outstanding, to call for a special shareholder meeting when there is an urgent matter to consider in order to incentivize a turnaround of ADM. This is becoming more important given that the ADM stock price is in a long-term slump. ADM stock was at \$97 in 2022 and at only \$53 in late 2024 during a robust stock market. The best strategies for turning around a company do not necessarily come from a company's existing shareholders. If ADM continues in its slump, ADM shareholders and potential ADM shareholders will not even consider acquiring more shares in order to call for a special shareholder meeting, if they have to wait one-year to call for a special shareholder meeting. A one-year holding period makes no sense. An emergency or a continued slumping stock price demands an immediate response. The fact that one shareholder or a group of shareholders can quickly acquire more shares to call for a special shareholder meeting is an incentive for ADM Directors to avoid such an emergency situation in the first place since the continued service of the least qualified ADM Directors could be terminated by a special shareholder meeting. This is a good incentive for the ADM Directors to have for the benefit of all ADM shareholders. At minimum this proposal alerts shareholders to the severe limitation, to the point of uselessness, baked into the current ADM rules for shareholders to call for a special shareholder meeting. Please vote yes: Support for Special

Shareholder Meeting Improvement—Proposal 4 90 | ADM Proxy Statement 2025 PROPOSAL NO. 4 — Stockholder Proposal to Remove the One-Year Holding Period Requirement to Call a Special Stockholder Meeting RECOMMENDATION OF THE BOARD OF DIRECTORS AGAINST THE STOCKHOLDER PROPOSAL The Board has carefully considered the above proposal, believes the proposal is not in the best interests of ADM and its stockholders for the reasons set forth below, and recommends that stockholders vote against the proposal. ADM's Special Meeting Right Reflects Extensive Board Consideration and is Aligned with Current Best Practices The Company has consistently demonstrated a commitment to strong corporate governance and responsiveness to stockholders. In February 2013, the Board adopted an amendment to our bylaws that reduced the ownership threshold for stockholders to call special stockholder meetings from a majority of the outstanding shares to not less than 10% of such shares. That amendment also included a customary provision that stockholders requesting a special meeting must have held such shares for at least one year. This 10% threshold is among the lowest, and thus most stockholder-friendly, among ADM and similar public companies. The Board adopted the amendment after thorough consideration. The Board carefully evaluated various terms including ownership thresholds and potential length of holding periods. In addition, the Board considered existing stockholder rights, investors' views, other companies' stockholder rights to call special meetings, and ADM's institutional investor profile. The Board believes that the current special meeting right, including the low ownership threshold and nominal one-year holding period, reflects the perspectives of our stockholders, is consistent with (indeed, is more stockholder-friendly than) market practice, and strikes the proper balance between ensuring that stockholders have the ability to call a special meeting and protecting against the risk that some stockholders, who may have narrow short-term interests, could trigger the expense and distraction of a special meeting to pursue matters that are not widely viewed as requiring immediate attention or that are being pursued for reasons that may not be in the best interests of the Company and our stockholders generally. Special Meetings Involve Substantial Time and Resources, and Eliminating the Holding Period Requirement Would Increase the Potential for Misuse The Board recognizes the importance of providing our stockholders with the right to call special meetings in appropriate circumstances. Given the size of the Company and our large number of stockholders, a special stockholder meeting is a significant undertaking that requires substantial time, effort, expense, and management resources. The Company must prepare, print, and distribute legal disclosure documents to stockholders; host websites to provide notice and access online; and solicit proxies and tabulate votes, all of which require substantial time and effort as well as the use of Company funds to pay for the costs of the special meeting. Such time, effort, and expense are required regardless of whether the special stockholder meeting is held in person or virtually. In addition, the Board and management must divert time and focus from their responsibility of managing the Company on behalf of all stockholders to prepare for and conduct the special meeting, consequently detracting from their primary focus of operating our businesses and maximizing long-term stockholder value. Accordingly, special meetings of stockholders should be extraordinary events that occur only when there are urgent and critical matters or significant fiduciary concerns. Our bylaws provide stockholders holding 10% or more of the Company's outstanding common stock for at least one year with the right to call special meetings, thus allowing for stockholders to call a special meeting when extraordinary matters arise, without enabling a minority of stockholders that have not held a financial stake in the Company for a meaningful period of time to call unnecessary or duplicative meetings for less significant matters. If the nominal one-year holding requirement is eliminated as suggested by the proponent's proposal, the Company could be subject to regular disruptions by short-term, special-interest stockholders with agendas that are not in the best

interests of the long-term stockholders or the Company, and would increase the potential for misuse of the special meeting right. It would also divert our Board's and management's attention from their primary focus of leading and operating our business, which could potentially operate against the best interests of our stockholders overall, in order to serve the narrow interests of the stockholders requesting a special meeting. ADM's Governance Practices and Policies Provide Stockholders the Ability to Communicate Views and Ensure Responsiveness to Stockholders; A Similar Proposal Was Overwhelmingly Rejected by Stockholders in 2022 The change requested by this stockholder proposal is unnecessary, could be potentially destructive to stockholder value, and should be rejected in light of our strong corporate governance policies and practices, our demonstrated willingness to discuss Company business and issues with stockholders, and our regular responsiveness to stockholders. We maintain strong corporate governance practices and provide multiple channels of communication between the Company and our stockholders. Our current corporate governance practices reflect our commitment to being responsive to our stockholders. We encourage and appreciate our dialogue with stockholders and their invaluable input on corporate governance matters. Our Board and management team regularly assess and continually enhance our corporate governance policies and procedures, taking into account the stockholder feedback received through our engagement process, the governance practices of similar public companies, and current trends in governance. The Board also considers stockholder feedback received through votes on stockholder proposals—including the similar proposal ADM Proxy Statement 2025 | 91 PROPOSAL NO. 4 — Stockholder Proposal to Remove the One-Year Holding Period Requirement to Call a Special Stockholder Meeting to eliminate the required holding period for calling special stockholder meetings that was presented to stockholder vote at the 2022 annual stockholder meeting. Stockholders at the 2022 meeting overwhelmingly rejected the similar proposal, with only approximately 5% of the votes cast being voted in favor of such proposal. In addition to providing our stockholders with the right to call a special meeting at a relatively low threshold of 10%, we have implemented numerous other corporate governance measures that align with best practices and that give stockholders the ability to directly communicate their views to the Board. Some of these measures are:

- Our stockholders have the opportunity to cast a vote with respect to all of our directors at least once per year. Our Board is not classified, and directors serve one-year terms.
- We have a majority voting standard for the election of directors in an uncontested election. Under our Corporate Governance Guidelines, each director annually submits an advance, contingent, irrevocable resignation that the Board may accept if the director fails to be elected through a majority vote in an uncontested election.
- All of the Company's directors, with the exception of the CEO, are independent. Each of the Audit, Nominating and Corporate Governance, Compensation and Succession, and Sustainability and Technology Committees are entirely composed of independent directors.
- We align our directors' interests with those of our stockholders through robust stock ownership requirements.
- We have vigorous evaluation processes for each of the Board, the Committees, and individual directors.
- We provide for "proxy access" in our bylaws pursuant to which stockholders can nominate a director candidate to stand for election and have that nominee included in our proxy materials.
- Our Board emphasizes stockholder involvement and input and incorporates the important feedback we receive from our stockholders through our robust outreach and engagement program, which enhances both our governance practices and the transparency of these practices to our stockholders. We have a long record of listening and responding to the input of our stockholders, as demonstrated by our recent engagement with many of our largest institutional stockholders. We hold formal discussions with our institutional stockholders to help us better understand the views of our investors on key topics. Our recent conversations with our institutional

investors covered topics of corporate governance, enterprise risk management, executive compensation, ESG, and other related issues important to our stockholders. Summary The Board believes that our existing special meeting right for stockholders is aligned with current best practices and strikes the appropriate balance between providing stockholders with meaningful rights and opportunities for involvement and considering the interests of all our stockholders. The proposed amendment would unnecessarily disrupt that balance by increasing the potential for misuse by a relatively small number of stockholders with narrow short-term interests to call a special meeting, which would require the Company to expend considerable time, effort, expense, and management resources. The Board's proven commitment to strong corporate governance and engagement with stockholders provide stockholders the ability to communicate their views and ensure Board responsiveness. The Board believes that the adoption of this stockholder proposal is unnecessary, potentially harmful, and not in the best long-term interests of ADM and its stockholders. Accordingly, the Board of Directors recommends that stockholders vote AGAINST this stockholder proposal. Proxies solicited by the Board will be so voted unless stockholders specify a different choice. THE BOARD OF DIRECTORS RECOMMENDS THAT YOU VOTE AGAINST THE STOCKHOLDER PROPOSAL TO ELIMINATE THE REQUIRED HOLDING PERIOD FOR CALLING SPECIAL STOCKHOLDER MEETINGS. PROXIES SOLICITED BY THE BOARD WILL BE VOTED AGAINST THE STOCKHOLDER PROPOSAL UNLESS STOCKHOLDERS SPECIFY OTHERWISE. 92 | ADM Proxy Statement 2025 General Information About the Annual Meeting and Voting Commonly Asked Questions and Answers about the Annual Meeting Why did I receive this proxy statement? The Board of Directors asks that you vote by proxy in advance of the annual stockholders' meeting. This proxy statement describes the proposals on which you, as a stockholder of the Company, are being asked to vote. It gives you information on the proposals, as well as other information, so that you can make an informed decision. You are invited to attend the annual meeting to vote on the proposals, but you do not need to attend in order to vote. The meeting will be completely virtual and will be held at the time and web address mentioned in the Notice of Annual Meeting included in these materials. Why did I receive a Notice of Internet Availability? We are using the "notice and access" method of providing proxy materials to stockholders via the internet. We will mail to our stockholders (other than those described below) a Notice of Internet Availability of Proxy Materials containing instructions on how to access our proxy statement and the 2024 Annual Report on Form 10-K and how to vote electronically via the internet. This notice will also contain instructions on how to request a paper copy of the proxy materials. Stockholders holding shares through the ADM 401(k) and Employee Stock Ownership Plan for Salaried Employees (the "401(k) and ESOP") and those stockholders who previously have opted out of participation in notice and access procedures will receive a paper copy of the proxy materials by mail or an electronic copy of the proxy materials by email. We are first providing our stockholders with notice and access to, or first mailing or emailing, this proxy statement and a proxy form around March 25, 2025. Who is entitled to vote at the Annual Meeting? Our common stockholders of record at the close of business on March 14, 2025, are the only holders entitled to notice of the annual meeting and to vote at the meeting. At the close of business on March 14, 2025, we had 480,155,676 outstanding shares of common stock, each share being entitled to one vote on each of the director nominees and on each of the other matters to be voted on at the meeting. How do I vote my shares and what can I do if I change my mind after I vote my shares? If you are a stockholder of record, you may vote your shares electronically during the annual meeting via the internet by visiting www.virtualshareholdermeeting.com/ADM2025, or you may vote by proxy prior to the annual meeting (1) via the internet by following the instructions provided in the Notice of Internet Availability of Proxy Materials or proxy card, (2) if you received

printed proxy materials, by calling the toll free number found on the proxy card, or (3) if you received printed proxy materials, by filling out the proxy card and returning it in the envelope provided. If you are a beneficial owner of shares held in street name, you must obtain a “legal proxy” from the organization that is the record holder of your shares in order to vote your shares electronically during the annual meeting. You may vote by proxy prior to the annual meeting by following the instructions you receive from the organization that is the record holder of your shares. If you properly submit a proxy, your shares will be voted at the meeting. You may revoke your proxy at any time prior to voting by: (1) delivering written notice of revocation to our Corporate Secretary; (2) delivering to our Corporate Secretary a new proxy form bearing a date later than your previous proxy; or (3) attending the annual meeting online and voting again (attendance at the meeting will not, by itself, revoke a proxy). Is my vote confidential? We have a policy of keeping confidential all proxies, ballots, and voting tabulations that identify individual stockholders. Such documents are available for examination only by the inspectors of election; Hickory Point Bank and Trust, fsb our transfer agent; and certain employees associated with processing proxy cards and tabulating the vote. We will not disclose any stockholder’s vote except in a contested proxy solicitation or as may be necessary to meet legal requirements. What is the quorum required for the annual meeting? The presence in person or by proxy of the holders of a majority in voting power of the outstanding shares of our common stock entitled to vote at the annual meeting will constitute a quorum to conduct business at the annual meeting. ADM Proxy Statement 2025 | 93 GENERAL INFORMATION ABOUT THE ANNUAL MEETING AND VOTING — Commonly Asked Questions and Answers about the Annual Meeting What are the voting requirements for the various proposals? Under our bylaws, stockholders elect our directors by a majority vote in an uncontested election (one in which the number of nominees is the same as the number of directors to be elected at the meeting) and by a plurality vote in a contested election (one in which the number of nominees exceeds the number of directors to be elected at the meeting). Because this year’s election is an uncontested election, each director nominee receiving a majority of votes cast (where the number of shares voted “for” a director nominee exceeds the number of shares voted “against” that nominee) will be elected. Approval of each other proposal presented in the proxy statement requires the affirmative vote of the holders of a majority in voting power of the shares of common stock which are present, in person or by proxy, at the meeting and entitled to vote on that matter. What are the effects of abstentions and broker non-votes on voting? A vote to “abstain” on the election of directors will have no effect on the outcome of that proposal. A vote to “abstain” on each other proposal presented in this proxy statement will have the effect of a vote against those proposals. If you hold shares in street name, your broker, bank, or other nominee is required to vote your shares according to your instructions. If you do not give instructions to your broker, bank, or other nominee, it will still be able to vote your shares with respect to certain “discretionary” items, but will not be allowed to vote your shares with respect to “non-discretionary” items. Proposals 1, 2, and 4 are “non-discretionary” items. If you do not instruct your broker, bank, or other nominee how to vote with respect to those proposals, it may not vote for those proposals, and your shares will be counted as broker “non-votes.” Proposal 3 is considered to be a discretionary item, and your broker, bank, or other nominee will be able to vote on this proposal even if it does not receive instructions from you. Broker non-votes will not have any effect on the result of the vote on any of the proposals. What are the Company’s costs associated with this proxy solicitation? We pay the costs of soliciting proxies from our stockholders. We have retained Georgeson LLC to help us solicit proxies. We will pay Georgeson LLC a base shareholder meeting services fee of approximately \$15,000 plus reasonable project management fees and expenses for its services. Our employees or employees of Georgeson LLC may

also solicit proxies in person or by telephone, mail, or the internet at a cost which we expect will be nominal. We will reimburse brokerage firms and other securities custodians for their reasonable fees and expenses in forwarding proxy materials to their principals. Who can attend the Annual Meeting? Our stockholders and advisors to our Company are the only people entitled to attend the annual meeting. Why is the Annual Meeting being held virtually? The annual meeting this year will be a completely virtual meeting of stockholders, held at www.virtualshareholdermeeting.com/ADM2025. Hosting a virtual meeting provides expanded access, improved communication, and cost savings for our stockholders and us and enables participation from any location around the world. How can stockholders submit questions to management during the Annual Meeting? Stockholders may submit questions during the annual meeting at www.virtualshareholdermeeting.com/ADM2025, and subject to the meeting rules of conduct, management will respond to questions following adjournment of the formal business of the annual meeting and after any management remarks. If you have questions during the meeting, you may type them in the dialog box at any point during the meeting until the floor is closed to questions. 94 | ADM Proxy Statement 2025 Submission of Stockholder Proposals and Other Matters Deadline for Submission of Stockholder Proposals Proposals of stockholders, including nominations for director, intended to be presented at the next annual meeting and desired to be included in our proxy statement for that meeting must be received by the Company's Corporate Secretary, addressed to ADM, Attn: Secretary, 77 West Wacker Drive, Suite 4600, Chicago, Illinois 60601, no later than November 25, 2025, and, in the case of nominations for director, no earlier than October 26, 2025, in order to be included in such proxy statement. These proposals and nominations must also meet all the relevant requirements of our bylaws in order to be included in our proxy statement. Notice of a stockholder proposal intended to be presented at the next annual meeting, but not included in our proxy statement for that meeting, must be delivered to the Secretary at the above address between January 8, 2026 and February 7, 2026 (or, if the next annual meeting is called for a date that is not within 30 days before or after the anniversary date of our 2025 annual meeting, such notice must be delivered by the close of business on the tenth day following the earlier of the date on which notice of the date of such annual meeting is given or public disclosure of the date of such annual meeting is made). The notice must set forth the information required by our bylaws. In addition to satisfying the foregoing requirements, in order to comply with the universal proxy rules, a stockholder who intends to solicit proxies in support of director nominees for election at the next annual meeting, other than the Company's nominees, must provide notice that sets forth the information required by Rule 14a-19 under the Exchange Act no later than March 9, 2026. Stockholders with the Same Address Individual stockholders sharing an address with one or more other stockholders may elect to "household" the mailing of the proxy statement and our annual report. This means that only one annual report and proxy statement will be sent to that address unless one or more stockholders at that address specifically elect to receive separate mailings. Stockholders who participate in householding will continue to receive separate proxy cards. Also, householding will not affect dividend check mailings. We will promptly send a separate annual report and proxy statement to a stockholder at a shared address on request. Stockholders with a shared address may also request us to send separate annual reports and proxy statements in the future, or to send a single copy in the future if we are currently sending multiple copies to the same address. Requests related to householding should be made in writing and addressed to Investor Relations, ADM, 4666 Faries Parkway, Decatur, Illinois 62526-5666, or by calling our Investor Relations at 217-424-5656. If you are a stockholder whose shares are held by a bank, broker, or other nominee, you can request information about householding from your bank, broker, or other nominee. Receiving

Future Proxy Materials Electronically Stockholders can elect to view future proxy statements and annual reports over the Internet instead of receiving copies in the mail. Taking this step will save the Company the cost of producing and mailing these documents. You can: • follow the instructions provided on your proxy card, voting instruction card or Notice of Internet Availability of Proxy Materials; or • go to www.proxyvote.com and follow the instructions provided. If you choose to receive future proxy statements and annual reports over the Internet, you will receive an email message next year containing the Internet address to access future proxy statements and annual reports. This email will include instructions for voting over the Internet. If you have not elected electronic delivery, you will receive either printed materials in the mail or a notice indicating that the proxy solicitation materials are available at www.proxyvote.com.

ADM Proxy Statement 2025 | 95 SUBMISSION OF STOCKHOLDER PROPOSALS AND OTHER MATTERS — Principal Holders of Voting Securities

Principal Holders of Voting Securities Based upon filings with the SEC, we believe that the following stockholders are beneficial owners of more than 5% of our outstanding common stock shares. The percentage of beneficial ownership is based on 480,155,676 shares of common stock outstanding as of March 14, 2025.

Name and Address of Beneficial Owner	Amount	Percent of Class
The Vanguard Group 100 Vanguard Blvd., Malvern, PA 19355	61,652,597(1)	12.84%
State Farm Mutual Automobile Insurance Company and related entities One State Farm Plaza, Bloomington, IL 61710	50,286,278(2)	10.47%
BlackRock, Inc. 50 Hudson Yards, New York, NY 10001	45,312,186(3)	9.44%
State Street Corporation One Congress Street, Suite 1, Boston, MA 02114	33,506,142(4)	8.21%

(1) Based on a Schedule 13G/A filed with the SEC on November 12, 2024, The Vanguard Group has sole dispositive power with respect to 59,323,497 shares, shared voting power with respect to 653,980 shares, and shared dispositive power with respect to 2,329,100 shares. (2) Based on a Schedule 13G/A filed with the SEC on May 9, 2024, State Farm Mutual Automobile Insurance Company and related entities have sole voting and dispositive power with respect to 46,796,552 shares and shared voting and dispositive power with respect to 3,489,726 shares. (3) Based on a Schedule 13G/A filed with the SEC on January 25, 2024, BlackRock, Inc. has sole voting power with respect to 40,654,339 shares and sole dispositive power with respect to 45,312,186 shares. (4) Based on a Schedule 13G filed with the SEC on February 4, 2025, State Street Corporation has shared voting power with respect to 24,979,088 shares and shared dispositive power with respect to 33,502,281 shares.

Other Matters It is not contemplated or expected that any business other than that pertaining to the subjects referred to in this proxy statement will be brought up for action at the meeting, but in the event that other business does properly come before the meeting calling for a stockholders' vote, the named proxies will vote thereon according to their best judgment in the interest of our Company. By Order of the Board of Directors

ARCHER-DANIELS-MIDLAND COMPANY Regina B. Jones, Corporate Secretary March 25, 2025

96 | ADM Proxy Statement 2025 Annex A Definition and Reconciliation of Non-GAAP Measures

The Company uses certain "Non-GAAP" financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States (GAAP), and should be considered in addition to, not in lieu of, GAAP reported measures. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in the reconciliation tables below.

Adjusted earnings per share (EPS). Adjusted EPS reflects ADM's fully diluted EPS after removal of the effect on EPS as reported of specified items as more fully described in the reconciliation tables below. Management believes that Adjusted EPS is a useful measure of ADM's performance because it provides investors additional information about ADM's operations allowing better evaluation of underlying business performance and better period-to-period comparability. This non-GAAP financial measure is not intended to replace or be an

alternative to EPS as reported, the most directly comparable GAAP financial measure, or any other measure of operating results under GAAP. Total segment operating profit. Total segment operating profit is ADM's consolidated earnings before income taxes adjusted for Other Business, Corporate, and specified items as more fully described in the reconciliation tables below. Management believes that total segment operating profit is a useful measure of ADM's performance because it provides investors information about ADM's reportable segment performance excluding other business, corporate overhead costs as well as specified items. Total segment operating profit is not a measure of consolidated operating results under GAAP and should not be considered an alternative to earnings before income taxes, the most directly comparable GAAP financial measure, or any other measure of consolidated operating results under GAAP. Adjusted Return on Invested Capital (ROIC). Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM's net earnings adjusted for the after-tax effects of interest expense on borrowings and specified items. Adjusted invested capital is the sum of ADM's equity (excluding redeemable and non-redeemable noncontrolling interests) and interest-bearing liabilities (which totals invested capital), adjusted for specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM's returns excluding the impacts of specified items and increases period-to-period comparability of underlying business performance. Management uses Adjusted ROIC to measure ADM's performance by comparing Adjusted ROIC to its weighted average cost of capital. Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures. EBITDA and Adjusted EBITDA. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as earnings before interest on borrowings, taxes, depreciation, and amortization, adjusted for specified items as more fully described in the reconciliation tables below. The Company calculates adjusted EBITDA by removing the impact of specified items and adding back the amounts of income tax expense, interest expense on borrowings, and depreciation and amortization to net earnings. Management believes that EBITDA and adjusted EBITDA are useful measures of the Company's performance because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. EBITDA and adjusted EBITDA are non-GAAP financial measures and are not intended to replace or be an alternative to net earnings, the most directly comparable GAAP financial measure.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☐ Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☐ Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☐ No ☐ Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer”, “accelerated filer”, “smaller reporting company”, and “emerging growth company” in Rule 12b-2 of the Exchange Act. Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐ If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐ Indicate by check mark whether the registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐ Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant’s executive officers during the relevant recovery period pursuant to §240.10D-1 (b). ☐ Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☐ State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant’s most recently completed second fiscal quarter. Common Stock, no par value—\$28.8 billion (Based on the closing sale price of Common Stock as reported on the New York Stock Exchange as of June 28, 2024) Indicate the number of shares outstanding of each of the registrant’s classes of common stock, as of the latest practicable date. Common Stock, no par value—479,707,071 shares (February 14, 2025) DOCUMENTS INCORPORATED BY REFERENCE Portions of the Registrant’s definitive proxy statement relating to its 2025 annual meeting of stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated. Such proxy statement will be filed with the U.S. Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates. 2 SAFE HARBOR STATEMENT This Annual Report on Form 10-K contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 that involve substantial risks and uncertainties. All statements, other than statements of historical fact included in this Annual Report on Form 10-K, are forward-looking statements. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as “anticipate,” “estimate,” “expect,” “project,” “plan,” “intend,” “believe,” “may,” “outlook,” “will,” “should,” “can have,” “likely,” and other words and terms of

similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. For example, all statements the Company makes relating to its future results and operations, growth opportunities, pending litigation and investigations, and timing of the remediation of the Company's material weakness in the Company's internal control over financial reporting are forward-looking statements. All forward-looking statements are subject to significant risks, uncertainties and changes in circumstances that could cause actual results and outcomes to differ materially from the forward-looking statements. These forward-looking statements are not guarantees of future performance and involve risks, assumptions and uncertainties, including, without limitation, those that are described in Item 1A, "Risk Factors" included in this Annual Report on Form 10-K, as may be updated in subsequent Quarterly Reports on Form 10-Q. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated or anticipated by such forward-looking statements. Accordingly, you are cautioned not to place undue reliance on these forward-looking statements. Except to the extent required by law, Archer-Daniels-Midland Company does not undertake, and expressly disclaims, any duty or obligation to update publicly any forward-looking statement whether as a result of new information, future events, changes in assumptions or otherwise.

ARCHER-DANIELS-MIDLAND COMPANY FORM 10-K FOR THE YEAR ENDED DECEMBER 31, 2024 4

Item 1. BUSINESS Company Overview Archer-Daniels-Midland Company (the "Company" or "ADM") unlocks the power of nature to enrich the quality of life. The Company is an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. ADM is a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. The Company is a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. ADM is a cutting-edge innovator, guiding the way to a future of new consumer and industrial solutions. ADM is a leader in sustainability, scaling across entire value chains to help decarbonize the multiple industries it serves. Around the globe, the Company's innovation and expertise are meeting critical needs while nourishing quality of life and supporting a healthier planet. The Company works with thousands of growers in the world's most productive agricultural regions to purchase their crops. The Company uses its integrated global network of elevators, trucks, railcars, barges and ships to move those crops from areas of supply to areas of demand, and transforms many of those raw commodities into a broad array of products serving customers spanning food, feed, fuel, industrial, and consumer

products. ADM is a pillar of the global food supply system, playing a critical role in helping billions of people to obtain access to the fundamental nutrition they need. From staple foods, such as flour, oils, and sweeteners, to innovative alternatives like plant-based meat and dairy and lower-sugar, fat and salt solutions, ADM offers the industry's broadest portfolio of food and beverage solutions. The Company is also a leader in animal nutrition, innovating in a world where more and more people want to feed their pets with the same kind of clean, simple, and healthy products that they eat themselves, and consumers expect livestock and poultry to be fed and raised naturally, humanely, and sustainably. ADM is a global leader in health and well-being, with an industry-leading range of probiotics, enzymes, supplements, and more to meet the needs of consumers looking for new ways to live healthier lives. The Company is also leading the way to a future of new consumer and industrial solutions from nature. With unparalleled expertise and capacity in precision fermentation, ADM is reimagining the world of lubricants, adhesives, home and personal care products, and more. ADM also has significant investments and joint ventures that aim to expand or enhance the market for its products or offer other benefits including, but not limited to, geographic or product-line expansion. The continued demand from customers for sustainably sourced products is a growth driver for ADM, and the Company invests in and supports sustainability efforts to enhance the long-term resilience of farmers, agriculture and critical supply chains, including the global food system. ADM's Board of Directors actively oversees the Company's sustainability strategy through a board-level Sustainability and Technology Committee (Sustainability Committee), and ADM's Chief Sustainability Officer is part of the core strategy team and reports to the Chief Executive Officer and Chair of the Board. Utilizing ADM's unique position in the agricultural value chain, including relationships with farmers around the globe and an unparalleled origination, transportation, and processing network, the Company works with growers by supporting them with personalized services and innovative technologies and partnering with them to develop and enhance conservation practices, including a goal of enrolling five million regenerative agriculture acres by the end of 2025. The Company is actively working to improve the efficiency of its facilities and vehicles, finding alternative uses for waste, reusing and recycling water, and sequestering carbon at its onsite capture and storage facility. These efforts are helping advance ADM's Strive 35 commitments to, by 2035, reduce absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 25% from a 2019 baseline, reduce absolute Scope 3 GHG emissions by 25% from a 2021 baseline, increase use of low-carbon energy sources to 25% of total energy used, reduce absolute water withdrawal by 10%, and achieve a 90% landfill diversion rate. As a global organization, the Company is strongly committed to a culture of inclusion and belonging. ADM fundamentally values the differences between individuals and believes a variety of perspectives and backgrounds support innovation, growth, and value creation.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY PART I

5 The Company's innovation and expertise are helping people live healthier lives and support a stronger future. The Company's globally-integrated footprint combines with local insights to give ADM capabilities few other companies have to meet critical global needs.

Segment Descriptions

The Company's operations are organized, managed, and classified into three reportable business segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable business segments, as defined by the applicable accounting standard, and are classified within either Corporate or Other Business. Financial information with respect to the Company's reportable business segments is set forth in Part II. Item 8. Note 17. Segment and Geographic Information.

Ag Services and Oilseeds

The Ag Services and Oilseeds segment includes global activities related to the origination, merchandising, transportation, and storage of agricultural

raw materials, and the crushing and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the segment include ingredients for food, feed, fuel, and industrial customers. Crude vegetable oils produced by the segment's crushing activities are sold "as is" to manufacturers of renewable diesel and other customers or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel and glycols or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Ag Services and Oilseeds segment is also a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cotton cellulose pulp is manufactured and sold to the chemical, paper, and other industrial markets. The Ag Services and Oilseeds segment's grain sourcing, handling, and transportation network (including barge, ocean-going vessel, truck, rail, and container freight services) provides reliable and efficient services to the Company's customers and agricultural processing operations. The Ag Services and Oilseeds segment also includes agricultural commodity and feed product import, export, and global distribution, and structured trade finance activities. The Company engages in various structured trade finance activities to leverage its global trade flows. The Company has a 22.5% equity interest in Wilmar International Limited ("Wilmar"), a Singapore publicly listed company. Wilmar is a leading global agribusiness group headquartered in Asia engaged in the businesses of packaged oils and packaged foods, oil palm cultivation, oilseeds crushing, edible oils refining, sugar milling and refining, specialty fats, oleo chemicals, biodiesel and fertilizers manufacturing, and grains processing. The Company has a 32.2% equity interest in Pacifcor. Pacifcor owns and operates grain export elevators in Kalama, Washington and Portland, Oregon. The Company has a 50.0% equity interest in SoyVen, a joint venture between ADM and Cargill to provide soybean meal and oil for customers in Egypt. The Company has a 37.5% equity interest in Olenex Sarl ("Olenex"), a joint venture between ADM and Wilmar that produces and sells a comprehensive portfolio of edible oils and fats to customers around the globe. In addition, Olenex markets refined oils and fats from the Company's plants in the Czech Republic, Germany, the Netherlands, Poland, and the U.K. The Company has a 50.0% equity interest in Stratas Foods LLC, a joint venture between ADM and ACH Jupiter, LLC, a subsidiary of Associated British Foods, that procures, packages, and sells edible oils in North America. The Company has a 50.0% equity interest in Edible Oils Limited, a joint venture between ADM and Princes Limited to procure, package, and sell edible oils in the United Kingdom. The Company also formed a joint venture with Princes Limited in Poland to procure, package, and sell edible oils in Poland, the Czech Republic, Slovakia, Hungary, and Austria. The Company has a 50.0% equity interest in Terminal de Grãos Ponta da Montanha S.A., a joint venture between ADM and Viterra, that provides grain receiving, storage, and shipping services for the Agribusiness segment in Brazil.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 6 The Company has a 50.0% equity interest in Gradable, LLC, a joint venture between ADM and Farmers Business Network, offering a digital grain procurement platform that enables farmers and buyers to confidently pursue and derive value from grain produced using sustainable and regenerative practices. The Company is a supplier of raw materials to Wilmar, Stratas Foods LLC, Edible Oils Limited, SoyVen, and Olenex.

Carbohydrate Solutions The Carbohydrate Solutions segment is engaged in corn and wheat wet and dry milling and other activities. The Carbohydrate Solutions segment converts corn and wheat into products and ingredients used in the food and beverage industry including sweeteners, corn and

wheat starches, syrup, glucose, wheat flour, and dextrose. Dextrose and starch are used by the Carbohydrate Solutions segment as feedstocks in other downstream processes. By fermentation of dextrose, the Carbohydrate Solutions segment produces alcohol and other food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use in products such as hand sanitizers and ethanol for use in gasoline due to its ability to increase octane as an extender and oxygenate. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Carbohydrate Solutions products include citric acids, which are used in various food and industrial products. The Carbohydrate Solutions segment is a leader in carbon capture and sequestration. By continuing to advance additional carbon capture and sequestration initiatives and projects aimed at replacing coal power and steam generation with lower emissions power, the Carbohydrate Solutions segment is well positioned to benefit from the replacement of essential materials historically made from fossil fuels with plant-based alternatives. The Company has a 50.0% equity interest in Hungrana Ltd. which operates a corn wet milling plant in Hungary. The Company has a 50.0% equity interest in Almidones Mexicanos S.A. which operates a corn wet milling plant in Mexico. The Company has a 50.0% equity interest in Aston Foods and Food Ingredients, a Russian-based sweeteners and starches business. The Company has a 40.0% equity interest in Red Star Yeast Company, LLC, which produces and sells fresh and dry yeast in the U.S. and Canada. The Company has a 22.1% equity interest in LSCP, LLLP, which operates an ethanol plant facility in the U.S.

Nutrition The Nutrition segment serves various end markets including food, beverages, and nutritional supplements for humans, and complete feed, feed premix and additives, pet food and pet treats for livestock, aquaculture, and pets. The segment engages in the creation, manufacturing, sale, and distribution of a wide array of ingredients and solutions including plant-based proteins, flavors and colors derived from nature, flavor systems, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, postbiotics, enzymes, botanical extracts, and other specialty food and feed ingredients and systems. The Nutrition segment also includes activities related to the procurement, processing, and distribution of edible beans, the processing and distribution of formula feeds and animal health and nutrition products and the manufacture of contract and private label pet treats and foods. The Company has a 45.3% equity interest in Vimison S.A. de C.V., a leader in the animal nutrition industry in Mexico. The Company has 50% equity interests in ADM Matsutani LLC and Matsutani Singapore Pte. Ltd., joint ventures for the worldwide sales and marketing of Fibersol. The Company has a 50% equity interest in ADM Vland Biotech Shandong Co., Ltd., which manufactures and commercializes human probiotics in Greater China. As of December 31, 2024, this joint venture ceased operations and has started liquidation actions. The Company has a 42.8% equity interest in Dusial S.A., a leader in the complete feed industry in Southwest of France. The Company has a 34.3% equity interest in Vitafort ZRT, a leading company in the Hungarian animal feed market.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 7 Corporate Corporate includes the activities related to cost and equity method investments in early-stage start-up companies within ADM Ventures. In addition to identifying companies to invest in, ADM Ventures also works on select high-potential, new product development projects and alternative business models, all with the objective of supporting the Company's strategic objectives. Other Business Other Business includes the Company's remaining operations as described below. ADM Investor Services, Inc., a wholly owned subsidiary of the Company, is a registered futures commission merchant and a clearing member of all principal commodities exchanges in the U.S. ADM Investor Services International Limited, a member of several derivative and commodity exchanges and clearing houses in Europe, ADMIS Singapore Pte.

Limited, a clearing member of the Singapore exchange, and ADMIS Hong Kong Limited, are wholly owned subsidiaries of ADM offering brokerage services in Europe and Asia. Insurance activities include Agrinational Insurance Company (Agrinational) and its subsidiaries. Agrinational, a wholly owned subsidiary of ADM, provides insurance coverage for certain property, casualty, marine, medical, and other miscellaneous risks of the Company. Agrinational also participates in certain third-party reinsurance arrangements.

Methods of Distribution The Company's products are distributed mainly in bulk from processing plants or storage facilities directly to customers' facilities. The Company has developed a comprehensive transportation capability to efficiently move both commodities and processed products virtually anywhere in the world. The Company owns or leases trucks, trailers, railroad tank and hopper cars, river barges, towboats, and ocean-going vessels used to transport the Company's products to its customers.

Concentration of Revenues by Product The following products accounted for 10% or more of revenues for the following periods: % of Revenues Year Ended

	December 31 2024	2023	2022
Soybeans	19%	18%	17%
Soybean Meal	12%	13%	12%
Corn	12%	12%	14%

Status of New Products The Company continues to expand its market footprint and business growth through the continuous development of its portfolio and optimization of production systems. Internal capabilities and acquisitions expand the Company's ability to unlock the potential of nature and serve customers' evolving and expanding needs through its offerings of innovative ingredients for all segments.

Source and Availability of Raw Materials A significant majority of the Company's raw materials are agricultural commodities. In addition, the Company sources specific fruits, vegetables, and nuts for extracts to make flavors and colors. In any single year, the availability and price of these commodities are subject to factors such as changes in weather conditions, plantings, government programs and policies, competition, changes in global demand, changes in standards of living, and global production of similar and competitive crops. The Company's raw materials are procured from thousands of growers, grain elevators, and wholesale merchants in North America, South America, Europe, Middle East, and Africa (EMEA), Asia, and Australia, pursuant primarily to short-term (less than one year) agreements or on a spot basis. The Company is not dependent upon any particular grower, elevator, or merchant as a source for its raw materials.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 8 Some of the principal crops that ADM sources and processes present specific climate change risks. For example, South American soy and global palm present risks of deforestation due to their proximity to the forest and other high-carbon-value landscapes. In addition, when not managed appropriately, row crops such as corn, soy, wheat, and canola present environmental risks such as water quality impairment, erosion, soil degradation, and GHG emissions. However, these crops also present an opportunity to combat climate change through their ability to sequester carbon in the soil using regenerative agricultural practices. In 2022, ADM launched its "re: generations" program to engage and encourage growers in its supply chain to implement regenerative agriculture practices. In the first year of the program, the Company exceeded its goal to enroll one million acres. The Company has since expanded its regenerative agriculture program to cover more than 2.8 million acres across 18 U.S. states and Canada and has also extended the program into new geographies, launching regenerative agriculture projects in Europe and South America, with a goal to enroll five million acres globally by the end of 2025. Under the stewardship of ADM's Board of Directors, the Company has established several key social and environmental policies that collectively outline expectations for its employees, business partners and contractors, and the Company as a whole with respect to its sourcing operations. These policies set the standards that govern the Company's approach to environmental stewardship, employee conduct, and raw material sourcing, among other areas, and outline ADM's positions on issues of widespread public interest. These standards are

included in, among others, the Company's Code of Conduct; Environment, Health, and Safety Policy; Human Rights Policy; Commitment to Protect Forests, Biodiversity, and Communities; Statement on Genetically Modified Organisms; Statement on Animal Testing; Commitment to Anti-Corruption Compliance; Protocol for Managing Supplier Non-Compliance and ADM Supplier Expectations, all of which are available on the Company's website (see Item 1, Business - Available Information). In addition to policies, a portion of the Company's commodity sourcing is conducted using third-party certification programs including ADM Responsible Soy, Biomass Biofuel Sustainability Voluntary Scheme, Round Table for Responsible Soy, International Sustainability and Carbon Certification, Round Table on Sustainable Palm Oil, and U.S. Soy Sustainability Assurance Protocol. These programs have standards that are established to provide transparency on specific sustainability-related criteria. ADM procures canola, soybeans, and palm under these programs. Trademarks, Brands, Recipes, and other Intellectual Property The Company owns trademarks, brands, recipes, and other intellectual property including patents, with a net book value of \$660 million as of December 31, 2024. More than 90% of these intangibles are in the Nutrition segment which is not materially dependent upon any individual trademark, brand, recipe or other intellectual property. Seasonality, Working Capital Needs, and Significant Customers There is a degree of seasonality in the growing cycles, procurement, and transportation of the Company's principal raw materials: oilseeds, corn, wheat, and other grains. The Company has seasonal financing arrangements with farmers in certain countries around the world. Typically, advances on these financing arrangements occur during the planting season and are repaid at harvest. The prices of agricultural commodities, which may fluctuate significantly and change quickly, directly affect the Company's working capital requirements. Because the Company has a higher portion of its operations in the northern hemisphere, principally North America and Europe, relative to the southern hemisphere, primarily South America, inventory levels typically peak after the northern hemisphere fall harvest and are generally lower during the northern hemisphere summer months. Working capital requirements have historically trended with inventory levels. No material part of the Company's business is dependent upon a single customer or very few customers. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 9 Competition The Company has significant competition in the markets in which it operates based principally on price, foreign exchange rates, quality, global supply, and alternative products, some of which are made from different raw materials than those utilized by the Company. Given the commodity-based nature of many of its businesses, the Company, on an ongoing basis, focuses on managing unit costs and improving efficiency through technology improvements, productivity enhancements, and regular evaluation of the Company's asset portfolio. The Company's Nutrition business is a vertically integrated business that provides ingredients and solutions for humans, animals, and pets in a highly competitive environment with a variety of companies offering the same products and services. The industry includes ingredient suppliers, contract manufacturers, global fast moving consumer goods companies, and private label brands, as well as smaller companies that specialize in specific niche markets. The Company focuses on staying ahead of the curve in terms of innovation and science-based solutions, building direct-to-consumer sales channels and focusing on consumer needs, expanding into new markets, building strategic partnerships, leveraging data and technology, and building a strong distribution network. Research, Creation, Design, and Development (R&D;) R&D; expense, net of reimbursements of government grants, for the year ended December 31, 2024 was \$269 million. The Company is committed to global health and sustainable products, recognizing the interconnectedness of human, animal, and environmental health. ADM's R&D; efforts focus on creating science-based products, solutions, and technologies aligned with macro trends in food security, sustainable processes, health,

and personalized nutrition. The Company strategically invests in R&D; across the entire nutrition value chain by leveraging its access to innovative processes and product optimization. The R&D; team is also engaged in BioSolutions initiatives which are a key part of ADM's commitment to utilize its value chain to reduce its carbon footprint, redesign core products with sustainable alternatives, and explore new markets. The Company is dedicated to transforming aspirations into solutions and brand innovation. The integration of interdisciplinary experts in biology, chemistry, physiology, nutrition, agronomy, and product development provides a competitive edge. R&D; teams are closely connected to customers and the global markets. Targeted product development leverages innovative ingredients and ADM's existing portfolio across different segments. R&D; innovation centers across three continents enable the rapid transformation of ideas into products. An external network of collaborators, including customers, key opinion leaders, start-ups, and academia amplifies the Company's scientific excellence. The scope and application of the Company's technical capabilities reinforce its commitment to global health and sustainable products. High-throughput screening and characterization facilities strengthen ADM's extensive ingredient database. Formulation platforms enable rapid upscaling or downscaling for cost-effective innovation. Resources dedicated to functional ingredient characterization enhance the Company's capacity to deliver on the science behind each product. ADM's R&D; strategy prioritizes fulfilling customer expectations and supporting the Company's growth. The Company's future strategy aims to deliver world-class solutions more efficiently and sustainably, and to capitalize on ADM's full potential. Environmental, Social, and Governance (ESG) The Company knows that the health of our natural resources is critical to our future, and that its commitment to sustainable practices will result in a stronger ADM and a better world. ADM is committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, industrial and consumer products, energy, and packaging materials while pursuing ways to continually improve the Company's efforts in both protecting the environment and enhancing environmental sustainability. The United Nations Development Programme created the Sustainable Development Goals (SDG) blueprint as a universal call to action to end poverty, protect the planet, and ensure that all people enjoy peace and prosperity. ADM focuses its efforts toward goals that align with its business objectives and allow the Company to make the greatest contribution towards the achievement of the SDGs, specifically Zero Hunger, Clean Water and Sanitation, Decent Work and Economic Growth, Climate Action, and Life On Land. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 10 Governance The Sustainability and Technology Committee of the Board actively oversees the Company's objectives, goals, strategies, and activities relating to sustainability. The Sustainability Committee also oversees the Company's compliance with sustainability laws and regulations, assesses performance relating to industry benchmarks, and assists the Board of Directors in overseeing the Company's operations as a sustainable organization and responsible corporate citizen in order to enhance shareholder value and protect ADM's reputation. The Company's Chief Sustainability Officer, Senior Vice President of Global Operations, and Chief Technology Officer regularly attend committee meetings as management representatives. The Executive Council of ADM, the Company's highest strategic and operational body, provides close supervision of the Company's ESG efforts and in-depth review of sustainability issues. Furthermore, regional sustainability teams, along with the corporate sustainability team, support the Chief Sustainability Officer to drive sustainability efforts in the Company's facilities and supply chains around the world. ADM's sustainability efforts are also supported by functional expertise throughout the Company such as in Operations and Utilities, Supply Chain and Procurement, Agricultural Services and Oilseeds, and Environmental Health and Safety (EHS). Strategy The Company aims to mitigate climate change and protect biodiversity through renewable product and process innovations, supply

chain efforts including a commitment to no-deforestation or native vegetation conversion and regenerative agriculture, and a strategic approach to operational excellence with a focus on enhancing the efficiency of ADM's production plants throughout its global operations. ADM believes sustainability is critical to its future growth strategy. ADM's strategic plan of sustainable growth leverages the trends and technologies in sustainability to help the Company grow and create value for its stakeholders. Agricultural Services and Oilseeds is focused on traceability of sourcing and differentiation and working with growers on low carbon agricultural practices and products. Carbohydrate Solutions is focused on decarbonization efforts that increasingly position the segment to offer low-carbon intensity feedstocks for biosolutions and biomaterials, including fuel solutions, to replace petroleum-based products. Nutrition is working with suppliers and customers to identify nature positive solutions that can reduce environmental impact in supply chains. The growth of these projects and businesses will be integral to supporting the objective of helping the planet limit total global warming to the 1.5°C threshold indicated by the United Nations. Additionally, the Company has incorporated the achievement of GHG emission goals and water reuse goals to executive performance measurement to reflect the strategic importance of ESG to its business. Moreover, ADM has a large industrial footprint and believes it is important to reduce GHG emissions related to its business activities and the entire agricultural supply chain. The Company continues to use internal and external resources to identify opportunities and take action to reduce its GHG emissions globally to meet its continued commitment to mitigate the effects of climate change. ADM's Strive 35 plan is an ambitious plan to, by 2035, reduce absolute Scope 1 and 2 GHG emissions by 25% from a 2019 baseline, reduce absolute Scope 3 GHG emissions by 25% from a 2021 baseline, increase use of low-carbon energy sources to 25% of total energy used, reduce absolute water withdrawal by 10%, and achieve a 90% landfill diversion rate. To support the Company's Strive 35 environmental goals, ADM developed a feasibility study with a leading engineering professional services firm that provides the technology pathway for absolute reduction of GHG emissions by 2035. The Company has also committed to develop a global strategy focused on improving community well-being in priority watersheds, including water-stressed areas, by the end of 2025. As of December 31, 2023, the Company reduced absolute Scope 1 and 2 GHG emissions by 14.7% and reduced Scope 3 GHG emissions by 7.7%. The Company reduced absolute water withdrawal by 4.2%. The Company realized no increase in low carbon energy usage and achieved 86.1% of its waste diverted from landfill. The Company anticipates spending between \$400 million and \$500 million on capital projects to achieve the Strive 35 targets. Through December 31, 2024, ADM has spent \$297 million on projects in support of these goals since inception, of which \$139 million was spent in 2024. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 11 The Company believes that protection of natural resources, habitats, and biodiversity are important to life and to the Company's business. ADM is committed to eliminating deforestation from all of the Company's supply chains in 2025. In 2023, after a strategic investigation of the impact of conversion of native habitats in its key supply chains, the Company announced its commitment to eliminate conversion of native habitats in high risk areas in South America for direct suppliers of all commodities in 2025 and indirect suppliers by 2027, with a 2025 cutoff date (a date after which conversion of primary native vegetation renders a given area or production unit non-compliant) for both direct and indirect suppliers. During the year ended December 31, 2024, the Company spent \$64 million specifically to improve equipment, facilities, and programs for pollution control and in light of requirements of various environmental agencies. There have been no material effects upon the earnings and competitive position of the Company resulting from compliance with applicable laws or regulations enacted or adopted relating to the protection of the environment.

ADM's corporate social investment program, ADM Cares, aligns the Company's corporate giving with its business strategies and sustainability objectives. Through the program, ADM works to sustain and strengthen its commitment to communities where ADM colleagues work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic, and environmental progress. The ADM Cares team evaluates potential projects submitted for funding to ensure they meet eligibility criteria, such as initiatives that support food security, health and well-being, and sustainability around the world. Additional Sustainability Disclosures Program updates, scenario analysis, and metrics and targets are available in ADM's Corporate Sustainability Report which can be accessed through its website at <http://www.adm.com>. References to the Company's website address in this report are provided as a convenience, and information contained on, or available through, the website is not incorporated by reference. See Available Information section below for more information.

Income Taxes The Company has a responsibility to oversee that all ADM businesses within the Company follow responsible tax practices. ADM manages its tax affairs based upon the following key principles: – a commitment to paying tax in compliance with all applicable laws and regulations in the jurisdictions in which the Company operates; – a commitment to the effective, sustainable, and active management of the Company's tax affairs; and – developing and sustaining open and honest relationships with the governments and jurisdictions in which the Company operates regarding the formulation of tax laws.

Human Capital and Culture ADM's purpose of unlocking the power of nature to enrich the quality of life highlights the significant role ADM plays within an essential industry and the critical job each employee has within the Company. ADM has long maintained its Code of Conduct to help the Company achieve the right results, the right way. The code establishes high standards of honesty and integrity for all ADM colleagues and business partners, and sets forth specific policies to further the Company's commitment to conducting business fairly and ethically everywhere it operates. The Company's culture is grounded in its values of integrity, respect, excellence, resourcefulness, teamwork, and responsibility. ADM is a truly global company of approximately 44,000 employees working together to achieve extraordinary results. Talented colleagues can be found in a wide variety of roles – including front-line employees who enable the production of ADM's products, supply chain experts who deliver to customers all over the world, engineering teams who continuously improve the Company's operations, sales and commercial teams who work closely with customers, information technology professionals who implement the technologies to enable the Company's processes, and so many more. ADM continues to develop its workforce to remain relevant and deliver on the Company's growth aspirations.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY PART I 12 The Company believes that cultivating an inclusive culture of care and continuous learning for our colleagues is a critical priority that assists ADM in its efforts to continue innovating, driving growth through customer focus, and delivering outstanding performance for shareholders. Part of ADM's vision is to foster an inclusive culture with opportunities for all employees so that all members of its diverse, global workforce belong and make meaningful contributions to the success of each other and the Company. ADM holds an annual Global Week of Understanding, a signature week-long investment focused on continuous learning and strengthening ADM's culture of belonging. The week features keynote presentations, training programs, roundtable sessions, and onsite activities that foster an environment where all can thrive, and diversity of perspectives are harnessed to fuel innovation and growth. In support of ADM's commitment to a productive, diverse, and inclusive workforce, ADM supports Employee Resource Groups (ERGs). These ERGs are voluntary, employee-led groups where colleagues with shared experiences or interests can come together to build a sense of community and engage in personal and professional development.

ADM's ERGs are open to all employees and offer forums for fostering collaboration, connection and belonging. The following tables set forth information about the Company's employees as of December 31, 2024. Number of Employees by Contract and Region Salaried Hourly Part-Time Total North America 10,034 11,171 215 21,420 EMEA 5,985 4,658 540 11,183 South America 2,904 4,511 873 8,288 Asia Pacific 1,817 805 26 2,648 Central America/Caribbean 238 260 6 504 Total 20,978 21,405 1,660 44,043 Number of Employees by Type and Gender Male % Female % Total % Full-time 31,799 75 % 10,584 25 % 42,383 100 % Part-time 672 40 % 988 60 % 1,660 100 % Total 32,471 74 % 11,572 26 % 44,043 100 % Percentage of Executive Council and Senior Leadership by Gender Percentage 2024 2023 Male Female Total Male Female Total Executive Council 69 % 31 % 100 % 67 % 33 % 100 % Senior Leadership 69 % 31 % 100 % 69 % 31 % 100 % Compensation and Benefits ADM offers market-competitive pay, benefits, and services that help meet the needs of its employees. The Company's global rewards package includes base pay, short-term incentive plans, long-term equity grants, paid time-off, employee assistance programs, and benefits that meet the country-specific competitive markets in which ADM operates. ADM's global bonus plan has clearly defined enterprise metrics and objectives which are the same for all eligible employees – creating a strong team spirit and fostering collaboration among colleagues. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 13 Employee Development All ADM employees participate annually in training and development that further increases knowledge, skills, and awareness on important topics. In addition, ADM offers many voluntary training opportunities, including in-person, virtual and on-demand training. Among the offerings are an Ability to Connect Program that cultivates business language skills to foster collaboration and LinkedIn Learning Platform which offers access to over 16,000 courses in 7 languages to support career development. ADM's leadership development program, Ability to Lead, focuses on enabling innovation, driving productivity, developing talent, change leadership, building trust, and coaching teams for engagement and performance. Additionally, first time and front line leaders are offered a Leadership Essentials program that cultivates effective communication, coaching, and the engagement and retention of talent. ADM's early career programs are focused on attracting and cultivating a strong pipeline of early career talent to become future leaders in the organization. Recruitment partnerships with a variety of organizations help ADM to engage with, support, recruit, and hire inclusively, from front line production associates, to interns, to college graduates that begin their career across ADM's business units, functions and regions. ADM prides itself in offering an array of career opportunities that include global assignments for its high potential talent, internal career growth for those who wish to learn more, and experiential learning through projects, mentorships, and on-the-job development. Workplace Safety ADM is committed to driving a safe and reliable culture that protects its people, its processes and the planet. By fostering a highly engaged workforce that is proactive and relentlessly focused on risk reduction, the Company aims to ensure every colleague returns home safely to their families and the things that matter most. In 2024, approximately 76% of ADM's sites completed the year with zero injuries and approximately 89% with no lost workday injuries. The Company's Total Recordable Incident Rate and Lost Workday Incident Rate, based upon the number of incidents per 100 employees (or per 200,000 work hours), as defined by OSHA, for ADM colleagues (excluding unsupervised contractors) in 2024 were 0.68 and 0.23, respectively. Notably, the Decatur, Illinois complex achieved significant safety improvements in 2024, with zero fatalities or serious injuries. In 2024, the Company had one ADM colleague fatality and nine serious injuries. The Company continues to take steps to further enhance the safety of its workplaces through occupational safety and process safety improvements and maintains a goal of zero fatalities. Through the guidance of the Environmental, Health, and Safety Technology Center, the

Company is advancing impactful occupational and process safety initiatives, including: – Driving excellence in Life-Critical Standards – Encouraging proactive use of Stop Work Authority – Expanding Total Process Safety training at all organizational levels – Providing focused support to our highest-risk sites Looking ahead to 2025, ADM is focused on efforts to continue to reduce serious injuries and its total recordable injury rate while strengthening its culture of safety and reliability. Board Diversity The Nominating and Corporate Governance Committee strives to recommend nominees who reflect a diversity of background and experience with the necessary skills to effectively perform the functions of the Board and its committees, including the Board's role in overseeing ADM's strategy and operations. As of December 31, 2024, 58% of ADM's 12 board members identified as members of underrepresented groups – five are African-American, Hispanic or Asian, and four are women. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 14 Available Information The Company's website is <http://www.adm.com>. ADM's annual reports on Form 10-K; quarterly reports on Form 10-Q; current reports on Form 8-K; directors' and officers' Forms 3, 4, and 5; and amendments to those reports, if any, are available, free of charge, through its website, as soon as reasonably practicable after electronically filing such materials with, or furnishing them to, the SEC. The Company's Code of Conduct, Corporate Governance Guidelines, and the written charters of the Audit, Compensation and Succession, Nominating and Corporate Governance, and Sustainability and Technology Committees are also available through its website. References to the Company's website address in this report are provided as a convenience and do not constitute, and should not be viewed as, an incorporation by reference of the information contained on, or available through, the website. Therefore, such information should not be considered part of this report. The SEC maintains a website which contains reports, proxy and information statements, and other information regarding issuers that file information electronically with the SEC. The SEC's website is <http://www.sec.gov>. Information about Our Executive Officers Certain information with respect to executive officers of the Company as of the date of this filing is set forth below. Except as otherwise indicated, all positions are with the Company.

Name Titles Age Juan R. Luciano Chair of the Board of Directors since January 2016. Chief Executive Officer and President since January 2015. 63 Monish Patolawala Executive Vice President and Chief Financial Officer since August 2024. President and Chief Financial Officer of 3M Company from September 2023 to July 2024. Executive Vice President, Chief Financial and Transformation Officer of 3M from October 2021 to September 2023 and Senior Vice President and Chief Financial Officer of 3M from July 2020 to October 2021. 55 Christopher M. Cuddy Senior Vice President of the Company since May 2015. President, Carbohydrate Solutions business unit since March 2015. 51 Regina B. Jones Senior Vice President, General Counsel and Secretary since September 2023. Chief Legal Officer at Baker Hughes from April 2020 to September 2023. EVP, General Counsel and Corporate Secretary at Delek US Holdings, Inc. from May 2018 to April 2020. 54 Gregory A. Morris Senior Vice President of the Company since November 2014. President, Ag Services & Oilseeds business unit since July 2019. President, Global Oilseeds Processing business unit from May 2015 to June 2019. 53 Ian Pinner Senior Vice President of the Company since January 2020. President, Nutrition business unit and Chief Sales and Marketing Officer since November 2023. Chief Strategy and Innovation Officer from January 2020 to November 2023. President, Health and Wellness from January 2020 to March 2021. Vice President, Growth and Strategy from August 2018 to January 2020. Chief Growth Officer from July 2017 to August 2018. 52 Jennifer L. Weber Senior Vice President, Chief People and Diversity Officer since August 2020. Executive Vice President - Human Resources at Lowe's Companies, Inc. from March 2016 to April 2020. 58 Molly Strader Fruit Vice President, Corporate Controller since March 2021. Vice President, Global Financial Services from May 2019 to March 2021. Controller, Carbohydrate Solutions from August

2018 to May 2019. Vice President, Global Credit from April 2016 to June 2019. Controller, Americas for Agricultural Services from June 2015 to August 2018. 46 Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 15 Item 1A. RISK FACTORS The risks described below, as well as the other information contained in this Annual Report on Form 10-K, should be carefully considered. Any one or more of such risks could materially and adversely affect the Company's business, financial condition, results of operations, and stock price and could cause actual results of operations and financial condition to vary materially from past or anticipated future results of operations and financial condition. Additional risks and uncertainties not presently known to the Company or that the Company currently believes to be immaterial may also adversely affect the Company. Operational Risks The Company is exposed to potential business disruption which could adversely affect the Company's operating results. The assets and operations of the Company could be subject to unplanned downtime or extensive property damage and business disruption from various events which include, but are not limited to, equipment failure, raw material shortages, natural disasters, severe weather conditions, accidents, explosions, fires, or other unexpected outages. The Company may not be able to resolve emergencies timely or effectively, and the associated liability which could result from these risks may not always be covered by or could exceed liability insurance. The Company's operations rely on dependable and efficient transportation services, the disruption of which could result in difficulties supplying materials to the Company's facilities and impair the Company's ability to deliver products to its customers in a timely manner. The Company relies on access to navigable rivers and waterways in order to fulfill its transportation obligations more effectively. In addition, if certain non-agricultural commodity raw materials, such as water or certain chemicals used in the Company's processing operations, are not available, the Company's business could be disrupted. Any major lack of available water for use in certain of the Company's processing operations could have a material adverse impact on operating results. Certain factors which may impact the availability of non-agricultural commodity raw materials are out of the Company's control including, but not limited to, disruptions resulting from weather, high or low river water conditions, economic conditions, border closures, manufacturing delays or disruptions at suppliers, shortage of materials, interruption of energy supply, and unavailable or poor supplier credit conditions. Transportation, inflationary impacts, and fluctuations in energy prices could affect the Company's operating results. The Company's operating costs and the selling prices of certain finished products are sensitive to changes in energy prices, inflationary pressures, and certain logistic constraints. The Company's processing plants are powered principally by electricity, natural gas, and coal. The Company's transportation operations are partially dependent upon rail access, diesel fuel and other petroleum-based products. Significant increases in the cost or access of these items, including any consequences of regulation or taxation of greenhouse gases, could adversely affect the Company's production costs and operating results. Human capital availability may not be sufficient to effectively support global operations. ADM's global operations function with skilled individuals necessary for the processing, warehousing, and shipping of raw materials for products used in other areas of manufacturing or sold as inputs or products to third-party customers. The availability of skilled trade and production workers has been a specific focus for the manufacturing industry. The inability to properly staff manufacturing facilities with skilled trades and hourly labor due to a limited number of qualified resources could negatively impact operations. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 16 The Company may fail to realize the benefits of or experience delays in the execution of its growth strategy. As the Company executes its growth strategy, through both organic and inorganic growth, it may encounter risks which could result in increased costs, decreased

revenues, and delayed synergies. Growth in new geographies outside the U.S. can expose the Company to volatile economic, political, and regulatory risks that may negatively impact its operations and ability to achieve its growth strategy. Expanding businesses where the Company has limited presence may expose the Company to risks related to the inability to identify an appropriate partner or target and favorable terms, inability to retain/hire strategic talent, or integration risks that may require significant management resources that would have otherwise been available for ongoing growth or operational initiatives. Acquisitions may involve unanticipated delays, costs, and other problems. Due diligence performed prior to an acquisition may not identify a material liability or issue that could impact the Company's reputation or adversely affect results of operations resulting in a reduction of the anticipated acquisition benefits. Additionally, acquisitions may involve integration risks such as: internal control effectiveness, system integration risks, the risk of impairment charges related to goodwill and other intangibles, ability to retain acquired employees, and other unanticipated risks. The Company may fail to realize the operational or financial benefits expected from acquisitions, which may impact the Company's growth strategy. The Company has limited control over and may not realize the expected benefits of its equity investments and joint ventures and may not be able to monetize the investments at an attractive value when the Company decides to exit the investments. The Company has invested in or advanced funds to joint ventures and investments over which the Company has limited control as to governance and management activities (see Part II. Item 8. Note 8. Investments in and Advances to Affiliates for investment balances and related net sales amounts). Risks related to these investments may include: the financial strength of the investment partner; loss of revenues and cash flows to the investment partner and related gross profit; the inability to implement beneficial management strategies, including risk management and compliance monitoring, with respect to the investment's activities; the risk that the Company may not be able to resolve disputes with the partners; and the risk that the Company may not realize the operational or financial benefits expected from the investment. The Company may encounter unanticipated operating issues, financial results, or compliance and reputational risks related to these investments. The Company faces risks related to health epidemics, pandemics, and similar outbreaks. The Company could be materially impacted in the future if a health epidemic, pandemic, or similar outbreak would arise causing severe disruptions. In such circumstances, ADM may be unable to perform fully on its contractual obligations, critical global supply chain and logistical networks may be affected, and costs and working capital needs may increase. These cost increases may not be fully recoverable or adequately covered by insurance. In addition, demand for certain products that ADM produces, particularly biofuels and ingredients that go into food and beverages that support the food services channels, could be materially impacted from a prolonged regional or global outbreak, leading to government-imposed lockdowns, quarantines, or other restrictions. Geopolitical Risks The Company faces risks related to international conflicts, acts of terrorism or war, or other geopolitical events, such as the ongoing Russia-Ukraine war, Israel-Hamas war, sanctions, maritime piracy, and other economic disruptions. ADM's assets and operations could be subject to extensive property damage, business disruption, loss in value, nationalization, and expropriation as a result of geopolitical conflicts, acts of terrorism (e.g. purposeful adulteration of the Company's products), war, and piracy, as well as any sanctions or embargoes resulting from these events. The assets and operations located in the region affected by the war between Russia and Ukraine are at an increased risk of property damage, inventory loss, business disruption, and expropriation. In addition, the Company may not be able to realize any financial or other benefits from its investments in Russia due to ongoing sanctions or actions of the Russian government. The Black Sea region is a major exporter of wheat and corn to the

world, and the disruption of supply may continue to cause volatility in volumes, prices, and margins of these commodities and related products. Further, there is a risk that ADM and its related parties could trade with a sanctioned partner due to the number of sanctions taken against Russia. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 17 Trade receivables may be at risk of higher defaults, and other third-party risks could affect ADM's ability to obtain inputs if suppliers are unable to perform or face insolvency, as certain supplies may not be attainable due to sanctions and/or restrictions on cross-border payment transactions. The Company could be materially impacted if, in the worst-case scenario, the conflict in Ukraine advances to other countries. The risk to ADM's business from the war in Israel could increase if it expands into other countries. As the Company continues to monitor geopolitical developments, shipping routes are adjusted accordingly as increased use of technology, including drones, has provided pirates with enhanced capabilities to identify and target vessels. Most attacks on ships in high-risk areas result in boarding, which poses significant safety and security risks to crew and cargo. Piracy and related maritime threats could negatively impact the Company. Crew extractions, potential ransom payments, lease obligations, and expenses related to rerouting vessels to circumvent high-risk areas may result in financial loss. Furthermore, disruptions in shipping schedules may be impacted for an extensive period. In these circumstances, trade policies and the Company's critical global supply chain and logistical networks could be affected, impairing the Company's ability to satisfy contractual obligations, and impacting working capital requirements. Insurance may not adequately cover these risks. In addition, provisions for certain products that ADM produces, particularly those that support the food services channels, could be materially impacted. Political instability and changes in trade policies could negatively impact the Company's financial results. The Company's operating results could be affected by political instability and by changes in monetary, fiscal, trade, and environmental policies, laws, regulations, and acquisition approvals, creating risks including, but not limited to: changes in a country's or region's economic or political conditions; local labor conditions and regulations, and safety and environmental regulations; reduced protection of intellectual property rights; changes in the regulatory or legal environment; restrictions on currency exchange activities; currency exchange fluctuations; burdensome taxes and trade tariffs; enforceability of legal agreements and judgments; adverse tax, administrative agency or judicial outcomes; and regulation or taxation of greenhouse gases. International risks and uncertainties, including changing social and economic conditions as well as terrorism, political hostilities, and war, could limit the Company's ability to transact business in these markets. The Company has historically benefited from the free flow of agricultural and food and feed ingredient products from the U.S. and other sources to markets around the world. Increases in tariff and restrictive trade policies around the world could negatively impact the Company's ability to enter certain markets or the price of products may become less competitive in those markets. Investigation Risks The Investigation and related events have had and may continue to have a material adverse impact on the Company. As previously disclosed, following a voluntary document request from the SEC relating to intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments, the Company conducted an internal investigation into certain accounting practices and procedures with respect to its Nutrition reporting segment, including as related to certain intersegment sales (the "Investigation"). The Company had historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Investigation, the Company identified certain intersegment sales that occurred between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting

segments that were not recorded at amounts approximating market. The Company corrected those errors in its fiscal year 2023 Form 10-K, along with subsequently identified errors that the Company corrected in an amendment to its Annual Report on Form 10-K for the fiscal year ended December 31, 2023 (the "FY2023 10-K/A"), and its Form 10-Qs for the first and second quarters of 2024, all of which were filed on November 18, 2024, to restate the segment disclosures included in those filings. As a result of the Investigation, correction of identified errors and related events, the Company has experienced, and may continue to experience, a number of adverse impacts and risks, including, but not limited to: – the Company's Board of Directors and senior management have been required to devote significant time to the Investigation, the correction of certain segment-specific historical financial information and related matters, resulting in potential management distraction from the operation of the business; – the price of the Company's common stock has declined significantly, has been subject to fluctuations and could continue to fluctuate upon further announcements or actions; Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 18 – the Company is facing securities litigation and could face additional litigation under federal and state securities laws or other claims arising from the Investigation, such litigation can be costly to defend, and if decided against the Company, such litigation could require the Company to pay substantial judgments or settlements; – the Company could discover additional material or immaterial errors in its financial statements; and – the three major credit rating agencies have maintained the Company's credit ratings at investment grade levels with a negative outlook; however, if the ratings are downgraded, the Company's access to the credit markets and its ability to fund its working capital and capital expenditures may be affected. The risks described above have had and may in the future have a material adverse effect on the Company's business, results of operations, financial condition and liquidity. In addition, although the Company has taken certain actions in response to the findings of the Investigation, the Company could take new or different actions in addition to those taken to date if it determines those actions are appropriate. Such actions are uncertain and could have a material adverse impact on the Company's business and the price of its common stock. The Company is subject to ongoing government investigations, and the timing for their resolution and outcome cannot be predicted. As previously disclosed, and as described more fully in Part II. Item 8. Note 20. Legal Proceedings of this report, the Company is under investigation by the United States Securities and Exchange Commission ("SEC") and the Department of Justice ("DOJ") relating to, among other things, intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The Company cannot predict when the SEC and DOJ investigations will be completed, nor can it predict the results of these investigations with any reasonable degree of certainty. Expenses incurred in connection with these investigations (which include substantial fees of lawyers and other professional advisors and potential obligations to indemnify officers and directors who are parties to these investigations) could adversely affect the Company's results of operations and liquidity position. The Company may be required to pay material fines, consent to injunctions on future conduct or be subject to other penalties, each of which could have a material adverse effect on its business, results of operations, financial condition and liquidity. These government investigations also may adversely affect the Company's ability to obtain, and/or increase the cost of obtaining, directors' and officers' liability insurance and/or other types of insurance. In addition, the findings and outcomes of the Investigation as well as the government investigations could result in additional litigation or actions taken by third parties against the Company. The effects and results of such other litigation or actions may have a materially adverse effect on the Company's business, results of operations, financial condition and liquidity. The

Company identified a material weakness in the Company's internal control over financial reporting, which could impact the Company's ability to report its results of operations and financial condition accurately and in a timely manner. During the fourth quarter of 2023, in connection with the Investigation, the Company identified a material weakness in its internal control over financial reporting related to the Company's accounting practices and procedures for segment disclosures. The material weakness resulted from inadequate controls that allowed for certain intersegment sales to be reported at amounts that were not in accordance with ASC 606, Revenue from Contracts with Customers. Specifically, the Company did not have adequate controls in place around measurement of certain intersegment sales between the Company's reporting segments. In addition, appropriate controls were not in place for the reporting of intersegment sales and for the application of disclosure requirements within ASC 280, Segment Reporting. For a more detailed description of this material weakness, see Part II. Item 9A. Controls and Procedures of this report. While the Company has implemented a remediation plan, the Company will not be able to conclude whether the steps the Company has taken will remediate the material weakness until a sustained period of time has passed to allow management to test the design and operational effectiveness of the new and enhanced controls. The material weakness, if not fully addressed, could result in additional accounting errors, such as those resulting in the restatement of certain segment-specific historical financial information as described in the FY2023 10-K/A. The Company may be unable to remediate this material weakness in a timely manner, which could adversely impact the accuracy and timeliness of future reports and filings the Company makes with the SEC. Further, additional errors may be identified as a result of the Company's remediation efforts, or additional material weaknesses could be identified, any of which could result in additional corrections or adjustments, which may be material, or could impact the Company's ability to report its results of operations and financial condition in an accurate and timely manner. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 19 Negative publicity has and may continue to adversely affect the Company and the market price of its common stock. The Company has become subject to negative publicity as a result of the Investigation and related events. Negative publicity and unfavorable perception of the Company has caused and could in the future cause significant declines in the price of the Company's common stock. Negative publicity can also impact the terms under which some customers and suppliers are willing to continue to do business with the Company and affect the Company's financial performance or financial condition. In addition, negative publicity or unfavorable perceptions make it more difficult for the Company and its employees to operate, resulting in reduced morale, a potential increase in employee turnover, and difficulty attracting talent. As a result, any new or ongoing negative publicity could have a material adverse effect on the Company's business, results of operations and financial condition, and the market price of the Company's common stock. Environmental, Social, and Governance Risks The Company may be impacted by carbon emission regulations in multiple regions throughout the globe. The production of the Company's products uses materials that can create emissions of certain regulated substances, including GHG emissions. Such regulated emissions also include indirect emissions that occur in the value chain as the result of activities from assets now owned or controlled by the Company. Several jurisdictions where the Company has operations have implemented or are in the process of implementing carbon pricing programs or regulations to reduce GHG emissions impacting climate change and rising sea levels including, but not limited to, the United States, Canada, Mexico, the European Union and its member states, the United Kingdom, and China. In particular, the State of Illinois enacted legislation intended to eliminate carbon emissions by 2050 which includes the mandate for zero emissions of carbon dioxide equivalent and co-pollutants from electric generation

using coal by 2030. It is difficult at this time to estimate the likelihood of passage, or predict the potential impact, of any additional legislation, regulations or agreements. Potential consequences of new obligations could include increased energy, transportation, raw material, and administrative costs, and may require the Company to make additional investments in its facilities and equipment. Operations could be impacted by deforestation regulations, including the European Union (EU) deforestation-free regulation as part of the EU Green Deal, and by Brazil's Amazon soy moratorium. The EU deforestation-free regulation's original effective date of December 2024 was formally postponed for one year. Soybeans and palm oil are the primary commodities covered by the regulation that will impact ADM due to the volume of those commodities that the Company imports into the EU. Failure to comply with the regulation could have serious consequences including civil, administrative, and criminal penalties, as well as negative impact on the Company's reputation, business, cash flows, and results of operations. Adhering to these regulations is costly, and insufficient enforcement heightens operational risks. Removal or revisions of existing deforestation regulations creates risk due to ADM's operational and technology costs incurred in its commitments to comply with such regulations, including ADM's investment in Gradable. The Company is committed to avoid sourcing from deforested areas. However potential disruptions to the Amazon soy moratorium due to changes in Brazilian legislation, could render the Company less competitive in the market and or damage the Company's reputation. The Company is working to source responsibly while maintaining its market position. Food or feed risks derived from quality issues or off label product usage, occupational health and safety issues, and ineffective diversification programs may expose the Company to certain regulatory or reputational risks. The Company is subject to federal, state, and local regulations on manufacturing or labeling; socially acceptable and sustainable farming practices; environmental, health, and safety regulations; and customer product liability claims. The liability which could result from noncompliance and other risks may not always be covered by, or could exceed liability insurance related to product liability and food safety matters maintained by the Company. Risks to the Company's reputation may exist due to potential negative publicity caused by product liability, food safety, occupational health and safety, workforce diversity, and environmental matters.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 20 The Company's sustainable practices require oversight and robust monitoring requirements. The lack of unified reporting standards increases sustainability regulatory compliance and reporting requirements. The Company has programs and policies in place (e.g., Corporate Sustainability Program; Commitment to Protecting Forests, Biodiversity and Communities; Environmental Policy; Strive 35 environmental goals; etc.) to expand responsible practices while reducing its environmental footprint and to help ensure compliance with laws and regulations. Implementation of these programs and policies sometimes requires the acquisition of technology or capital investments at a cost to the Company. Starting in 2026, the Corporate Sustainability Reporting Directive (CSRD) will require companies within the European Union to report extensive climate-related information for the 2025 financial year. The reporting requirements of CSRD, along with the growing multitude of corporate sustainability reporting standards, will result in increased compliance costs and could result in regulatory reporting risks as each standard will have its own required disclosures. Failure to comply with laws and regulations can have serious consequences, including civil, administrative, and criminal penalties as well as a negative impact on the Company's reputation, business, cash flows, and results of operations. The Company's carbon capture and sequestration operations are also subject to potential risks and uncertainties, including complying with complex and evolving regulations, obtaining and maintaining permits and regulatory approvals, and managing operational challenges. Financial Risks

Limitations on access to external financing could adversely affect the Company's operating results due to its capital-intensive nature. The Company requires significant capital, including continuing access to credit markets, to operate its current business and fund its growth strategy. The Company's working capital requirements, including margin requirements on open positions on futures exchanges, are directly affected by the price of agricultural commodities, which may fluctuate significantly and change quickly. The Company also requires substantial capital to maintain and upgrade its extensive network of storage facilities, processing plants, refineries, mills, ports, transportation assets, and other facilities to keep pace with competitive developments, technological advances, regulations, and changing safety standards in the industry. Moreover, the expansion of the Company's business and pursuit of acquisitions or other business opportunities may require significant amounts of capital. Access to credit markets and pricing of the Company's capital is dependent upon maintaining sufficient credit ratings from credit rating agencies. Strong credit ratings allow the Company to access cost-competitive tier one commercial paper markets. As of December 31, 2024, the three major credit rating agencies maintained the Company's credit ratings at investment grade levels with a negative outlook. Further watches, reviews or downgrades could occur. If the Company is unable to maintain sufficiently high credit ratings, access to these commercial paper and other debt markets and costs of borrowings could be adversely affected. If the Company is unable to generate sufficient cash flow or maintain access to adequate external financing, including as a result of significant disruptions in the global credit markets, it could restrict the Company's current operations and its growth opportunities.

Strategic and Economic Risks Agricultural commodities, agricultural commodity products, and non-agricultural commodity raw materials the Company procures, transports, stores, processes, and merchandises can be affected by various factors beyond the Company's control. The availability and prices of agricultural commodities are subject to wide fluctuations, including impacts from factors outside the Company's control such as changes in market conditions, weather conditions, crop disease, plantings, government programs and policies, climate change, competition, and changes in global demand, which could adversely affect the Company's operating results. Additionally, the Company depends globally on agricultural producers to ensure an adequate supply of the agricultural commodities. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 21 Reduced supply of agricultural commodities and rising costs of non-agricultural commodity raw materials could adversely affect the Company's profitability by increasing the cost of raw materials and/or limiting the Company's ability to procure, transport, store, process, and merchandise agricultural commodities and products in an efficient manner. High and volatile commodity and non-agricultural commodity prices can place more pressures on short-term working capital funding. Conversely, if supplies are abundant and crop production globally outpaces demand for more than one or two crop cycles, price volatility is somewhat diminished. This could result in reduced operating results due to the lack of supply chain dislocations and reduced market spread and basis opportunities. The Company has certain finished products, such as ethanol and biodiesel, which are closely related to, or may be substituted for, petroleum products, or in the case of ethanol, blended into gasoline to increase octane content. Therefore, the selling prices of ethanol and biodiesel can be impacted by the selling prices of gasoline, diesel fuel, and other octane enhancers. A significant decrease in the price of gasoline, diesel fuel, or other octane enhancers could result in a significant decrease in the selling price of the Company's ethanol and biodiesel. The Company may use derivative contracts as anticipatory hedges for both purchases and sales of commodities to protect itself in the near term against price changes and to protect and maximize processing margins, but there can be no assurance that any derivative contracts entered into by the Company will have those effects. The Company is

subject to economic downturns and regional economic volatilities, which could adversely affect the Company's operating results. The Company conducts its business and has substantial assets located in many countries and geographic areas. While 64% of the Company's long-lived assets are in the United States, the Company also has significant operations in both developed areas (such as Western Europe and Canada) and emerging market areas. One of the Company's strategies is to expand the global reach of its core model, which may include expanding or developing its business in emerging market areas. Both developed and emerging market areas are subject to impacts of economic downturns, including decreased demand for the Company's products, and reduced availability of credit, or declining credit quality of the Company's suppliers, customers, and other counterparties. In addition, emerging market areas could be subject to more volatile operating conditions including, but not limited to, logistics limitations or delays, labor-related challenges, epidemic outbreaks and economic recovery, limitations or regulations affecting trade flows, local currency concerns, and other economic and political instability. Political fiscal instability could generate intrusive regulations in emerging markets, potentially creating unanticipated assessments of taxes, fees, increased risks of corruption, etc. Economic downturns and volatile market conditions could adversely affect the Company's operating results and ability to execute its long-term business strategies, although the nature of many of the Company's products (i.e. food and feed ingredients) is less sensitive to demand reductions in any economic downcycle. The Company has significant competition in the markets in which it operates and is subject to industry-specific risks which could adversely affect the Company's operating results. The Company faces significant competition in each of its businesses and has numerous competitors, who can be different depending upon each of the business segments in which it participates. The Company competes for the acquisition of inputs such as raw materials, transportation services, and other materials and supplies, as well as for workforce and talent. Competition impacts the Company's ability to generate and increase its gross profit as a result of the following factors: – Pricing of the Company's products is partly dependent upon industry processing capacity, which is impacted by competitor actions to bring idled capacity on-line, build new production capacity or execute aggressive consolidation; – Many of the products bought and sold by the Company are global commodities or are derived from global commodities that are highly price competitive and, in many cases, subject to substitution; – Significant changes in exchange rates of foreign currencies versus the U.S. dollar, particularly the currencies of major crop growing countries, could also make goods and products of these countries more competitive than U.S. products; – Improved yields in different crop growing regions may reduce the reliance on origination territories in which the Company has a significant presence; and – Continued merger and acquisition activities resulting in further consolidations could result in greater cost competitiveness and global scale of certain players in the industry, especially when acquirers are state-owned and have profit and return objectives that may differ from private sector enterprises. The Company is subject to industry-specific risks which include but are not limited to: launch of new products by other industries that can replace the functionalities of the Company's production; shifting consumer preferences; and product safety and quality. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY PART I 22 In the case of the Nutrition business, while maintaining efficient and cost-effective operations are important, the ability to drive innovation and develop quality nutritional and wellness solutions for human and animal needs are key factors to remain competitive in the nutrition market. Certain of the Company's merchandised commodities and finished products are used as ingredients in livestock and poultry feed. The Company is subject to risks associated with economic, product quality, feed safety or other factors which may adversely affect the livestock and poultry businesses, including the outbreak of disease in livestock and poultry,

for example African swine fever, which could adversely affect demand for the Company's products used as ingredients in feed. In addition, ADM's investment in the flavors and ingredients businesses exposes the Company to risks related to innovation, adaptation, and product claims to meet the changing requirements of its customers. The Company's risk management strategies may not be effective. The Company has a Chief Risk Officer who oversees the ERM Program and regularly reports to the Board of Directors through the Audit Committee, which assists the Board in its oversight of the Company's ERM program, on the myriad of risks facing the Company and the Company's strategies for mitigating those risks. The Company's business is affected by fluctuations in agricultural commodity cash prices and derivative prices, transportation costs, energy prices, interest rates, foreign currency exchange rates, and equity markets. The Company's risk monitoring efforts may not be successful at detecting a significant risk exposure, and such exposure could adversely affect the Company's operating results.

Regulatory Risks The Company is subject to numerous laws, regulations, and mandates globally which could adversely affect the Company's operating results and forward strategy. The Company does business globally, connecting crops and markets in over 180 countries, and is required to comply with laws and regulations administered by the United States federal government as well as state, local, and non-U.S. governmental authorities in numerous areas including: accounting and income taxes, anti-corruption, anti-bribery, global trade, trade sanctions, privacy and security, environmental, product compliance and safety, and handling and production of regulated substances. The Company frequently faces challenges from U.S. and foreign tax authorities regarding the amount of taxes due including questions regarding the timing, amount of deductions, the allocation of income among various tax jurisdictions. Legislatures and taxing authorities in many jurisdictions in which ADM operates may enact changes to their tax rules. The Organization for Economic Cooperation and Development (the "OECD"), the European Union, and other countries (including countries in which the Company operates) have committed to enacting substantial changes to numerous long-standing tax principles impacting how large multinational enterprises are taxed. In particular, the OECD's Pillar Two initiative introduces a 15% global minimum tax applied on a country-by-country basis. While it appears unlikely the United States will enact legislation to adopt Pillar Two, certain countries in which ADM operates have enacted legislation, and other countries are in the process of introducing draft legislation to implement the minimum tax directive. Certain aspects of Pillar Two were effective for ADM during the year ended December 31, 2024 with additional components becoming effective beginning in the year ended December 31, 2025. In the U.S., under U.S. GAAP, Pillar Two taxes are considered an alternative minimum tax accounted for as a period cost that will impact the effective tax rate in the year the Pillar Two tax obligation arises. As such, deferred taxes will not be recognized or adjusted for the estimated effects of future minimum taxes. While at this time we do not expect the impact of Pillar Two to be material to our consolidated financial statements in 2025, there is no assurance that it will not have an adverse effect on our effective tax rate, financial results, or cash flows in future periods. On January 20, 2025, President Trump issued executive orders that the OECD Global Tax Deal has no force and effect in the U.S., and to investigate foreign countries' compliance with tax treaties and to prepare a list of options for protective measures the U.S. should adopt in response. Our analysis is ongoing as the OECD continues to release additional guidance, countries enact legislation, and the potential U.S. response. To the extent additional legislative changes take place in the countries in which we operate, it is possible that these changes may yield an adverse impact on our effective tax rate, financial results, and cash flows. Changes in administration or shifts in legislative priorities may lead to alterations in the U.S. tax code or may potentially influence the global tax landscape and the Company's compliance requirements related to tariffs and sanctions. Table of

Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 23 The Company is subject to the EU Network and Information Security (NIS2) directive, which aims to enhance cybersecurity across the EU by establishing more stringent requirements for a broader range of sectors and entities. Although NIS2 has not yet been fully implemented, the Company is proactively working with relevant authorities and stakeholders in various countries as they enact the directive. NIS2 mandates that organizations implement robust cybersecurity measures, including formal business continuity (BC) and disaster recovery (DR) plans, to ensure resilience against cyber threats. Non-compliance with these regulations could result in significant fines, legal penalties, and operational disruptions. Any failure to comply with applicable laws and regulations or appropriately resolve these challenges could subject the Company to administrative, civil, and criminal remedies, including fines, penalties, disgorgement, injunctions, and recalls of its products, and damage to its reputation. Regulations specifically affecting the agricultural sector and related industries; regulatory policies or matters that affect a variety of businesses; and taxation policies could adversely affect the Company's operating results. Agricultural production and trade flows are subject to government policies, mandates, regulations, and trade agreements, including taxes and tax credits, tariffs, duties, subsidies, incentives, foreign exchange rates, and import and export restrictions, including policies related to genetically modified organisms, traceability standards, sustainable practices, product safety and labeling, renewable fuels, low carbon fuel mandates, and technology related to energy production and/or emissions reductions. These policies can influence the planting of certain crops; the location and size of crop production; whether unprocessed or processed commodity products are traded; the volume and types of imports and exports; the availability and competitiveness of feedstocks as raw materials; the viability and volume of production of certain of the Company's products; and industry profitability. For example, changes in government policies, tax credits, and/or regulation of ethanol and biodiesel, including, but not limited to, the Clean Fuels Production Tax Credit and the Renewable Fuel Standard under the Energy Independence and Security Act of 2007 in the United States, including the treatment of small refinery exemptions, can have an impact on the Company's operating results. International trade regulations can adversely affect agricultural commodity trade flows by limiting or disrupting trade between countries or regions. Regulations of financial markets and instruments, including the Dodd-Frank Act, Consumer Protection Act, and the European Market Infrastructure Regulation, create uncertainty and may lead to additional risks and costs, and could adversely affect the Company's futures commission merchant business and its agricultural commodity risk management practices. Future government policies may adversely affect the supply of, demand for, and prices of the Company's products; adversely affect the Company's ability to deploy adequate hedging programs; restrict the Company's ability to do business in its existing and target markets; and adversely affect the Company's revenues and operating results. The Company's strategy involves expanding the volume and diversity of crops it merchandises and processes, expanding the global reach of its core model, expanding its value-added product portfolio, and expanding the sustainable agriculture programs and partnerships it participates in. Government policies including, but not limited to, antitrust and competition law, trade restrictions, food safety regulations, sustainability requirements, and traceability, can impact the Company's ability to execute this strategy successfully. Technological Risks The Company's inability to successfully complete its ongoing implementations of new enterprise resource planning (ERP) systems and upgrades of its information technology (IT) systems could have a material and adverse effect on the Company's business, financial condition, and operational results. The Company is currently upgrading its IT platforms, including certain ERP systems, on a global scale, with these upgrades expected to occur in phases over the next several years. These upgrades include making changes to

legacy systems or acquiring new systems with new functionality, and building new policies, procedures, training programs and monitoring tools. The Company is also engaged in implementations of new ERP systems which has required and will continue to require significant investments of human and financial resources. The Company's strategy for pursuing these upgrades and implementations will likely evolve over time and may increase the time or expense involved in completing these projects. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 24 In implementing new ERPs, the Company may experience significant increases to inherent costs and risks associated with changing and acquiring these systems, policies, procedures and monitoring tools, including capital expenditures, additional operating expenses, demands on management time and other risks and costs of delays or difficulties in transitioning to or integrating new systems policies, procedures, or monitoring tools into its current systems. Any significant disruption or deficiency in the design and implementation of any ERP may adversely affect the Company's ability to operate its business, or maintain effective disclosure controls and internal control over financial reporting. These implementations, modifications and upgrades may not result in productivity improvements at a level that outweighs the costs of implementation, or at all. In addition, difficulties with implementing new technology systems, such as ERPs, delays in the Company's timeline for planned improvements, significant system failures or the Company's inability to successfully modify its IT systems, policies, procedures or monitoring tools to respond to changes in its business needs in the past have caused and in the future may cause disruptions in the Company's business operations, increase security risks, including the risk of cybersecurity breaches, and may have a material and adverse effect on the Company's business, financial condition and results of operations. Information technology systems are subject to interruptions or failures which may affect the Company's ability to conduct its business. The Company's operations rely on certain key IT systems, some of which are dependent on services provided by third parties, to provide critical data connectivity, information, and services for internal and external users. These interactions include, but are not limited to: ordering and managing materials from suppliers; risk management activities; converting raw materials to finished products; inventory management; shipping products to customers; processing transactions; summarizing and reporting financial results of operations; human resources benefits and payroll management; and complying with regulatory, legal or tax requirements. Additionally, legacy technologies are used to support significant business functions. The instability of aging legacy systems could diminish performance and elevate the risk of system failures, reduce compatibility with modern software, and impact growth initiatives. The Company's IT systems, processes, and sites may suffer cybersecurity breaches, which could expose the Company to operational and various regulatory risks. Increased IT security and social engineering threats and more sophisticated computer crime, including advanced persistent threats, pose a potential risk to the security of the Company's IT systems, networks, and services, as well as the confidentiality, availability, and integrity of the Company's third-party data. The Company is subject to a variety of laws and regulations in the United States and other jurisdictions regarding artificial intelligence (AI), privacy, data protection, and data security, including those related to the collection, storage, handling, use, disclosure, transfer, and security of personal data. Compliance with and interpretation of various data privacy regulations continue to evolve, and any violation could subject the Company to legal claims, regulatory penalties, and damage to its reputation. If the Company's IT systems are breached, damaged, or cease to function properly due to any number of causes, such as catastrophic events, power outages, security breaches, or cyber-based attacks, and the Company's recovery efforts do not effectively mitigate the risks on a timely basis, the Company may suffer significant interruptions in its ability to manage its operations, loss of valuable

data, actual or threatened legal actions, and damage to its reputation, which may adversely impact the Company's revenues, operating results, and financial condition. Generative AI advancements are progressing at an unprecedented pace, which brings risks that could subject the Company to loss through various technical, legal, and opportunistic-related risks. The Company continues to advance in the development and integration of AI systems across its operations. AI technologies introduce a range of potential risks and challenges as detailed below.

Ethical and Bias Risks AI systems often rely on large datasets, which can inadvertently introduce bias if the data is not sufficiently diverse or representative leading to AI-driven decisions that may be unfair or discriminatory, potentially harming both individuals and our brand reputation.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY

PART I 25 **Data Security and Privacy** AI systems rely heavily on vast amounts of data, which could include sensitive personal or proprietary information. If not managed and protected properly, AI systems could become targets for data breaches, exposing critical information to unauthorized access.

Regulatory and Legal Compliance AI technology is evolving rapidly with governments and regulatory bodies around the world beginning to introduce new requirements, guidelines, and frameworks to ensure the responsible use of AI. There is a risk that emerging regulations may require costly and complex compliance adjustments to our AI systems. Furthermore, legal challenges related to intellectual property, liability for AI-driven decisions, and potential misuse of AI present significant risks.

Operational Risks and Reliability AI systems may fail to perform as expected under certain conditions or become vulnerable to adversarial attacks that manipulate the AI's output. As AI becomes more integrated into our operations, the risks of system failure or malfunction increase, potentially disrupting our business processes.

Talent and Resource Challenges The rapid pace of AI development requires specialized talent and resources to ensure the successful design, implementation, and maintenance of AI systems. The shortage of skilled AI professionals presents a risk to our ability to effectively develop and leverage AI technologies. Additionally, the complexity of AI systems demands continuous investment in research and development, which could strain resources and impact other areas of the business.

Item 1B. UNRESOLVED STAFF COMMENTS The Company has no unresolved staff comments.

Item 1C. CYBERSECURITY Risk Management and Strategy The Company faces significant and persistent cybersecurity risks due to: the breadth of geographies, networks, and systems ADM must defend against cybersecurity attacks such as exploitation of vulnerabilities, ransomware, denial of service, supply chain attacks, or other similar threats; the attractiveness of the Company's systems and processes to threat actors (including state-sponsored organizations) seeking to inflict harm on ADM or its customers; the substantial level of harm that could occur to the Company and its customers in case of a material cybersecurity incident; and ADM's use of third-party products, services and components. During the year ended December 31, 2024, the Company has not identified risks from cybersecurity threats, including as a result of prior cybersecurity incidents, that have materially affected or are reasonably anticipated to materially affect the Company, including its business strategy, results of operations, or financial condition. Nevertheless, the Company recognizes cybersecurity threats are ongoing and evolving. For more information on the Company's cybersecurity risks, refer to Item 1A. Risk Factors. ADM is committed to supporting the governance and oversight of cybersecurity risks and to implementing mechanisms, controls, technologies, and processes designed to help the Company assess, identify, and manage these risks. Cybersecurity risks are included in the risk universe that the Company's Enterprise Risk Management (ERM) function evaluates, with input from information security subject matter experts at the Company, to assess top risks to the enterprise. The ERM process provides input into our strategic planning process, such as development of action plans to address and mitigate identified risks. Integrating cybersecurity risk into the overall

ERM process in this manner assists the Company in identifying, assessing, and managing material cybersecurity risks. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 26 The Company has a dedicated cybersecurity team that collaborates with compliance, privacy, legal, and other teams across the global organization to assess the risk landscape. ADM's cybersecurity program is designed to be aligned with applicable industry standards and is assessed regularly by independent third-party auditors. The multifaceted nature of the Company's cybersecurity measures includes aspects of prevention, detection, and response capabilities, employee training programs, threat intelligence monitoring, and the implementation of an array of technologies. The Company has established processes to oversee and identify cybersecurity risks associated with the use of third-party service providers, which include the completion of due diligence before engaging with any third party, controls for response to mitigate any significant risks, and assessments and reviews during the course of the relationship. Additionally, the Company has ongoing partnerships with government and commercial cybersecurity experts to understand emerging cybersecurity threats. The Company has seen an increase in cyberattack volume, frequency, and sophistication. ADM seeks to detect and investigate unauthorized attempts and attacks against its network, products, and services, and to prevent their occurrence and recurrence where practicable through changes or updates to the Company's internal processes and tools; however, ADM remains potentially vulnerable to known or unknown threats. The Company's cyber incident response plan includes an escalation process if a cybersecurity incident meets specific rating criteria to trigger swift and effective action designed to minimize potential disruptions and protect the integrity of our operations. The Company also conducts periodic cybersecurity scenarios with senior management to enhance preparedness.

Governance The Board of Directors has oversight of cybersecurity risk as part of the ERM program. The Board of Directors is assisted by the Sustainability and Technology Committee, which regularly reviews the cybersecurity program with management and reports to the Board of Directors and the Audit Committee, which assists the Board in its oversight of the Company's ERM program. Cybersecurity reviews by the Sustainability and Technology Committee or the Board of Directors generally occur quarterly, or more frequently as determined to be necessary or advisable. In recent years, the Board added a director who had served as Chief Information Officer for a large public company with sensitive information to assist the Board and Sustainability and Technology Committee in overseeing cybersecurity risks. The Company's cybersecurity program is led by the Chief Information Security Officer (CISO), who reports to the Senior Vice President and Chief Technology Officer (CTO). The CISO is informed about and monitors prevention, detection, mitigation, and remediation efforts through regular communication and reporting from professionals in the information security team, many of whom hold cybersecurity certifications in Information Systems Security or Information Security Management, and through the use of technological tools and software and results from third party audits. Additionally, the CISO directs the Global Information and Cyber Security Council (the "Council"), which includes a diverse range of relevant experts. The Council includes management from global technology, compliance, privacy, controlling, operations, security, automation, ERM, and internal audit. The Council promotes alignment and communication of new and ongoing cybersecurity prevention techniques and provides a forum for staying current on the latest cybersecurity threats. The CTO and CISO report information about such risks to the Board of Directors, the Sustainability and Technology Committee, or the Audit Committee during the regular cybersecurity reviews. The CISO and CTO have extensive experience assessing and managing cybersecurity programs and cybersecurity risk. The CISO has served in that position since 2018 and, was previously the Vice President, Head of Enterprise Security, Americas at Worldpay and a Security

Principal/Strategist for Hewlett Packard Enterprises for a combined cybersecurity experience of 20 years. The CTO joined ADM in 2016 and was previously Senior Vice President and Chief Information Officer at Dow Corning Corporation for approximately 6 years. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY PART I 27 Item 2. PROPERTIES The Company's operations are such that most products are efficiently processed near the source of raw materials. Consequently, the Company has many plants strategically located in agricultural commodity producing areas. The annual volume of commodities processed will vary depending upon availability of raw materials and demand for finished products. The Company owns approximately 150 warehouses and terminals primarily used as bulk storage facilities and has 68 innovation centers. Processing plants and procurement facilities owned or leased by unconsolidated affiliates are not included in the tables below. To enhance the efficiency of transporting large quantities of raw materials and finished products between the Company's procurement facilities and processing plants and also the final delivery of products to its customers around the world, the Company owns approximately 1,900 barges, 9,500 rail cars, 360 trucks, 1,210 trailers, 140 boats, and 3 oceangoing vessels; and leases, under operating leases, approximately 700 barges, 22,450 rail cars, 250 trucks, 530 trailers, 31 boats, and 20 oceangoing vessels. The daily capacities of the processing plants and storage capacities of the procurement facilities that the Company owns or leases, under operating leases, are as follows: Processing Facilities (in '000 metric tons) Owned Leased Ag Services Carbohydrate Ag Services Carbohydrate and Oilseeds Solutions Nutrition Total and Oilseeds Solutions Nutrition Total North America 85 88 101 274 — — 74 74 South America 32 — 3 35 1 — 3 4 Europe 50 6 13 69 — 1 — 1 Asia-Pacific 1 — 31 32 1 — 10 11 Total daily capacity 168 94 148 410 2 1 87 90 Procurement Facilities (in '000 metric tons) Owned Leased Ag Services Carbohydrate Ag Services Carbohydrate and Oilseeds Solutions Nutrition Total and Oilseeds Solutions Nutrition Total North America 12,922 589 62 13,573 766 68 — 834 South America 2,134 — — 2,134 231 — — 231 Europe 1,478 — — 1,478 — 18 — 18 Asia-Pacific 75 — — 75 81 — 4 85 Total storage capacity 16,609 589 62 17,260 1,078 86 4 1,168 Item 3. LEGAL PROCEEDINGS For information regarding certain legal proceedings involving the Company, see Part II. Item 8. Note 20. Legal Proceedings of this report, which is incorporated herein by reference. ARCHER-DANIELS-MIDLAND COMPANY PART I 28 Item 4. MINE SAFETY DISCLOSURES None. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART I 29 Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES Common Stock Market The Company's common stock is listed and traded on the New York Stock Exchange under the trading symbol "ADM". The number of registered stockholders of the Company's common stock at February 14, 2025, was 7,524. Issuer Purchases of Equity Securities Period Total Number of Shares Purchased(1) Average Price Paid per Share Total Number of Shares Purchased as Part of Publicly Announced Program(2) Number of Shares Remaining to be Purchased Under the Program(2) October 1, 2024 to October 31, 2024 — \$ — — 14,764,049 November 1, 2024 to November 30, 2024 1,110 52.333 — 14,764,049 December 1, 2024 to December 31, 2024 — — — 114,764,049 Total 1,110 \$ 52.333 — 114,764,049 (1) Total shares purchased represent those shares purchased in the open market as part of the Company's publicly announced stock repurchase program described below, shares received as payment for the exercise price of stock option exercises, and shares received as payment for the withholding taxes on vested restricted stock awards. During the three-month period ended December 31, 2024, there were 1,110 shares received as payments for the withholding taxes on vested restricted stock awards. (2) On November 5, 2014, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1,

2015 and ending December 31, 2019. On August 7, 2019, the Company's Board of Directors approved the extension of the stock repurchase program through December 31, 2024 and the repurchase of up to an additional 100,000,000 shares under the extended program. On December 11, 2024, the Company's Board of Directors approved a second extension of the stock repurchase program through December 31, 2029 and the repurchase of up to an additional 100,000,000 shares under the extended program.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART II 30 Performance Graph The graph below compares the Company's common stock with those of the S&P; 500 Index and the S&P; Consumer Staples Index. The graph assumes an initial investment of \$100 on December 31, 2019 and assumes all dividends have been reinvested through December 31, 2024. The stock performance shown in the graph is not indicative of nor intended to forecast the potential future performance of ADM's common stock.

	12/31/19	12/31/20	12/31/21	12/31/22	12/31/23	12/31/24

Item 6. RESERVED Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART II 31 Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A;) should be read in conjunction with the accompanying Consolidated Financial Statements, which can be found in Part II. Item 8. Financial Statements and Supplementary Data. This MD&A; generally discusses 2024 and 2023 items and year-to-year comparisons between 2024 and 2023. Discussions of 2022 items and year-to-year comparisons between 2023 and 2022 are not included in this Form 10-K and can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II. Item 7 of the Company's Annual Report on Form 10-K/A for the fiscal year ended December 31, 2023, filed on November 18, 2024.

Company Overview Archer-Daniels-Midland Company and its subsidiaries (the "Company" or "ADM") unlock the power of nature to enrich the quality of life. The Company is an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. ADM is a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. The Company is a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. ADM is a cutting-edge innovator, guiding the way to a future of new consumer and industrial solutions. ADM is a leader in sustainability, scaling across entire value chains to help decarbonize the multiple industries it serves. Around the globe, the Company's innovation and expertise are meeting critical needs while nourishing quality of life and supporting a healthier planet.

Reportable Segments The Company's operations are organized, managed, and classified into three reportable segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. See Part II. Item 8. Financial Statements and Supplementary Data, Note 17. Segment and Geographic Information for further details on the nature of our business and our reportable operating segments.

Strategy The Company's strategic transformation is focused on three strategic pillars: Productivity, Innovation, and Culture. The Productivity pillar includes (1) partnering across various global teams including procurement, supply chain, operations, and commercial to optimize costs and improve both production volumes and demand fulfillment across the enterprise; (2) implementation of improved standardized business processes and aggressive management of selling, general, and administrative expenses and Corporate costs; (3) portfolio simplification to improve operational performance; and (4) increased use of technology, data analytics, and automation at production facilities, in offices, and with customers to improve efficiencies and customer service. The Innovation pillar includes

expansions and investments in (1) the modernization and digitization of our operations network; (2) sustainability-driven innovation, which encompasses the full range of products, solutions, capabilities, and commitments to serve both customer needs and farmer resilience; and (3) growth initiatives, including organic growth with additional capacity to meet growing market demand and strategic objectives. The Culture pillar focuses on building capabilities and enabling collaboration, teamwork, and agility from process standardization and digitalization, and bringing new perspectives and expertise to the Company's decision-making. ADM plans to support the three pillars with investments in technology, which include expanding digital capabilities and investing further in research and development. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 32 Sustainability Sustainability is a key driver in ADM's expanding portfolio of environmentally responsible, plant-derived products. Consumers today increasingly expect their food and drink to come from sustainable ingredients, produced by companies that share their values, and ADM is continually finding new ways to meet those needs through its portfolio actions. Significant Portfolio Actions The Company's significant portfolio actions and announcements during 2024 include the following acquisitions: • Revela Foods, a Wisconsin-based developer and manufacturer of innovative dairy flavor ingredients and solutions; • FDL, a UK-based leading developer and producer of premium flavor and functional ingredient systems; • PT Trouw Nutrition Indonesia, a leading provider of functional and nutritional solutions for livestock farming in Indonesia; and • Totally Natural Solutions Ltd., a UK-based hops flavoring producer. See Part II. Item 8. Note 3. Acquisitions of "Notes to Consolidated Financial Statements" for further information. Internal and Government Investigation The Company has historically disclosed in the footnotes to its financial statements that intersegment sales have been recorded at amounts approximating market. In connection with the Company's previously disclosed internal investigation regarding certain accounting practices and procedures with respect to its Nutrition reporting segment, including as related to certain intersegment sales (the "Investigation") the Company identified certain intersegment sales that occurred between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments that were not recorded at amounts approximating market. The Company corrected those errors in its fiscal year 2023 Form 10-K, along with subsequently identified errors that the Company corrected in an amendment to its Annual Report on Form 10-K for the fiscal year ended December 31, 2023 (the "FY2023 10-K/A"), and its Form 10-Qs for the first and second quarters of 2024, all of which were filed on November 18, 2024, to restate the segment information disclosure included in those filings. As previously disclosed, the Company is under investigation by the United States Securities and Exchange Commission ("SEC") and the Department of Justice ("DOJ") relating to, among other things, intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The Company is continuing to cooperate with the SEC and DOJ investigations and is unable to predict the outcome of these investigations. Material Weakness In connection with the Investigation, the Company identified a material weakness in the Company's internal control over financial reporting related to its accounting practices and procedures for segment disclosures. For more information, see "Controls and Procedures" in Part II, Item 9A herein. Operating Performance Indicators The Company is exposed to certain risks inherent to an agricultural-based commodity business. These risks are further described in Part I. Item 1A. Risk Factors in this Annual Report on Form 10-K. The Company's Ag Services and Oilseeds and Carbohydrate Solutions segments are principally agricultural commodity-based businesses where changes in selling prices move in relationship to changes in prices of the

commodity-based agricultural raw materials. As a result, changes in agricultural commodity prices have relatively equal impacts on both revenues and cost of products sold. Therefore, margins per volume or metric ton generally are meaningful as a performance indicator in these businesses. The Company's Nutrition segment also utilizes agricultural commodities (or products derived from agricultural commodities) as raw materials. However, in these operations, agricultural commodity market price changes do not necessarily correlate to changes in cost of products sold. As a result, changes in revenues of these businesses may correspond to changes in margins. Therefore margin rates generally are meaningful as a performance indicator in these businesses.

Table of Contents
ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

33 The Company has consolidated subsidiaries in approximately 80 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency except for certain significant subsidiaries in Switzerland where Euro is the functional currency, and Brazil and Argentina where U.S. dollar is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. For the majority of the Company's business activities in Brazil and Argentina, the functional currency is the U.S. dollar; however, certain transactions, including taxes, occur in local currency and require remeasurement to the functional currency. Changes in revenues are expected to be correlated to changes in expenses reported by the Company caused by fluctuations in the exchange rates of foreign currencies, primarily the Euro, British pound, Canadian dollar, and Brazilian real, as compared to the U.S. dollar. The Company measures its performance using key financial metrics including net earnings, adjusted diluted earnings per share (EPS), margins, segment operating profit, total segment operating profit, earnings before interest, taxes, depreciation, and amortization (EBITDA), adjusted EBITDA, return on invested capital, adjusted economic value added, and operating cash flows before working capital. Some of these metrics are not defined by generally accepted accounting principles in the United States (GAAP) and should be considered in addition to, and not in lieu of, GAAP financial measures. For more information, see the "Non-GAAP Financial Measures" section below. The Company's financial results can vary significantly due to changes in factors such as fluctuations in energy prices, weather conditions, crop plantings, government programs and policies, trade policies, changes in global demand, general global economic conditions, changes in standards of living, global production of similar and competitive crops, and geopolitical developments. Due to the unpredictable nature of these and other factors, the Company undertakes no responsibility for updating any forward-looking information contained within this "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023
Market Factors Influencing Operations or Results in the Twelve Months Ended December 31, 2024

The Company is subject to a variety of market factors which affect the Company's operating results, including those discussed below related to 2024. In the Ag Services and Oilseeds segment, following two years of very favorable market conditions, several headwinds in the agriculture cycle, including fewer market dislocations and high cost inflation, led to more normalized results throughout the entire value chain. Ag Services benefited from improved river conditions and an excellent crop in North America, which improved export volumes, while South America Origination margins were negatively impacted by take or pay contracts with railroads. Global Trade market conditions were driven by solid trading and continued structured trade finance opportunities. Crushing saw depressed vegetable oil demand and lower prices primarily driven by increased market supply, imports of used cooking oil, uncertainty with the Producer Tax Credit policy change, and the delay of the European

Union's Deforestation Regulation requirements. In Refined Products and Other, North America margins were pressured by an increase in the supply of low carbon intensity feedstock and limited forward sales opportunities caused by the uncertainty around Producers Tax Credit policy transition. In the Carbohydrate Solutions segment, demand for starches and sweeteners remained solid with margins remaining steady across the entire portfolio. Strong export demand for ethanol helped offset higher industry production to minimize the imbalance between supply and demand. In the Nutrition segment, demand was mixed in a few food and beverage product categories driven by shifts in consumer discretionary spend and preferences. Human Nutrition was impacted by inflation, which drove lower demand and decreased volumes for alternative proteins in some regions. Demand started to recover in the food, beverage, and dietary supplement categories. In Animal Nutrition, a soft amino acids market driven by price weakness in North America was partially offset by an improved market in EMEA. The global feed market saw some modest improvement with continued price weakness of main feed ration commodities, while key livestock prices remained steady. The feed additives market was impacted by volatility on vitamins due to supply disruptions, however overall it modestly improved, following the improvement in the feed sector.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

34 Processed volumes by product for the years ended December 31, 2024 and 2023 are as follows (in metric tons):

	2024	2023	Change
Oilseeds	35,719	34,899	820
Corn	18,541	18,067	474
Total	54,260	52,966	1,294

The Company generally operates its production facilities, on an overall basis, at or near capacity, adjusting facilities individually, as needed, to react to the current margin environment and seasonal local supply and demand conditions. The overall increase in oilseeds processed volumes was primarily related to improved crush capacity in North America, driven by the Company's new facility in Spiritwood, North Dakota, and in EMEA in 2024 compared to lower crush rates in the previous year due to inclement weather, unplanned downtime, and reduced capacity due to the Russian-Ukraine war. The overall increase in corn processed volumes was related to increased plant reliability in 2024 compared to lower volumes in the previous year driven by unplanned downtime at the Decatur, Illinois plant.

Federal Blenders' and Producers' Credits Biodiesel tax incentives have been provided through various U.S. statutes. The Blenders' Tax Credit (BTC) is the primary regulation, applicable to qualifying biodiesel. The BTC has lapsed and been reinstated numerous times over the last decade. The Inflation Reduction Act of 2022 extended the BTC through December 31, 2024 and established a new Clean Fuel Production Credit (CFPC) effective January 1, 2025. For the year ended December 31, 2024, the Company recorded a benefit of \$316 million related to the BTC. The Company estimates a significant decrease in the CFPC available in the year ending December 31, 2025 compared with the BTC claimed during the year ended December 31, 2024.

Analysis of Results of Operations

Earnings before income taxes decreased 47% or \$2.0 billion, to \$2.3 billion, primarily driven by lower pricing and execution margins, as well as a \$461 million impairment charge related to the Company's investment in Wilmar, partially offset by increased sales volumes. Total segment operating profit (a non-GAAP measure) in 2024 decreased 28% or \$1.7 billion, to \$4.2 billion, driven by lower results in the Ag Services and Oilseeds segment and the Nutrition segment. Total segment operating profit (a non-GAAP measure) in 2024 excluded asset impairment, restructuring and net settlement contingencies of \$490 million, and a gain on the sale of certain assets of \$10 million. Total segment operating profit (a non-GAAP measure) in 2023 excluded asset impairment, restructuring, and net settlement contingencies of \$361 million, and a gain on the sale of certain assets of \$17 million. Total segment operating profit (a non-GAAP measure) is reconciled to earnings before income taxes, the most directly comparable

GAAP measure, in the "Non-GAAP Financial Measures" section below. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 35

Revenues for the years ended December 31, 2024 and 2023, were as follows (in millions): 2024 2023 Change Ag Services and Oilseeds Ag Services \$ 44,083 \$ 47,420 \$ (3,337) Crushing 11,836 14,020 (2,184) Refined Products and Other 10,597 11,986 (1,389) Total Ag Services and Oilseeds 66,516 73,426 (6,910) Carbohydrate Solutions Starches and Sweeteners 8,587 9,885 (1,298) Vantage Corn Processors 2,647 2,989 (342) Total Carbohydrate Solutions 11,234 12,874 (1,640) Nutrition Human Nutrition 3,944 3,634 310 Animal Nutrition 3,405 3,577 (172) Total Nutrition 7,349 7,211 138 Total Segment Revenues 85,099 93,511 (8,412) Other Business 431 424 7 Total Revenues \$ 85,530 \$ 93,935 \$ (8,405)

Revenues and cost of products sold in agricultural merchandising and processing businesses are significantly correlated to the underlying commodity prices and volumes. In periods of significant changes in market prices, the underlying performance of the Company is better evaluated by looking at margins since both revenues and cost of products sold, particularly in the Ag Services and Oilseeds segment, generally have a relatively equal impact from market price changes which generally result in an insignificant impact to gross profit. Revenues decreased \$8.4 billion to \$85.5 billion driven by lower sales prices (\$16.0 billion), partially offset by higher sales volumes (\$7.6 billion). Lower sales prices of soybeans, corn, meal, oils, wheat and alcohol, were partially offset by higher sales volumes of soybeans, corn, oils, wheat, alcohol, and flavors. Ag Services and Oilseeds revenues decreased 9% to \$66.5 billion driven by lower sales prices (\$13.5 billion), partially offset by higher sales volumes (\$6.6 billion). Carbohydrate Solutions revenues decreased 13% to \$11.2 billion driven by lower sales prices (\$2.3 billion), partially offset by higher sales volumes (\$612 million). Nutrition revenues increased 2% to \$7.3 billion driven by higher sales volumes (\$386 million), partially offset by lower sales prices (\$248 million). Cost of products sold decreased \$6.7 billion to \$79.8 billion driven primarily by lower average commodity costs. Manufacturing expenses increased \$288 million primarily driven by increased salaries and benefits driven by salary increases, higher depreciation expenses, increased legal, professional, and other fees, increased maintenance expenses due to work performed at Ag Services and Oilseeds facilities in Decatur, Illinois and the Company's new facility in Spiritwood, North Dakota, among others, partially offset by decreases in energy costs, particularly driven by lower energy pricing in North America and EMEA. Foreign currency translation impacts decreased revenues by \$335 million and cost of goods sold by \$290 million, decreasing gross profit by \$45 million. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 36

Gross profit decreased \$1.7 billion or 23%, to \$5.8 billion driven by lower margins in Ag Services, which decreased by \$300 million to \$1.2 billion, Crushing, which decreased \$518 million to \$991 million, Refined Products and Other, which decreased \$709 million to \$554 million, Starches and Sweeteners, which decreased by \$112 million to \$1.4 billion, and Human Nutrition, which decreased by \$77 million to \$941 million, partially offset by higher margins in Animal Nutrition, which increased \$62 million to \$509 million. Selling, general, and administrative expenses increased 7% to \$3.7 billion driven by higher legal and financing fees, higher salary and benefit costs, and increased amortization of intangibles, driven by the Company's investment in computer software and intangibles acquired in business combinations, partially offset by decreased incentive compensation reflecting lower Company performance and reduced provisions for bad debt. Asset impairment, exit, and restructuring costs increased \$203 million to \$545 million. Charges in 2024 included a \$461 million impairment related to the Company's Wilmar equity investment, \$43 million of impairments related to customer lists and discontinued trademarks in the Animal Nutrition subsegment, \$4 million of reportable

segment specific restructuring charges and \$23 million of restructuring in Corporate. Charges in 2023 consisted of \$137 million of impairments related to goodwill in the Animal Nutrition reporting unit, \$108 million of impairments related to property, plant, and equipment and an equity method investment, \$64 million of impairments related to customer list and discontinued Animal Nutrition trademarks, \$27 million of reportable segment specific restructuring charges, and \$6 million of restructuring in Corporate. Equity in earnings of unconsolidated affiliates increased \$70 million to \$621 million due primarily to higher earnings from the Company's investments in Almidones Mexicanos S.A., Wilmar, Skyland Grain, LLC, and Hungrana Ltd., partially offset by lower earnings from the Company's investment in Olenex Sarl and SoyVen. As of December 31, 2024, the Company had sold its interest in Skyland Grain, LLC. Interest and investment income increased \$63 million to \$562 million driven by lower investment valuation losses in 2024 of \$16 million, a decrease of \$60 million when compared to the prior year, and higher interest income within Ag Services and Oilseeds (\$30 million, compared to the prior year of \$0), driven by bond investments within South America, partially offset by lower net interest income (decrease of \$36 million) for ADM Investor Services due to lower customer balances. Interest expense increased \$59 million to \$706 million driven by increased use of the Company's commercial paper borrowing programs. Other income - net of \$251 million increased \$75 million. Current year income included third party insurance recoveries of \$133 million, foreign exchange gains of \$46 million, and net gains on disposals of individually insignificant assets in the ordinary course of business of \$16 million. Prior year income included net gains on disposals of individually insignificant assets in the ordinary course of business of \$38 million, the non-service components of net pension benefit income of \$18 million, net foreign exchange gains of \$85 million, and net other income. Income taxes of \$476 million decreased \$352 million. The Company's effective tax rate for 2024 was 21.1% compared to 19.3% for 2023. The increase in the effective rate was driven primarily by the impairment of the Company's investment in Wilmar and changes in the Company's geographic mix of earnings.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 37

Segment Operating Profit Segment operating profit for the years ended December 31, 2024 and 2023 was as follows (in millions):

	2024	2023	Change
Segment Operating Profit Ag Services and Oilseeds	\$ 715	\$ 1,168	\$ (453)
Crushing	844	1,290	(446)
Refined Products and Other	552	1,306	(754)
Wilmar	336	303	33
Total Ag Services and Oilseeds	\$ 2,447	\$ 4,067	\$ (1,620)
Carbohydrate Solutions Starches and Sweeteners	\$ 1,343	\$ 1,329	\$ 14
Vantage Corn Processors	33	46	(13)
Total Carbohydrate Solutions	\$ 1,376	\$ 1,375	\$ 1
Nutrition Human Nutrition	\$ 327	\$ 417	\$ (90)
Animal Nutrition	59	10	49
Total Nutrition	\$ 386	\$ 427	\$ (41)

In the Ag Services and Oilseeds segment, segment operating profit decreased 40%. The Ag Services subsegment operating profit was lower than 2023. South America Origination margins decreased driven by lower origination volumes and margin compression due to slow farmer selling and higher industry rail freight take or pay agreements. North America grain exports were not competitive with South America, leading to weak exports and costs from a carry market contributed to slow farmer selling, limiting trade opportunities in the first half of the year. Execution in destination marketing as well as effective risk management continued to deliver strong Global Trade results in 2024, though lower than 2023. The Crushing subsegment operating profit was lower than 2023, particularly in North America. Increased industry capacity pressured Crushing margins and an increased supply of competing low carbon intensity feedstocks, and the European Union's Deforestation Regulation delay negatively affected margins. For 2024, there were approximately \$20 million of net positive mark-to-market timing effects, compared to approximately \$185 million of net positive impacts in 2023. The Crushing subsegment current year operating results

also included \$76 million of insurance proceeds for the partial settlement of the Decatur East and West insurance claims related to incidents in 2023. The Refined Products and Other (RPO) subsegment operating profit was lower than 2023 as increased pre-treatment capacity at renewable diesel facilities, higher imports of used cooking oil, aggressive competition among food suppliers to serve customer demand, and biofuel policy uncertainty negatively impacted margins. There were net negative timing impact of approximately \$430 million year-over-year. In the Carbohydrate Solutions segment, segment operating profit was flat compared to the prior year. The Starches and Sweeteners subsegment operating profit was higher year-over-year driven by improved cost position on higher utilization rates, higher joint-venture earnings, and \$84 million of insurance proceeds for the partial settlement of the Decatur East and Decatur West insurance claims related to an incident that occurred in 2023. Strong margins and volumes in North America were offset by weaker domestic ethanol margins, co-product values, and margins in EMEA. The Vantage Corn Processors subsegment results decreased year-over-year driven by lower margins, due to higher industry production and inventory levels, partially offset by higher volumes driven by increased exports.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

38 In the Nutrition segment, segment operating profit decreased 9%. Human Nutrition results were lower than the prior year. Specialty Ingredients was impacted by unplanned downtime at Decatur East, higher costs of goods sold associated with the termination of an unfavorable supply agreement, and a normalizing texturants market negatively impacted margins, partially offset by \$71 million of insurance proceeds for the partial settlement of the 2023 Decatur East incident insurance claims and changes in inventory adjustments compared to the prior year. In Health and Wellness, lower profits were driven by inventory reserve adjustments due primarily to changes in customer demand fulfillment, non-recurring benefits in the prior year, and softer margins within Vitamins, offset by stronger growth in biotics and botanicals. The prior year was impacted by a revaluation loss of \$19 million related to an investment in precision fermentation. Flavors results were higher than the prior year driven by current year acquisitions, and a prior year \$45 million negative impact primarily related to the deconsolidation and write-down of a joint venture. Animal Nutrition results were higher compared to the prior year, as amino acids market recovery, cost optimization efforts and lower input costs bolstered margins.

Other Business and Corporate Results

Other Business contribution of operating profit decreased 34% from \$375 million to \$247 million. Lower net interest income from reduced trading activity levels drove decreased earnings in ADM Investor Services. Captive insurance results decreased, driven by higher claim settlements, which included partial settlements of \$231 million for the Decatur East and West insurance claims, of which \$133 million was from reinsurers during the fourth quarter. Corporate results were as follows (in millions):

	2024	2023	Change
Interest expense - net	(1) \$ (482)	(1) \$ (431)	(1) \$ (51)
Unallocated corporate costs	(2) (1,205)	(2) (1,144)	(2) (61)
Expenses related to acquisitions	(7) (7)	(7) —	(7) —
Gain on debt conversion option	— 6	(6) (6)	(6) (12)
Restructuring charges	(3) (23)	(3) (6)	(3) (17)
Other expense - net	(4) (4)	(4) (24)	(4) 20
Total Corporate	\$ (1,721)	\$ (1,606)	\$ (115)

(1) Interest expense-net increased \$51 million driven by increased borrowings and higher interest rates on the Company's commercial paper borrowing programs and increased interest expense relating to uncertain tax positions. (2) Unallocated corporate costs increased \$61 million driven by increases in legal and professional fees and securitization fees, offset by decreased incentive compensation driven by lower Company performance. (3) Restructuring charges increased \$17 million driven by \$10 million relating to foreign restructuring charges. (4) Other expense in the current year included railroad maintenance expenses of \$64 million and net valuation losses of approximately \$16 million in the Company's ADM Ventures portfolio. Other income in the current year

also included foreign exchange gains of \$78 million and the non-service components of net pension benefit income of \$18 million. Other expense in the prior year included the non-service components of net pension benefit income of \$18 million and foreign exchange gains, partially offset by railroad maintenance expenses of \$67 million and investment revaluation losses of \$57 million. Non-GAAP Financial Measures The Company uses certain "Non-GAAP" financial measures as defined by the SEC. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures.

Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in this section. The Company uses adjusted net earnings, adjusted diluted EPS, EBITDA, adjusted EBITDA, and total segment operating profit, non-GAAP financial measures as defined by the SEC, to evaluate the Company's financial performance. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL

CONDITION AND RESULTS OF OPERATIONS 39 Adjusted net earnings is defined as net earnings adjusted for the effects on net earnings of specified items as more fully described in the reconciliation tables. Adjusted diluted EPS is defined as diluted EPS adjusted for the effects on reported diluted EPS of specified items as more fully described in the reconciliation tables. EBITDA is defined as earnings before interest on borrowings, taxes, and depreciation and amortization. Adjusted EBITDA is defined as earnings before interest on borrowings, taxes, depreciation, and amortization, adjusted to exclude the impact of specified items as more fully described in the reconciliation tables. Total segment operating profit is defined as ADM's consolidated earnings before income taxes, adjusted for Other Business, Corporate, and specified items as more fully described in the reconciliation tables.

Management believes that adjusted net earnings, adjusted diluted EPS, EBITDA, adjusted EBITDA, and total segment operating profit are useful measures of the Company's performance because they provide investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. Adjusted net earnings, adjusted diluted EPS, EBITDA, adjusted EBITDA, and total segment operating profit are not intended to replace or be an alternative to net earnings, diluted EPS, and earnings before income taxes, the most directly comparable amounts reported under GAAP. The table below provides a reconciliation of net earnings (the most directly comparable GAAP measure) to adjusted net earnings (a non-GAAP measure) and diluted EPS to adjusted diluted EPS (a non-GAAP measure) for the years ended

December 31, 2024 and 2023. 2024 2023 In millions Per share In millions Per share Average number of shares outstanding - diluted 493 542 Net earnings and reported EPS (fully diluted) \$ 1,800 \$ 3.65 \$ 3,483 \$ 6.43 Adjustments: Gains on sale of assets (net of tax of \$3 million in 2024 and \$5 million in 2023) (1) (8) (0.02) (12) (0.03) Asset impairment, restructuring, and net settlement contingencies (net of tax of \$1 million in 2024 and \$57 million in 2023) (1) 512 1.04 310 0.57 Expenses related to acquisitions (net of tax of \$2 million in 2024 and \$1 million in 2023) (1) 5 0.01 6 0.01 Gain on debt conversion option (net of tax of \$0) (1) — — (6) (0.01) Certain discrete tax adjustments (2) 30 0.06 4 0.01 Adjusted net earnings and adjusted diluted EPS \$ 2,339 \$ 4.74 \$ 3,785 \$ 6.98 (1) Tax effected using the U.S. and applicable tax rates. (2) Includes impact of changes in tax law, valuation allowances, and the Company's indefinite reinvestment of foreign earnings. Management believes these adjustments are helpful to understand distortion in GAAP effective tax rates created by non-recurring items. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS 40 The table below provides a reconciliation of net earnings (the most directly comparable GAAP measure) to EBITDA (a non-GAAP measure) and adjusted EBITDA (a non-GAAP measure) for the years ended December 31, 2024 and 2023 (in millions).

2024 2023 Change Net earnings \$ 1,800 \$ 3,483 \$ (1,683) Net earnings (losses) attributable to non-controlling interests (21) (17) (4) Income tax expense 476 828 (352) Earnings Before Income Taxes 2,255 4,294 (2,039) Interest expense 506 430 76 Depreciation and amortization 1,141 1,059 82 EBITDA 3,902 5,783 (1,881) Gains on sale of assets (11) (17) 6 Asset impairment, restructuring, and contingency provisions 513 367 146 Railroad maintenance expense 64 67 (3) Expenses related to acquisitions 7 7 — Adjusted EBITDA \$ 4,476 \$ 6,207 \$ (1,731) The table below provides a reconciliation of earnings before income taxes (the most directly comparable GAAP measure) to total segment operating profit (a non-GAAP measure) for the years ended December 31, 2024 and 2023 (in millions). 2024 2023 Change Earnings Before Income Taxes \$ 2,255 \$ 4,294 \$ (2,039) Other Business (earnings) loss (247) (375) 128 Corporate 1,721 1,606 115 Specified Items: Gains on sale of assets (10) (17) 7 Impairment, restructuring, and net settlement contingencies 490 361 129 Total Segment Operating Profit \$ 4,209 \$ 5,869 \$ (1,660) Liquidity and Capital Resources The Company's objective is to have sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural commodity-based business. The Company depends on access to credit markets, which can be impacted by its credit rating and factors outside of the Company's control, to fund its working capital needs and capital expenditures. The primary source of funds to finance the Company's operations, capital expenditures, and advancement of its growth strategy is cash generated by operations and lines of credit, including a commercial paper borrowing facility and accounts receivable securitization programs. In addition, the Company believes it has access to funds from public and private equity and debt capital markets in both U.S. and international markets. At December 31, 2024, the Company's capital resources included shareholders' equity of \$22.2 billion and lines of credit, including the accounts receivable securitization programs described below, totaling \$13.0 billion, of which \$9.1 billion was unused. Of the Company's total lines of credit, \$5.1 billion supported the commercial paper borrowing programs, against which there was \$1.7 billion of commercial paper outstanding at December 31, 2024. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 41 As of December 31, 2024, the Company had \$611 million of cash and cash equivalents, \$354 million of which is cash held by foreign subsidiaries whose undistributed earnings are considered indefinitely reinvested. Based on the Company's historical ability to generate sufficient cash flows from its U.S. operations and unused and available U.S. credit capacity of \$4.5 billion, the Company has asserted these funds are indefinitely reinvested outside the U.S. As of December 31, 2024, the Company has total available liquidity of \$9.7 billion comprised of cash and cash equivalents and unused lines of credit. The Company believes that cash flows from operations, cash and cash equivalents on hand, and unused lines of credit will be sufficient to meet its ongoing liquidity requirements for at least the next twelve months. Operating Cash Flows Net cash provided by operating activities was \$2.8 billion, \$4.5 billion, and \$3.5 billion for the years ended December 31, 2024, 2023, and 2022, respectively. The decrease in cash provided by operating activities in 2024 compared to 2023 was primarily driven by lower earnings in the current year and changes in net working capital. Changes in net working capital were driven by changes in segregated investments, changes in inventory, changes in trade payables and changes in payables to brokerage customers. Segregated investments increased \$693 million in the current year compared to an increase of \$194 million in the prior year, driven by higher interest rates. Inventories decreased \$162 million in the current year reflecting lower commodity pricing, offset by increased volumes of on-hand inventories compared to a decrease of \$2.9 billion in the prior-year, reflecting lower commodity pricing. Trade payables decreased \$719 million in the current year compared to a decrease of \$1.5 billion in the prior

year, reflecting lower commodity pricing. Brokerage payables decreased \$78 million in the current year compared to a decrease of \$2.1 billion in the prior year which was driven by decreased trading activity in the Company's futures commission and brokerage business. Investing Cash Flows Net cash used in investing activities was \$2.7 billion, \$1.5 billion, and \$1.4 billion for the years ended December 31, 2024, 2023, and 2022, respectively. Net cash used in investing activities for the year ended December 31, 2024 included additions to property, plant and equipment of \$1.6 billion, business acquisitions, net of cash acquired of \$927 million, and purchases of short-term investments, primarily driven by purchases within South America, of \$308 million. Net cash used in investing activities for the year ended December 31, 2023 included additions to property, plant and equipment of \$1.5 billion. Financing Cash Flows Net cash used in financing activities was \$1.5 billion, \$4.6 billion, and \$2.5 billion for the years ended December 31, 2024, 2023, and 2022, respectively. Net cash used in financing activities for the year ended December 31, 2024 included net borrowings on short-term credit agreements of \$1.8 billion. Net cash used in financing activities for the year ended December 31, 2023, was driven by net borrowings of short-term credit agreements of \$390 million, corporate bond repayments of \$963 million, which consisted of the €600 million aggregate principal amount of 1.750% Notes due 2023 and \$300 million aggregate principal amount of zero coupon exchangeable bonds due 2023, partially offset by proceeds from debt of \$501 million. Cash paid for share repurchases for the years ended December 31, 2024, 2023, and 2022 were \$2.3 billion, \$2.7 billion, and \$1.5 billion, respectively. Dividends paid for the years ended December 31, 2024, 2023, and 2022 were \$985 million, \$977 million, and \$899 million, respectively.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

42 Financial Ratios At December 31, 2024 and 2023, the Company had a current ratio, defined as current assets divided by current liabilities, of 1.4 to 1 and 1.6 to 1, respectively. Included in working capital was \$7.0 billion of readily marketable commodity inventories at each of December 31, 2024 and 2023. The Company's ratio of long-term debt to total capital (the sum of long-term debt of \$7.6 billion and shareholders' equity of \$22.2 billion in 2024 and the sum of long-term debt of \$8.3 billion and shareholders' equity of \$24.1 billion in 2023) was 25% at each of December 31, 2024 and 2023. The Company's ratio of net debt (the sum of short-term debt of \$1.9 billion, current maturities of long-term debt of \$674 million, and long-term debt of \$7.6 billion less the sum of cash and cash equivalents of \$611 million and short-term marketable securities of \$246 million in 2024, and the sum of short-term debt of \$105 million, current maturities of long-term debt of \$1 million, and long-term debt of \$8.3 billion less the sum of cash and cash equivalents of \$1.4 billion and short-term marketable securities of none in 2023) to capital (the sum of net debt of \$9.3 billion and shareholders' equity of \$22.2 billion in 2024 and the sum of net debt of \$7.0 billion and shareholders' equity of \$24.1 billion in 2023) was 30% and 22% at December 31, 2024 and 2023, respectively. Credit Ratings As of December 31, 2024, the three major credit rating agencies maintained the Company's credit ratings at investment grade levels with a negative outlook. Stock Repurchase Program On March 12, 2024, the Company entered into an accelerated share repurchase ("ASR") transaction agreement with Merrill Lynch International, an affiliate of BofA Securities, Inc., to repurchase \$1.0 billion of ADM common stock as part of ADM's existing share repurchase program to repurchase up to 200 million shares through December 31, 2024. On March 28, 2024, the Company received an interim delivery of 8,880,986 shares at an average share price of \$60.596, or \$538 million in aggregate. On April 15, 2024, the Company received a final delivery of 7,325,733 shares at an average share price of \$63.045, or \$462 million in aggregate, as final settlement of the ASR transaction. On December 11, 2024, the Company's Board of Directors approved a second extension of the stock repurchase program through

December 31, 2029 and the repurchase of up to an additional 100,000,000 shares under the extended program. As of December 31, 2024, the Company had 115 million shares remaining that may be repurchased under its stock repurchase program until December 31, 2029.

Accounts Receivable Securitization Program The Company has accounts receivable securitization programs (the "Programs") with certain commercial paper conduit purchasers and committed purchasers. The Programs provide the Company with up to \$2.8 billion in funding against accounts receivable transferred into the Programs and expand the Company's access to liquidity through efficient use of its balance sheet assets (see Part II. Item 8. Note 19 Sale of Accounts Receivable for more information and disclosures on the Programs). As of December 31, 2024, the Company utilized \$2.0 billion of its facility under the Programs.

Contractual Obligations and Commercial Commitments In 2025, the Company expects capital expenditures of \$1.5 billion and additional cash outlays of approximately \$1.0 billion in dividends and up to \$155 million in share repurchases, subject to other strategic uses of capital and the evolution of operating cash flows and the working capital position throughout the year. The Company's purchase obligations as of December 31, 2024 and 2023 were \$12.4 billion and \$14.0 billion, respectively. The decrease is primarily related to a decrease in obligations to energy commitments.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 43

As of December 31, 2024, the Company expects to make payments related to purchase obligations of \$11.8 billion within the next twelve months. The Company's other material cash requirements within the next 12 months include current maturities of long-term debt of \$674 million, interest payments of \$325 million, operating lease payments of \$377 million, transition tax liability of \$61 million, and pension, other postretirement, and defined contribution plan contributions of \$114 million. The Company expects to make payments related to purchase obligations and other material cash requirements beyond the next twelve months of \$15.9 billion. The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company was in compliance with these covenants as of December 31, 2024.

Critical Accounting Estimates The process of preparing financial statements requires management to make estimates and judgments that affect the carrying values of the Company's assets and liabilities as well as the recognition of revenues and expenses. These estimates and judgments are based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Certain of the Company's accounting estimates are considered critical, as these estimates are important to the depiction of the Company's financial statements and require significant or complex judgment by management. Critical accounting estimates are those estimates made in accordance with GAAP which involve a significant level of estimation uncertainty and have had or are reasonably likely to have a material impact on ADM's financial condition and results of operations. Management has discussed with the Company's Audit Committee the development, selection, disclosure, and application of these critical accounting estimates. Following are the accounting estimates management considers critical to the Company's financial statements.

Fair Value Measurements - Inventories and Commodity Derivatives Description: Certain of the Company's inventory, inventory-related payables, and commodity derivative assets and liabilities as of December 31, 2024 are valued at estimated fair values, including \$7.0 billion of merchandisable agricultural commodity inventories, \$0.8 billion of commodity derivative assets, \$0.8 billion of commodity derivative liabilities, and \$0.7 billion of inventory-related payables. Commodity derivative assets and liabilities include forward purchase and sales contracts for agricultural

commodities. Merchandisable agricultural commodities are freely traded, have quoted market prices, and may be sold without significant additional processing. Judgments and Uncertainties: Management estimates fair value for its commodity-related assets and liabilities based on exchange-quoted prices, adjusted for differences in local markets. The Company's inventory, inventory-related payables, and commodity derivative fair value measurements are mainly based on observable market quotations without significant adjustments and are therefore reported as Level 2 within the fair value hierarchy. Level 3 fair value measurements of approximately \$3.5 billion of assets and \$0.5 billion of liabilities represent fair value estimates where unobservable price components represent 10% or more of the total fair value price. For more information concerning amounts reported as Level 3, see Part II. Item 8. Note 4 Fair Value Measurements. Sensitivity of Estimate to Change: Changes in the market values of these inventories and commodity contracts are recognized in the statement of earnings as a component of cost of products sold. If management used different methods or factors to estimate market value, amounts reported could differ materially. Additionally, if market conditions change subsequent to year-end, amounts reported in future periods could differ materially. Income Taxes Description: The Company accounts for income taxes in accordance with the applicable accounting standards which prescribe a minimum threshold a tax position is required to meet before being recognized in the Consolidated Financial Statements. Deferred taxes are recognized for the estimated taxes ultimately payable or recoverable based on enacted tax law. Changes in enacted tax rates are reflected in the tax provision as they occur. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 44 Judgments and Uncertainties: ADM calculates its provision for income taxes based on the statutory tax rates and tax attributes available to the Company in the various jurisdictions in which it operates. The Company uses judgment in evaluating the Company's tax positions and determining its annual tax provision. Sensitivity of Estimate to Change: While ADM considers all of its tax positions fully supportable, the Company faces challenges from U.S. and foreign tax authorities regarding the amount of taxes due. The Company recognizes a tax position in its Consolidated Financial Statements when it is determined to be more likely than not to be sustained upon examination, based on its technical merits. The position is then measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. Business Combinations Description: The Company's acquisitions are accounted for in accordance with Accounting Standards Codification (ASC) Topic 805, Business Combinations, as amended. The consideration transferred is allocated to various assets acquired and liabilities assumed at their estimated fair values as of the acquisition date with the residual allocated to goodwill. The Company accounts for any redeemable non-controlling interest in temporary equity - redeemable non-controlling interest at redemption value with periodic changes recorded in retained earnings. Judgments and Uncertainties: Fair values allocated to assets acquired and liabilities assumed in business combinations require management to make significant judgments, estimates, and assumptions, especially with respect to intangible assets. Management makes estimates of fair values based upon assumptions it believes to be reasonable. These estimates are based upon historical experience and information obtained from the management of the acquired companies and are inherently uncertain. The estimated fair values related to intangible assets primarily consist of customer relationships, trademarks, and developed technology which are determined primarily using discounted cash flow models. Estimates in the discounted cash flow models include, but are not limited to, certain assumptions that form the basis of the forecasted results (e.g. revenue growth rates, customer attrition rates, and royalty rates). These significant assumptions are forward looking and could be affected by future economic and market conditions.

Sensitivity of Estimate to Change: During the measurement period, which may take up to one year from the acquisition date, adjustments due to changes in the estimated fair value of assets acquired and liabilities assumed may be recorded as adjustments to the consideration transferred and related allocations. Upon the conclusion of the measurement period or the final determination of the values of assets acquired and liabilities assumed, whichever comes first, any such adjustments are charged to the Consolidated Statements of Earnings. Goodwill Impairment Description: Goodwill represents the aggregate of the excess consideration paid for acquired businesses over the fair value of the net assets acquired. At December 31, 2024, the Company had goodwill of \$4.5 billion. The Company evaluates goodwill for impairment at the reporting unit level annually on October 1 or more frequently whenever there are indicators that the carrying value may not be fully recoverable, utilizing either the qualitative or quantitative method. The Company has seven reporting units with goodwill identified at one level below the operating segment using the criteria in ASC 350, Intangibles - Goodwill and Other (Topic 350). Two reporting units do not have any recorded goodwill. During the year ended December 31, 2024, the Company evaluated goodwill for impairment using a qualitative assessment for two reporting units and using a quantitative assessment for five reporting units. See Part II. Item 8. Note 9. Goodwill and Other Intangible Assets for further information. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 45

Judgments and Uncertainties: The Company has the option to first qualitatively assess factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the Company elects not to use this option, or it is determined that qualitative factors alone are not sufficient to conclude whether it is more likely than not that the fair value of the reporting unit is less than its carrying value, or it is determined from the qualitative assessment that it is more likely than not that the fair value of a reporting unit is less than its carrying value, then the Company performs the quantitative goodwill impairment test. As part of the Company's impairment analysis, the fair value of a reporting unit is generally determined using both the income and market approaches. Critical estimates in the determination of the fair value, when using a discounted cash flow analysis, of each reporting unit require management to make assumptions including, but not limited to, future expected cash flows of the reporting unit utilizing appropriate revenue growth, EBITDA margins, and discount rates. A decline in the actual cash flows of a reporting unit in future periods, as compared to the projected cash flows used in the discounted cash flow analysis, could result in the carrying value of the reporting unit exceeding its fair value. Further, a change in the discount rate, as a result of a change in economic conditions or otherwise, could result in the carrying values of the reporting units exceeding their respective fair values. Although the Company believes its estimates of fair value are reasonable, actual financial results could differ from those estimates due to the inherent uncertainty involved in making such estimates.

Sensitivity of Estimate to Change: Per the results of the impairment testing within the Ag Services and Oilseeds (AS&O;) reportable segment for the year ended December 31, 2024, the estimated fair value of the Ag Services, Crushing, and RPO reporting units evaluated for impairment using a quantitative assessment was in excess of 128%, 191% and 209% of its carrying value, respectively, and no impairment was recorded for any of the AS&O; reporting units. Per the results of the impairment testing within the Nutrition reportable segment for the year ended December 31, 2024, the estimated fair value of the Animal Nutrition and Human Nutrition reporting units evaluated for impairment using a quantitative assessment was in excess of 7% and 32% of its carrying value, respectively, and no impairment was recorded for either of the Nutrition reporting units. The Company used a combination of the income and market approaches when performing the quantitative assessment of goodwill for

the Animal Nutrition reporting unit. The Company weighted the income approach with a probability weight of 75%, as it is based on the future business plans and growth estimates for the Company's Animal Nutrition business and thus considers short-term and long-term cash flow expectations for the business. The market approach was weighted less heavily at 25%, as it represents an estimate of fair value based on market guideline companies for which future growth expectations are not precisely known. The income approach is predicated upon the value of the estimated future cash flows that a business will generate going forward. The Company used the Discounted Cash Flow (DCF) method under the income approach for the analysis of Animal Nutrition. The market approach assumes that companies operating in the same industry will share similar characteristics and that values will correlate to those characteristics. Therefore, under the market approach, a comparison of the reporting unit to similar companies whose financial information is publicly available may provide a reasonable basis to estimate the fair value of the reporting unit. The two forms of the market approach most commonly applied are the Guideline Public Company (GPC) method and the Guideline Merged and Acquired Company (GMAC) method. The Company utilized the GPC method to estimate the fair value of the Animal Nutrition reporting unit under the market approach. The GMAC method was also considered, but ultimately was not relied upon due to the lack of recent transactions that were directly comparable. In the selection of the appropriate market multiples, the Company considered the performance of the business, the size, risks, opportunities, and a comparison of the margins and growth of the Animal Nutrition business compared to the guideline public companies. The estimated fair value calculated by the GPC method was within 5% of the estimated fair value calculated by the income approach. The Company performed a sensitivity analysis for the significant assumptions used in the goodwill impairment testing analysis for the Animal Nutrition reporting unit. The sensitivities were calculated in isolation using the income approach and keeping all other assumptions constant. The sensitivities for revenue growth and EBITDA growth do not consider the offsetting impact of a lower discount rate assumption to reflect the reduced risk in estimated future cash flow growth used under the income approach or the related impacts on pricing multiples used under the market approach.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
OPERATIONS 46

As of December 31, 2024, goodwill allocated to the Animal Nutrition reporting unit totaled \$887 million. For Animal Nutrition impairment testing, certain hypotheticals would have the following results: – A hypothetical increase to the discount rate of approximately 100 basis points would result in a goodwill impairment of approximately \$68 million; – A hypothetical decrease to forecasted EBITDA margins of approximately 50 basis points would result in goodwill impairment of approximately \$5 million; and – A hypothetical decrease in the expected annual revenue growth rate over the entire forecast of approximately 250 basis points would result in a goodwill impairment of approximately \$69 million.

Investments in Affiliates Description: The Company applies the equity method of accounting for investments over which the Company has the ability to exercise significant influence, including its 22.5% investment in Wilmar. These investments in affiliates are carried at cost plus equity in undistributed earnings and are adjusted, where appropriate, for amortizable basis differences between the investment balance and the underlying net assets of the investee. Generally, the minimum ownership threshold for asserting significant influence is 20% ownership of the investee. However, the Company considers all relevant factors in determining its ability to assert significant influence including but not limited to, ownership percentage, board membership, customer and vendor relationships, and other arrangements.

Judgments and Uncertainties: The Company has evaluated its investments in affiliates as of December 31, 2024 to be appropriately stated at carrying

values. The Company also periodically compares the book value of its investment in Wilmar against its market value as determined through quoted market prices, and evaluates any potential other-than-temporary impairment. The Company's investment in Wilmar had a carrying value of \$3.9 billion as of December 31, 2024, and a market value of \$3.2 billion based on the quoted Singapore Exchange market price, converted to U.S. dollars at the applicable exchange rate, at December 31, 2024. The Company evaluated several factors in its determination of whether an other-than-temporary impairment had occurred. This included consideration of the short duration of the carrying value being above Wilmar's stock price, the recent performance of Wilmar's stock price as quoted on the Singapore Exchange, latest consensus analyst forecasts, Wilmar's long history of earnings and dividends and the Company's continued representation on Wilmar's Board. The Company considers its investment in Wilmar a significant and strategic relationship and has the intent and ability to retain its investment in Wilmar for a period of time sufficient to allow for any anticipated recovery in market value. Based on the evaluation of the factors above, the Company does not consider the investment to be other-than temporarily impaired at December 31, 2024.

Sensitivity of Estimate to Change: The performance of impairment tests involves the use of estimates and assumptions, which may change period to period. If the Company management used different assumptions in the evaluation of its equity method investments, including its investment in Wilmar, the Company may conclude that the investment is other-than-temporarily impaired.

Recent accounting pronouncements See "New Accounting Pronouncements Not Yet Adopted" within Note 1. Summary of significant accounting policies, to the Consolidated Financial Statements included in Part II. Item 8 for information regarding recent accounting pronouncements. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS 47

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in: commodity market prices as they relate to the Company's net commodity position, foreign currency exchange rates, and interest rates as described below.

Commodity Price Risk The availability and prices of agricultural commodities are subject to wide fluctuations due to factors such as changes in weather conditions, crop disease, plantings, government programs and policies, competition, changes in global demand, changes in customer preferences and standards of living, and global production of similar and competitive crops. The Company manages its exposure to adverse price movements of agricultural commodities used for, and produced in, its business operations, by entering into derivative and non-derivative contracts which reduce the Company's overall short or long commodity position. Additionally, the Company uses exchange-traded futures and exchange-traded and over-the-counter option contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded commodities futures contracts and the cash prices of the underlying commodities, counterparty contract defaults, and volatility of freight markets. In addition, the Company, from time-to-time, enters into derivative contracts which are designated as hedges of specific volumes of commodities that will be purchased and processed, or sold, in a future month. The changes in the market value of such futures contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed designated hedging transactions are deferred in other comprehensive income, net of applicable taxes, and recognized as a component of cost of products sold or revenues in the statement of earnings when the hedged item is recognized. The Company's

commodity position consists of merchandisable agricultural commodity inventories, related purchase and sales contracts, energy and freight contracts, and exchange-traded futures and exchange-traded and over-the-counter option contracts including contracts used to hedge anticipated transactions. The fair value of the Company's commodity position is a summation of the fair values calculated for each commodity by valuing all of the commodity positions at quoted market prices for the period, where available, or utilizing a close proxy. The Company has established metrics to monitor the amount of market risk exposure, which consist of volumetric limits, and value-at-risk (VaR) limits. VaR measures the potential loss, at a 95% confidence level, that could be incurred over a one year period. Volumetric limits are monitored daily and VaR calculations and sensitivity analysis are monitored weekly. The Company performs sensitivity analyses measuring the potential loss in fair value resulting from a hypothetical 10% adverse change in market prices. The highest, lowest, and average weekly long (short) position for the years ended December 31, 2024 and 2023 together with the market risk from a hypothetical 10% adverse price change is as follows (in millions):

	December 31, 2024	December 31, 2023
Fair Value Market Risk Highest position	\$ 543	\$ 54
Fair Value Market Risk Lowest position	\$ 498	\$ 50
Average position	168	17

The change in fair value of the average position was due to the overall decrease in average quantities of certain commodities.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY PART II 48 Foreign Currency Exchange Risk The Company has consolidated subsidiaries in more than 80 countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency except certain significant subsidiaries in Switzerland where Euro is the functional currency, and Brazil and Argentina where U.S. dollar is the functional currency. To reduce the risks associated with foreign currency exchange rate fluctuations, the Company enters into currency exchange contracts to minimize its foreign currency position related to transactions denominated primarily in Euro, British pound, Canadian dollar, and Brazilian real currencies. These currencies represent the major functional or local currencies in which recurring business transactions occur. The Company also uses currency exchange contracts and foreign currency denominated debt as hedges against amounts indefinitely invested in foreign subsidiaries and affiliates. The currency exchange contracts used are forward contracts, swaps with banks, exchange-traded futures contracts, and over-the-counter options. The changes in market value of such contracts have a high correlation to the price changes in the currency of the related transactions. The potential loss in fair value for such net currency position resulting from a hypothetical 10% adverse change in foreign currency exchange rates is not material.

Interest Rate Risk The fair value of the Company's long-term debt is estimated using quoted market prices, where available, and discounted future cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Market risk is estimated as the potential increase in fair value resulting from a hypothetical 50 basis points decrease in interest rates. Actual results may differ.

	December 31, 2024	December 31, 2023
(In millions) Fair value of long-term debt	\$ 7,055	\$ 8,557
Fair value amount over (under) carrying value	(501)	298
Market risk	271	378

The decrease in the fair value of long-term debt at December 31, 2024 is due to an increase in corporate bond interest rates.

Table of Contents

Note 1. Summary of Significant Accounting Policies Company Overview Archer-Daniels-Midland

Company and its subsidiaries (the "Company" or "ADM") unlock the power of nature to enrich the quality of life. The Company is an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. ADM is a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. The Company is a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. ADM is a cutting-edge innovator, guiding the way to a future of new consumer and industrial solutions. ADM is a leader in sustainability, scaling across entire value chains to help decarbonize the multiple industries it serves. Around the globe, the Company's innovation and expertise are meeting critical needs while nourishing quality of life and supporting a healthier planet. ADM has three reportable segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. See Note 17. Segment and Geographic Information for further details on the nature of the Company's business and its reportable operating segments.

Principles of Consolidation The Consolidated Financial Statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated. The Company consolidates all entities, including variable interest entities (VIEs), in which it has a controlling financial interest. For VIEs, the Company assesses whether it is the primary beneficiary as defined under the applicable accounting standard. Investments in affiliates, including VIEs through which the Company exercises significant influence but does not control the investee and is not the primary beneficiary of the investee's activities, are carried at cost plus equity in undistributed earnings since acquisition and are adjusted, where appropriate, for basis differences between the investment balance and the underlying net assets of the investee. The Company's portion of the results of certain affiliates and results of certain VIEs are included using the most recent available financial statements. In each case, the financial statements are within 93 days of the Company's year-end and are consistent from period to period.

Use of Estimates The preparation of Consolidated Financial Statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect amounts reported in its Consolidated Financial Statements and accompanying notes. Actual results could differ from those estimates.

Cash Equivalents The Company considers all non-segregated, highly-liquid investments with a maturity of three months or less at the time of purchase to be cash equivalents. **Segregated Cash and Investments** The Company segregates certain cash, cash equivalents, and investment balances in accordance with regulatory requirements, commodity exchange requirements, and insurance arrangements. These balances represent deposits received from customers of the Company's registered futures commission merchant and commodity brokerage services, cash margins and securities pledged to commodity exchange clearinghouses, and cash pledged as security under certain insurance arrangements. Segregated cash and investments also include restricted cash collateral for the various insurance programs of the Company's captive insurance business. To the degree these segregated balances are comprised of cash and cash equivalents, they are considered restricted cash and restricted cash equivalents on the statement of cash flows. **Table of Contents** ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 56 **Short-Term Marketable Securities** Short-term marketable securities include foreign government securities with maturities greater than three months and less than one year and are recorded at fair value with gains and losses on these investments included in Other income in the Consolidated Statements of Earnings. **Revenue Recognition** The Company principally generates revenue from merchandising and transporting agricultural commodities, and

manufacturing products for use in food, beverages, feed, energy, and industrial applications, and ingredients and solutions for human and animal nutrition. The Company's revenue that is generated from physically settled derivative sales contracts is accounted for under ASC 815, Derivatives and Hedging (Topic 815), and revenue from sales of other products and services is accounted for under ASC 606, Revenue from Contracts with Customers (Topic 606). Revenue from physically settled derivative sales contracts primarily relates to forward sales of commodities where such contracts meet the definition of a derivatives under ASC 815. Revenue from such commodities contracts is recognized at a point in time, upon transferring control of the commodity to the customer, similar to revenue recognized from contracts with customers under Topic 606. Prior to settlement, these contracts are recognized at fair value within current assets and liabilities, with the unrealized gains or losses primarily recorded within Cost of products sold. See Note 4. Fair Value Measurements and Note 5. Derivative Instruments & Hedging Activities for further information. Revenue from sales of other products and services is measured based on the consideration specified in the contract with a customer, in accordance with Topic 606. The Company follows a policy of recognizing revenue at a single point in time when it satisfies its performance obligation by transferring control over a product or service to a customer. Revenue for deferred price contracts that allow for pricing to be determined after title of the goods has passed to the customer is recognized when the price is determined. For transportation service contracts, the Company recognizes revenue over time as the mode of transportation moves towards its destination in accordance with the transfer of control guidance of Topic 606. The amount of revenue recognized follows the contractually specified price which may include freight or other contractually specified cost components. The majority of the Company's contracts with customers have one performance obligation and a contract duration of one year or less. The Company applies the practical expedient in Topic 606, and does not disclose information about remaining performance obligations that have original expected durations of one year or less. See Note 2. Revenues for further information. Shipping and Handling Costs Shipping and handling costs related to contracts with customers for the sale of goods are accounted for as a fulfillment activity and are included in cost of products sold. Accordingly, amounts billed to customers for such costs are included as a component of revenues. Taxes Collected from Customers and Remitted to Governmental Authorities The Company does not include taxes assessed by governmental authorities that are (i) imposed on and concurrent with a specific revenue-producing transaction and (ii) collected from customers, in the measurement of transactions prices or as a component of revenues and cost of products sold. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 57 Receivables The Company records accounts receivable at net realizable value. This value includes an allowance for estimated uncollectible accounts to reflect any loss anticipated on the accounts receivable balances including any accrued interest receivables thereon. The Company estimates uncollectible accounts by pooling receivables according to type, region, credit risk rating, and age. Each pool is assigned an expected loss co-efficient to arrive at a general reserve based on historical write-offs adjusted, as needed, for regional, economic, and other forward-looking factors. The Company minimizes credit risk due to the large and diversified nature of its worldwide customer base. ADM manages its exposure to counter-party credit risk through credit analysis and approvals, credit limits, and monitoring procedures. Long-term receivables recorded in other assets were not material to the Company's overall receivables portfolio. The Company recorded bad debt (reversals) expense in selling, general, and administrative expenses of \$(16) million, \$6 million, and \$88 million in the years ended December 31, 2024, 2023, and 2022, respectively. Changes to the allowance for estimated uncollectible accounts for the years ended December 31, 2024 and 2023 are

as follows (in millions): Year Ended December 31 2024 2023 Opening balance, January 1 \$ 215 \$ 199 Provisions (reversals), net (16) 6 Recoveries 9 2 Write-offs against allowance (32) (28) Other (9) 36 Closing balance, December 31 \$ 167 \$ 215 Provisions (reversals), net in the years ended December 31, 2024 and 2023 included reversals of prior general provisions for economic factors related to the COVID pandemic. Write-offs against allowance in the year ended December 31, 2024 were primarily related to uncollectable trade receivables in the normal course of business. Write-offs against allowance in the year ended December 31, 2023 were primarily related to a customer in Brazil and allowance on receivables that were subsequently sold. Inventories Certain merchandisable agricultural commodity inventories, which include inventories acquired under deferred pricing contracts, are stated at market value. In addition, the Company values certain inventories using the first-in, first-out (FIFO) method at the lower of cost or net realizable value. The following table sets forth the Company's inventories as of December 31, 2024 and 2023 (in millions). December 31, 2024 December 31, 2023 Raw materials and supplies (1) \$ 1,922 \$ 1,944 Finished goods 2,689 3,026 Market inventories 6,961 6,987 Total inventories \$ 11,572 \$ 11,957 (1) Includes work in process inventories which were not material as of December 31, 2024 and 2023. Fair Value Measurements The Company measures the fair value of certain assets and liabilities in accordance with ASC Topic 820, Fair Value Measurements and Disclosures, which defines fair value as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Company uses the market approach valuation technique to measure the majority of its assets and liabilities carried at fair value. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 58 Three levels are established within the fair value hierarchy that may be used to report fair value: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs. Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data. Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. The fair value hierarchy gives the lowest priority to Level 3 inputs. In evaluating the significance of fair value inputs, the Company generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. Judgment is required in evaluating both quantitative and qualitative factors in the determination of significance for purposes of fair value level classification. In many cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of input that is a significant component of the fair value measurement determines the placement of the entire fair value measurement in the hierarchy. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels. Level 3 amounts can include assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as assets and liabilities for which the determination of fair value requires significant management judgment or estimation. Based on historical experience with the Company's suppliers and customers, the Company's own credit risk and knowledge of current market conditions, the Company does not view non-performance risk to be a significant input to fair value for the majority of its forward commodity purchase and sale contracts. However, in certain cases, if the Company believes the

non-performance risk to be a significant input, the Company records estimated fair value adjustments, and classifies the measurement in Level 3. The Company's policy regarding the timing of transfers between levels, including both transfers into and transfers out of Level 3, is to measure and record the transfers at the end of the reporting period. Derivatives The Company recognizes its financial and non-financial derivative instruments, excluding exchange traded instruments, as either assets or liabilities at fair value in its Consolidated Balance Sheets. Unrealized gains are reported as other current assets and unrealized losses are reported as accrued expenses and other payables. Exchange traded instruments are cash-settled daily with the settlement reflected within Other current assets. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and on the type of hedging relationship. The majority of the Company's derivatives have not been designated as hedging instruments, and as such, changes in fair value of these derivatives are recognized in earnings immediately, within revenue or cost of products sold, as appropriate. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 59 For those derivative instruments that are designated and qualify as hedging instruments, the Company designates the hedging instrument, based upon the exposure being hedged, as a cash flow hedge, fair value hedge or a net investment hedge. For derivative instruments that are designated and qualify as highly-effective cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the gain or loss on the derivative instrument is reported as a component of Accumulated other comprehensive income (loss) (AOCI) and as an operating activity in the statement of cash flows and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. Hedge components excluded from the assessment of effectiveness and gains and losses related to discontinued hedges are recognized in the Consolidated Statements of Earnings during the current period. For derivative instruments that are designated and qualify as net investment hedges, foreign exchange gains and losses related to changes in foreign currency exchange rates are deferred in AOCI until the underlying investment is divested. For derivative instruments that are designated and qualify as fair value hedges, changes in the fair value of the hedging instrument and changes in the fair value of the hedged item are recognized in the Consolidated Statements of Earnings in the same financial statement caption as the hedged items. Equity Method Investments The Company uses the equity method of accounting for equity investments if the investment provides the ability to exercise significant influence, but not control, over operating and financial policies of the investee. The Company's proportionate share of the net income or loss of these investees is included in consolidated net earnings. Judgment regarding the level of influence over each equity method investment includes considering key factors such as the Company's ownership interest, the legal form of the investee, any representation on the board of directors, and any participation in policy-making decisions. The Company evaluates equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment might not be recoverable. Factors considered by the Company when reviewing an equity method investment for impairment include the length of time (duration) and the extent (severity) to which the fair value of the equity method investment has been less than cost, the investee's financial condition and near-term prospects, and the intent and ability to hold the investment for a period of time sufficient to allow for anticipated recovery. An impairment that is other-than-temporary is recognized in the period identified. See Note 8. Investments in and Advances to Affiliates for further information. Cost Method Investments Cost method investments of \$439 million and \$438 million as of December 31, 2024 and

2023, respectively, are included in other assets in the Company's Consolidated Balance Sheets. Revaluation losses of \$16 million for the year ended December 31, 2024 were related to an investment in alternative protein and precision fermentation. Revaluation losses of \$76 million for the year ended December 31, 2023 were related to investments in the alternative protein category and precision fermentation. Revaluation gains of \$37 million for the year ended December 31, 2022 were in connection with observable third-party transactions (a Level 2 measurement under applicable accounting standards). Revaluation gains and losses are recorded in Interest and investment income in the Company's Consolidated Statements of Earnings. As of December 31, 2024, the annual and cumulative amounts of upward and downward adjustments were \$2 million and \$18 million, and \$113 million and \$75 million, respectively. Property, Plant, and Equipment Property, plant, and equipment are recorded at cost. Repair and maintenance costs are expensed as incurred. The Company uses the straight-line method in computing depreciation for financial reporting purposes and generally uses accelerated methods for income tax purposes. The annual provisions for depreciation have been computed principally in accordance with the following ranges of asset lives: buildings - 15 to 40 years; and machinery and equipment - 3 to 40 years. The Company capitalized interest on major construction projects in progress of \$32 million, \$32 million, and \$20 million for the years ended December 31, 2024, 2023, and 2022, respectively.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 60

The Company evaluates long-lived assets for impairment whenever indicators of impairment exist. In addition, assets are written down to fair value after consideration of the Company's ability to utilize the assets for their intended purpose, employ the assets in alternative uses, or sell the assets to recover the carrying value. Fair value is generally based on a discounted cash flow analysis which relies on management's estimate of market participant assumptions or estimated selling price for assets considered held for sale (a Level 3 measurement under applicable accounting standards).

Leases The Company leases certain transportation equipment, plant equipment, office equipment, land, buildings, and storage facilities. Most leases include options to renew, with renewal terms that can extend the lease term from 6 months to 95 years. The renewal options are not included in the measurement of the right of use assets and lease liabilities unless the Company is reasonably certain to exercise the optional renewal periods. Certain leases also include index and non-index escalation clauses and options to purchase the leased property. Leases accounted for as finance leases were immaterial at December 31, 2024. As an accounting policy election, the Company does not apply the recognition requirements of ASC Topic 842 to short-term leases in all of its underlying asset categories. The Company recognizes short-term lease payments in earnings on a straight-line basis over the lease term, and variable lease payments in the period in which the obligation for those payments is incurred. The Company also combines lease and non-lease contract components in all of its underlying asset categories as an accounting policy election.

Income Taxes The Company accounts for income taxes in accordance with the liability method. Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and reported amounts in the Consolidated Financial Statements using statutory rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recorded in the results of operations in the period that includes the enactment date under the law. Applicable accounting standards prescribe a minimum threshold a tax position is required to meet before being recognized in the Consolidated Financial Statements. The Company recognizes in its Consolidated Financial Statements tax positions determined more likely than not to be sustained upon examination, based on the technical merits of the position. The Company classifies interest on income tax-related balances as interest expense and

classifies tax-related penalties as selling, general, and administrative expenses. Income tax effects from AOCI are released when the individual units of account are sold, terminated, or extinguished. Goodwill and Other Intangible Assets Goodwill and other intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests. Definite-lived intangible assets, including capitalized expenses related to the Company's 1ADM program such as third-party configuration costs and internal labor, are amortized over their estimated useful lives of 1 to 50 years and are reviewed for impairment whenever there are indicators the carrying value of the assets may not be fully recoverable. The Company's accounting policy is to evaluate goodwill and other intangible assets with indefinite lives for impairment on October 1 of each fiscal year or whenever there are indicators the carrying value of the assets may not be fully recoverable. See Note 9. Goodwill and Other Intangible Assets for further information.

Table of Contents ARCHER-DANIELS-MIDLAND

COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 61 Supplier Payable Programs The Company has Supplier Payable Programs ("SPP") with financial institutions which act as its paying agents for payables due to certain of its suppliers. The Company has neither an economic interest in a supplier's participation in the SPP nor a direct financial relationship with the financial institutions, and has concluded its obligations to the suppliers, including amounts due and scheduled payment terms, are not impacted by their participation in the SPP. Accordingly, amounts associated with the SPP are classified as trade payables in the Company's Consolidated Balance Sheets and in operating activities in the Consolidated Statements of Cash Flows. The supplier invoices that have been confirmed as valid under the program require payment in full generally within 90 days of the invoice date. As of December 31, 2024 and 2023, the Company's outstanding payment obligations that suppliers had elected to sell to the financial institutions were \$222 million and \$274 million, respectively. Changes to the outstanding payment obligations for the years ended December 31, 2024 and 2023 were as follows (in millions):

	Year Ended December 31, 2024	2023
Opening balance, January 1	\$ 274	\$ 196
Obligations confirmed	948	1,100
Obligations paid	(1,000)	(1,022)
Closing balance, December 31	\$ 222	\$ 274

Payables to Brokerage Customers Payables to brokerage customers represent the total of customer accounts at the Company's futures commission merchant with credit or positive balances. Customer accounts are used primarily in connection with commodity transactions and include gains and losses on open commodity trades as well as securities and other deposits made for margins or other purposes as required by the Company or the exchange-clearing organizations or counterparties. Payables to brokerage customers have a corresponding balance in segregated cash and investments and customer omnibus receivable in other current assets.

Stock Compensation The Company recognizes expense for its stock compensation based on the fair value of the awards that are granted. The Company's stock compensation plans provide for the granting of restricted stock and restricted stock units (Restricted Stock Awards), performance stock units (PSUs), and stock options. The fair values of stock options are estimated at the date of grant using the Black-Scholes option valuation model, which requires the input of subjective assumptions. The fair values of Restricted Stock Awards and PSUs are determined based on the market value of the Company's shares on the grant date. Measured compensation cost, net of forfeitures, is recognized ratably over the vesting period of the related stock compensation award. Compensation expense for stock option grants, Restricted Stock Awards, and PSUs granted to employees is generally recognized on a straight-line basis during the service period of the respective grant. Certain of the Company's option grants, Restricted Stock Awards, and PSUs continue to vest upon the recipient's retirement from the Company and compensation expense related to option grants and Restricted Stock Awards granted to retirement-eligible employees is recognized in earnings on the date of grant. Compensation expense

for PSUs is based on the probability of meeting the performance criteria. The Company recognizes forfeitures as they occur. Research and Development Costs associated with research and development are expensed as incurred and recorded within selling, general, and administrative expenses. Such costs incurred, net of expenditures subsequently reimbursed by government grants, were \$269 million, \$256 million, and \$216 million for the years ended December 31, 2024, 2023, and 2022, respectively.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

62 Earnings Per Share Basic earnings per common share are determined by dividing net earnings attributable to controlling interests by the weighted average number of common shares outstanding. In computing diluted earnings per common share, average number of common shares outstanding is increased by dilutive potential common shares, including unvested restricted stock units, PSUs and common shares underlying stock options outstanding with exercise prices lower than the average market price of common shares using the treasury stock method.

Business Combinations The Company's acquisitions are accounted for in accordance with ASC Topic 805, Business Combinations, as amended. The consideration transferred is allocated to various assets acquired and liabilities assumed at their estimated fair values as of the acquisition date with the residual allocated to goodwill. Fair values allocated to assets acquired and liabilities assumed in business combinations require management to make significant judgments, estimates, and assumptions, especially with respect to intangible assets. Management makes estimates of fair values based upon assumptions it believes to be reasonable. These estimates are based upon historical experience and information obtained from the management of the acquired companies and are inherently uncertain. The estimated fair values related to intangible assets primarily consist of customer relationships, trademarks, and developed technology which are determined primarily using discounted cash flow models. Estimates in the discounted cash flow models include, but are not limited to, certain assumptions that form the basis of the forecasted results (e.g. revenue growth rates, customer attrition rates, and royalty rates). These significant assumptions are forward looking and could be affected by future economic and market conditions. During the measurement period, which may take up to one year from the acquisition date, adjustments due to changes in the estimated fair value of assets acquired and liabilities assumed may be recorded as adjustments to the consideration transferred and the related allocations. Upon the conclusion of the measurement period or the final determination of the values of assets acquired and liabilities assumed, whichever comes first, any such adjustments are charged to the Consolidated Statements of Earnings.

Redeemable Non-controlling Interests The Company presents any redeemable non-controlling interests in temporary equity within the Consolidated Balance Sheets at redemption value with period changes recorded in reinvested earnings. The Company reports the portion of its earnings or loss for redeemable non-controlling interests as net earnings (losses) attributable to non-controlling interests in the Consolidated Statements of Earnings. Changes to the Company's redeemable non-controlling interests for the years ended December 31, 2024, 2023, and 2022 are as follows (in millions):

Year Ended December 31,	2024	2023	2022
Opening balance, January 1	\$ 320	\$ 299	\$ 259
Net income (loss) attributable to redeemable non-controlling interests	(21)	(6)	21
Acquisition of redeemable non-controlling interests	(18)	—	—
Currency translation adjustments and other	(28)	27	19
Closing balance, December 31	(1)	\$ 253	\$ 320

(1) As of December 31, 2024, redeemable non-controlling interests includes \$136 million related to the 25% non-controlling interest for PetDine, LLC. The Company has the option to acquire this remaining 25% interest in PetDine, LLC by March 31, 2025. The non-controlling interest holders also have the option to put the 25% interest to the Company by the same date.

FINANCIAL STATEMENTS 63 Adoption of New Accounting Pronouncements Effective January 1, 2024, the Company adopted the amended guidance of Accounting Standards Codification (ASC) 848, Reference Rate Reform, which provides optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The guidance applies only to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The expedients and exceptions provided by the guidance do not apply to contract modifications made and hedging relationships entered into or evaluated after December 31, 2024, except for hedging relationships existing as of December 31, 2024, that an entity has elected certain optional expedients for and that are retained through the end of the hedging relationship. ADM has completed the transition of its financing, funding, and hedging portfolios from LIBOR to alternative reference rates. The transition did not have an impact on the Company's Consolidated Financial Statements. Effective December 31, 2024, the Company adopted Accounting Standards Update (ASU) 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures, which improves disclosures about a public entity's reportable segments and addresses requests from investors and other allocators of capital for more detailed information about a reportable segment's expenses. The amended guidance improves reportable segment disclosure requirements primarily through enhanced disclosures about significant segment expenses and permits entities to disclose more than one measure of a reportable segment's profitability used by the Chief Operating Decision Maker. The adoption of the amended guidance resulted in expanded disclosures in Note 17. Segment and Geographic Information in this report but did not have an impact on the Company's Consolidated Financial Statements. New Accounting Pronouncements Not Yet Adopted Effective December 31, 2025, the Company will be required to adopt ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures, which enhances the transparency and decision usefulness of income tax disclosures. The amendments address investor requests for more transparency about income tax information through improvements to income tax disclosures primarily related to the rate reconciliation and income taxes paid information. The adoption of the amended guidance will result in expanded disclosures in the Company's income taxes footnote but is not expected to have an impact on the Company's Consolidated Financial Statements. Effective December 31, 2027, the Company will be required to adopt ASU 2024-03, Income Statement—Reporting Comprehensive Income — Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of income statement expenses, which will require tabular disclosure of certain operating expenses disaggregated into categories, such as purchases of inventory, employee compensation, depreciation, and intangible asset amortization. The adoption of the amended guidance will result in expanded disclosures in the Company's footnotes but is not expected to have an impact on the Company's Consolidated Financial Statements. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 64 Note 2. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 66 Ag Services and Oilseeds The Ag Services and Oilseeds segment generates revenue from the sale of commodities, from service fees for the transportation of goods, from the sale of products manufactured in its global processing facilities, and from its structured trade finance activities. The Company engages in various structured trade finance activities to leverage its global trade flows whereby the Company obtains letters of credit (LCs) to guarantee payments on both global purchases and sales of grain. LCs guaranteeing payment on grain sales are sold on a non-recourse basis with no continuing involvement. The Company earns returns from the difference in interest rates between the LCs that guarantee payment on the underlying purchases and sales of grain given the differing risk profiles of the underlying transactions. The net return related to structured trade finance activities is included in revenue and was not significant for the years ended December 31, 2024, 2023, and 2022. Carbohydrate Solutions The Carbohydrate Solutions segment generates revenue from the sale of products manufactured at the Company's global corn and wheat milling facilities around the world. Revenue is recognized when control over products is transferred to the customer. Products are shipped to customers from the Company's various facilities and from its network of storage terminals. The amount of revenue recognized is based on the consideration specified in the contract which could include freight and other costs depending on the specific shipping terms of each contract. Nutrition The Nutrition segment sells ingredients and solutions including plant-based proteins, natural flavors, flavor systems, natural colors, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, postbiotics, enzymes, botanical extracts, edible beans, formula feeds, animal health and nutrition products, pet food and treats, and other specialty food and feed ingredients. Revenue is recognized when control over products is transferred to the customer. The amount of revenue recognized follows the contracted price or the mutually agreed price of the product. Other Business Other Business includes the Company's futures commission business whose primary sources of revenue are commissions and brokerage income generated from

executing orders and clearing futures contracts and options on futures contracts on behalf of its customers. Commissions and brokerage revenue are recognized on the date the transaction is executed. Other Business also includes the Company's captive insurance business which generates third party revenue through its proportionate share of premiums from third-party reinsurance pools. Reinsurance premiums are recognized on a straight-line basis over the period underlying the policy.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 67 Note 3. Acquisitions During the year ended December 31, 2024, the Company acquired Revela Foods, LLC ("Revela"), a Wisconsin-based developer and manufacturer of innovative dairy flavor ingredients and solutions, Fuerst Day Lawson Ltd. ("FDL"), a UK-based leading developer and producer of premium flavor and functional ingredient systems, PT Trouw Nutrition Indonesia ("PT"), a leading provider of functional and nutritional solutions for livestock farming in Indonesia, and Totally Natural Solutions Ltd. ("TNS"), a UK-based hops flavoring producer, for an aggregate cash consideration of \$948 million. The aggregate cash consideration of these acquisitions, net of \$21 million in cash acquired, was allocated as follows, subject to final measurement period adjustments (in millions). Revela FDL PT TNS Total Working capital, net of cash acquired \$ 49 \$ 10 \$ 6 \$ 2 \$ 67 Property, plant, and equipment 38 33 6 2 79 Goodwill 409 136 3 9 557 Other intangible assets 166 93 — 10 269 Other long-term assets 28 10 — — 38 Long-term liabilities (42) (41) — — (83) Aggregate cash consideration, net of cash acquired \$ 648 \$ 241 \$ 15 \$ 23 \$ 927 Goodwill recorded in connection with the acquisitions is primarily attributable to the synergies expected to arise after the Company's acquisition of the businesses. Of the \$557 million allocated to goodwill, \$373 million is expected to be deductible for tax purposes. These acquisitions add capabilities to the Company's Nutrition segment. The Company's Consolidated Statements of Earnings for the year ended December 31, 2024 includes the post-acquisition results of the acquired businesses which were immaterial. The following table sets forth the fair values and the useful lives of the other intangible assets acquired as of December 31, 2024. Useful Lives Revela FDL TNS Total (In years) (In millions) Intangible assets with finite lives: Customer lists 10 to 18 \$ 124 \$ 73 \$ 8 \$ 205 Recipes and others 10 to 21 42 20 2 64 Total other intangible assets acquired \$ 166 \$ 93 \$ 10 \$ 269 Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 68 Note 4. Fair Value Measurements The following tables set forth, by level, the Company's assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2024 and 2023 (in millions). Fair Value Measurements at December 31, 2024 Level 1 Level 2 Level 3 Total Assets: Inventories carried at market \$ — \$ 3,930 \$ 3,031 \$ 6,961 Unrealized derivative gains: Commodity contracts — 404 427 831 Foreign exchange contracts — 272 — 272 Interest rate contracts — 5 — 5 Cash equivalents 70 — — 70 Marketable securities 246 — — 246 Segregated investments 1,681 — — 1,681 Total Assets \$ 1,997 \$ 4,611 \$ 3,458 \$ 10,066 Liabilities: Unrealized derivative losses: Commodity contracts \$ — \$ 355 \$ 405 \$ 760 Foreign exchange contracts — 212 — 212 Inventory-related payables — 654 88 742 Total Liabilities \$ — \$ 1,221 \$ 493 \$ 1,714 Fair Value Measurements at December 31, 2023 Level 1 Level 2 Level 3 Total Assets: Inventories carried at market \$ — \$ 4,274 \$ 2,713 \$ 6,987 Unrealized derivative gains: Commodity contracts — 628 731 1,359 Foreign currency contracts — 187 — 187 Cash equivalents 209 — — 209 Segregated investments 1,362 — — 1,362 Total Assets \$ 1,571 \$ 5,089 \$ 3,444 \$ 10,104 Liabilities: Unrealized derivative losses: Commodity contracts \$ — \$ 500 \$ 457 \$ 957 Foreign currency contracts — 144 — 144 Inventory-related payables — 1,219 101 1,320 Total Liabilities \$ — \$ 1,863 \$ 558 \$ 2,421 Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 69 Inventories Carried at Market and Inventory-Related Payables Estimated fair values of inventories and inventory-related payables stated at market are

based on exchange-quoted prices, adjusted for differences in local markets and quality, referred to as basis. Market valuations for the Company's inventories are adjusted for location and quality (basis) because the exchange-quoted prices represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis adjustments are generally determined using inputs from competitor and broker quotations or market transactions and are considered observable. Basis adjustments are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact the movement of these basis adjustments. In some cases, the basis adjustments are unobservable because they are supported by little to no market activity. When unobservable inputs have a significant impact (more than 10%) on the measurement of fair value, the inventory is classified in Level 3. Changes in the fair value of inventories and inventory-related payables are recognized in the Consolidated Statements of Earnings as a component of cost of products sold. Unrealized Derivative Gains and Losses Derivative contracts include exchange-traded commodity futures and options contracts, forward commodity purchase and sale contracts, and over-the-counter (OTC) instruments related primarily to agricultural commodities, energy, interest rates, and foreign currencies. Substantially all of the Company's exchange-traded commodity futures and options contracts are cash-settled on a daily basis and, therefore, are not included in these tables. Fair value for forward commodity purchase and sale contracts is estimated based on exchange-quoted prices adjusted for differences in local markets. Market valuations for the Company's forward commodity purchase and sale contracts are adjusted for location (basis) because the exchange-quoted prices represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis adjustments are generally determined using inputs from competitor and broker quotations or market transactions and are considered observable. Basis adjustments are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact the movement of these basis adjustments. In some cases, the basis adjustments are unobservable because they are supported by little to no market activity. When observable inputs are available for substantially the full term of the contract, it is classified in Level 2. When unobservable inputs have a significant impact (more than 10%) on the measurement of fair value, the contract is classified in Level 3. Except for certain derivatives designated as cash flow hedges, changes in the fair value of commodity-related derivatives are recognized in the Consolidated Statements of Earnings as a component of cost of products sold. Changes in the fair value of foreign currency-related derivatives are recognized in the Consolidated Statements of Earnings as a component of revenues, cost of products sold, and other (income) expense - net, depending upon the purpose of the contract. The changes in the fair value of derivatives designated as effective cash flow hedges are recognized in the Consolidated Balance Sheets as a component of AOCI until the hedged items are recorded in earnings or it is probable the hedged transaction will no longer occur. Cash Equivalents The Company's cash equivalents are comprised of money market funds valued using quoted market prices and are classified as Level 1. Marketable Securities The Company's marketable securities are comprised of foreign government securities. Government securities are valued using quoted market prices and are classified as Level 1. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 70 Segregated Investments The Company's segregated investments are comprised of U.S. Treasury securities. U.S. Treasury securities are valued using quoted market prices and are classified as Level 1. The following tables present a rollforward of the activity of all assets and liabilities

measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the years ended December 31, 2024 and 2023 (in millions). Level 3 Fair Value Assets Measurements at December 31, 2024 Inventories Carried at Market Commodity Derivative Contracts Gains Total Opening balance, January 1, 2024 \$ 2,713 \$ 731 \$ 3,444 Total increase (decrease) in net realized/unrealized gains included in cost of products sold 646 1,010 1,656 Purchases 16,296 — 16,296 Sales (16,609) — (16,609) Settlements — (1,369) (1,369) Transfers into Level 3 1,416 241 1,657 Transfers out of Level 3 (1,431) (186) (1,617) Closing balance, December 31, 2024 (1) \$ 3,031 \$ 427 \$ 3,458 (1) Includes increase in unrealized gains of \$1.7 billion relating to Level 3 assets still held at December 31, 2024. Level 3 Fair Value Liabilities Measurements at December 31, 2024 Inventory-related Payables Commodity Derivative Contracts Losses Total Opening balance, January 1, 2024 \$ 101 \$ 457 \$ 558 Total increase (decrease) in net realized/unrealized losses included in cost of products sold and interest expense (12) 1,124 1,112 Purchases 79 — 79 Sales (81) — (81) Settlements — (1,142) (1,142) Transfers into Level 3 1 68 69 Transfers out of Level 3 — (102) (102) Closing balance, December 31, 2024 (1) \$ 88 \$ 405 \$ 493 (1) Includes increase in unrealized losses of \$1.1 billion relating to Level 3 liabilities still held at December 31, 2024. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 71 Level 3 Fair Value Assets Measurements at December 31, 2023 Inventories Carried at Market Commodity Derivative Contracts Gains Total Opening balance, January 1, 2023 \$ 2,760 \$ 541 \$ 3,301 Total increase (decrease) in net realized/unrealized gains included in cost of products sold 432 1,460 1,892 Purchases 29,929 — 29,929 Sales (30,038) — (30,038) Settlements (4) (1,559) (1,563) Transfers into Level 3 1,584 371 1,955 Transfers out of Level 3 (1,950) (82) (2,032) Closing balance, December 31, 2023 (1) \$ 2,713 \$ 731 \$ 3,444 (1) Includes increase in unrealized gains of \$2.1 billion relating to Level 3 assets still held at December 31, 2023. Level 3 Fair Value Liabilities Measurements at December 31, 2023 Inventory-related Payables Commodity Derivative Contracts Losses Debt Conversion Option Total Opening balance, January 1, 2023 \$ 89 \$ 603 \$ 6 \$ 698 Total increase (decrease) in net realized/unrealized losses included in cost of products sold and interest expense 5 1,303 (6) 1,302 Purchases 49 — — 49 Settlements (35) (1,583) — (1,618) Transfers into Level 3 1 157 — 158 Transfers out of Level 3 (8) (23) — (31) Closing balance, December 31, 2023 (1) \$ 101 \$ 457 \$ — \$ 558 (1) Includes increase in unrealized losses of \$1.3 billion relating to Level 3 liabilities still held at December 31, 2023. Transfers into Level 3 of assets and liabilities previously classified in Level 2 were due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts rising above the 10% threshold. Transfers out of Level 3 were primarily due to the relative value of unobservable inputs to the total fair value measurement of certain products and derivative contracts falling below the 10% threshold and thus permitting reclassification to Level 2. In some cases, the price components that result in differences between exchange-traded prices and local prices for inventories and commodity purchase and sale contracts are observable based upon available quotations for these pricing components, and in some cases, the differences are unobservable. These price components primarily include transportation costs and other adjustments required due to location, quality, or other contract terms. In the table below, these other adjustments are referred to as basis. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 72 The following table sets forth the weighted average percentage of the unobservable price components included in the Company's Level 3 valuations as of December 31, 2024 and 2023. The Company's Level 3 measurements may include basis only, transportation cost only, or both price components. As an example, for Level 3 inventories with basis, the unobservable component as of December 31, 2024 was a weighted average 24.9% of the total

price for assets and 31.3% of the total price for liabilities. Weighted Average % of Total Price December 31, 2024 December 31, 2023 Component Type Assets Liabilities Assets Liabilities Inventories and Related Payables Basis 24.9% 31.3% 25.0% 33.2% Transportation cost 10.8% —% 11.5% —% Commodity Derivative Contracts Basis 21.8% 23.4% 24.2% 24.9% Transportation cost 10.8% 10.8% 9.3% 3.2%

In certain of the Company's principal markets, the Company relies on price quotes from third parties to value its inventories and physical commodity purchase and sale contracts. These price quotes are generally not further adjusted by the Company in determining the applicable market price. In some cases, availability of third-party quotes is limited to only one or two independent sources. In these situations, absent other corroborating evidence, the Company considers these price quotes as 100% unobservable and, therefore, the fair value of these items is reported in Level 3. Note 5.

Derivative Instruments & Hedging Activities

Derivatives Not Designated as Hedging Instruments

The majority of the Company's derivative instruments have not been designated as hedging instruments. The Company uses exchange-traded futures and exchange-traded and OTC options contracts to manage its net position of merchandisable agricultural product inventories and forward cash purchase and sales contracts to reduce price risk caused by market fluctuations in agricultural commodities and foreign currencies. The Company also uses exchange-traded futures and exchange-traded and OTC options contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the correlation between the value of exchange-traded commodities futures contracts and the value of the underlying commodities, counterparty contract defaults, and volatility of freight markets. Derivatives, including exchange traded contracts and forward commodity purchase or sale contracts, and inventories of certain merchandisable agricultural products, which include amounts acquired under deferred pricing contracts, are stated at fair value or market value. Inventory is not a derivative and therefore fair values of and changes in fair values of inventories are not included in the tables below. The following table sets forth the fair value of derivatives not designated as hedging instruments as of December 31, 2024 and 2023 (in millions).

Changes in the market value of inventories of certain merchandisable agricultural commodities, inventory-related payables, forward cash purchase and sales contracts, exchange-traded futures, and exchange-traded and OTC options contracts are recognized in earnings immediately as a component of cost of products sold. Changes in the fair value of foreign currency-related derivatives are recognized in the Consolidated Statements of Earnings as a component of revenues, cost of products sold, and other (income) expense - net depending on the purpose of the contract. Derivatives

Designated as Hedging Instruments The Company had certain derivatives designated as cash flow and net investment hedges as of December 31, 2024 and 2023. In addition, the Company had certain derivatives designated as fair value hedges as of December 31, 2024. Cash Flow Hedges For derivative instruments that are designated and qualify as highly-effective cash flow hedges (i.e., hedging the exposure to variability in expected future cash flow that is attributable to a particular risk), the gain or loss on the derivative instrument is reported as a component of AOCI and as an operating activity in the statement of cash flows and reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings. Hedge components excluded from the assessment of effectiveness and gains and losses related to discontinued hedges are recognized in the Consolidated Statements of Earnings during the relevant period. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 74 For each of the hedge programs described below, the derivatives are designated as cash flow hedges. The changes in the market value of such derivative contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Once the hedged item is recognized in earnings, the gains and losses arising from the hedge are reclassified from AOCI to either revenues or cost of products sold, as applicable. The Company uses futures or options contracts to hedge the purchase price of anticipated volumes of corn to be purchased and processed in a future month. The objective of this hedging program is to reduce the variability of cash flows associated with the Company's forecasted purchases of corn. The Company's corn processing plants normally grind approximately 59 million bushels per month. During the past 12 months, the Company hedged between 12% and 31% of its monthly grind. At December 31, 2024, the Company had designated hedges representing between 9% to 26% of its anticipated monthly grind of corn for the next 12 months. The Company uses futures and options contracts to hedge the purchase price of anticipated volumes of soybeans to be purchased and processed in a future month for certain of its U.S. soybean crush facilities, subject to certain program limits. The Company also uses futures or options contracts to hedge the sales prices of anticipated soybean meal and soybean oil sales proportionate to the soybean crushing process at these facilities, subject to certain program limits. During the past 12 months, the Company hedged between 76% and 100% of the anticipated monthly soybean crush for soybean purchases and soybean meal and oil sales at the designated facilities. At December 31, 2024, the Company had designated hedges representing between 5% and 100% of the anticipated monthly soybean crush for soybean purchases and soybean meal and oil sales at the designated facilities over the next 12 months. The Company uses futures and OTC swaps to hedge the purchase price of anticipated volumes of natural gas consumption in a future month for certain of its facilities in North America and Europe, subject to certain program limits. During the past 12 months, the Company hedged between 41% and 74% of the anticipated monthly natural gas consumption at the designated facilities. At December 31, 2024, the Company had designated hedges representing between 35% and 50% of the anticipated monthly natural gas consumption over the next 12 months. As of December 31, 2024 and 2023, the Company had after-tax losses of \$13 million and after-tax gains of \$42 million in AOCI, respectively, related to gains and losses from these programs. The Company expects to recognize \$13 million of the 2024 after-tax losses in its Consolidated Statements of Earnings during the next 12 months. Fair Value Hedges The Company uses interest rate swaps designated as fair value hedges to protect the fair value of fixed-rate debt due to changes in interest rates. The changes in the fair value of the interest rate swaps and the underlying fixed-rate debt is recognized in the Consolidated Statements of Earnings during the current period. The terms of the interest rate swaps match the terms of the

underlying debt. The Company executed fixed-to-floating rate interest rate swaps with an aggregate notional amount of \$500 million as of December 31, 2024. As of December 31, 2024, the Company had pre-tax gains of \$5 million in other current assets related to interest rate swaps and a corresponding offset to the underlying debt for the same amount, with no net impact to earnings. Net Investment Hedges The Company uses cross-currency swaps and foreign exchange forwards designated as net investment hedges to protect the Company's investment in a foreign subsidiary against changes in foreign currency exchange rates. The Company had USD-fixed to Euro-fixed cross-currency swaps with an aggregate notional amount of \$394 million and \$805 million as of December 31, 2024 and 2023, respectively, and foreign exchange forwards with an aggregate notional amount of \$2.1 billion as of each of December 31, 2024 and 2023. Amounts excluded from the assessment of hedge effectiveness are immaterial for all periods presented. As of December 31, 2024 and 2023, the Company had after-tax losses of \$99 million and \$5 million in AOCI, respectively, related to foreign exchange gains and losses from net investment hedge transactions. The amount is deferred in AOCI until the underlying investment is divested. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 75 The following table sets forth the fair value of derivatives designated as hedging instruments as of December 31, 2024 and 2023 (in millions).

Revenues recognized in the year ended December 31, 2024

from contract liabilities as of December 31, 2023 were \$529 million. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 77 Note 8. Investments in and Advances to Affiliates The Company applies the equity method of accounting for investments in investees over which the Company has the ability to exercise significant influence.

Wilmar Investment The Company had a 22.5% share ownership in Wilmar as of December 31, 2024 and 2023. During the year ended December 31, 2024, the Company's investment in Wilmar was written down to its fair value, resulting in a pre-tax impairment charge of \$461 million recorded in asset impairment, exit, and restructuring costs within the Consolidated Statement of Earnings. Subsequent to this impairment, the Company continues to monitor its investment in Wilmar for impairment. The Company's investment in Wilmar had a carrying value of \$3.9 billion as of December 31, 2024, and a market value of \$3.2 billion based on the quoted Singapore Exchange market price, converted to U.S. dollars at the applicable exchange rate, at December 31, 2024. In accordance with its accounting policy, as of December 31, 2024, the Company evaluated several factors in its determination of whether an other-than-temporary impairment of its investment in Wilmar had occurred as of that date. This included consideration of the short duration of the carrying value being above Wilmar's stock price, the recent performance of Wilmar's stock price as quoted on the Singapore Exchange, latest consensus analyst forecasts, Wilmar's long history of earnings and dividends and the Company's continued representation on Wilmar's Board. The Company considers its investment in Wilmar a significant and strategic relationship and has the intent and ability to retain its investment in Wilmar for a period of time sufficient to allow for any anticipated recovery in market value. Based on the evaluation of the factors above, the Company does not consider the investment to be other-than temporarily impaired at December 31, 2024. The Company will continue to reassess its investment in Wilmar which may result in the recognition of an other-than-temporary impairment in the future.

Other Investments As of December 31, 2024, the Company also holds equity method investments in Pacificor (32.2%), Stratas Foods LLC (50.0%), Edible Oils Limited (50.0%), Olenex (37.5%), SoyVen (50.0%), Hungrana Ltd (50.0%), Almidones Mexicanos S.A. (50.0%), Terminal de Grãos Ponta da Montanha S.A. (50.0%), Gradable, LLC (50.0%), Aston Foods and Food Ingredients (50.0%), Red Star Yeast Company, LLC (40.0%), LSCP, LLLP (22.1%), Vimison S.A. de C.V. (45.3%), ADM Matsutani LLC (50%), Matsutani Singapore Pte. Ltd. (50%), ADM Vland Biotech Shandong Co., Ltd. (50%), Dusial S.A. (42.8%), and Vitafort ZRT (34.3%).

Summarized Financial Information The Company had 69 and 73 unconsolidated domestic and foreign affiliates as of December 31, 2024 and 2023, respectively. The following tables summarize the aggregated balance sheets as of December 31, 2024 and 2023, and the aggregated statements of earnings of the Company's unconsolidated affiliates for the years ended December 31, 2024, 2023, and 2022 (in millions).

	December 31, 2024	2023	2022

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 78 Year Ended December 31

	2024	2023	2022
Revenues	\$ 77,251	\$ 85,754	\$ 109,448
Gross profit	3,673	4,261	8,946
Net earnings	2,036	2,452	3,140

The Company's share of the undistributed earnings of its unconsolidated affiliates as of December 31, 2024 was \$6.1 billion. Transactions and Balances with Investees Net sales to unconsolidated affiliates during the years ended December 31, 2024, 2023, and 2022 were \$6.7 billion, \$7.0 billion, and \$7.8 billion, respectively. Accounts receivable due from unconsolidated affiliates as of December 31, 2024 and 2023 was \$342 million and \$167 million, respectively. The Company provides credit facilities totaling \$142 million to seven unconsolidated affiliates. One facility that bears interest at 5.9% has an outstanding balance of \$2 million, one facility

that bears interest at 6.9% has an outstanding balance of \$7.5 million, and one facility that bears interest at 4.2% has an outstanding balance of \$7.5 million while the remaining facilities have no outstanding balance as of December 31, 2024. The outstanding balance is included in other current assets in the Company's Consolidated Balance Sheets. Note 9. Goodwill and Other Intangible Assets

Goodwill Changes in the carrying amount of goodwill by reportable segment and Other Business for the years ended December 31, 2024 and 2023 are as follows (in millions):

	Ag Services & Oilseeds	Carbohydrate Solutions	Nutrition	Other Business	Total
Balance at December 31, 2022	\$ 193	\$ 224	\$ 3,731	\$ 14	\$ 4,162
Acquisitions	20	—	—	20	Impairments
—	—	—	(137)	—	(137)
Currency translation adjustments and other	22	—	46	(10)	58
Balance at December 31, 2023	\$ 235	\$ 224	\$ 3,640	\$ 4	\$ 4,103
Acquisitions	—	—	557	—	557
Currency translation adjustments and other	(17)	(8)	(127)	1	(151)
Balance at December 31, 2024	\$ 218	\$ 216	\$ 4,070	\$ 5	\$ 4,509

As of each of December 31, 2024 and 2023, accumulated impairment for goodwill was \$156 million. During the year ended December 31, 2024, the Company evaluated goodwill for impairment using a qualitative assessment for two reporting units and using a quantitative assessment for five reporting units.

Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 79

Per the results of the impairment testing within the Ag Services and Oilseeds (AS&O;) reportable segment for the year ended December 31, 2024, the estimated fair value of the Ag Services, Crushing, and RPO reporting units evaluated for impairment using a quantitative assessment was in excess of 128%, 191% and 209% of its carrying value, respectively, and no impairment was recorded for any of the AS&O; reporting units. Per the results of the impairment testing within the Nutrition reportable segment for the year ended December 31, 2024, the estimated fair value of the Animal Nutrition and Human Nutrition reporting units evaluated for impairment using a quantitative assessment was in excess of 7% and 32% of its carrying value, respectively, and no impairment was recorded for either of the Nutrition reporting units. The Company used a combination of the income and market approaches when performing the quantitative assessment of goodwill for the Animal Nutrition reporting unit. The Company weighted the income approach with a probability weight of 75%, as it is based on the future business plans and growth estimates for the Company's Animal Nutrition business and thus considers short-term and long-term cash flow expectations for the business. The market approach was weighted less heavily at 25%, as it represents an estimate of fair value based on market guideline companies for which future growth expectations are not precisely known. During the year ended December 31, 2023, the Company recorded a goodwill impairment charge of \$137 million related to the Animal Nutrition reporting unit that was evaluated for impairment using a quantitative assessment. The decline in the fair value of the Animal Nutrition reporting unit was primarily driven by a higher discount rate due to changes in the underlying business performance and industry conditions as well as the macroeconomic environment, causing a decline in the projected cash flows. Following the recording of the impairment charge, the remaining carrying value of goodwill in the Animal Nutrition reporting unit as of December 31, 2023 was \$946 million. There was no goodwill impairment charge recorded for the year ended December 31, 2022.

Other Intangible Assets The following table sets forth the detail on other intangible assets.

Discount amortization expense, net of premium amortization, of \$13 million, \$15 million, and \$6 million for the years ended December 31, 2024, 2023, and 2022, respectively, are included in interest expense related to the Company's long-term debt. At December 31, 2024, the fair value of the Company's long-term debt, excluding current portion, was \$7.1 billion, as estimated using quoted market prices (a Level 2 measurement under applicable accounting standards), compared to a carrying value of \$7.6 billion. The Company's credit facilities and certain debentures require the Company to comply with specified financial and non-financial covenants including maintenance of minimum tangible net worth as well as limitations related to incurring liens, secured debt, and certain other financing arrangements. The Company was in compliance with these covenants as of December 31, 2024. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

81 The aggregate future maturities of long-term debt as of December 31, 2024 are as follows (in millions):

Amount	2025	\$ 675	2026	1,007	2027	265	2028	1	2029	145	Thereafter
Total estimated future maturities	\$ 8,521										

At December 31, 2024, the Company had lines of credit, including the accounts receivable securitization programs described below, totaling \$13.0 billion, of which \$9.1 billion was unused. The Company had outstanding standby letters of credit and surety bonds at December 31, 2024 and 2023, totaling \$1.4 billion and \$1.6 billion, respectively. The Company has accounts receivable securitization programs (the "Programs"). The Programs provide the Company with up to \$2.8 billion in funding resulting from the sale of accounts receivable. As of December 31, 2024, the Company utilized \$2.0 billion of its facility under the Programs. See Note 19. Sale of Accounts Receivable for further information on the Programs. The weighted average interest rates on short-term borrowings outstanding at December 31, 2024 and 2023, were 4.7% and 7.4%, respectively. Of the Company's total lines of credit, \$5.1 billion supported the combined U.S. and European commercial paper borrowing programs, against which there was \$1.7 billion of commercial

paper outstanding at December 31, 2024. Credit Ratings As of December 31, 2024, the three major credit rating agencies maintained the Company's credit ratings at investment grade levels with a negative outlook. Note 11. Stock Compensation Total compensation expense for stock option grants, Restricted Stock Awards, and PSUs recognized during the years ended December 31, 2024, 2023, and 2022 was \$74 million, \$112 million, and \$147 million, respectively. Changes in incentive compensation expense from period to period are primarily caused by the level of attainment of the PSU performance criteria described below. Stock Option Grants The Company's employee stock compensation plans provide for the granting of options to employees to purchase common stock of the Company pursuant to the Company's 2020 Incentive Compensation Plan. These options are issued at market value on the date of grant, vest incrementally over one year to five years, and expire ten years after the date of grant. The fair value of each option grant is estimated as of the date of grant using the Black-Scholes single option pricing model. The volatility assumption used in the Black-Scholes single option pricing model is based on the historical volatility of the Company's stock. The volatility of the Company's stock was calculated based upon the monthly closing price of the Company's stock for the period immediately prior to the date of grant corresponding to the average expected life of the grant. The average expected life represents the period of time that option grants are expected to be outstanding. The risk-free rate is based on the rate of U.S. Treasury zero-coupon issues with a remaining term equal to the expected life of option grants. No options were granted in 2024, 2023, and 2022. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 82 A summary of option activity during 2024 is presented below (in thousands, except per share amounts):

	Shares	Weighted-Average Exercise Price
Shares under option at December 31, 2023	1,614	\$37.11
Exercised (567)	44.38	
Shares under option at December 31, 2024	1,047	\$33.18
Exercisable at December 31, 2024	1,047	\$33.18

The weighted-average remaining contractual term of options outstanding and exercisable at December 31, 2024, was 1 year. The aggregate intrinsic value of options outstanding and exercisable at December 31, 2024, was \$19 million. The total intrinsic values of options exercised during the years ended December 31, 2024, 2023, and 2022, were \$9 million, \$20 million, and \$117 million, respectively. Cash proceeds received from options exercised during the years ended December 31, 2024, 2023, and 2022, were \$25 million, \$20 million, and \$90 million, respectively, and are presented as financing activities within the Consolidated Statements of Cash Flows under Other - net. Restricted Stock Awards and PSUs The Company's 2020 Incentive Compensation Plan provides for the granting of restricted stock and restricted stock units at no cost to certain officers and key employees. In addition, the Company's 2020 Incentive Compensation Plan also provides for the granting of PSUs at no cost to certain officers and key employees. Restricted Stock Awards are made in common stock or stock units with equivalent rights and vest at the end of a restriction period of three years. Starting with the February 2023 grant, Restricted Stock Awards have a three-year graded vesting schedule and vest at 33.33% each year. The awards for PSUs are made in common stock units and vest at the end of a vesting period of three years subject to the attainment of certain future service and Company performance criteria. During the years ended December 31, 2024, 2023, and 2022, 2.6 million, 1.7 million, and 2.3 million common stock or stock units, respectively, were granted as Restricted Stock Awards and PSUs. At December 31, 2024, there were 11.2 million shares available for future grants pursuant to the 2020 Incentive Compensation Plan. The fair value of Restricted Stock Awards and PSUs is determined based on the market value of the Company's shares on the grant date. The weighted-average grant-date fair values of awards granted during the years ended December 31, 2024, 2023, and 2022 were \$55.16, \$78.90, and \$70.13, respectively. A summary of Restricted Stock Awards and PSUs activity during 2024 is presented below (in thousands, except per

share amounts): Restricted Stock Awards and PSUs Weighted Average Grant-Date Fair Value Per Share Non-vested at January 1, 2024 5,332 \$69.82 Granted 2,635 55.16 Vested (2,396) 58.70 Forfeited (286) 67.19 Non-vested at December 31, 2024 5,285 \$68.77 Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 83 At December 31, 2024, there was \$89 million of total unrecognized compensation expense related to Restricted Stock Awards and PSUs. Amounts to be recognized as compensation expense during the years ended December 31, 2025, 2026, and 2027 are expected to be \$58 million, \$27 million, and \$4 million, respectively, based on expected Company performance and award service conditions. The total grant-date fair value of Restricted Stock Awards and PSU's that vested during the year ended December 31, 2024 was \$141 million. Note 12. Other (Income) Expense – Net The following table sets forth the items in other (income) expense (in millions). Year Ended December 31 2024 2023 2022 Gains on sale of assets \$ (27) \$ (38) \$ (78) Other – net (224) (138) (280) \$ (251) \$ (176) \$ (358) Other - net in the year ended December 31, 2024 included the non-service components of net pension benefit income of \$18 million, net foreign exchange gains of \$46 million, third party insurance recoveries of \$133 million, and net other income. Other - net for the year ended December 31, 2023 included the non-service components of net pension benefit income of \$18 million, net foreign exchange gains of \$85 million, and net other income. Other - net for the year ended December 31, 2022 included a legal recovery related to the 2019 and 2020 closure of the Company's export facility in Reserve, Louisiana of \$110 million, net foreign exchange gains of \$105 million, a \$50 million one-time payment from the USDA Biofuel Producer Recovery Program, and the non-service components of net pension benefit income of \$25 million, partially offset by net other expense. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 84 Note 13. Income Taxes The following table sets forth the geographic split of earnings before income taxes (in millions). Year Ended December 31 2024 2023 2022 United States \$ 656 \$ 1,844 \$ 2,725 Foreign 1,599 2,450 2,508 Total Earnings Before Income Taxes \$ 2,255 \$ 4,294 \$ 5,233 Significant components of income tax expense are as follows (in millions): Year Ended December 31 2024 2023 2022 Current expense Federal \$ 108 \$ 291 \$ 379 State 8 47 97 Foreign 490 513 481 \$ 606 \$ 851 \$ 957 Deferred expense (benefit) Federal (99) (52) 23 State 6 (10) 7 Foreign (37) 39 (119) \$ (130) \$ (23) \$ (89) Income tax expense \$ 476 \$ 828 \$ 868 Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 85 Significant components of deferred tax liabilities and assets are as follows (in millions): December 31, 2024 December 31, 2023 Deferred tax liabilities Property, plant, and equipment \$ 808 \$ 827 Intangibles 343 358 Right of use assets 317 263 Equity in earnings of affiliates 236 214 Debt exchange 49 50 Reserves and other accruals 133 49 Other 30 137 \$ 1,916 \$ 1,898 Deferred tax assets Pension and postretirement benefits \$ 95 \$ 111 Inventories 12 20 Lease liabilities 323 268 Stock compensation 36 42 Foreign tax loss carryforwards 386 494 Capital loss carryforwards 41 42 State tax attributes 23 25 US carryforwards 196 27 Other 111 71 Gross deferred tax assets 1,223 1,100 Valuation allowances (223) (216) Net deferred tax assets \$ 1,000 \$ 884 Net deferred tax liabilities \$ 916 \$ 1,014 The net deferred tax liabilities are classified as follows: Noncurrent assets \$ 352 \$ 295 Noncurrent liabilities (1,268) (1,309) \$ (916) \$ (1,014) Net Operating Losses and Valuation Allowances The Company had \$386 million and \$494 million of tax assets related to net operating loss carryforwards of certain international subsidiaries at December 31, 2024 and 2023, respectively. As of December 31, 2024, approximately \$314 million of these assets have no expiration date, and the remaining \$72 million expire at various times through fiscal 2034. The annual usage of certain of these assets is limited to a percentage of taxable income of the respective foreign subsidiary for the year. The Company has recorded a valuation allowance of \$166 million and \$160 million against these tax assets at December

31, 2024 and 2023, respectively, due to the uncertainty of their realization. The Company had \$41 million of tax assets related to foreign capital loss carryforwards at each of December 31, 2024 and 2023. The Company recorded a valuation allowance of \$41 million against these tax assets at each of December 31, 2024 and 2023 due to the uncertainty of their realization. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 86 The Company had \$196 million of tax assets related to U.S. income tax attributes at December 31, 2024, of which \$39 million will expire between 2029 and 2034, \$89 million will expire in 2044, and the remaining \$68 million have no expiration date. The Company had \$23 million and \$25 million of tax assets related to state income tax attributes (incentive credits and net operating loss carryforwards), net of federal tax benefit, at December 31, 2024 and 2023, respectively, a majority of which will expire between 2025 and 2029. Due to the uncertainty of realization, the Company recorded a valuation allowance of \$16 million and \$14 million related to state income tax assets net of federal tax benefit as of December 31, 2024 and 2023, respectively. The change in the valuation allowance was related to the increase in the state income tax attributes over what was reserved in prior years. In assessing the need for a valuation allowance, the Company considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. During 2024, the Company increased valuation allowances primarily related to net operating loss carryforwards. The activity related to the income tax valuation allowance for the years ended December 31, 2024, 2023, and 2022 was as follows (in millions):

Year Ended December 31	2024	2023	2022
Opening balance, January 1	\$ 216	\$ 209	\$ 281
Additions	40	58	18
Deductions	(33)	(51)	(90)
Ending balance, December 31	\$ 223	\$ 216	\$ 209

Income Tax Rate Reconciliation Reconciliation of the statutory federal income tax rate to the Company's effective income tax rate on earnings is as follows:

Year Ended December 31	2024	2023	2022
US Federal Statutory rate	21.0 %	21.0 %	21.0 %
State income taxes, net of federal tax benefit	0.2	0.9	1.4
Foreign earnings taxed at rates other than the U.S. statutory rate	2.2	(0.3)	(3.8)
Foreign currency effects/remeasurement	(4.8)	0.5	0.6
Withholding Tax	1.8	0.1	—
Impairment of Investments	4.3	0.5	—
Change in Uncertain Tax Position	3.2	0.1	0.5
Tax benefit on U.S. biodiesel credits	(2.9)	(1.7)	(1.2)
Second-generation biofuel credit	(1.2)	—	—
U.S. railroad credits	(2.5)	(1.5)	(1.2)
U.S. tax on foreign earnings	0.6	1.2	0.2
Other	(0.8)	(1.5)	(0.9)
Effective income tax rate	21.1 %	19.3 %	16.6 %

The effective tax rates for 2024 and 2023 were impacted by the tax impact of impairments on investments and the Company's geographic mix of earnings. The effective tax rate for 2022 was impacted by the Company's geographic mix of earnings and discrete tax items. ADM's operations in foreign jurisdictions accounted for 71%, 57%, and 48% of the Company's total pre-tax earnings in fiscal years 2024, 2023, and 2022, respectively. The foreign rate differential was primarily due to various tax rates applicable to the income earned from the Company's operations in Europe, Asia, South America and the Caribbean. Table of Contents

ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 87 U.S. Legislative Changes On August 16, 2022, the U.S. government enacted the Inflation Reduction Act of 2022 (the "Inflation Act"), which includes, among other provisions, changes to the U.S. corporate income tax system, including a 15% minimum tax based on "adjusted financial statement income," and a one percent excise tax on net repurchases of stock for tax years beginning after December 31, 2022. While the Inflation Act has no immediate impact and is not expected to have a material adverse effect on ADM's results of operations going forward, the Company will continue to evaluate its impact as further information becomes available. Other Matters It is not practicable to determine the amount of unrecognized deferred tax liability related to any remaining undistributed earnings of foreign subsidiaries and corporate joint ventures not subject to the transition tax. The Company has elected to pay the one-time transition tax on accumulated foreign earnings over eight

years. As of December 31, 2024, the Company's remaining transition tax liability was \$61 million, which will be paid in 2025. The Company incurred U.S. taxable income of \$674 million, \$425 million, and \$684 million related to Global Intangible Low-Taxed Income (GILTI) and deducted \$16 million, \$77 million, and \$67 million related to Foreign Derived Intangible Income Deduction in fiscal years 2024, 2023, and 2022, respectively. The Company made an accounting policy election to treat GILTI as a period cost. The Company has recorded and will continue to record the impact of tax reform items as U.S. tax authorities issue Treasury Regulations and other guidance addressing tax reform-related changes. The additional guidance, along with the potential for additional global tax legislation changes, may affect significant deductions and income inclusions and could have a material adverse effect on the Company's net income or cash flow.

Unrecognized Tax Benefits The following table sets forth a rollforward of activity of unrecognized tax benefits for the year ended December 31, 2024 and 2023 (in millions).

	December 31, 2024	2023
Opening balance, January 1	\$ 168	\$ 151
Net additions related to current year's tax positions	12	2
Net additions related to prior years' tax positions	57	28
Additions (adjustments) related to acquisitions	2	—
Reductions related to lapse of statute of limitations	(6)	(6)
Settlements with tax authorities	(48)	(7)
Ending balance, December 31	\$ 185	\$ 168

The additions and reductions in unrecognized tax benefits shown in the table included effects related to net income and shareholders' equity. The changes in unrecognized tax benefits did not have a material effect on the Company's net income or cash flow. At December 31, 2024 and 2023, the Company had accrued interest and penalties on unrecognized tax benefits of \$59 million and \$52 million, respectively.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 88

The Company is subject to income taxation and routine examinations in many jurisdictions around the world and frequently faces challenges regarding the amount of taxes due. These challenges include positions taken by the Company related to the timing, nature, and amount of deductions and the allocation of income among various jurisdictions. In its routine evaluations of the exposure associated with various tax filing positions, the Company recognizes a liability, when necessary, for estimated potential tax owed by the Company in accordance with applicable accounting standards. Resolution of the related tax positions, through negotiations with relevant tax authorities or through litigation, may take years to complete. Therefore, it is difficult to predict the timing for resolution of tax positions and the Company cannot predict or provide assurance as to the ultimate outcome of these ongoing or future examinations. However, the Company does not anticipate that the total amount of unrecognized tax benefits will increase or decrease significantly in the next twelve months. Given the long periods of time involved in resolving tax positions, the Company does not expect that the recognition of unrecognized tax benefits will have a material impact on the Company's effective income tax rate in any given period. If the total amount of unrecognized tax benefits were recognized by the Company at one time, there would be a reduction of \$183 million on the tax expense for that period. The Company remains subject to federal examination in the U.S. for the calendar tax years 2018 through 2024. In the year ended December 31, 2014, the Company's wholly-owned subsidiary in the Netherlands, ADM Europe B.V., received a tax assessment of \$122 million, including interest, from the Netherlands tax authority challenging the transfer pricing aspects of a business reorganization implemented in the year ended December 31, 2009. On July 11, 2024, the Tax Court of Appeals issued a ruling decreasing the assessment to \$52 million, including interest. The Company decided not to appeal the decision further, and therefore the Tax Court of Appeals order is final. As of December 31, 2024, the Company has paid the final assessed amount, and the issue is considered settled.

Note 14. Leases The following table sets forth the amounts relating to the Company's total lease cost and other information (in millions).

	Year Ended December 31, 2024	2023
Total lease cost		

2022 Lease cost: Operating lease cost \$ 410 \$ 390 \$ 356 Short-term lease cost 135 126 127 Total lease cost \$ 545 \$ 516 \$ 483 Other information: Operating lease liability principal payments (1) \$ 397 \$ 374 \$ 339 Right-of-use assets obtained in exchange for new operating lease liabilities \$ 437 \$ 327 \$ 357

December 31 2024 2023 Weighted-average remaining lease term - operating leases (in years) 7.7 Weighted average discount rate - operating leases 4.5 % 4.1 % (1) Operating lease payments are presented as operating activities within the Consolidated Statements of Cash Flows.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 89 The aggregate future lease payments for operating leases as of December 31, 2024 are as follows (in millions): Undiscounted Cash Flows 2025 \$ 377 2026 284 2027 231 2028 180 2029 122 Thereafter 442 Total undiscounted minimum lease payments 1,636 Less: Interest (1) (255) Lease liability \$ 1,381 (1) Calculated using the implicit rate of the lease, if available, or the incremental borrowing rate that is appropriate for the tenor and geography of the lease.

Note 15. Employee Benefit Plans The Company provides substantially all U.S. employees and employees at certain foreign subsidiaries with retirement benefits including defined benefit pension plans and defined contribution plans. The Company also provides certain eligible U.S. employees who retire under qualifying conditions with subsidized postretirement health care coverage or Health Care Reimbursement Accounts. The Company maintains 401(k) plans covering substantially all U.S. employees. The Company contributes cash to the plans to match qualifying employee contributions, and also provides a non-matching employer contribution of 1% of pay to eligible participants. Under an employee stock ownership component of the 401(k) plans, employees may choose to invest in the Company's stock as part of their own investment elections. Assets of the Company's 401(k) plans consist primarily of listed common stocks and pooled funds. The Company's 401(k) plans held 5.6 million shares of Company common stock at December 31, 2024, with a market value of \$282 million. Cash dividends received on shares of Company common stock by these plans during the year ended December 31, 2024 were \$11 million.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 90 The following table sets forth the components of retirement plan expense for the years ended December 31, 2024, 2023, and 2022 (in millions).

Pension Benefits Postretirement Benefits	Year Ended December 31 2024	Year Ended December 31 2023	Year Ended December 31 2022
Retirement plan expense	Defined benefit plans:

currency effects and Other (39) 21 — — Fair value of plan assets, ending \$ 1,351 \$ 1,415 \$ — \$ —
 Funded status \$ (322) \$ (350) \$ (102) \$ (113) Amounts recognized in the Consolidated Balance Sheets
 consist of: Other assets (non-current) \$ 68 \$ 63 \$ — \$ — Accrued expenses and other payables (19)
 (19) (13) (14) Other long-term liabilities (371) (394) (89) (99) Net amount recognized in the Consolidated
 Balance Sheets \$ (322) \$ (350) \$ (102) \$ (113) In 2024, the actuarial gains in the pension plans were
 primarily driven by increases in the global bond yields, which were partially offset by unfavorable asset
 performances in the funded plans in the U.S. and the U.K. The Company uses the corridor approach
 when amortizing actuarial losses. Under the corridor approach, net unrecognized actuarial losses in
 excess of 10% of the greater of the projected benefit obligation or the market related value of plan
 assets are amortized over future periods. For plans with little to no active participants, the
 amortization period is the remaining average life expectancy of the participants. For plans with active
 participants, the amortization period is the remaining average service period of the active participants.
 The amortization periods range from 4 to 27 years for the Company's defined benefit pension plans
 and from 5 to 18 years for the Company's postretirement benefit plans. Included in AOCI for pension
 benefits at December 31, 2024, are the following amounts that have not yet been recognized in net
 periodic pension cost: unrecognized prior service credit of \$30 million and unrecognized actuarial loss
 of \$235 million. Included in AOCI for postretirement benefits at December 31, 2024, are the following
 amounts that have not yet been recognized in net periodic postretirement benefit cost: unrecognized
 prior service cost of \$1 million and unrecognized actuarial loss of \$15 million. Table of Contents
 ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 92 The
 following table sets forth the principal assumptions used in developing net periodic benefit cost:
 Pension Benefits Postretirement Benefits December 31 2024 December 31 2023 December 31 2024
 December 31 2023 Discount rate 4.5% 4.8% 4.9% 5.1% Expected return on plan assets 6.0% 6.0% N/A
 N/A Rate of compensation increase 4.8% 4.3% N/A N/A Interest crediting rate 4.0% 3.9% N/A N/A The
 following table sets forth the principal assumptions used in developing the year-end actuarial present
 value of the projected benefit obligations: Pension Benefits Postretirement Benefits December 31
 2024 December 31 2023 December 31 2024 December 31 2023 Discount rate 5.0 % 4.5 % 5.5% 4.9%
 Rate of compensation increase 4.8 % 4.8 % N/A N/A Interest crediting rate 4.6 % 4.0 % N/A N/A The
 projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the
 pension plans with projected benefit obligations in excess of plan assets were \$1.4 billion, \$1.4 billion,
 and \$1.0 billion, respectively, as of December 31, 2024, and \$1.5 billion, \$1.5 billion, and \$1.0 billion,
 respectively, as of December 31, 2023. For postretirement benefit measurement purposes, a 8.7%
 annual rate of increase in the per capita cost of covered health care benefits was assumed for the year
 ended December 31, 2024. The rate was assumed to decrease gradually to 4.5% by 2034 and remain
 at that level thereafter. Plan Assets The Company's employee benefit plan assets are principally
 comprised of the following types of investments: Common Stock: Equity securities are valued based
 on quoted exchange prices and are classified within Level 1 of the valuation hierarchy. Mutual Funds:
 Mutual funds are valued at the closing price reported on the active market on which they are traded
 and are classified within Level 1 of the valuation hierarchy. Common Collective Trust (CCT) Funds: The
 fair values of the CCTs are valued using net asset value (NAV). The investments in CCTs are comprised
 of U.S. and international equity, fixed income, and other securities. The investments are valued at NAV
 provided by administrators of the funds. Corporate Debt Instruments: Corporate debt instruments are
 valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy.
 U.S. Treasury Instruments: U.S. Treasury instruments are valued at the closing price reported on the
 active market on which they are traded and are classified within Level 1 of the valuation hierarchy.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 93 U.S. Government Agency, State, and Local Government Bonds: U.S. government agency obligations and state and municipal debt securities are valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy. The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants' methods, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The following tables set forth, by level within the fair value hierarchy, the fair value of plan assets as of December 31, 2024 and 2023 (in millions). Fair Value Measurements at December 31, 2024 Level 1 Level 2 Level 3 Total Common stock \$ 36 \$ — \$ — \$ 36 Mutual funds 154 — — 154 Corporate bonds — 517 — 517 U.S. Treasury instruments 161 — — 161 U.S. government agency, state and local government bonds — 4 — 4 Other 13 18 — 31 Total assets \$ 364 \$ 539 \$ — \$ 903 Common collective trust funds at NAV U.S. equity 30 International equity 67 Fixed income 298 Other 53 Total assets at fair value \$ 1,351 Fair Value Measurements at December 31, 2023 Level 1 Level 2 Level 3 Total Common stock \$ 37 \$ — \$ — \$ 37 Mutual funds 147 — — 147 Corporate bonds — 473 — 473 U.S. Treasury instruments 262 — — 262 U.S. government agency, state and local government bonds — 8 — 8 Other — 7 — 7 Total assets \$ 446 \$ 488 \$ — \$ 934 Common collective trust funds at NAV U.S. equity 15 International equity 60 Fixed income 330 Other 76 Total assets at fair value \$ 1,415 There are no Plan assets classified as Level 3 in the fair value hierarchy; therefore there are no gains or losses associated with Level 3 assets. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 94 The following table sets forth the actual asset allocation for the Company's global pension plan assets as of the measurement date.

	December 31 2024(1)(2)	December 31 2023(2)
Equity securities	21%	19%
Debt securities	68%	77%
Other	11%	4%
Total	100%	100%

(1) The Company's U.S. pension plans contain approximately 68% of the Company's global pension plan assets. The actual asset allocation for the Company's U.S. pension plans as of the measurement date consists of 23% equity securities, 74% debt securities, and 3% other. The target asset allocation for the Company's U.S. pension plans is approximately the same as the actual asset allocation. The actual asset allocation for the Company's foreign pension plans as of the measurement date consists of 18% equity securities, 56% debt securities, and 26% other. The target asset allocation for the Company's foreign pension plans is approximately the same as the actual asset allocation. (2) The Company's pension plans did not directly hold any shares of Company common stock as of the December 31, 2024 and 2023 measurement dates. Investment objectives for the Company's plan assets are to: – Optimize the long-term return on plan assets in consideration of funded status risk. – Maintain a broad diversification of assets and appropriate risk exposure across asset classes. – Maintain careful control of the risk level within each asset class. Asset allocation targets promote optimal expected return and volatility characteristics given the long-term time horizon for fulfilling the obligations of the pension plans. Selection of the targeted asset allocation for plan assets was based upon a review of the expected return and risk characteristics of each asset class, as well as the correlation of returns among asset classes. The U.S. pension plans target asset allocation is also based on an asset and liability study that is updated periodically. Investment guidelines are established with each investment manager. These guidelines provide the parameters within which the investment managers agree to operate, including criteria that determine eligible and ineligible securities, diversification requirements, and credit quality standards, where applicable. In some countries, derivatives may be used to gain market exposure in an efficient and timely manner;

however, derivatives may not be used to leverage the portfolio beyond the market value of underlying investments. The Company uses external consultants to assist in monitoring the investment strategy and asset mix for the Company's plan assets. To develop the Company's expected long-term rate of return assumption on plan assets, the Company generally uses long-term historical return information for the targeted asset mix identified in asset and liability studies. Adjustments are made to the expected long-term rate of return assumption when deemed necessary based upon revised expectations of future investment performance of the overall investment markets.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 95

Future Contributions and Expected Benefit Payments Based on actuarial calculations, the Company expects to contribute \$25 million to the pension plans and \$13 million to the postretirement benefit plan during 2025. The Company may elect to make additional discretionary contributions during this period. The following benefit payments, which reflect expected future service, are expected to be paid by the benefit plans (in millions):

	2025	2026	2027	2028	2029	2030-2034
Pension Benefits	\$ 76	\$ 83	\$ 89	\$ 96	\$ 102	\$ 590
Postretirement Benefits	\$ 13	\$ 12	\$ 11	\$ 10	\$ 10	\$ 39

Note 16. Shareholders' Equity The Company has authorized one billion shares of common stock and 500,000 shares of preferred stock, each with zero par value. No preferred stock has been issued. At December 31, 2024 and 2023, the Company had approximately 237.6 million shares and 202.5 million shares, respectively, of its common shares in treasury. Treasury stock of \$4.8 billion and \$4.9 billion at December 31, 2024 and 2023, respectively, is recorded at cost as a reduction of common stock, and treasury stock of \$2.3 billion and \$2.7 billion at December 31, 2024 and 2023, respectively, is recorded at cost as a reduction of reinvested earnings.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 97

Note 17. Segment and Geographic Information The Company's operations are organized, managed, and classified into three reportable business segments: Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are not reportable segments, as defined by the applicable accounting standard, and are

classified within either Corporate or Other Business. The reportable segments have been identified based on financial data utilized by the Chief Operating Decision Maker (CODM), which is the Company's Chief Executive Officer, who is also the Company's Chair of the Board. The CODM uses segment operating profit as the measurement of segment profit or loss. Separate financial information for the Company's three reportable segments is evaluated by the CODM on a monthly basis to allocate resources and assess performance. The CODM does not use total assets by segment to make decisions regarding resources; therefore, the total asset disclosure by segment has not been included. Operating profit for each segment is based on net sales less identifiable operating expenses. Also included in operating profit for each segment is equity in earnings of affiliates based on the equity method of accounting. Specified items and certain corporate items are not allocated to the Company's individual business segments because operating performance of each business segment is evaluated by the CODM exclusive of these items. The Ag Services and Oilseeds segment includes global activities related to the origination, merchandising, transportation, and storage of agricultural raw materials, and the crushing and further processing of oilseeds such as soybeans and soft seeds (cottonseed, sunflower seed, canola, rapeseed, and flaxseed) into vegetable oils and protein meals. Oilseeds products produced and marketed by the segment include ingredients for food, feed, energy, and industrial customers. Crude vegetable oils produced by the segment's crushing activities are sold "as is" to manufacturers of renewable green diesel and other customers or are further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold "as is" or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oils are used to produce biodiesel and glycols or are sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Ag Services and Oilseeds segment is also a major supplier of peanuts and peanut-derived ingredients to both the U.S. and export markets. In North America, cotton cellulose pulp is manufactured and sold to the chemical, paper, and other industrial markets. The Ag Services and Oilseeds segment's grain sourcing, handling, and transportation network (including barge, ocean-going vessel, truck, rail, and container freight services) provides reliable and efficient services to the Company's customers and agricultural processing operations. The Ag Services and Oilseeds segment also includes agricultural commodity and feed product import, export, and global distribution, and structured trade finance activities. The Company engages in various structured trade finance activities to leverage its global trade flows. This segment also includes the Company's share of the results of its equity investments in Wilmar, Pacifcor, Stratas Foods LLC, Edible Oils Limited, Olenex, SoyVen, and Gradable. The Carbohydrate Solutions segment is engaged in corn and wheat wet and dry milling and other activities. The Carbohydrate Solutions segment converts corn and wheat into products and ingredients used in the food and beverage industry including sweeteners, corn and wheat starches, syrup, glucose, wheat flour, and dextrose. Dextrose and starch are used by the Carbohydrate Solutions segment as feedstocks in other downstream processes. By fermentation of dextrose, the Carbohydrate Solutions segment produces alcohol and other food and animal feed ingredients. Ethyl alcohol is produced by the Company for industrial use in products such as hand sanitizers and ethanol for use in gasoline due to its ability to increase octane as an extender and oxygenate. Corn gluten feed and meal, as well as distillers' grains, are produced for use as animal feed ingredients. Corn germ, a by-product of the wet milling process, is further processed into vegetable oil and protein meal. Other Carbohydrate Solutions products include citric acids which are used in various food and industrial products. The Carbohydrate Solutions segment is a leader in carbon

capture and sequestration. This segment also includes the Company's share of the results of its equity investments in Hungrana Ltd., Almidones Mexicanos S.A., Aston Foods and Food Ingredients, Red Star Yeast Company, LLC, and LSCP, LLLP. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 98 The Nutrition segment serves various end markets including food, beverages, and nutritional supplements for humans, and complete feed, feed premix and additives, petfood and pet treats for livestock, aquaculture, and pets. The segment engages in the creation, manufacturing, sale, and distribution of a wide array of ingredients and solutions including plant-based proteins, natural flavors, flavor systems, natural colors, emulsifiers, soluble fiber, polyols, hydrocolloids, probiotics, prebiotics, postbiotics, enzymes, botanical extracts, and other specialty food and feed ingredients and systems. The Nutrition segment also includes activities related to the procurement, processing, and distribution of edible beans, the processing and distribution of formula feeds and animal health and nutrition products and the manufacture of contract and private label pet treats and foods. This segment also includes the Company's share of the results of its equity investments in Vimison S.A. de C.V., ADM Matsutani LLC, Matsutani Singapore Pte. Ltd., ADM Vland Biotech Shandong Co., Ltd., Dusial S.A., and Vitafort ZRT. Other Business results include the Company's financial business units related to futures commission and insurance activities. Corporate results principally include unallocated corporate expenses, interest cost net of interest income, and revaluation gains and losses on cost method investments and the share of the results of equity investments in early-stage start-up companies. Intersegment sales have been recorded using principles consistent with ASC 606, Revenue from Contracts with Customers. Segment Information for the Years ended December 31, 2024, 2023 and 2022 The following tables present data by segment (in millions). Year Ended December 31, 2024 Ag Services and Oilseeds Carbohydrate Solutions Nutrition Total Revenue from external customers \$ 66,516 \$ 11,234 \$ 7,349 \$ 85,099 Other Business 431 Total revenues \$ 85,530 Less: Cost of materials 60,378 7,170 4,651 Manufacturing costs 3,436 2,592 1,249 Selling, general, and administrative expenses 919 326 1,166 Other segment items (1) (664) (230) (103) Segment operating profit \$ 2,447 \$ 1,376 \$ 386 \$ 4,209 Reconciliation of segment operating profit Other Business 247 Corporate (1,721) Specified items: Gains on sales of assets and businesses 10 Asset impairment, restructuring, and net settlement contingencies (2) (490) Earnings before income taxes \$ 2,255 (1) Other segment items for each reportable segment include: Ag Services and Oilseeds: Equity in the earnings of affiliates; interest and investment income, interest expense; and other income/ expense. Carbohydrate Solutions: Equity in the earnings of affiliates and other income/expense. Nutrition: Equity in the earnings of affiliates; asset impairment, exit, and restructuring charges; and other income/expense. (2) These charges primarily include a \$461 million impairment charge related to the Company's investment in Wilmar, within the Ag Services and Oilseeds segment, and a \$43 million impairment charge related to the discontinued animal nutrition trademarks, within the Nutrition segment, partially offset by reversals of certain contingency liabilities in the Ag Services and Oilseeds segment. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 99 Year Ended December 31, 2023 Ag Services and Oilseeds Carbohydrate Solutions Nutrition Total Revenue from external customers \$ 73,426 \$ 12,874 \$ 7,211 \$ 93,511 Other Business 424 Total revenues \$ 93,935 Less: Cost of materials 65,751 8,729 4,608 Manufacturing costs 3,338 2,550 1,136 Selling, general, and administrative expenses 880 323 1,034 Other segment items(1) (610) (103) 6 Segment operating profit \$ 4,067 \$ 1,375 \$ 427 \$ 5,869 Reconciliation of segment operating profit Other Business 375 Corporate (1,606) Specified items: Gains on sales of assets and businesses 17 Asset impairment, restructuring, and net settlement contingencies (2) (361) Earnings before income taxes \$ 4,294 (1) Other segment items for each

Asset Impairment, Exit, and Restructuring

Costs The following table sets forth the charges included in asset impairment, exit, and restructuring costs (in millions). Year Ended December 31 2024 2023 2022

Costs	2024	2023	2022
Restructuring and exit costs (1)	\$ 26	\$ 33	\$ 29
Impairment charge - goodwill and other intangible assets (2)	43	201	2
Impairment charge - other long-lived assets (3)	476	108	35
Total asset impairment, exit, and restructuring costs	\$ 545	\$ 342	\$ 66

(1) The year ended December 31, 2024 includes restructuring charges of \$23 million, within Corporate, presented as a specified item. The year ended December 31, 2023 includes several individually insignificant restructuring charges totaling \$27 million presented as specified items across the Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition segments, and \$6 million within Corporate. The year ended December 31, 2022 includes several individually insignificant restructuring charges totaling \$28 million presented as specified items and restructuring charges of \$1 million within Corporate. (2) The year ended December 31, 2024 includes impairments of discontinued Animal Nutrition trademarks of \$43 million, within the Nutrition segment, presented as specified items. The year ended December 31, 2023 includes impairments related to goodwill of \$137 million and customer list and discontinued Animal Nutrition trademarks totaling \$64 million, within the Nutrition segment, presented as specified items. The year ended December 31, 2022 includes customer list impairment of \$2 million, within the Nutrition segment presented as specified items. (3) The year ended December 31, 2024 includes \$461 million impairment charge related to the Company's investment in Wilmar, within the Ag Services and Oilseeds segment, presented as a specified item. The year ended December 31, 2023 includes impairments related to certain long-lived assets of \$10 million, \$33 million, and \$65 million, within the Ag Services and Oilseeds, Carbohydrate Solutions, and Nutrition segments, respectively, presented as specified items. The year ended December 31, 2022 includes impairments related to certain long-lived assets of \$15 million and \$20 million, within the Carbohydrate Solutions and Nutrition segments, respectively, presented as specified items.

Note 19. Sale of Accounts Receivable The Company has an accounts receivable securitization program (the "First Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "First Purchasers"). Under the First Program, certain U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Receivables, LLC ("ADM Receivables"). ADM Receivables transfers certain of the purchased accounts receivable to each of the First Purchasers together with a security interest in all of its right, title, and interest in the remaining purchased accounts receivable. In exchange, ADM Receivables receives a cash payment of up to \$1.7 billion for the accounts receivable transferred. The First Program terminates on May 16, 2025, unless extended. The Company also has an accounts receivable securitization program (the "Second Program") with certain commercial paper conduit purchasers and committed purchasers (collectively, the "Second Purchasers"). Under the Second Program, certain non-U.S.-originated trade accounts receivable are sold to a wholly-owned bankruptcy-remote entity, ADM Ireland Receivables Company ("ADM Ireland Receivables"). ADM Ireland Receivables transfers certain of the purchased accounts receivable to each of the Second Purchasers together with a security interest in all of its right, title, and interest in the remaining purchased accounts receivable. In exchange, ADM Ireland Receivables receives a cash payment of up to \$1.1 billion (€1.1 billion) for the accounts receivables transferred. The Second Program terminates on April 18, 2025, unless extended.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 104 Under the First and Second Programs (collectively, the "Programs"), ADM Receivables and ADM Ireland Receivables use the cash proceeds from the transfer of receivables to the First Purchasers and Second Purchasers (collectively, the "Purchasers") and other consideration, as applicable, to finance the purchase of receivables from the Company and the ADM subsidiaries originating the receivables. The Company accounts for these transfers as sales

of accounts receivable. The Company acts as a servicer for the transferred receivables. At December 31, 2024 and 2023, the Company did not record a servicing asset or liability related to its retained responsibility, based on its assessment of the servicing fee, market values for similar transactions, and its cost of servicing the receivables sold. As of December 31, 2024 and 2023, the fair value of trade receivables transferred to the Purchasers under the Programs and derecognized from the Company's Consolidated Balance Sheets was \$2.0 billion and \$1.6 billion, respectively. Total receivables sold were \$46.9 billion, \$54.8 billion, and \$59.0 billion for the years ended December 31, 2024, 2023, and 2022, respectively. Cash collections from customers on receivables sold were \$47.0 billion, \$53.6 billion, and \$56.9 billion for the years ended December 31, 2024, 2023, and 2022, respectively. All cash flows under the Programs are classified as operating activities because the cash received from the Purchasers upon both the sale and the collection of the receivables is not subject to significant interest rate risk, given the short-term nature of the Company's trade receivables. Receivables pledged as collateral to the Purchasers were \$0.7 billion and \$1.1 billion as of December 31, 2024 and 2023, respectively. Transfers of receivables under the Programs resulted in an expense for the loss on sale of \$95 million, \$56 million, and \$21 million, for the years ended December 31, 2024, 2023, and 2022, respectively, which is classified as selling, general, and administrative expenses in the Consolidated Statements of Earnings.

Note 20. Legal Proceedings The Company is routinely involved in a number of actual or threatened legal actions, including those involving alleged personal injuries, employment law, product liability, intellectual property, environmental issues, alleged tax liability (see Note 13. Income Taxes for information on income tax matters), and class actions. The Company also routinely receives inquiries from regulators and other government authorities relating to various aspects of its business, and at any given time, the Company has matters at various stages of resolution. The outcomes of these matters are not within the Company's complete control and may not be known for prolonged periods of time. In some actions, claimants seek damages, as well as other relief including injunctive relief, that could require significant expenditures or result in lost revenues. In accordance with applicable accounting standards, the Company records a liability in its Consolidated Financial Statements for material loss contingencies when a loss is known or considered probable and the amount can be reasonably estimated. If the reasonable estimate of a known or probable loss is a range, and no amount within the range is a better estimate than any other, the minimum amount of the range is accrued. If a material loss contingency is reasonably possible but not known or probable, and can be reasonably estimated, the estimated loss or range of loss is disclosed in the notes to the Consolidated Financial Statements. When determining the estimated loss or range of loss, significant judgment is required to estimate the amount and timing of a loss to be recorded. Estimates of probable losses resulting from litigation and governmental proceedings involving the Company are inherently difficult to predict, particularly when the matters are in early procedural stages, with incomplete facts or legal discovery; involve unsubstantiated or indeterminate claims for damages; potentially involve penalties, fines, disgorgement, or punitive damages; or could result in a change in business practice. The Company's estimated loss or range of loss with respect to loss contingencies may change from time to time, and it is reasonably possible the Company will incur actual losses in excess of the amounts currently accrued and such additional amounts may be material. While the Company continues to work with parties with respect to potential resolution, no assurance can be given that it will be successful in doing so and the Company cannot predict the outcome of these matters.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 105 Commodities Class Actions On September 4, 2019, AOT Holding AG ("AOT") filed a putative class action under the U.S. Commodities Exchange Act in federal district court

in Urbana, Illinois, alleging that the Company sought to manipulate the benchmark price used to price and settle ethanol derivatives traded on futures exchanges. On March 16, 2021, AOT filed an amended complaint adding a second named plaintiff Maize Capital Group, LLC ("Maize"). AOT and Maize allege that members of the putative class collectively suffered damages calculated to be between approximately \$500 million to over \$2.0 billion as a result of the Company's alleged actions. On July 14, 2020, Green Plains Inc. and its related entities ("GP") filed a putative class action lawsuit, alleging substantially the same operative facts, in federal court in Nebraska, seeking to represent sellers of ethanol. On July 23, 2020, Midwest Renewable Energy, LLC ("MRE") filed a putative class action in federal court in Illinois alleging substantially the same operative facts and asserting claims under the Sherman Act. On November 11, 2020, United Wisconsin Grain Producers LLC ("UWGP") and five other ethanol producers filed a lawsuit in federal court in Illinois alleging substantially the same facts and asserting claims under the Sherman Act and Illinois, Iowa, and Wisconsin law. The court granted ADM's motion to dismiss the MRE and UWGP complaints without prejudice on August 9, 2021 and September 28, 2021, respectively. On August 16, 2021, the court granted ADM's motion to dismiss the GP complaint, dismissing one claim with prejudice and declining jurisdiction over the remaining state law claim. MRE filed an amended complaint on August 30, 2021, which ADM moved to dismiss on September 27, 2021. The court denied ADM's motion to dismiss on September 26, 2023. On May 17, 2024, the court stayed MRE's case pending a decision in UWGP's appeal, described below. UWGP filed an amended complaint on October 19, 2021, which the court dismissed on July 12, 2022. UWGP has appealed the dismissal to the United States Court of Appeals for the Seventh Circuit. On October 26, 2021, GP filed a new complaint in Nebraska federal district court, alleging substantially the same facts and asserting a claim for tortious interference with contractual relations. On March 18, 2022, the Nebraska federal district court granted ADM's motion to transfer the GP case back to the Central District of Illinois for further proceedings. ADM moved to dismiss the complaint on May 20, 2022 and on December 30, 2022, the court dismissed GP's complaint with prejudice. GP appealed the dismissal. On January 12, 2024, the appellate court vacated the dismissal and remanded the case to the district court for further proceedings. On March 8, 2024, GP filed an amended complaint, which ADM moved to dismiss. On December 3, 2024, the court issued a decision on ADM's motion to dismiss GP's amended complaint, denying one ground for dismissal and certifying a question of law to the Nebraska Supreme Court before deciding the other ground. The Company denies liability, and is vigorously defending itself in these actions. As these actions are in pretrial proceedings, the Company is unable at this time to predict the final outcome with any reasonable degree of certainty, but believes the outcome will not have a material adverse effect on its financial condition, results of operations, or cash flows. Government Investigations As previously disclosed, the Company is under investigation by the United States Securities and Exchange Commission ("SEC") and the Department of Justice ("DOJ") relating to, among other things, intersegment sales between the Company's Nutrition reporting segment and the Company's Ag Services and Oilseeds and Carbohydrate Solutions reporting segments. The Company is continuing to cooperate with the SEC and DOJ investigations and is unable to predict the outcome of these investigations. Shareholder Litigation As previously disclosed, on January 24, 2024, following the Company's announcement of an investigation relating to intersegment sales, a purported stockholder of the Company filed a putative securities fraud class action in the U.S. District Court for the Northern District of Illinois against the Company and certain of its current and former officers. Defendants filed motions to dismiss, which remain pending and are set for argument on March 6, 2025. The Company intends to continue to vigorously defend against these claims. However, given the uncertainty of litigation, the Company is unable to predict the final outcome of this

proceeding with any reasonable degree of certainty, nor does it currently have sufficient information to estimate a reasonably possible loss or range of loss with respect to this matter. Also as previously disclosed, beginning on March 29, 2024, purported stockholders of the Company filed a number of related derivative lawsuits against certain current and former officers and directors of the Company, seeking unspecified damages. The derivative litigation is now consolidated in the U.S. District Court for the District of Delaware. Defendants filed a motion to dismiss the consolidated complaint, which remains pending. The Company is unable to predict the final outcome of this proceeding with any reasonable degree of certainty. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 106 Note 21. Subsequent Event On January 31, 2025, the Company completed the acquisition of Vandamme Hugaria Kft, a 700 metric ton/day non-genetically modified crush and extraction facility based in Hungary, for an aggregate consideration of \$123 million, subject to working capital adjustments. Table of Contents ARCHER-DANIELS-MIDLAND COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS 107 Report of Independent Registered Public Accounting Firm To the Shareholders and the Board of Directors of Archer-Daniels-Midland Company Opinion on the Financial Statements We have audited the accompanying Consolidated Balance Sheets of Archer-Daniels-Midland Company (the Company) as of December 31, 2024 and 2023, the related Consolidated Statements of Earnings, Comprehensive Income (Loss), Shareholders' Equity and Cash Flows for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the "Consolidated Financial Statements"). In our opinion, the Consolidated Financial Statements present fairly, in all material respects, the financial position of the Company at December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 20, 2025 expressed an adverse opinion thereon. Basis for Opinion These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion. Critical Audit Matters The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of critical audit matters does not

alter in any way our opinion on the Consolidated Financial Statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate. 108 Table of Contents Market or Fair Values of Certain Merchandisable Agricultural Commodity Inventories, Inventory-Related Payables, and Forward Commodity Purchase and Sales Contracts Description of the Matter As explained in Notes 1 and 4 to the Consolidated Financial Statements, certain merchandisable agricultural commodity inventory and inventory-related payables are stated at market or fair value. Forward commodity purchase and sales contracts that qualify as derivative contracts are also stated at market or fair value. The merchandisable agricultural commodity inventory, inventory-related payables, and forward commodity purchase and sales contracts are considered level 2 and 3 fair value instruments. As of December 31, 2024, the market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, forward commodity contracts in an asset position, and forward commodity contracts in a liability position were \$6,961 million, \$742 million, \$831 million, and \$760 million, respectively. Auditing the estimated market or fair values for merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts is complex due to the judgment involved in determining market or fair value, specifically related to determining the estimated basis adjustments, which represent the adjustment made to exchange quoted prices to arrive at the market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sales contracts. The basis adjustments are generally determined using inputs from competitor or broker quotations or market transactions and are impacted by specific local supply and demand characteristics at each facility and the overall market. Factors such as substitute products, weather, fuel costs, contract terms, and futures prices also impact these basis adjustments. How We Addressed the Matter in Our Audit We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's determination of the estimated market or fair values for certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts. Our tests included controls over the estimation process supporting the basis adjustments. To test the estimated market or fair values of certain merchandisable agricultural commodity inventories, inventory-related payables, and forward commodity purchase and sale contracts, our audit procedures included, among others, evaluating (i) the Company's selection of the principal market, (ii) the inputs for the basis adjustments, and (iii) the completeness and accuracy of the underlying data supporting the basis adjustments. For example, we evaluated management's methodology for determining the basis adjustment including assessing the principal market identified and sources utilized by management to support the basis adjustment. Specifically, we compared the basis adjustments used by management to competitor and broker quotations, trade publications, and/ or recently executed transactions. Further, we investigated, to the extent necessary, basis adjustments that were inconsistent with third party available information. Finally, we evaluated the adequacy of the Company's financial statement disclosures related to the estimated market or fair values of certain merchandisable agricultural inventories, inventory-related payables, and forward commodity purchase and sale contracts. Animal Nutrition Goodwill Impairment Evaluation Description of the Matter At December 31, 2024, the Company's total goodwill was \$4.5 billion of which \$0.9 billion was assigned to the Animal Nutrition reporting unit. Goodwill is assigned to the Company's reporting units as of the acquisition date. As discussed in Note 1 and Note 9 of the Consolidated Financial Statements, goodwill is tested at the reporting unit level for impairment at least annually on October 1, or when events or circumstances occur that would more likely than not reduce

the fair value of a reporting unit below its carrying amount. The Company uses an income and market approach in its quantitative impairment tests and determined the fair value of the Animal Nutrition reporting unit exceeded its carrying value by 7% at the assessment date. Auditing the Company's Animal Nutrition goodwill impairment charge was complex and highly judgmental due to the significant estimation required in determining the fair value of the reporting unit. In particular, the fair value estimate using a weighted income and market approach was sensitive to significant assumptions such as revenue growth rates, projected EBITDA margins, and the discount rate. These significant assumptions are forward-looking and could be affected by future economic and market conditions and the performance of the Animal Nutrition reporting unit.

109 Table of Contents How We Addressed the Matter in Our Audit To test the estimated fair value used in the Company's Animal Nutrition reporting unit goodwill impairment charge, we performed audit procedures that included, among others, assessing the methodologies used to determine the fair value of the reporting unit and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. As it pertains to revenue growth rates and projected EBITDA margins, we compared the significant assumptions used by management to historical results and current industry and economic trends, as applicable. We assessed the historical accuracy of management's estimates. In addition, we involved our valuation specialists to assist with our evaluation of the methodology used by the Company to determine the fair value of reporting unit and testing of the significant assumptions used by management, including the discount rate. Specifically, we evaluated the components of the discount rate used by the Company with the involvement of our valuation specialists.

/s/ Ernst & Young LLP We have served as the Company's auditor since 1930. Saint Louis, Missouri February 20, 2025

110 Table of Contents Report of Independent Registered Public Accounting Firm To the Shareholders and the Board of Directors of Archer-Daniels-Midland Company Opinion on Internal Control over Financial Reporting We have audited Archer-Daniels-Midland Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, because of the effect of the material weakness described below on the achievement of the objectives of the control criteria, Archer-Daniels-Midland Company (the Company) has not maintained effective internal control over financial reporting as of December 31, 2024, based on the COSO criteria. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weakness has been identified and included in management's assessment. Management has identified a material weakness related to the Company's accounting practices and procedures for segment disclosures. Appropriate controls were not in place for the reporting of intersegment sales and for the application of disclosure requirements within ASC 280, Segment Reporting. The absence of adequate controls with respect to the reporting of intersegment sales impacted the completeness and accuracy of the Company's segment disclosures and review controls over key inputs and assumptions utilized by the Company when performing the goodwill and long-lived asset impairment tests. As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Revela Foods, LLC (Revela), Fuerst Day Lawson Ltd. (FDL), PT Trouw Nutrition Indonesia (PT) and Totally Natural Solutions Ltd. (TNS), which are included in the 2024 consolidated financial statements of the Company and constituted 1.0% of total assets, after excluding

goodwill and intangibles assets recorded, as of December 31, 2024, and 0.4% and 1.1% of revenues and net earnings attributable to controlling interests, respectively, for the year then ended. Our audit of internal control over financial reporting of the Company also did not include an evaluation of the internal control over financial reporting of Revela, FDL, PT, and TNS. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Consolidated Balance Sheets of the Company as of December 31, 2024 and 2023, the related Consolidated Statements of Earnings, Comprehensive Income (Loss), Shareholders' Equity and Cash Flows for each of the three years in the period ended December 31, 2024, and the related notes. This material weakness was considered in determining the nature, timing and extent of audit tests applied in our audit of the 2024 Consolidated Financial Statements, and this report does not affect our report dated February 20, 2025, which expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

111 Table of Contents

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial

Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"), as of December 31, 2024. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were not effective as of December 31, 2024, due to the material weakness described below.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. Management's assessment of the effectiveness of the Company's internal control over financial reporting did not include the internal controls of Revela Foods, LLC ("Revela"), Fuerst Day Lawson Ltd. ("FDL"), PT Trouw Nutrition Indonesia ("PT") and Totally Natural Solutions Ltd. ("TNS"), which were acquired in the year ended December 31, 2024. In accordance with the SEC guidance regarding the reporting of internal control over financial reporting in connection with an acquisition, management may omit an assessment of an acquired business' internal control over financial reporting from management's assessment of internal control over financial reporting for a period not to exceed one year from the date of acquisition. Revela, FDL, PT and TNS are included in the Company's Consolidated Financial Statements and constituted 1.0% of total assets, after excluding goodwill and intangibles assets recorded, as of December 31, 2024, and 0.4% and 1.1% of revenues and net earnings attributable to controlling interests, respectively, for the year ended December 31, 2024. Under the supervision and with the participation of management, including the Company's Chief Executive Officer and Chief Financial Officer, the Company's management assessed the design and operating effectiveness of the Company's internal control over financial reporting as of December 31, 2024, based on the framework set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). Based on this assessment, management concluded that the Company's internal control over financial reporting was not effective as of December 31, 2024, due to the material weakness described below. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's annual or interim financial statements will not be prevented or detected on a timely basis. Because the control deficiency described below could have resulted in a material misstatement of its annual or interim financial statements, the Company determined that this deficiency constitutes a material weakness. During the fourth quarter of 2023, in connection with the Investigation, the Company identified a material weakness in its internal control over financial reporting related to the Company's accounting practices and procedures for segment disclosures. The material weakness resulted from inadequate controls that allowed for certain intersegment sales to be reported at amounts that were not in accordance with ASC 606, Revenue from Contracts with Customers. Specifically, the Company did not have adequate controls in place around measurement of certain intersegment sales between the Company's reporting segments. In addition, appropriate controls were not in place for the reporting of intersegment sales and for the application of disclosure requirements within ASC 280, Segment Reporting. The absence of adequate controls with respect to the reporting of intersegment sales impacted the completeness and accuracy of the Company's segment disclosures and review controls over projected financial information utilized in goodwill and other long-lived asset impairment tests.

Table of Contents ARCHER-DANIELS-MIDLAND COMPANY PART II 113 Notwithstanding such material

weakness in internal control over financial reporting, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, the Company's financial position, results of operations, and cash flows for the periods presented in conformity with GAAP. Ernst & Young LLP, an independent registered public accounting firm, has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2024. That report is included herein and is incorporated in this Item 9A by reference.

Remediation Plan The Company continues to implement enhancements to its internal controls to remediate the identified material weakness in its internal control over financial reporting related to the Company's accounting practices and procedures for intersegment sales and to enhance the reliability of its financial statements with respect to the pricing and reporting of such sales. Specifically, the Company has (i) enhanced the Company's accounting policies with respect to the measurement of intersegment sales and (ii) improved its documentation of the Company's pricing guidelines for intersegment sales. In addition, the design and documentation of the execution of pricing and measurement controls for segment disclosure purposes and projected financial information used in impairment analyses have been enhanced, and testing of these controls will continue as part of the regular internal control over financial reporting process. Further, training for relevant personnel on the measurement of intersegment sales and application of relevant accounting guidance to intersegment sales and segment disclosures has been provided and remains ongoing. While the Company believes that these efforts have improved its internal control over financial reporting, the Company will not be able to conclude whether the steps the Company has taken will remediate the material weakness in internal control over financial reporting until a sustained period of time has passed to allow management to test the design and operational effectiveness of the new and enhanced controls.

Changes in Internal Control Over Financial Reporting The Company is undertaking upgrades to its IT platforms and, in particular, certain of its enterprise resource planning (ERP) systems on a worldwide basis, which is expected to occur in phases over the next several years. The Company did not have any further deployments of updated ERP systems during the year ended December 31, 2024. Except for the material weakness described above and the related implementation of remediation measures, there have been no changes in internal control over financial reporting during the year ended December 31, 2024 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. During the year ended December 31, 2024, the Company completed the acquisitions of Revela, FDL, PT, and TNS. As a result of the acquisitions, the Company is in the process of reviewing the internal control structures of these businesses and, if necessary, will make appropriate changes as the Company incorporates its controls and procedures into the acquired businesses.

Item 9B. OTHER INFORMATION None of the Company's directors or officers (as defined in Rule 16a-1(f) of the Exchange Act) adopted, modified or terminated any contract, instruction, or written plan for the purchase or sale of ADM's securities that was intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) of the Exchange Act or any non-Rule 10b5-1 trading arrangement (as defined in Item 408(c) of Regulation S-K) during the quarter ended December 31, 2024.

Item 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS Not applicable.

Sustainable packaging encompasses designs and materials that reduce the consumption of resources, utilize renewable or recycled inputs, and provide responsible end-of-life options such as recyclability, compostability, or reusability. True sustainable packaging balances ecological considerations with economic and social factors, addressing everything from raw material sourcing to manufacturing processes, distribution efficiency, consumer use, and disposal. Rather than focusing solely on a single attribute like biodegradability, comprehensive sustainable packaging approaches consider multiple environmental indicators including carbon footprint, water usage, and waste reduction. Companies increasingly view sustainable packaging as both an environmental responsibility and a business imperative, driven by consumer demand, regulatory pressures, and corporate sustainability commitments. The concept emphasizes designing packaging systems that work

again delivered on a broad range of sustainability accomplishments spanning three focus areas: feeding the world, protecting nature, and enriching lives. Our work to Feed the World offers the opportunity for change both in the near term and for future generations. One example of this is our partnership with Concern Worldwide to create and support the Lifesaving Education and Assistance to Farmers program, or LEAF, a comprehensive, dual-phased initiative to address malnutrition in Kenya and Ethiopia. In 2023, we contributed \$1 million to support LEAF Phase III, which continues to harness the power of local agriculture and nutrition to save and enrich lives. Regenerative agriculture represents another important element of our efforts to feed the world. We were proud to launch our regenerative agriculture programs in Europe and Latin America in 2023 as we expanded to 2.8 million regenerative agriculture acres around the globe. These practices are building farm resilience and ultimately supporting a global food system that can sustainably support a growing population. Of course, in addition to helping feed the world, regenerative agriculture is also continuing to support our work to Protect Nature. Collectively, the farmers partnering with us on regenerative agriculture reduced their GHG emissions by 310,000 metric tons and sequestered over 263,000 metric tons of CO₂e. But that's just the starting point of our decarbonization work. We're also advancing a broad range of initiatives to reduce the carbon footprint of our own operations, and compounding the full value-chain emissions benefits as we move crops through our transportation and manufacturing footprint. In 2023, we delivered a 14.7% reduction in our Scope 1 and 2 footprint, from projects like transitioning facilities from coal to natural gas and construction of a wind turbine project in Brazil. In line with our commitment to align with ambitious goals to limit the average rise of global temperatures to 1.5 degrees Celsius, we submitted our Scope 1 + 2, Scope 3, and FLAG GHG emission reduction targets to the Science-based Targets Initiative. In addition to reducing GHG emissions, our efforts to protect nature in 2023 also focused on biodiversity. We launched a global biodiversity mapping project, even as we moved forward with significant initiatives to protect our natural habitats. ADM was proud to partner with the E.O. Wilson Biodiversity Foundation, providing a \$1 million grant to support research and education on biodiversity. The company joined the Business Leaders Open Call to Accelerate Water Action, as we continued to advance our own water use reduction goals. And we unveiled a new goal for all of our direct supply chains to be free of conversion of primary native vegetation in defined high-risk areas by December 31, 2025, and indirect supply chains by December 31, 2027, as we continue on our pathway to 100% deforestation-free supply chains by 2025. Our third focus area, Enrich Lives, is a critical enabler of all of our sustainability work. In 2023, we supported sustainability, food security, and health and well-being through more than \$20 million in giving via our corporate social investment program, ADM Cares. We also worked with a third party to conduct our first formal human rights saliency assessment to offer a comprehensive view of how we can continue to uphold our dedication to human rights in our value chain. Our commitment to enriching lives has as its highest priority protecting the health and safety of our colleagues. Our safety performance in 2023 did not meet our expectations, and we are aggressively moving to return to a positive trajectory in 2024. We believe that true innovation arises from having many different perspectives and backgrounds at the highest levels of an organization, and we are continuing to look for new ways to build, strengthen, and support an inclusive culture that allows us to cultivate innovation and growth. We were proud in 2023 to be recognized as a Financial Times Diversity Leader, named for the 4th straight year in Ethisphere's World's Most Ethical Companies list, and included for the 15th year on the FORTUNE Magazine World's Most Admired Companies List. The pages that follow demonstrate another year of concrete and significant progress in executing our ambitious sustainability agenda. I'm proud of our team for delivering accomplishments that are supporting our efforts to add value for our

stakeholders ... and that are paving the pathway toward a better future for us all. Sincerely, Juan R. Luciano Board Chair and CEO "I'm proud of our team for delivering accomplishments that are paving the pathway toward a better future." Introduction 5 About ADM 5 About the Report 6 Purpose and Strategy 7 Goals and Key Performance Indicators Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 4 Introduction Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 5 About ADM ADM unlocks the power of nature to enrich the quality of life. We're an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. We're a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. We're a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. We're a cutting-edge innovator, guiding the way to a future of new consumer and industrial solutions. And we're a leader in sustainability, scaling across entire value chains to help decarbonize the multiple industries we serve. Around the globe, our innovation and expertise are meeting critical needs while nourishing quality of life and supporting a healthier planet. Learn more at www.adm.com. About the Report We are committed to reporting on our Environmental, Social, and Governance (ESG) activities on an annual basis. This report highlights our activities and progress toward addressing key ESG topics from January 1, 2023, to December 31, 2023. Our purpose as a company is to unlock the power of nature to enrich quality of life; therefore, our report is organized into three main sections: Feed the World, Protect Nature, and Enrich Lives. Aligned with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) and the Task Force on Nature-Related Financial Disclosures (TNFD), our disclosures cover governance, strategy, risk and impact mitigation, and metrics and targets. We have included an index to the Global Reporting Initiative (GRI) Standards and the Sustainability Accounting Standards Board (SASB) at the end of the report. Purpose and Strategy Our purpose is to unlock the power of nature to enrich the quality of life Our commitment to growth and change goes beyond our products and services. At ADM, sustainable practices and a focus on environmental responsibility are not separate from our primary business: they are integral to the work we do every day to serve customers and create value for shareholders. We are committed to being a force for change in developing innovative, sustainable solutions spanning food, feed, fuel and consumer and industrial products while pursuing ways to continually improve our efforts in both protecting the environment and enhancing environmental and social sustainability. That is why our current strategic plan is called "Sustainable Growth." Worldwide Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 8 Our Core Business Every day, our 42,000 employees work to transform agricultural commodities into ingredients and products for food, feed, fuel, and industrial and consumer products. We purchase millions of metric tons of agricultural commodities and transport them whole or processed to customers in more than 190 countries. We operate around 330 processing facilities, 520 procurement centers, and 67 innovation centers in 48 countries. Operating our own transportation fleet of 31,900 rail cars, 2,500 barges, 580 trucks, 1,700 trailers, 160 boats, and 25 oceangoing vessels allows us to move grain as needed in the event of weather or political disasters that may jeopardize food security. In 2023, we processed 18.1 million metric tons of corn and 34.9 million metric tons of oilseeds. Origination Of Crops Processing Specialties Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 9 Ag Services Oilseeds Nutrition Carbohydrate Solutions Transportation Customer Procure/Store Grain Local Sales Exports Destination Marketing Meal Vegetable Oil Other Products Starches & Sweeteners Flour BioSolutions Other Products Food | Feed | Fuel | Industrial Flavors Specialty Ingredients Animal Nutrition Ingredients Health & Wellness Ingredients Where We Operate North America South America Europe Africa Asia/Pacific Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 10 Food Quality and Safety We believe food is fundamental to quality of life, and expanding access to nutrition is a foundational piece of how we fulfill our purpose. The safety and security of our world's food and feed supply chains are of critical importance to that work. That's why at ADM, we continually review and improve our food safety systems and procedures, including good manufacturing practices for human and animal food. We also develop and implement risk-based preventive controls and critical control points for human food based on hazard analysis. Our facilities, processes, and procedures undergo regular evaluation to assess the risk of product contamination, and we implement a variety of safeguards and security concepts to reduce those risks. We've built our Food Safety and Quality program around three pillars: achieving best in class food safety, maintaining a culture of quality, and leveraging innovation and technology. Food Safety Driven Utilizing our customized "Integrated Risk Metric" (IRM) assessment application, we are able to proactively monitor and provide focused support across the organization through subject matter expertise, resources and global verification procedures to ensure conformity to strict food safety standards. Customer Centered Our Quality and Food Safety Center of Excellence keeps the customer at the center of all we do. Whether an internal or external customer, we strive to provide the highest quality product and service. Tools such as our newly launched Quality Management System (QMS) help to align everyone on best practices to ultimately satisfy all of our customers. Quality Focused In September 2023, we held our fourth annual Global Food Safety Week for our colleagues around the globe to refresh and refocus. This year, our theme was "We Own Quality" to highlight the fact that everyone in the company has a role in quality. We completed trainings and other activities to reinforce and educate our team on the critical roles we all play and how to improve our quality and food safety culture. In 2023, we also launched our first all-colleague Quality and Food Safety training. This was the first coordinated effort to provide uniform training to all colleagues around the world on our efforts in this area. North American Lab Achieves

ISO Certification The North America Microbiology Lab, located in Decatur, Illinois, has received ISO/IEC 17025:2017 accreditation by the ANSI National Accreditation Board. The ISO 17025 accreditation is an internationally recognized standard that has been developed through technical committees of leading experts and stakeholders from around the world. Knowledge and best practices have been incorporated into the standard with the objective of promoting confidence in the operation of laboratories. The accreditation confirms that ADM's microbiology laboratory will now be able to offer laboratory testing services that are accepted globally.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 11 315 GFSI Certified Sites 5.76K Reduction in Liters of Lab Waste Reduction 2023 Highlight Enhancing Food Security As a key component of the global food system, ADM has a critical role to play in safeguarding food security. As we strive to meet our purpose to unlock the power of nature to enrich the quality of life, we recognize the importance of working with growers across our vast supply chains. Resilient farms can support economic development while reducing environmental impacts and protecting our food supply to meet the needs of a growing global population.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 12 Supporting local economic development Protecting farmer health and safety Maximizing diversity Reducing GHG emissions Protecting water quality Conserving biodiversity Improving soil health Continuously covering soil Using cover crops Responsibly managing inputs like nutrients and pesticides Using Integrated Pest Management Providing farmers with education, technical support, financial incentives, and more Reducing food insecurity Minimizing soil disturbance and maintaining living roots in soil Reduced or no tillage Supporting Food Access Sustainable Affordable Nutrition ADM is a foundation of the global food system, and we understand the importance of ensuring access to quality foods for a growing global population. ADM addresses the need for a reliable supply of affordable and healthy macro- and micronutrients through our Sustainable Affordable Nutrition (SAN) program. Our objective is to provide high-quality, lower-cost ingredients to improve global access to nutritious foods while upcycling ingredients across the ADM portfolio from the feed market to the food market. We partner with downstream companies, assisting with formulation and product development as they seek to launch new brands into the market. We also work to improve access to nutritious foods by collaborating with government organizations and NGOs such as Feed My Starving Children (FMSC), a nonprofit organization empowering volunteers to pack meals for the malnourished in nearly 70 countries. We have maintained a partnership with FMSC for over a decade, with ADM hosting two volunteer meal-packing events each year. In 2023, ADM colleagues packed more than 100,000 meals for those in need.

CONIN Paraguay The Fundación Cooperadora para la Nutrición Infantil (CONIN Paraguay) is a non-profit organization working on the prevention and recovery of malnourished children in Paraguay. The group focuses on supporting children and their mothers in high social risk communities. The foundation works to empower mothers through education and support, healthcare access and food assistance. ADM Paraguay has partnered with this organization for the past three years.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 13 Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 14 Concern Worldwide Efforts in Ukraine In 2023, we partnered with Concern Worldwide to provide a critical lifeline to those most affected by the war in Ukraine. Our funding directly supports Concern's multipurpose cash assistance (MPCA) to Ukrainians. The financial support enables recipients to purchase essential goods and services. In addition to financial assistance, our contribution also enhanced the living conditions within "Collective Centers" – temporary shelters housing displaced Ukrainians – allowing the centers to purchase hygiene kits and distribute food kits.

LEAF III The Lifesaving Education and Assistance to Farmers (LEAF) project,

initiated in October 2019 by Concern Worldwide with funding from ADM, aimed to address food security and malnutrition in Tana River County, Kenya, initially engaging 6,000 farmers. Through nutrition-sensitive climate smart agriculture interventions, it achieved significant results within 12 months, sparking enthusiasm among traditionally pastoralist communities to engage in farming. LEAF II, an expansion funded by ADM in 2022, focused on scaling up these practices, supporting more than 10,000 households. In 2023, ADM provided an additional \$1 million grant to Concern Worldwide to support the launch of LEAF III, which aims to significantly improve food security and nutrition for more than 15,500 farmers in the region. The project will target women farmers specifically by providing them with better access to agricultural inputs such as seeds and tools. It will also provide irrigation support to enhance yields. To improve farmer knowledge and skills, Concern plans to expand access to agricultural information through a mobile phone application. Additionally, they will strengthen the role of Community Resource Persons (CORPs) as extension agents who can provide in-person guidance. Recognizing the challenges of post-harvest management, Concern will collaborate with private sector actors to establish aggregation centers where farmers can store their harvests safely. They will also pilot a program introducing solar-powered milling machines to add value to crops for the grower communities. To improve farmers' bargaining power and production planning, the project will support the formation of farmer groups and associations. Another key component of LEAF III is to conduct soil and water analysis to inform farmers about appropriate land management practices that will ultimately increase agricultural yields.

Protect Nature 16 Habitat Protection 19 Biodiversity 22 Climate 28 Freshwater 32 Waste Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 15 Habitat Protection Our planet's ecosystems provide us with essential resources, such as clean air, water and food. They also play a crucial role in regulating our climate. By preserving and conserving these natural habitats, we can ensure the sustainability of our environment and the well-being of future generations. When we protect nature and habitats, we are not only safeguarding biodiversity but also supporting the livelihoods of local communities who depend on these ecosystems. We focus on two key aspects of habitat protection: working to restore ecosystems that have been previously altered, and implementing programs to prevent clearing of existing habitats through no-deforestation and no-conversion efforts. Local Projects Protecting habitats requires a multifaceted approach. Cleaning up trash prevents entanglement or ingestion by wildlife; removing invasive species allows native species to thrive and maintain ecosystem balance; and tree planting provides shelter and food, stabilizes soil, and reduces habitat loss. In 2023, we participated in several of these types of projects in our communities. For example, in Paraguay, working with the NGO A Todo Pulmón, colleagues and their families joined in the "Plant Paraguay" project planting, 1,400 trees. Our colleagues were happy to be a part of this widespread initiative that planted more than 15,000 trees across 46 communities. We participated in a similar initiative with the Essex Regional Conservation Fund in Canada, implementing a project focused on wildlife restoration and tree planting. Colleagues in the U.S. worked with Living Lands & Waters to clean trash and debris out of rivers, and in Switzerland, they joined with the Association for the Safeguard of Lake Geneva to clear invasive species out of the lake.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 16 No-Deforestation In 2015, ADM acknowledged the critical role our company plays in the preservation of forests globally by issuing its No-Deforestation Policy, committing to cease sourcing from any newly deforested land, or previously deforested where an earlier cut-off date exists, for example, the Amazon Soy Moratorium. Our initial third-party risk assessments identified palm and South American soy as our highest deforestation-risk commodity sourcing. Since 2015, we have continued to develop action plans and publish update reports for these high risk commodities;

investigate grievances; and suspend non-compliant sources, when applicable. These documents are available on our website at www.adm.com/sustainability. As our programs, regulations and global expectations continue to mature, we announced our aim to be deforestation free by 2025. This announcement doesn't change the effective date of our policy; rather it communicates when we believe we will have sufficient systems in place to demonstrate and verify compliance. To track progress toward this target, we are focusing on tracing and monitoring the supply chains of our high deforestation risk commodities based on the commodity-geography combination, including palm globally and corn, soy, and cotton in high-risk municipalities in South America. Sourcing of other commodities (e.g. wheat, canola, peanuts) and commodities from non-high-risk areas (e.g. Europe and North America) are included in the "low risk" category. Volumes of high-risk commodities are tracked by verification status: "deforestation-free" or "in progress." We believe sectoral consistency advances these efforts. It demonstrates to industry and farmers the importance of working together to end deforestation. We continue to participate in several sectoral and industry organizations related to no-deforestation, including: World Business Council for Sustainable Development's Soft Commodities Forum, the Agriculture Sector Roadmap to 1.5°C signed at COP26, Vision Sectorial del Gran Chaco Argentino, and the Palm Oil Collaboration Group's No Deforestation, No Expansion on Peat and No Exploitation (NDPE) Implementation Reporting Framework (IRF). To meet our 2025 deforestation-free goal, we identified four key actions:

- Conduct a comprehensive deforestation risk assessment for all commodity and ingredient supply chains.
- For high-risk supply chains, identify direct and indirect volumes and determine a method for traceability.
- Develop monitoring protocols and supplier engagement plans to measure deforestation-free volumes.
- Engage a third party to verify results.

Palm remains a high-risk commodity globally. We do not source any palm from the plantation, instead sourcing palm oil, palm kernel oil, and palm kernel expeller from processors. We collaborate with our suppliers to implement and strengthen supply chain traceability, supplier engagement, monitoring and verification, and reporting. Our actions work to ensure that we source from suppliers who are implementing deforestation-free policies, and who are delivering against the NDPE IRF. To track progress toward our no-deforestation by 2025 target, we aim to have 100% of our volumes in the "delivering" category. South America Within South America there are areas at high-risk for agriculturally-driven deforestation. We are focusing on tracing and screening our corn and soybean purchases from three key sourcing countries: Argentina, Brazil and Paraguay. Currently, we use satellite mapping overlaid with farm boundaries to monitor for deforestation in our direct sourcing. For indirect sourcing, where we buy commodities or products from a supplier rather than the farm, we are identifying the first aggregation point and screening for deforestation in a 50 km radius. Our soybean volumes sourced in South America in 2023 were 97.5% deforestation free. Deforestation-free Commodity Purchases 75% 16% 9% Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 17 Low Risk Deforestation Free In Progress No-Conversion In 2023, ADM engaged an independent group of experts to assess the potential climate impacts of both deforestation and conversion of primary native vegetation linked to our commodity supply chains in South America. Having already committed to deforestation-free supply chains by 2025, this assessment provided us a basis for creating our no-conversion commitment: we will avoid sourcing from converted habitats in high-risk areas after December 31, 2025. The assessment used satellites and other data sources to develop maps of existing agricultural areas and areas suitable for future agricultural use; carbon stocks of native vegetation; and pasture areas suitable for agricultural expansion. By evaluating the data and overlaying the maps, the study was able to determine areas at high-risk of conversion for agricultural use. Because we already have a no-deforestation commitment

in place, we focused on non-forest primary habitat conversion. The high-risk areas include the Brazilian Amazon, Cerrado, and Pantanal biomes, and the Paraguayan and Argentinian Chaco. We have committed to avoid sourcing commodities produced on farms within these high-risk areas that have conversion of primary non-forest native vegetation after December 31, 2025. For these high-risk biomes, we have adopted December 31, 2025 as our cut-off date for conversion, and we aim to have systems in place to demonstrate compliance in our direct supply chains by that date and for our indirect supply chains by December 31, 2027. In 2021, we began monitoring conversion of primary native vegetation in high priority areas in the Brazilian Cerrado, and since then, we've expanded to additional areas of Brazil. As we approach the cutoff date, we will continue to expand monitoring and engage and educate our suppliers on our sourcing requirements. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 18 Biodiversity Society and business rely on nature's assets and services. Around the world, the loss of biodiversity is having a significant impact on nature's ability to provide these vital services. ADM works to support biodiversity through supply chain projects, industry collaborations and philanthropic support. In 2023, we began mapping biodiversity hotspots in our key sourcing regions using tools including the Map of Life from the Center for Biodiversity and Global Change at Yale University, Map of Natural Lands from Science-based Targets Network and E.O. Wilson Biodiversity Foundation's Half-Earth Map. In addition, we collaborated with key partners on projects focused on education, research, technology and knowledge sharing. E.O. Wilson Biodiversity Foundation In 2023, ADM Cares provided a \$1 million grant to the E.O. Wilson Biodiversity Foundation to support the Half-Earth Chairs and Scholars and Half-Earth Educator Ambassadors programs. The foundation's goal is to reverse the extinction crisis and safeguard biodiversity for future generations by protecting half of Earth's land, seas, and freshwater. The Half-Earth Chairs and Scholars Program aims to champion research to understand our world better, nurture future biodiversity stewardship and improve conservation efforts worldwide. To meet this aim, the Half-Earth Project is working to train and support experts in biodiversity science who live and work in important conservation ecosystems around the world. The Half-Earth Project Educator Ambassadors program continues to grow into a robust network of teachers engaging youth in biodiversity science and conservation. The network has more than 900 official ambassadors and four times that number of educators engaged in the broader community. Ambassadors are in 39 states and Washington, D.C., with access to more than 100 different lesson plans to use in the classroom. Learn more about the E.O. Wilson Biodiversity Foundation at <https://eowilsonfoundation.org/> Restor Through an ADM Cares grant, we began a collaboration with Restor, an open data platform providing ecological insights for the global restoration movement. The Restor platform creates a digital ecosystem for restoration by sharing ecological information so that restoration organizations can learn from one another and so funders can find and track projects to support. The platform has more than 16,500 users that benefit from the use of the technology to support access to funding and markets for sustainable livelihood opportunities. Through improved data sharing and collaboration, increasing efficacy of forest restoration sites on Restor is estimated to have increased carbon sequestration by more than 40,000 metric tons in 2023. Restor is connecting local communities to data, funding and resources. Their work supports a community of knowledge exchange and learning around the world for the protection of land so trees can recover; for the amendment of soil so vegetation can return; and for the thousands of other approaches used to promote the health of grasslands, peatlands and all other ecosystems that are equally important for life on earth. ADM is thrilled to support this vital effort. Learn more about Restor at <https://restor.eco/about/> Parque Vida Cerrado In 2023, we continued our efforts with Parque Vida Cerrado, which focuses on restoration of

habitats and biodiversity. ADM supported a project focused on tracking mammal species moving through farms in the Brazilian Cerrado as well as a project working with local schools to support restoration activities. ADM, Parque Vida Cerrado and local farmers developed a program to observe and track the movement of wildlife through farmland in the Cerrado. The study set up 25 trail cameras across five farms in Western Bahia, three in Barreiras and two in Luís Eduardo Magalhães. The project captured more than 11,000 images and recordings from which project scientists were able to identify 32 different wild mammal species. Of the species identified, 11 are vulnerable or near threatened, including the maned wolf, jaguar and giant anteater. Parque Vida Cerrado and ADM also collaborated with two local schools to carry out environmental education workshops. Through the five workshops, the project engaged 21 teachers who then taught more than 460 students about restoration support and intervention activities. The students executed around 30 projects that benefited the students, their families and their environment. Learn more about Parque Vida Cerrado at <https://vidacerrado.org.br/>

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 19 Regenerative Agriculture Regenerative agriculture is an outcome-based farming approach that protects and improves soil health, biodiversity, climate, and water resources while supporting farming business development. Regenerative agriculture is adaptive to local physical conditions and culture and is based on five principles of land management:

- Minimizing soil disturbance
- Maintaining living roots in soil
- Continuously covering soil
- Maximizing diversity – crops, soil microbes, pollinators
- Responsibly managing inputs – nutrients, pesticides, etc.

At ADM, we often say that everything starts with the farmer. That is certainly true for successful implementation of regenerative agriculture programs. We meet farmers where they live, both figuratively and literally. We focus on supporting their efforts through flexibility, ease of entry, third-party expertise and community support. We work with partners spanning the value chain, connecting farmers to end customers, technology providers and technical experts. All of our partners have a role to play, and all come together with an understanding that this work benefits all stakeholders. Building on the success of our regenerative agriculture program in its inaugural year, our 2023 efforts focused on retaining participating growers, expanding practice adoption, and rolling out projects in additional geographies. We exceeded our goal and engaged more than 2.8 million acres. We aim to engage 3.5 million acres globally in 2024, and we have increased our 2025 ambition from 4 million acres to 5 million.

North America The ADM re:generations(TM) program continued to grow in 2023, with data collected and validated on over 2.6 million acres across the United States and Canada. The projects covered several crops, including corn, soy, wheat, canola, sorghum, cotton, and peanuts.

EMEA In EMEA, we have expanded our program to more than 14,000 acres including wheat and canola in Poland, soy in Serbia, and wheat, barley, and canola in the United Kingdom.

South America In 2023, we continued efforts with peanut growers on 19,000 hectares in Argentina, and we launched a pilot project in Brazil covering 20,800 hectares focusing on soy growers in Minas Gerais and Mato Grosso do Sul in the Brazilian Cerrado.

APAC In 2023, our smallholder program in India engaged 25,500 growers across 36,000 hectares, focusing on regenerative practices including fertilizer efficiency, crop rotation and cover crops in addition to social sustainability.

Outcomes In 2023, our regenerative agriculture projects:

- Reduced our Scope 3 GHG footprint by 310,000 metric tons of CO₂e.
- Sequestered 263,700 metric tons of CO₂e.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 20 Responsible Pesticide Management We recognize that pesticide use in the agricultural sector has led to concerns regarding the potential for unintended environmental and health impacts. We also recognize that an estimated 45% of crop production worldwide is lost to pests annually. While we do not own farms and cannot mandate practices, we do strive to work with growers across our

diverse global supply chains to support sustainable practices that substitute natural controls for some agrochemicals, foster ecosystem balance, reduce GHG emissions, and mitigate crop losses. To that end, ADM aims to reduce the usage of chemical pesticides in our key agricultural supply chains by 2030. We will work to achieve this through the following activities:

- Engage 2,000 growers in 2024 to establish a baseline of pesticide usage in our key agricultural supply chains in key sourcing regions.
- Using the established baseline, determine potential pesticide reduction opportunities and set a numeric reduction goal by the end of 2025.
- Provide educational resources and support on integrated pest management (IPM) to growers participating in our regenerative agriculture programs.
- Increase sourcing of commodities through programs that have criteria to implement specific sustainable and regenerative practices, as listed below. We engage with growers around the world on implementing sustainable and regenerative agricultural practices, including IPM, cover crops and companion crops.

IPM is designed to reduce risks to health and the environment through the design and implementation of a plan to prevent and manage pest damage by the most economical means with the least possible hazard to people, property and the environment. Cover crops and companion crops can help protect crops from pests by supporting improvements in soil health and increased beneficial predatory insects. We source commodities from several programs with components that specifically impact pesticide usage, such as regenerative agriculture, ADM Responsible Soy, Doing It Right, ISCC, RSPO, and RTRS programs. We are also supporting the adoption of cover crops, companion crops and/or the development, implementation and monitoring of IPM plans. In 2023, we sourced volumes from programs that specifically focus on pesticide management techniques and practices as follows:

METRIC TONS	Canola	Corn	Cotton	Palm	Peanuts	Sorghum	Soybeans	Sunflower	Wheat	Other
45,000	5,098,000	2,409,000	21,000	238,000	71,000	45,000	4,876,000	80,000	461,000	18,000

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 21

Climate Recently, the Intergovernmental Panel on Climate Change (IPCC) released their sixth synthesis report with straightforward statements and dire warnings. The evidence is clear: if we do not act now, the planet will experience irreversible and catastrophic changes to ecosystems around the world, jeopardizing the people and wildlife depending on them. But there is also hope – promising low-carbon technologies, carbon removal through photosynthesis, ambitious national commitments, and support for community adaptations, as well as increased funding, can impact the degree to which the Earth experiences warming and climate change impacts.

Total ADM Footprint 2023	Introduction Feed the World	Protect Nature	Enrich Lives	Governance	Data Tables and Indices
22	Scope 1	Scope 2	Scope 3	Total 2023 Emissions	122.1 MT
10%	2%	88%	Scope 1 + 2	Carbon Reduction	As previously disclosed,

ADM committed to submitting a near-term GHG emission reduction target in alignment with the Science-based Targets Initiative's (SBTi) target-setting criteria. We are pleased to announce that we fulfilled this commitment and have submitted Scope 1 + 2, Scope 3, and FLAG GHG emission reduction targets to SBTi for approval. As a part of our submission, we have opted to use a market-based approach for the Scope 2 portion of our target to reflect our renewable electricity procurement efforts. As a result, our 2019 baseline and 2023 disclosures in this report, unless otherwise noted, are calculated with a market-based approach. We await the finalization and approval of these targets, pending SBTi review and engagement with the ADM team. As we work toward potential updates to our targets to align with SBTi, we remain committed to our existing Scope 1 + 2 reduction program and have completed another successful year of project implementation and realized reductions. Major milestones from 2023 include:

- Three oilseeds facilities have successfully transitioned from coal to natural gas, which is expected to reduce our annual emissions by around 180,000 metric tons of CO₂e per year.
- The completion of 59 projects cumulatively projected to reduce Scope 1 + 2 emissions by

more than 280,000 metric tons of CO₂e annually. Target GHG Emissions 25% Absolute reduction in Scope 1 + 2 GHG emissions over 2019 baseline by 2035 Scope 1 + 2 Emissions 14.1M 12.6M — 2.94M 2.03M -520K -544K 16.5M 14.1M 2019 (Baseline) 2023 0 2 5 7 10 12 15 17 ¢ Scope 1 ¢ Scope 2 ¢ CCS Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 23 14.7% Reduction Projected Scope 1 + 2 GHG Reduction Glidepath and Timeline Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 24 We have investigated a broad range of technologies and solutions and developed a plan to guide our efforts toward achieving our Scope 1 + 2 GHG reduction target. This glidepath is an estimate and subject to change depending on a variety of factors, including emerging technologies, regulatory and policy changes, and permitting processes. Scope 3 ADM continues to monitor the evolving landscape of GHG accounting best practices as we await the finalization of the GHG Protocol's Land Sector and Removals Guidance, expected to be released in late 2024, and potential subsequent updates to SBTi's Forest, Land, and Agriculture (FLAG) Science-based Target-Setting Guidance. We continue to calculate our FLAG-related emissions, including those associated with land use change, in alignment with current draft guidance and have submitted two Scope 3-related targets for review and approval to SBTi. In addition to our combined Scope 1 + 2 target, our submission to SBTi in Q1 2024 included a separate FLAG target (covering FLAG-related emissions from Category 1: Purchased Goods and Services and Category 15: Investments) and a non-FLAG Scope 3 target. As a result of our proposed science-based targets, we expect to expand our current Scope 3 inventory reporting to meet the SBTi's target-setting criteria to include disclosing additional categories not previously reported by ADM. Please refer to our 2024 CDP Climate submission, to be submitted by September 2024, for additional information and data on our Scope 3 inventory. Currently, our Scope 3 inventory includes Categories 1-5 and 10: Purchased Goods and Services, Capital Goods, Fuel-and-energy-related Activities, Upstream Transportation and Distribution, Waste from Operations, and Processing of Sold Products. Category 1: Purchased Goods and Services represents the largest share of our overall Scope 3 inventory with the majority of those emissions associated with our procurement of agricultural commodities. This includes the emissions from fuel, fertilizer and land use change, among other direct emission sources at the farm level. To achieve our Scope 3 reduction goals, we will address the sources of these emissions by continuing to expand our regenerative agriculture program, aimed at reducing on-farm emissions and sequestering carbon in the soil, and using satellite mapping to understand and address land use change-related emissions associated with our supply chains. For example, in 2023 our regenerative agriculture efforts globally reduced our Scope 3 footprint by 310,000 metric tons of CO₂e and sequestered 263,700 metric tons of CO₂e. Stakeholder engagement continues to be a top priority in our Scope 3 reduction strategy as we work with upstream and downstream partners to improve the quality of data used in our calculations and develop collaborative efforts aimed at reducing emissions across the value chain. Target GHG Emissions 25% Absolute reduction in Scope 3 GHG emissions over 2021 baseline by 2035 Scope 3 Emission (in millions) 51.4 53.0 — 39.2 33.8 25.9 20.7 116.5 107.5 2021 (Baseline) 2023 0 24 48 72 96 120 ¢ FLAG Emissions ¢ FLAG Land Use Change Emissions ¢ Non-FLAG Emissions Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 25 7.7% Reduction Energy Last year, ADM introduced a new target to increase our renewable and low-carbon energy usage to 25% of total energy usage by 2035. Renewable energy includes sources such as wind, hydro, and solar. Low-carbon energy includes zero- or low-emission sources such as biofuels, nuclear, natural gas with carbon capture and storage (CCS), and low-carbon hydrogen and ammonia. Paired with our existing energy intensity goal to reduce energy per ton of product produced by 10% by 2035, these energy targets support our GHG reduction targets while also strategically managing energy use. In

2023, we increased our renewable and low-carbon energy use through increased purchases of renewable energy certificates (RECs) and power purchase agreements (PPAs). We continued to invest in the use of biofuels in our mobile and stationary equipment and have made progress in our pursuit of technologies that will enable us to use onsite low-carbon fuels. Key initiatives from 2023 include:

- A signed agreement with Warwick Carbon Solutions for the development of Broadwing Energy, a natural gas-fueled power plant that will provide lower-carbon steam and electricity to our Decatur complex. Leveraging ADM's CCS expertise, this plant will utilize carbon capture technology and provide a significant increase to our overall low-carbon energy usage.
- As of August 2023, a new wind power facility is now providing our operations in Brazil with enough renewable electricity to offset a projected 19,000 metric tons of GHG emissions per year.
- The installation of solar panels at ADM's Silo Chroscina and Araguari facilities to enable the onsite generation of renewable electricity.

Complementing our efforts in low-carbon energy, 2023 was also a successful year in addressing energy efficiency and implementing reduction initiatives. ADM performed 15 "Energy Treasure Hunts" last year that identified savings opportunities worth 241,000 megawatt hours (MWh) per year with a potential cost reduction component of \$10.2M. Overall, our team implemented 89 previously identified opportunities that are projected to save more than 250,000 MWh per year. Target Energy increase low-carbon energy use to 25% of total energy usage by 2035 Low-Carbon Energy (% of total energy usage) 2019 (Baseline) 2023 0% 3% 6% 9% Energy Intensity (MWh/ton of product produced) 2019 (Baseline) 2023 0 0.3 0.6 0.9 1.2

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 26

In 2023, ADM implemented 89 projects with energy savings benefits that are estimated to save over 250,000 MWh. 3.8% Reduction 1.06 1.02 7.6% 6.4% 1.2% Reduction Innovation Our eyes are always toward the future – to new ways, new formulas and new possibilities. We're at our best when we're on the cusp. And we thrive as partners, co-creators and instigators, using technical ingenuity to spark game-changing ideas and ground-breaking solutions. That fundamental core of our culture has powered our development of a broad portfolio of solutions in polymers, packaging, and home and personal care. Broadwing Energy In 2021, ADM and Warwick Carbon Solutions, an expert in the development of power and industrial energy transition projects, first announced the intention to build a new power and steam facility that would supply our processing operations in Decatur. Since then, the scope of this project has evolved and in late 2023, a formal agreement was signed which will enable Broadwing Energy LLC (a subsidiary of Warwick Carbon Solutions) to move forward with building a natural gas power plant that will provide ADM with electricity and steam. This power plant will use removal technology to capture post-combustion CO₂ emissions and with the use of ADM's carbon capture and sequestration capabilities, safely and permanently store these emissions underground. The project is expected to begin operations 2028-2029 and during this startup phase, we anticipate that it will have a CO₂ capture efficiency of over 90% and reduce our GHG emissions at the Decatur complex by 2 million MTCO₂e annually. This first-of-its-kind facility is slated to become a key lever in our decarbonization strategy and encapsulates ADM's commitment to pursuing innovative solutions for the sustainability challenges of today. Solugen ADM and Solugen, a rapidly scaling climate technology company, announced a strategic partnership in 2023 to increase the production of plant-based specialty chemicals and bio-based building block molecules to meet the rising demand for sustainable products. As a part of this agreement, Solugen has broken ground on a new biomanufacturing facility adjacent to ADM's existing corn complex in Marshall, Minnesota, allowing ADM to provide dextrose for the production of lower-carbon organic acids and the development of innovating molecules to replace existing fossil fuel-based materials. These biomaterials have a range of applications in various industries such as

energy, water treatment, agriculture, construction materials, cleaning, and personal care, among others. This partnership marks another exciting endeavor in ADM's efforts to diversify our product stream while addressing market needs for sustainable solutions, and we look forward to playing our role in decarbonizing our customers' supply chains. The Next Horizons The bioeconomy is a vast and growing opportunity for ADM. As the largest corn processor in the world, we produce dextrose which can act as a feedstock for a broad variety of microbes that serve as building blocks for plant-based products for food and feed ingredients, as bio-actives to support wellness, and as substitutes for oil-based products ranging from plastics to fiber. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 27 Freshwater Water has become an increasingly scarce resource in many regions of the world, and lack of water threatens to become one of the leading challenges we all face globally. Water is critical to biodiversity, healthy communities and our operations, and we must do our part to protect it, which is why ADM included a two-part water goal in its Strive 35 plan. The first goal is designed to maximize water use efficiency and minimize water consumption across our global operations. The second goal is to develop a strategy to improve community well-being in priority watersheds, including water-stressed areas. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 28 Operational Water Efficiency and Reduction Our water use reduction efforts are focused on 41 of our largest sites, which collectively account for more than 95% of our global water usage. We refer to these sites as our Major Water Users Group (MWUG), and we measure water usage at these sites using a combination of flow meters and utility bills. We exclude once-through cooling water from our withdrawal numbers because we return the water to its original location with only a change in temperature. Although we reuse and recycle water through various processes such as cooling tower recirculating, for calculation purposes we only include reuse water that has been processed in our onsite wastewater treatment facility. To reduce the use of fresh water, we practice the three Rs: reduce, reuse and reclaim. Our sites have adopted best management practices for minimizing water use and maximizing its reuse before disposal. Further, we have advanced a number of reclaim operations where wastewater is further treated and returned for use within our facilities. Across our MWUG locations, we are regularly investigating new technologies that could increase water reuse and reclaim opportunities and further reduce our fresh water intake. Water withdrawal consists of municipal water, surface water, well water, rain water and wastewater purchased from third parties. Our reduction efforts focus on reuse, recycle, and reclaim within our operations, which will allow us to make progress toward our goals and reduce our freshwater intake needs. In 2023, we implemented several projects expected to reduce our water withdrawal by more than 654,000 m³ annually, including:

- Our Tianjin, China, facility upgraded its reverse osmosis backwash water reuse system, which should reduce annual water usage by around 54,000 m³.
- At our Cedar Rapids, Iowa, corn facility, an automation system that will save around 165,000 m³ annually.
- At our Adana, Turkey, facility, installation of vacuum pumps to improve cooling water circulation is expected to save more than 150,000 m³ of water annually.

TARGET Water 10% Absolute reduction in water withdrawal over 2019 baseline by 2035

Water Withdrawal (million cubic meters)	2019 (Baseline)	2023	0	30	60	90	120
Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 29	110.6	115.4	4.2%	Reduction	Ç	In 2023, ADM implemented 43 projects with water savings benefits that are estimated to save over 654,000 m ³ annually.	Global Water Strategy

As part of our Strive 35 goals, we committed to develop a water strategy focused on improving community well-being in priority watersheds, including water-stressed areas. We continue efforts to develop our strategy based on the vision and framework developed in 2022. In 2023, we focused our efforts on identifying the covered facilities, developing KPIs, and identifying partnerships

and collaborations that support implementing water reduction and replenishment projects. Strategic Framework • Maximize water use efficiency across global operations • Track and report consumptive water loss • Establish community-focused partnerships • Develop a water replenishment program • Integrate the program into existing operations and processes

Global Efforts In 2023, we joined the Business Leaders Open Call to Accelerate Water Action, committing to take bold action on water and calling on the global business community to join the effort. We acknowledge the severity of the water crisis, including its effects on communities, the environment and the economy, and commit to working across our operations and supply chains, joining businesses around the world to achieve collective positive water impact in at least 100 vulnerable prioritized water basins by 2030. To inform our global water strategy, we will compare covered facilities to the CEO Water Mandate 100 priority basins to prioritize action areas.

Covered Facilities While ADM has several types of facilities, not all use water in daily operations. For example, grain elevators, barge loading terminals, and some animal feed processing facilities only have water for sanitation purposes. We will include our operating facilities that use water as a significant input of the location's operation. To ensure proper focus, last year we reassessed the water risk category of the regions where our sites are located using the World Resources Institute (WRI) Aqueduct™ tool. Facilities located in regions categorized as medium-high, high or extreme water risk will be included. From the full list of ADM operated locations globally, the covered facilities list will be determined using the following criteria:

- Processing facilities - this will exclude warehouses, grain silos, transportation hubs, and offices.
- Water-using facilities - this will exclude processing sites that do not use water as a significant input, such as feed blending, and dry bean packaging.
- Elevated water risk - this will exclude facilities that are located in regions categorized by the Aqueduct tool as low or medium-low risk.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices

30 Water.org Partnership Today, 2.2 billion people lack access to safe water, and 3.5 billion people lack access to a toilet. Water.org is dedicated to changing this, empowering families through access to affordable financing and expert resources to make household water and toilet solutions a reality. Water.org is an international nonprofit organization that has positively transformed millions of lives around the world with access to safe water and sanitation. Founded by Gary White and Matt Damon, Water.org pioneers market-driven financial solutions to the global water crisis — breaking down barriers to give women hope, children health, and families a bright future. ADM and Water.org have been working together since 2019. Through ADM Cares, we have given \$1.4 million to support water and sanitation access in six countries: India, Brazil, the Philippines, Peru, Cambodia and Indonesia, reaching 816,587 people with water and sanitation solutions through 190,124 loans, which have mobilized \$71.5 million in capital. In 2023, ADM Cares provided funding for several Water.org initiatives, including a \$150,000 grant for a project in the Philippines that helped provide 22,000 people with safe and sustainable water sources. Another \$150,000 grant supported a project in Cambodia enabling a microfinancing program that provides affordable loans for sanitation systems, as well as training to support water utilities for 21,400 people in need. A \$200,000 grant supported a collaboration in Indonesia with rural utilities for households to connect to waterlines, helping provide 21,400 people with access to clean water and sanitation, while also supporting infrastructure.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices

31 Waste ADM continues to uncover new landfill diversion opportunities while strengthening existing waste management processes as we work toward our Strive 35 waste goal. As evidenced by our year-over-year improvement in landfill diversion, we are committed to incorporating beneficial reuse and resource efficiency across our global operations. Our efforts in 2023 include the following highlights:

- ADM colleagues at our oilseeds facilities in Windsor, Ontario; Lincoln, Nebraska;

and Deerfield, Missouri, implemented process optimization improvements that, among other positive impacts, led to a waste reduction of 3,000 metric tons per year of bleaching clay and diatomaceous earth. • Our oilseeds site in Dharwad, India, has partnered with a cement manufacturer to co-process the facility's effluent treatment plant sludge into alternative fuels and raw materials. Through this partnership, the site will divert approximately 100 metric tons per year from landfill. • The team at our oilseeds complex in Valdosta, Georgia, implemented a source separation program to facilitate the beneficial reuse of organic materials such as soybean hulls, cottonseed and meal. By leveraging local composting services for its organics streams, the site is projected to divert more than 3,000 metric tons from landfill per year. Investment Recovery Program Launched in 2020, ADM's best-in-class investment recovery program - now deployed worldwide - enables waste reduction and landfill avoidance through the reuse and recycling of surplus and idle assets. Built on circular economy principles and modeling industry best practices, ADM's global investment recovery program provides our global network of manufacturing locations, crop procurement facilities and corporate offices a structured and standardized process coupled with enabling technologies to: identify surplus and idle assets; create internal visibility to those assets to transfer and reuse wherever possible; to recycle those assets if appropriate; or monetize the surplus assets through a structured process that minimizes environmental impacts and risks. ADM has a dedicated investment recovery team within our Global Procurement organization that leads the overarching program and strategy. At ADM, we leverage the power of our global network to ensure the success and sustainability of this program. The investment recovery program supports ADM's Strive 35 program, tied to both the Scope 3 GHG reduction and landfill diversion goals. In 2023, the program proved to be an effective solution for recovering investments associated with procurement spend while contributing to ADM's waste diversion goals. Since inception, more than 7,600 assets have been sold or transferred. TARGET Waste 90% diverted from landfill Landfill Diversion 2019 (Baseline) 2023 0% 25% 50% 75% 100% Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 32 4.9% Increase Å 81.2% 86.1% Landfill Avoidance Projects Brazil Bottled Oil Although much of ADM's product is sold business-to-business, in Brazil, we sell bottled vegetable oil to consumers. These sales generate two types of consumer waste: used cooking oil and plastic from the bottles. To minimize land and water impacts, ADM participates in programs to address both waste streams. Used Cooking Oil Through Programa Meio Ambiente Nas Escolas (PMANE), we work with local schools to provide collection points for used cooking oil. In addition, the schools conduct awareness and education campaigns with the students to teach environmental science and the importance of properly disposing of used oil. The program began in 2018, and it continues to grow. In 2023, ADM worked with 337 schools reaching more than 70,000 students. The children share what they've learned with their families, and they bring used cooking oil from home to the collection areas set up in the schools. Last year, we recovered more than 46,600 liters of oil. Plastic Packaging Through an industry effort called EmCicla created by the Associação Brasileira das Indústrias de Óleos Vegetais (ABIOVE), ADM collaborates with other oil retailers and specialized partners to enable plastic bottle recycling. The program aims to design and implement reverse logistics of plastic packaging. In 2023, our efforts resulted in 2,690 metric tons of plastic waste recovered, contributing to EmCicla's total results: 7,888 metric tons of plastic recovered by 33 different organizations from different stages of the recycling chain. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 33 Enrich Lives 35 Community Engagement 36 Human Rights 38 Diversity, Equity, and Inclusion 40 Health and Safety Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 34 Community Engagement ADM Cares At ADM, we believe in the concept of shared value creation. Our corporate

social investment program, ADM Cares, aligns corporate giving with our business strategies and sustainability objectives. Through the program, we work to sustain and strengthen our commitment to communities where we work, live and operate by directing funding to initiatives and organizations driving meaningful social, economic and environmental progress. Our goal is to bolster the communities where ADM employees reside and work by allocating resources, volunteer efforts and industry expertise to projects and organizations that drive meaningful progress. ADM Cares maximizes our societal impact across the globe, and by collaborating with partners, we magnify the effect of our philanthropic endeavors, making a difference in the lives of individuals worldwide. In 2023, ADM Cares grants were focused on three key areas in line with our mission of unlocking nature to enrich lives: sustainability, food security, and health and well-being. The ADM Cares team assesses potential projects to ensure they meet specific criteria and contribute to our objectives in these focal areas. The impact of projects supported by ADM Cares is evaluated through annual reports to continually assess community needs and address pressing issues. By concentrating on these areas, ADM Cares initiatives further our sustainability goals, particularly by partnering with entities that align with the United Nations Sustainable Development Goals (SDGs) relevant to our sustainability and business targets. Specifically, we contribute to: Zero Hunger Clean Water and Sanitation Decent Work and Economic Growth Climate Action Life on Land Colleague Volunteering ADM Cares initiatives extend beyond corporate borders to address pivotal issues within our grower communities and those in which we operate. Colleague engagement plays a vital role as well, fostering a sense of pride and purpose among ADM employees who are directly involved in supporting and implementing these initiatives. Volunteer events take place across the globe, allowing colleagues to participate actively in their communities. For example, in EMEA Volunteer Week takes place each May, encouraging teams and individuals to volunteer with local causes. Colleagues band together across regions to address food insecurity by supporting local food banks through collections and onsite packing events. We emphasize education through local and global volunteer events that expose students to the agriculture industry, inform students with career days, and provide students with access to food and sanitation. Environmentally focused volunteer events include tree planting, river cleanups, and wildlife restoration projects. Through these collaborative efforts, ADM Cares not only enriches lives in our communities, but also cultivates a sustainable and prosperous future for people across regions.

2023 ADM Cares spending \$20.1 million Human Rights Our dedication to upholding human rights is central to our purpose, and foundational to our work spanning the value chains in which we operate. We take decisive actions that leave a lasting, sustainable impact on communities and ecosystems worldwide. We are committed to doing business with integrity and believe in paving the way with fair business practices, progressive solutions and mindful actions that make a positive impact. While the primary responsibility for safeguarding human rights lies with governments, we recognize our pivotal role in ensuring that human rights are respected across our operations, supply chains and the communities we touch. Our global influence gives us the power to drive meaningful change, and our initiatives in 2023 exemplify our steadfast commitment to embedding human rights principles throughout our value chain. Salience Exercise ADM is a member of the UN Global Compact and annually submits a Communication on Progress. The United Nations Guiding Principles (UNGPs) reporting framework includes recognition and disclosure of a company's salient human rights issues. It emphasizes a people-first approach when conducting risk assessment and defines salient as "the human rights that are at risk of the most severe negative impacts through a company's activities or

business relationships.” The framework notes that salient issues are defined by scale, scope and irremediability. By acknowledging these risks, we can begin to focus on the mitigation and prevention of potential human rights issues throughout our supply chains. In 2023, we worked with a third party to undergo a formal salience assessment. Our organization was guided through the UNGP framework when conducting our initial assessment. We recognize that this is not a one-time effort, but rather a continuous one that will become more informed and strengthened over time. A salience exercise differs from a typical materiality assessment. It assesses all risks to humans across all areas of our value chain, no matter how small the scale or far-reaching the issue. ADM teams, affected communities and NGOs are all brought to the table to discuss which human rights issues are most critical across our value chains. This exercise provides an opportunity to identify gaps in our human rights efforts through robust collaboration. We engaged colleagues from all areas of our operations and supply chains, and after assessing all potential and actual human rights issues, we determined our most salient impacts based on greatest severity to people and communities. We will continue to provide detailed information on our salient issues in our future reports. Following our assessment, we discussed these identified risks with third-party and internal stakeholders and determined the following to be our salient human rights risks: • Living Wage • Gender Discrimination • Health and Safety • Child Labor • Forced Labor • Impacts on Communities • Just Transition in Agriculture We are working actively to prevent, resolve and/or mitigate these risks throughout our own operations and value chains. For more information, please view our 2023 Supply Chain Due Diligence Report.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 36

Supply Chain Due Diligence We actively engage in environmental and social due diligence efforts throughout our supply chains, taking actions that make a measurable, sustainable difference for communities and ecosystems around the world. ADM has vast and varied supply chains. Our origination teams procure raw commodities—such as corn, soybeans, wheat, and softseeds— from all over the world, while our procurement teams source the ingredients and indirect supplies needed to run our operations. We have been working for several years to assess our origination footprint and the risks associated with those commodities and geographies. In 2023, we finalized our Supply Chain Due Diligence Standard Operating Procedure (SOP). The SOP serves as a guide to implement the Supply Chain Due Diligence (SCDD) process, which aims to prevent, resolve and/or mitigate adverse impacts on people and the environment in our supply chain. It is our goal to deploy this SOP globally. ADM is implementing its SCDD program based on the United Nations Global Compact (UNGC) Framework, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Co-operation and Development (OECD), and the Food and Agriculture Organization (FAO) of the United Nations Guidance for Responsible Agricultural Supply Chains. Our program and policies apply to all employees, officers, directors, contract workers and agents of ADM, our divisions, and our affiliates in all countries. In addition, we expect that our direct and indirect suppliers, business partners, agents, and consultants uphold our policies. Our SCDD program allows us to set and communicate clear expectations with our customers and monitor compliance, serving as an enforcement mechanism. Due to the nature of human rights and environmental issues, this is an iterative process that we seek to continuously improve. The foundation is based on the aforementioned policies. There are six integral parts of our sustainability program: Policy Commitment Risk and Impact Assessment Implementing Effective Actions Tracking and Monitoring Communication and Reporting Grievance and Remedy For more information on our Standard Operating Procedure, risk assessments, training and reporting, please view our 2023 Supply Chain Due Diligence Report. SEDEX In our commitment to safeguarding human rights throughout our supply

chains, we actively engage with suppliers and stakeholders to ensure ethical sourcing practices. As part of this effort, ADM is a member of Sedex, the largest online platform for assessing supply chain sustainability. We utilize their audit program to evaluate, enhance, and disclose our sustainability practices. Annually, designated facilities undergo responsible sourcing audits conducted by independent third-party auditors. Sites are chosen by region, production, risk, previous audits and past findings. These audits not only highlight potential areas for improvement, but also serve as a mechanism to identify violations of rights. In the event of findings, our sustainability, legal, operations and compliance teams collaborate with facility personnel to implement necessary corrective actions swiftly and effectively. In 2023, ADM hosted 20 Sedex audits across all business units and in six countries. At the ADM facilities visited in 2023, there were no fees charged to jobseekers in exchange for employment, and no collateral was taken in the form of money, identification, or other personal belongings without workers' consent as a condition of employment by ADM or contracted companies. No human trafficking or forced labor of any kind was observed. In addition to our internal auditing efforts, ADM leverages the Sedex platform to actively engage with our suppliers in assessing their sustainability performance. Through Sedex, we collaborate closely with our suppliers to evaluate their practices and ensure alignment with our ethical standards. The platform facilitates transparency and communication, enabling us to work together to address any areas of concern and drive continuous improvement. By leveraging Sedex, we not only uphold our commitment to ethical sourcing but also foster stronger partnerships with our suppliers, creating a more sustainable value chain.

37 Diversity, Equity and Inclusion Strategic Pillars: How We Will Achieve Our Vision
Recruitment Advancement, Development, & Retention
Culture At ADM, we recognize that diversity, equity, and inclusion are critical business imperatives, and we are committed to fostering an environment where all employees feel valued and empowered to drive success. By championing a culture of inclusivity and providing equitable opportunities, we ensure that every team member contributes meaningfully to our collective achievements. Our diverse workforce, comprising individuals with varied backgrounds and perspectives, fuels innovation and unlocks new avenues for growth. Aligned with our broader business strategy, our DE&I strategy focuses on three key areas: Recruitment; Advancement, Development & Retention; and Culture. To oversee and steer this strategy, we have established a global DE&I council. It is critical that all employees understand our commitment to DE&I. In 2023, 99.8% of colleagues completed DE&I training as a part of annual training requirements, and we included that training in new colleague onboarding. Globally, we support Employee Resource Groups (ERGs). These voluntary, employee-led groups allow colleagues with shared experiences, interests, or goals to come together in a safe space to offer support, build a sense of community, and promote personal and professional development. Our ERGs have continued to grow – both in membership and with the introduction of additional groups across our four regions (North America, APAC, EMEA and LATAM) to include, depending on geographic relevance, Multicultural, Black Colleague, Hispanic, Veterans, and LGBTQIA+ affinity groups. At ADM, we believe that true innovation arises from having many different perspectives and backgrounds at the highest levels of an organization, and we are continuing to look for new ways to build, strengthen, and support an inclusive culture that allows us to cultivate innovation and growth. Our ERGs welcome all – whether colleagues identify with an affinity group or want to show their support as allies.

Industry Action
In support of our commitment to a productive, diverse and inclusive workforce, we are a signatory to the CEO Action for Diversity & Inclusion™ and a member of Paradigm for Parity®. At the industry level, ADM founded and currently participates in Together We Grow, a consortium of agricultural industry leaders united in a shared

belief that American agriculture's best days are yet to come. Emphasizing diversity and inclusion, Together We Grow works to build a modern workforce with the skills, experience and capabilities needed to keep pace with the growing world. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 38 Supplier Diversity Procurement Diverse suppliers bring a variety of advantages to the table, including innovation, customer service, and competitive edge – enhancing our supply chain resiliency. ADM's supplier diversity program continues its strategic focus on building a diverse and resilient supply chain around the globe. We define diverse suppliers as businesses that are 51% owned and operated by minorities, veterans, women, hub-zoned, people with disabilities, and LGBTQIA+. ADM's dedicated Supplier Diversity team within our Global Procurement organization leads the overarching program and strategy. At ADM, we leverage the power of a truly global network of procurement professionals – from category management to our site purchasing teams – who work hand in hand with our Supplier Diversity team to seek out opportunities to engage diverse suppliers for sourcing events led by the teams. ADM has expanded its Supplier Diversity program globally, with regional supplier diversity champions overseeing the program in all parts of the world. We leverage strategic relationships with organizations such as the National Minority Supplier Development Council (NMSDC), Women's Business Enterprise National Council (WBENC), and WeConnect International to assist in finding the best diverse supplier for our sourcing opportunities. ADM's best-in-class supplier diversity program continues to set a competitive standard, receiving multiple awards for excellence, most recently "Best of the Decade 100" supplier diversity program (MBN USA & WE USA), gold winner and "Top Global Champion" for Supplier Diversity (WEConnect International), and "Top 25 Diversity Change Leader" (DiversityPlus magazine). Origination Around the world, we work to support growers in our supply chains. Increasing diversity builds resiliency while growing and empowering local communities. Smallholder Farmers Around the world, smallholders play a vital role in the health and stability of the world's food supply but face many challenges such as access to markets, technology and education. In India, we engage with more than 25,000 smallholders in a sustainable agriculture program that aims to empower growers with sustainability resources, technology and market connections. Minority Growers In the U.S., we have partnered with the National Black Growers Council (NBGC), a membership of multigenerational producers who advocate for the best interests of Black farmers locally, statewide and nationally. NBGC works to improve the efficiency, productivity and sustainability of Black row crop farmers. Through our regenerative agriculture program, ADM aims to support NBGC members looking to adopt practices that improve soil health and farm resiliency by providing financial incentives and technical assistance. In 2023, we participated in six NBGC field days that convened more than 1,300 farmers across Georgia, Arkansas, Mississippi, Louisiana, Alabama and South Carolina. During those events and throughout the season, 111 NBGC members enrolled in our program, planting 38,325 acres of cover crops. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 39 Health and Safety Our people are our lifeblood – they innovate, create and deliver. They are the ones who make our company great, and they are our future. We invest in our people and strive to create a workplace where they can thrive. This includes building a safety culture so everyone goes home safely to their families and the things that are most important to them. And this also includes investing in our people to maximize their potential. Safety Protecting the health and safety of our colleagues is paramount, and in 2023, our safety performance did not meet our expectations. In 2024, we are refocusing our efforts in both occupational and process safety in support of our vision of Safe or We Don't Do it. We remain committed to fostering a safe working environment for all of our employees and contractors. A strong safety and health management system is built on a robust list of policies, standards and

supporting documentation, including life-critical standards that govern our high-risk work. We have increased our focus on process safety with additional resources, processes and programs. Our internal audit program for Environmental, Health and Safety, and Process Safety provides essential governance and identifies opportunities for improvement, reduce risk and supports our compliance commitments while leveraging our strong continuous improvement mindset. In 2023, approximately 75% of our sites completed the year without recordable injuries and about 90% without lost workday injuries. Sadly, we mourn two ADM colleague fatalities, one in the U.S. and one in France. We are committed to our ambitious goal of reducing our Total Recordable Incident Rate (TRIR) and Lost Workday Incident Rate (LWIR) year over year to achieve a 25% improvement by 2025. We have taken additional steps to meet these goals by launching or enhancing efforts to improve occupational and process safety, including:

- Safe Work Permit and Last Minute Risk Assessment programs for all maintenance activities
- A renewed focus on learning, awareness and commitment to our Life Critical Standards
- Process Safety Fundamentals training that allows for learning from experience and is designed to build skills in identifying and managing risk
- Establishment of a Global Safety Council which brings together representatives of all regions and functions
- Enhanced New Site EHS Integration Program designed to quickly and effectively deliver ADM's standards and programs to newly acquired facilities

Total Recordable Incident Rate (TRIR) 0.74 0.67 2020 (Baseline) 2023 0.0 0.2 0.4 0.6 0.8 1.0
Lost Workday Incident Rate (LWIR) 0.23 0.23 2020 (Baseline) 2023 0.0 0.2 0.4 0.6 0.8 1.0

Employee Health Programs In 2023, ADM fully implemented a program with Medcor/Work Right at our Decatur, IL, complex that can not only assess and treat minor injuries onsite, but also provide injury prevention resources to colleagues. The program includes ergonomic assessments and recommendations for our colleagues' workspaces, suggested stretching and rehabilitation exercises to prevent injuries related to repetitive movements or poor posture, and even massages. Employees can make appointments with the Medcor/Work Right team for advice and treatment at no cost. Virtual health support has been deployed to all U.S. locations. We provide access to several virtual health support programs for our colleagues. For example, access to Hinge Health can help employees suffering from muscle or joint pain by working with a virtual care team to assess and develop a personalized exercise plan, reduce pain, find physical therapists and more. We also provide weight management support through Wondr Health, diabetes and blood pressure management through Livongo, and a smoking cessation program in partnership with the American Cancer Society Quit for Life® program.

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 40 Governance 42 Strategy and Oversight 43 Risk and Opportunity Management 44 Key Topic Assessment and Stakeholder Engagement 45 Commitments and Policies 46 Compliance and Ethics

Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 41 Strategy and Oversight Our commitment to change and growth goes beyond our products and services. At ADM, sustainable practices and a focus on environmental responsibility are not separate from our primary business: they are integral to the work we do every day to serve customers and create value for shareholders. We are committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, energy, and packaging materials while pursuing ways to continually improve our efforts in both protecting the environment and enhancing environmental and social sustainability. That is why our current strategic plan is called "Sustainable Growth". We believe sustainability is critical to our future growth strategy. Our strategic plan of sustainable growth leverages the trends and technologies in sustainability to help us grow and create value for our stakeholders. Our Ag Services and Oilseeds business unit is focused on traceability of sourcing and differentiation and working with growers on low-carbon agricultural practices and

products. Carbohydrate Solutions is focused on decarbonization efforts that increasingly position the business to offer low-carbon intensity feedstocks for biosolutions and biomaterials, including fuel solutions, to replace petroleum-based products. Nutrition is working with suppliers and customers to identify nature positive solutions that can reduce environmental impact in supply chains. The growth of these projects and businesses will be integral to supporting the objective of helping the planet limit total global warming to the 1.5°C threshold indicated by the United Nations. Additionally, ADM includes achievement of gender parity and GHG emission goals in executive performance measurement to reflect the strategic importance of ESG to our business. Our sustainability efforts are overseen by our Board of Directors, including a dedicated Sustainability and Corporate Responsibility Committee, and led by our Chief Sustainability Officer (CSO), who is supported by regional sustainability teams. The Sustainability and Corporate Responsibility Committee actively oversees objectives, goals, strategies and activities relating to sustainability and corporate responsibility matters, and assists the Board in ensuring that we operate as a sustainable organization and responsible corporate citizen. The Executive Council of ADM, our highest strategic and operational body, provides close supervision of our ESG efforts and in-depth review of sustainability issues. Furthermore, regional sustainability teams, along with the corporate sustainability team, support the CSO to drive sustainability efforts in our facilities and supply chains around the world. Our sustainability efforts are also supported by functional expertise throughout the company, including Operations and Utilities; Supply Chain and Procurement; Diversity, Equity, and Inclusion; and Environmental, Health, and Safety.

Sustainability and Corporate Responsibility Committee of the Board

- Has direct oversight responsibility of objectives, goals, strategies, risks, and activities related to sustainability
- Executive Council of ADM**
- Highest strategic and operational body
- Provides close supervision of our ESG efforts and an in-depth review of sustainability issues
- Vice President, Chief Sustainability Officer (CSO)**
- Leads ADM's sustainability efforts
- Reports metrics quarterly to ADM Board of Directors
- Meets quarterly with ADM Sustainability and Corporate Social Responsibility Committee of the Board
- Reports regularly to ADM leadership
- Regional and Corporate Sustainability Teams**
- Support business units to drive transformation and help create value across the supply chain
- Support sustainability initiatives and implementation on the ground
- Engage and interact with stakeholders
- Located in North America, South America, and EMEA

Introduction Feed the World

Protect Nature Enrich Lives Governance Data Tables and Indices

42 Risk and Opportunity

Management Sustainability risk management, including climate change and deforestation, is integrated into our multi-disciplinary, company-wide enterprise risk management (ERM) process. Each quarter, the ERM Sustainability subgroup reviews and reports sustainability risks and related mitigation actions with the ERM team. The review includes previously identified risks to ensure proper focus of our initiatives, as well as the identification and assessment of emerging risks. The team uses a risk matrix that includes a quantitative assessment of impact, mitigation and residual risk as well as qualitative information about risk categories, warning periods, mitigation strategies and effectiveness. In line with the recommendations of the Taskforce on Climate-related Financial Disclosures (TCFD), we conducted a scenario analysis using three potential warming scenarios: 1.5°C (latest recommendation from IPCC to prevent the worst effects of global warming), 2°C (aligned with the Paris Climate Accords), and 2.6°C (status quo). In each of the scenarios, we identified potential sourcing shifts and limitations, operational changes, physical impacts, and opportunities. In 2023, we completed a human rights salience exercise to identify risks to human rights in our operations and supply chains. We have also begun identifying and assessing nature-related issues using the LEAP framework from the Taskforce on Nature-related Financial Disclosures (TNFD). Through these tools, we have identified key risks

which we put into two categories: physical risks and transition risks. Key opportunities are related to products and services offerings. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 43 Transition Risks Physical Risks Opportunities • Emerging regulation and carbon pricing mechanisms could result in increased operational costs in the short to medium term. • Changes in policy or introduction of new policies could introduce additional tax requirements at our facilities or could limit our ability to operate our assets and increase our operating costs. • Market demand has a direct effect on production, as well as demand for certified sustainable commodities. Changes in consumer demand could result in additional cost of implementation that may not be overcome by product sales. • ADM uses coal-fired cogeneration technology to meet a portion of our energy demand. We are working to reduce the carbon footprint of our operations, but transitions can be time intensive and costly. • Working with growers to encourage widespread adoption of regenerative agriculture practices is resource intensive and can be difficult to scale. • Increased severity and frequency of extreme weather events such as cyclones and floods could lead to increased direct costs from the disruption of supply chains and impair our ability to deliver products to customers in a timely manner. • Increased severity and frequency of extreme weather events such as cyclones and floods could lead to increased sourcing costs due to limited availability of agricultural commodities and impact ADM's ability to produce goods, which would directly affect sales and revenue. • Ecosystem decline can impact natural systems, including crop production, which could lead to increased sourcing costs from the disruption of supply chains. • Water shortages could impact our ability to operate our facilities and deliver products to customers in a timely manner. • Climate-related impacts and instability could increase risk for human rights violations. • Developing enhanced transportation and warehousing scheduling, routing, and tracking technologies could reduce carbon footprint and costs while improving customer delivery satisfaction. • Development and expansion of low-emission goods and services could lead to increased revenues resulting from increased demand. • As demand for renewable products grows, development of new products or services from R&D; and innovation could lead to increased revenues through access to new and emerging markets. • ADM's scale and geographic reach could enable widespread program adoption and implementation allowing first-to-market sustainable offerings. Key Topic Assessment and Stakeholder Engagement Following the guidelines from the Global Reporting Initiative (GRI), we use a third party to conduct a formal assessment to identify and prioritize key sustainability topics that reflect our most significant impacts to the economy, environment and people, including human rights. Because these impacts may change over time as our activities, business relationships and assets evolve, we update this assessment on a regular basis. During our most recent assessment, the firm interviewed, surveyed and researched publicly available information from a variety of internal and external stakeholders, including ADM leadership, investors, customers, employees and NGOs. The assessment indicated several key topics that are consistent across all stakeholder groups as critically important: "GHG Emissions," "Deforestation & Conversion," "Governance" and "Water Management." Although these are critical to manage, the other topics on the matrix are also important to ADM and our stakeholders. The next formal assessment will take place in 2024 and will include double materiality in accordance with the EU Corporate Sustainability Reporting Directive (CSRD). Ongoing Stakeholder Engagement We have established direct and easy-to-access communication channels for engagement with different types of stakeholders. These engagements provide valuable insights on stakeholder concerns and topics that they consider important. In 2023, we engaged with stakeholders via customer feedback, NGO inquiries, and dialogue with shareholders. We also met with several customers and entered into partnerships on regenerative agriculture and environmental topics. As part of our supply chain efforts

in palm and soy, specifically on the 1.5°C Roadmap, additional emphasis was placed on engaging with key stakeholders. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 44 Commitments and Policies ADM has set forth several key social and environmental commitments and policies that collectively outline our expectations for our colleagues, business partners and contractors, and our organization as a whole. They establish clear standards that govern our approach to raw material sourcing, environmental stewardship and employee conduct, among other areas, and they state our positions on issues of widespread public interest. These standards were developed with input from our operations, law, compliance, and EHS teams, and were approved by Board Chair and CEO Juan Luciano:

- Policy to Protect Forests, Biodiversity, and Communities
- Code of Conduct
- Environmental, Health, & Safety (EHS) Policy
- Human Rights Policy
- Statement on Genetically Modified Organisms
- Statement on Animal Testing
- Commitment to Anti-Corruption Compliance
- ADM Supplier Expectations
- ADM Tax Policy
- Managing Supplier Non-Compliance Procedure

In a world that is becoming increasingly interconnected and transparent, we strive to match that clarity and provide means to facilitate conversation and feedback. We invite all stakeholders who have concerns related to the implementation of our policies to email us at responsibility@adm.com or use The ADM Way Helpline. Our Human Rights Policy protects human rights defenders, whistleblowers, complainants, and community spokespersons from any form of retaliation.

Compliance and Ethics At ADM, we believe in leading by example, setting a global standard for “good business” that other companies in our industry will follow. In March 2024, we were recognized by Ethisphere, a global leader in advancing the standards of ethical business practices, as one of the World’s Most Ethical Companies™ and one of only 10 honorees in the Food, Beverage, & Agriculture category. This honor marks the fifth consecutive year we have received this recognition for our deep commitment to ethical business practices, transparency, and corporate citizenship. We maintain high ethical standards across our global workforce. We expect colleagues to take responsibility for their actions and adhere to our values of honesty and integrity, consistent with our commitment to always conduct business fairly and ethically. In 2023, we updated our Code of Conduct. In addition to a new style and structure, the updated Code includes an expansive set of updated examples to help colleagues apply the Code, as well as links and references to relevant policies and resource centers. These resource centers provide colleagues easy access to a wide range of supporting tools and job aids, such as our “Food for Thought” guide, which provides answers to common questions about our Code, related policies, and programs, as well as an extensive set of solutions to various scenarios that our colleagues may face. Our Code is designed to guide us in our work activities, shows us how to conduct business in an ethical and legal manner, and is consistent with our Company’s values and culture of integrity. By knowing and following our Code, each of us does our part to maintain and further build trust with our various stakeholders, including our colleagues, customers, business partners, shareholders, and the communities in which we operate. We prohibit all forms of corruption, including bribery, and we abide by all anti-corruption laws in every country we do business. We have a robust anti-corruption program that includes a global Anti-Corruption Policy and other compliance procedures and controls designed to minimize the potential for corruption in ADM’s global business dealings, such as enhanced due diligence, screening, monitoring of high risk third parties, and pre-approvals before hosting or entertaining government officials. We train colleagues and third parties to raise awareness of corruption risks and applicable anti-corruption laws in order to both avoid inadvertent violations of the law and enable early recognition and handling of potential issues. Our Anti-Corruption Program and Policy are updated periodically to address new risks and

incorporate continuous enhancements. We have a strong “Speak Up” culture at ADM, which helps us handle issues and address problems in a timely manner, building trust with one another and with our customers, suppliers and business partners and protecting the company from legal, financial and reputational risks. We encourage colleagues to voice concerns or ask questions through multiple channels, including by talking with their supervisors, Human Resources, or Compliance, or at any time through additional reporting channels such as The ADM Way Helpline, which is available by phone or online in more than 30 languages and accessible using a QR code. Reporting via the Helpline can be done anonymously, where permitted by law. We do not tolerate any form of retaliation for making a good-faith report of actual or potential misconduct. The ADM Way Helpline may also be used by stakeholders outside of ADM to raise questions or voice concerns. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and Indices 46 Our helpline is available by phone or online in more than 30 languages. We feel a deep and genuine regard for the safety and well-being of all people, communities and resources, and we treat them with care and consideration. We demonstrate trust and openness. And we are good stewards of the environment. Our Human Rights Policy protects human rights defenders, whistleblowers, complainants and community spokespersons from any form of retaliation. In 2023, we received a total of 1,397 reports concerning topics such as employee relations; environmental, health, and safety (EHS); diversity; equal opportunity; respect in the workplace; and misuse or misappropriation of assets or information. We log and track all reports we receive. Each is classified by type and then assigned to an investigator to conduct an independent and objective review into the concerns raised. If an allegation is substantiated, we implement corrective and disciplinary actions that can include coaching and counseling, process or control improvement, verbal or written warnings, financial penalties, or termination. We assess the effectiveness of our compliance controls through enhanced reporting and automation. We are able to monitor trends and identify compliance risks with the use of an interactive compliance application which enables us to assess information from our databases on various topics such as conflicts of interest, government hosting and gifting, expense reporting and training. In 2023, we implemented a formal process to identify, document and remediate the root cause of behaviors that led to violations of ADM’s Code, and created a tool to help ensure the fairness and consistency of disciplinary actions. Training is a key component of our compliance program. In 2023, 99% of all colleagues completed required training on topics such as anti-corruption, anti-money laundering, conflicts of interest, data privacy and insider trading. Above and beyond our global annual required training, Compliance held 144 facilitator-led training sessions for more than 5,000 colleagues in 16 countries around the world. We also created a toolkit for managers to guide them on integrity-based leadership and decision-making, which has been incorporated into new manager training and orientation materials. We published 65 global and regional compliance communications in 2023 to improve employee understanding of expectations regarding integrity and compliance, enhance awareness of compliance risks, provide guidance on appropriate behaviors, and increase transparency into how ADM investigates and remediates issues of concern. The communications covered topics such as anti-corruption, data privacy and records retention, conflicts of interest, trade sanctions, and speaking up. Consistent with our commitment to manage risk related to our third-party relationships around the world, 2023 marked the ninth consecutive year of ongoing compliance monitoring and training of third-party service providers acting on our behalf. This year we completed 23 compliance audits of third parties, including port agents, customs brokers, law firms, consultants and distributors. We also hosted 12 virtual compliance training sessions globally, with more than 550 attendees from seven countries. Introduction Feed the World Protect Nature Enrich Lives Governance Data Tables and

We are committed to being a force for change in developing innovative, sustainable solutions spanning food, feed, fuel and consumer and industrial products while pursuing ways to continually improve our efforts in both protecting the environment and enhancing environmental and social sustainability. [...] To meet our 2025 deforestation-free goal, we identified four key actions: • Conduct a comprehensive deforestation risk assessment for all commodity and ingredient supply chains. • For high-risk supply chains, identify direct and indirect volumes and determine a method for traceability. • Develop monitoring protocols and supplier engagement plans to measure deforestation-free volumes. • Engage a third party to verify results. [...] best in class food safety, maintaining a culture of quality, and leveraging innovation and technology.

Founded in 1902 and headquartered in Chicago, Illinois, ADM has grown into a multi-billion-dollar enterprise that influences global food supply chains. Its operations span continents, engaging in activities that range from the origination of crops to the manufacture of oils, protein meals, and other essential products. In this comprehensive analysis, we will delve into ADM's business model, conduct a SWOT analysis to identify its strengths, weaknesses, opportunities, and threats, and identify key competitors that ADM will face in 2024. ## What You Will Learn 1. **ADM's Business Model:** Understanding the core elements of ADM's business strategy and operations. 2. **SWOT Analysis:** A detailed examination of ADM's internal strengths and weaknesses, as well as external opportunities and threats. 3. **Competitors in 2024:** Insight into the key players in the agribusiness and food processing industry that compete with ADM. 4. **Key Takeaways:** Summarizing the essential points from the analysis. 5. **FAQs:** Addressing common questions about ADM. ## Key Takeaways * ADM is a global leader in agricultural origination and processing. * The company has a diversified business model with significant investments in innovation and sustainability. * ADM faces competition from other giants in the industry like Cargill, Bunge, and

Louis Dreyfus Company (LDC). * The SWOT analysis reveals ADM's strategic advantages and areas that need attention, including market expansion and technological advancements. ## ADM's Business Model ADM's business model is multifaceted, encompassing a wide array of operations within the agricultural supply chain. Here's an in-depth look at the core elements: ### 1. **Origination** ADM sources crops such as corn, wheat, soybeans, and other grains from farmers around the globe. The company works closely with agricultural producers to ensure a consistent supply of raw materials. This step involves not only procurement but also logistics management to transport these crops to various processing facilities. ### 2. **Processing** Once the raw materials are sourced, ADM processes them into a variety of products. The processing segment includes: * **Oilseeds Processing:** Crushing oilseeds to produce vegetable oils and protein meals. * **Corn Processing:** Converting corn into sweeteners, starches, and bio-products like ethanol. * **Wheat Milling:** Producing flour and other wheat-based products. ### 3. **Nutrition** This segment focuses on producing ingredients for human and animal nutrition. ADM manufactures products such as: * **Human Nutrition:** Plant-based proteins, natural flavors, and health and wellness products. * **Animal Nutrition:** Feed ingredients, premixes, and specialty feed solutions for livestock. ### 4. **Distribution** ADM operates a vast network of transportation and storage facilities, ensuring efficient distribution of its products. The company's extensive logistics capabilities include: * **Shipping:** Operating a fleet of vessels for ocean transport. * **Storage:** Managing a global network of silos and warehouses. ### 5. **Innovation and Sustainability** ADM invests heavily in research and development to innovate its product offerings and improve process efficiencies. The company is also committed to sustainability, focusing on reducing its carbon footprint, promoting responsible sourcing, and enhancing food security. ## SWOT Analysis A SWOT analysis helps to identify the internal and external factors that affect ADM's performance: ### Strengths 1. **Global Presence:** ADM operates in over 170 countries, giving it a vast market reach and diversified revenue streams. 2. **Integrated Supply Chain:** The company's end-to-end supply chain capabilities ensure efficiency and cost-effectiveness. 3. **Innovative R&D:** ADM's investment in research and development fosters innovation in product offerings and process improvements. 4. **Strong Brand Reputation:** With over a century of experience, ADM is a trusted name in the agribusiness sector. ### Weaknesses 1. **Dependence on Agricultural Commodities:** ADM's profitability is highly influenced by the volatility of agricultural commodity prices. 2. **High Operating Costs:** The extensive global operations and logistics network contribute to significant operating expenses. 3. **Regulatory Risks:** The company operates in a highly regulated industry, with exposure to changing policies and trade regulations. ### Opportunities 1. **Market Expansion:** Growing demand for plant-based proteins and health-focused food products presents opportunities for market expansion. 2. **Technological Advancements:** Innovations in biotechnology and digital agriculture can enhance productivity and reduce costs. 3. **Sustainability Initiatives:** Increasing consumer and regulatory focus on sustainability offers opportunities for ADM to lead in sustainable agribusiness practices. ### Threats 1. **Intense Competition:** ADM faces stiff competition from other major players in the agribusiness sector. 2. **Climate Change:** Adverse weather conditions and climate change can impact crop yields and supply chain stability. 3. **Geopolitical Risks:** Political instability and trade tensions in key markets can disrupt operations and supply chains. ## Competitors in 2024 The agribusiness and food processing industry is highly competitive. Here are some of the key competitors ADM will face in 2024: ### 1. **Cargill** Cargill is one of the largest privately held companies in the United States, with a diverse range of operations in agriculture, food, and industrial products. Like ADM, Cargill has a global footprint and a strong focus on innovation and sustainability. ### 2. **Bunge Limited** Bunge is a

leading global agribusiness and food company, specializing in oilseed processing, grain trading, and food production. The company's extensive network of facilities and strong market presence make it a formidable competitor. ### 3. **Louis Dreyfus Company (LDC)** LDC is a global merchant and processor of agricultural goods, operating in over 100 countries. The company's diversified portfolio includes grains, oilseeds, coffee, cotton, and sugar. LDC's strong supply chain capabilities and focus on sustainability position it as a key competitor to ADM. ### 4. **Tyson Foods** Tyson Foods is a major player in the food industry, particularly in meat processing. While not a direct competitor in all segments, Tyson's focus on protein production and its expanding portfolio of plant-based products make it a significant competitor in the nutrition space. ### 5. **Nestlé** Nestlé is the world's largest food and beverage company, with a diverse range of products and a strong global presence. The company's focus on nutrition, health, and wellness aligns with ADM's strategic goals, making it a key competitor in the human nutrition segment. ## Conclusion Archer-Daniels-Midland Company stands as a global leader in the agribusiness sector, leveraging its extensive supply chain capabilities, innovative R&D, and commitment to sustainability. The SWOT analysis highlights ADM's strengths, such as its global presence and integrated supply chain, while also identifying areas for improvement, such as managing commodity price volatility and regulatory risks. In 2024, ADM will face competition from major players like Cargill, Bunge, LDC, Tyson Foods, and Nestlé. However, the company's strategic focus on market expansion, technological advancements, and sustainability initiatives positions it well for continued growth and leadership in the industry. ## FAQs ### 1. **What does ADM do?** ADM is a global leader in agricultural origination and processing, producing a wide range of products for human and animal nutrition. The company sources crops, processes them into oils, protein meals, and other products, and distributes them globally. ### 2. **Who are ADM's main competitors?** ADM's main competitors include Cargill, Bunge, Louis Dreyfus Company, Tyson Foods, and Nestlé. These companies compete with ADM in various segments of the agribusiness and food processing industry. ### 3. **What are ADM's strengths?** ADM's strengths include its global presence, integrated supply chain, innovative R&D, and strong brand reputation. These factors contribute to the company's leadership in the agribusiness sector. ### 4. **What are some opportunities for ADM?** Opportunities for ADM include market expansion in plant-based proteins and health-focused food products, technological advancements in biotechnology and digital agriculture, and leading in sustainable agribusiness practices. ### 5. **What challenges does ADM face?** ADM faces challenges such as commodity price volatility, high operating costs, regulatory risks, intense competition, climate change, and geopolitical risks. Managing these challenges is crucial for the company's continued success. ### 6. **How does ADM ensure sustainability?** ADM is committed to sustainability through initiatives aimed at reducing its carbon footprint, promoting responsible sourcing, and enhancing food security. The company invests in sustainable practices and collaborates with stakeholders to achieve its sustainability goals. --- This article provides a comprehensive overview of Archer-Daniels-Midland's business model, SWOT analysis, and competitors in 2024. By understanding these aspects, stakeholders can gain valuable insights into ADM's strategic position and future prospects in the agribusiness sector. 6. How does ADM ensure sustainability? ADM is committed to sustainability through initiatives aimed at reducing its carbon footprint, promoting responsible sourcing, and enhancing food security. The company invests in sustainable practices and collaborates with stakeholders to achieve its sustainability goals. [...] In 2024, ADM will face competition from major players like Cargill, Bunge, LDC, Tyson Foods, and Nestlé. However, the company's strategic focus on market expansion, technological advancements, and sustainability initiatives positions it well for continued growth and leadership in the industry. ## FAQs ### 1. What does ADM do? [...] 1. Market Expansion: Growing demand for plant-based proteins and health-focused food products presents opportunities for market expansion. 2. Technological Advancements: Innovations in biotechnology and digital agriculture can enhance productivity and reduce costs. 3. Sustainability Initiatives: Increasing consumer and regulatory focus on sustainability offers opportunities for ADM to lead in sustainable agribusiness practices. ### Threats

November 2025** 09:00 - 16:00 The Sustainable Packaging Summit returns in a new venue, the spacious Jaarbeurs Event & Exhibition Centre in Utrecht. We're back, and this year we're taking things to the next level. With an extra day of content, more speakers, exhibitors, and industry leaders, expanded networking opportunities, and an exclusive block party in the exhibition hall, the Summit is set to be an unmissable event for anyone in the packaging industry. From decision-makers to researchers, start-ups to global brands, investors to policymakers, and students to scientists, the entire packaging value chain is coming together. This is where knowledge meets action—where innovations are launched, collaborations begin, and sustainability goals move forward. Stay ahead of regulatory shifts, discover cutting-edge solutions, and build the relationships that will shape the future of packaging. Join us on 10-12 November 2025 to accelerate transformation, fuel innovation, and help create a truly sustainable packaging industry. The Sustainable Packaging Summit will be back, bigger than ever, with an extra day of content, more speakers, exhibitors, and industry professionals. We're moving to the spacious Jaarbeurs Event & Exhibition Centre in Utrecht. A visit to the Sustainable Packaging Summit allows decision-makers from across the supply chain to keep on top of industry developments, stay abreast of key topics and regulatory changes, discover innovative solutions, and forge new collaborative relationships. Join us on the 10–12 of November 2025 as we unite the global packaging value chain to drive sustainable transformation, offering fresh insights, expanded networking, and actionable solutions for a greener future. [Skip to content](#content) Homepage Top Ad **[**Sign up for Trellis Briefing**]**(https://trellis.net/newsletter/?utm_medium=trellis-site&utm_source=homepage-cta&utm_campaign=trellis-briefing) — the sustainability news you need in one concise morning email. [Executive Moves](<https://trellis.net/topic/executive-moves/>) # ADM's new chief sustainability officer joins amid turbulent times for ag giant Grains trader is enacting job cuts and has seen its emissions commitment removed by the Science Based Targets Initiative [Read More](<https://trellis.net/article/adm-chief-sustainability-officer-appointment/>) By [Jim Giles](<https://trellis.net/article/author/jim-giles/>) ADM faces challenges on both the sustainability and the general business front. Source: Katherine Welles via Shutterstock The troubled ag giant ADM has appointed Katherine Pickus, previously at Tyson Foods, as its new chief sustainability officer. Pickus joins following a period of turbulence at the global grains trader. ADM's net earnings fell to \$1.8 billion in 2024, the second consecutive annual decline. The company said it would eliminate up to 700 jobs in a bid to make \$750 million in savings. ADM is also the subject of an accounting irregularities probe by federal investigators. The company faces additional challenges with its sustainability targets. Its 2023 sustainability report — the most recent available — notes that ADM [submitted targets consistent with 1.5 degrees Celsius of warming](https://www.adm.com/globalassets/sustainability/sustainability-reports/final_archer-daniels-midland-adm_2023-corporate-sustainability-report_51424.pdf) to the Science Based Targets Initiative. The commitment was subsequently flagged as removed by the SBTi. ## Former VP at Tyson Pickus served as vice president for sustainability and global impact at Tyson Foods from 2021 until her move to ADM earlier last month. She was previously vice president for global sustainability at Griffith Foods. In a [farewell post on LinkedIn](https://www.linkedin.com/posts/alison-taylor-9700979_im-excited-to-announce-katherine-f-pickus-activity-7290867562513321984-pla?utm_source=share&utm_medium=member_desktop&rcm;=ACoAAAAx0R4BfjXsdIGDoRVrwboX4lNqyVKjEw) , outgoing CSO Alison Taylor highlighted ADM's Strive35 program as a significant part of her tenure. The program includes a 2035 target for reducing the company's absolute greenhouse gas emissions by 25 percent, energy intensity by 15 percent, water intensity by 10 percent and achieving a 90 percent landfill diversion rate. Taylor will continue as climate leader in residence at Duke University, a part-time position she took up in September. ## Subscribe to Trellis Briefing Get real case studies, expert action steps and the latest sustainability trends in a concise morning email. [### Jim Giles](<https://trellis.net/article/author/jim-giles/>) Jim Giles is Vice President, Editor-at-Large at Trellis Group. His writing has appeared in the New York Times, Atlantic, Economist, Guardian, Nature and other publications. He was the co-founder of Matter, an award-winning investigative publication that was acquired by Medium in 2013. In 2017, he was a graduate of the Sulzberger Executive Leadership Program at Columbia University. He's also worked as a strategic consultant for several high-impact organizations, including the European Climate Foundation and the Wellcome Trust. ### Tags [Food & Agriculture](<https://trellis.net/article/tag/food-agriculture/>) ### Featured Reports [Sponsored S&P; Global Bio-Chemicals 2025: An Evolving Sustainability Stream](<https://trellis.net/resource/sp-global-commodity-insights-bio-chemicals-2025-evolving-sustainability-stream-research-report/>) [Sponsored A

[US Food Waste Pact](/) # Collaborate with Industry Peers to Target, Measure, and Act to Reduce Food Waste [Join the Pact](/contact) ## What is the U.S. Food Waste Pact? The U.S. Food Waste Pact is a national voluntary agreement to help food businesses achieve their waste reduction targets. It's designed to go beyond just commitment setting to actually driving meaningful progress through precompetitive collaboration and data-driven action across the supply chain. Grounded in the Target, Measure, Act framework, the Pact gives businesses a clear path to identify opportunities, track results, and scale solutions that work. When these three levers align, real change happens: less waste, lower emissions, and stronger business performance. * **Target** | Set goals to reduce food waste. * **Measure** | Use data to mark progress against those goals. * **Act** | Implement data-informed action to meet those goals. [Learn More About Us](/about-us) ## Food Business Signatories Since the Pact launched at the end of 2023, 27 business signatories have signed on to participate in the initiative's programming. The Pact is gaining momentum as it works to scale its efforts into more areas of the food system and make food waste reduction more accessible and effective. [Learn More about our Signatories](/signatories) [Join the Pact](/join) ## Why Food Waste? In the U.S., 31% of all food goes unsold or uneaten—an almost \$400 billion opportunity for the nation, including over \$230 billion for food businesses alone. Food waste is contributing 4% to our national greenhouse gas emissions and consuming nearly 20% of our nation's freshwater supply, all while one in seven Americans face food insecurity. The U.S. Food Waste Pact will deliver on the urgent need for a national strategy and partnership to accelerate food waste reduction—a top solution to climate change. 0% The percentage of the U.S. food supply that goes unsold or uneaten each year \$0B The lost value of unsold food for food businesses, from farm to retail 0M The equivalent to how much GHG is released from food waste from food businesses, from farm to retail 0B The number of meals that go to waste across food businesses, from farm to retail ## Resources Explore our resources to learn more about the U.S. Food Waste Pact and how you can get involved. [View Resource Library](/resources) ## Employee Engagement Toolkit The Employee Engagement Toolkit is an open-source portfolio of materials designed for food businesses of all kinds to pilot their own employee engagement intervention projects to address food waste in their operations. Scaling Impact 2024 Corporate Sustainability Report Contents Introduction 4 About ADM 5 About the Report 5 Our Business 6 Where We Operate 7 Sustainability at ADM 9 Key Topic Assessment and Stakeholder Engagement 10 Risk and Opportunity Management 11 Commitments and Policies 12 Protect Nature 13 Environmental Strategy 14 Carbon Footprint 15 Energy 17 Freshwater 18 Waste 19 Biodiversity 20 Enrich Lives 24 Culture, Engagement, & Inclusion 25 Health and Safety 26 Food Safety and Quality 27 Human Rights 28 Community Engagement & Global Impact 30 Governance 32 Strategy and Oversight 33 Compliance and Ethics 34 Data Tables and Indices 36 Data Tables 37 Verification Statements 38 GRI Content Index 41 SASB Standards 46 TCFD 48 Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 2 CEO Statement Dear Stakeholders, ADM's sustainability efforts in 2024 reflect our continuous, dedicated work to enable and support agriculture and farmers, drive innovation and long-term value, protect and strengthen vital supply chains, and serve our customers. I'm proud of ADM's progress this year and the momentum we're building toward our goals. Sustainability is integral to ADM's growth strategy. Our business is deeply connected to the land, farmers and responsible stewardship, and has been for over 120 years. Healthy and resilient soil, water and air are the foundation for the crops that we transform into an unparalleled array of products. ADM's work supports farmers by creating value and global demand for products and practices that help feed the world, protect nature and enrich lives. As a pillar of the global food system, we recognize our role in ensuring billions have access to the fundamental nutrition they need, and our opportunity to support sustainable solutions to meet the needs of a growing global population. In addition, consumer demand is evolving, and customers increasingly expect sustainably sourced products. Among the year's sustainability highlights, ADM expanded our global regenerative agriculture program, increasing acreage and downstream partnerships with customers, to help strengthen soil health and ensure the long-term resilience of agriculture. The program grew to 5 million acres globally, surpassing our 2024 goal of 3.5 million acres and achieving our 2025 goal a year early. Farmers in the program reduced their GHG emissions by more than 1 million metric tons of CO₂e and sequestered more than 363,000 metric tons of carbon in the soil. We also continued enhancing the efficiency of our own footprint, reducing emissions and saving both energy and water as part of our Strive 35 strategy. In 2024, measuring over our 2019 baseline, we delivered a 14.5% reduction in our Scope 1 + 2 GHG emissions, 6.6% reduction in energy intensity and 3.6% reduction in water withdrawal. Healthy ecosystems play a critical role in supporting agricultural resilience, and ADM progressed toward our target to achieve a deforestation-free supply chain by the end of 2025. We also remain committed to conversion-free supply chains in South America's high-risk biomes, helping to protect primary native vegetation. Of course, all of this work comes back to ADM's purpose: unlocking nature to enrich lives. We are committed to making a positive impact on the lives of our colleagues, our partners and the communities where we operate. This year, among other

actions, we advanced our safety record, with a 31% year-over-year reduction in Tier 1 and 2 process safety incidents across our global network. ADM Cares, our corporate social investment program, also invested \$15.6 million in projects and organizations driving meaningful social, economic and environmental progress. We know there's more to be done – and we can't do it alone. Together with our partners and customers, we're scaling up and accelerating solutions to drive growth and secure our future. I'm excited for the work ahead and confident ADM will meet the challenge. Sincerely, Juan R. Luciano Board Chair and CEO

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 3 "Together with our partners and customers, we're scaling up and accelerating solutions to drive growth and secure our future." Introduction 5 About ADM 5 About the Report 6 Our Business 7 Where We Operate Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 4 About ADM ADM unlocks the power of nature to enrich the quality of life. We're an essential global agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. We're a premier human and animal nutrition provider, offering one of the industry's broadest portfolios of ingredients and solutions from nature. We're a trailblazer in health and well-being, with an industry-leading range of products for consumers looking for new ways to live healthier lives. We're a cutting-edge innovator, guiding the way to a future of new bio-based consumer and industrial solutions. And we're leading in business-driven sustainability efforts that support a strong agricultural sector, resilient supply chains, and a vast and growing bioeconomy. Around the globe, our expertise and innovation are meeting critical needs from harvest to home. About the Report We are committed to reporting on our sustainability activities on an annual basis. This report highlights our activities and progress toward addressing key sustainability topics from January 1, 2024, to December 31, 2024. Informed by the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and the Taskforce on Nature-related Financial Disclosures (TNFD), our disclosures cover governance, strategy, risk and impact mitigation, and metrics and targets. We have included an index to the Global Reporting Initiative (GRI) Standards and the Sustainability Accounting Standards Board (SASB) at the end of the report. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 5 Our Business ADM works with thousands of growers in the world's most productive agricultural regions to purchase millions of metric tons of crops each year. Our 44,000 employees work to transform many of those raw commodities into a broad array of products and ingredients serving our customers' needs in food, feed, fuel, industrial, and consumer product applications. ADM is able to efficiently distribute commodities and processed products virtually anywhere in the world with our integrated network of elevators, warehouses, terminals, and transportation fleet assets. ADM owns approximately 150 warehouses and terminals and has 68 innovation centers. We operate a transportation fleet consisting of 2,600 barges, 31,950 rail cars, 610 trucks, 1,740 trailers, 171 boats, and 23 ocean-going vessels, which allows us to move grain as needed in the event of extreme weather or political conflicts that may jeopardize food security. In 2024, we processed 18.5 million metric tons of corn and 35.7 million metric tons of oilseeds. Because these impacts may change over time as our activities, business relationships, and assets evolve, we update this assessment on a regular basis. During our most recent assessment in 2024, the firm compiled perspectives from interviews, surveys, workshops, and research from a variety of internal and external stakeholders, including ADM executives, internal subject matter experts, investors, customers, and NGOs. The assessment prioritized the following key topics based on stakeholder feedback: Climate Strategy Scope 1 + 2 GHG Emissions Scope 3 GHG Emissions Water Management Sustainable and Regenerative Agriculture Deforestation, Conversion, Land-Use, and Land-Use Change Occupational Health & Safety Human Rights and Labor Conditions Corporate Governance Ongoing Stakeholder Engagement We have established direct and easy-to-access communication channels for engagement with our stakeholders. These engagements provide valuable insights on stakeholder concerns and topics that they consider important. In 2024, we engaged with key stakeholders including customers, policy makers, NGOs, and investors. After meeting with customers, we entered into partnerships with several of them on regenerative agriculture and additional collaborations on environmental and human rights topics. We placed additional emphasis on engaging key stakeholders relevant to our supply chain efforts in global palm and South American soy as a part of our strategy to achieve the goals outlined in our Policy to Protect Forests, Biodiversity, and Communities. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 10 Risk and Opportunity Management Sustainability risk management, including climate change and deforestation, is integrated into our multi-disciplinary, company-wide enterprise risk management (ERM) process. Each quarter, the ERM Sustainability subgroup and the ERM team review and report sustainability risks and related mitigation actions. The review includes previously identified risks to ensure that our initiatives are properly focused, as well as the identification and assessment of emerging risks. The team uses a risk matrix that includes a quantitative assessment of impact, mitigation, and residual risk as well as qualitative information about risk categories, warning periods, mitigation strategies, and effectiveness. In line with the

recommendations of the TCFD, we conducted a scenario analysis using three potential warming scenarios: 1.5°C (latest recommendation from the Intergovernmental Panel on Climate Change (IPCC) to prevent the worst effects of global warming), 2°C (aligned with the Paris Climate Accords), and 2.6°C (status quo). In each of the scenarios, we identified potential sourcing shifts and limitations, operational changes, physical impacts, and opportunities. In 2023, we completed a human rights salience exercise to identify risks to human rights in our operations and supply chains. We are also identifying and assessing nature-related issues using the LEAP framework from the TNFD. We have categorized the risks identified through these tools as physical risks or transition risks. We have also identified opportunities related to products and services. Transition Risks Physical Risks Opportunities

More information regarding the results of our scenario analysis and ADM's management of sustainability-related risks and opportunities can be found in our latest CDP Corporate Questionnaire disclosure. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 11 Commitments and Policies ADM maintains several key social and environmental commitments and policies that collectively outline our expectations for our colleagues, business partners, and contractors, and our organization as a whole. They establish clear standards that govern our approach to raw material sourcing, environmental stewardship, and employee conduct, among other areas, and they state our positions on issues of widespread public interest. These standards were developed with input from our operations, law, compliance, and EHS teams, and were approved by Board Chair and CEO Juan Luciano:

- ADM Supplier Expectations
- ADM Tax Policy
- Code of Conduct
- Commitment to Anti-Corruption Compliance
- Environmental, Health, & Safety (EHS) Policy
- Human Rights Policy
- Managing Supplier Non-Compliance Procedure
- Policy to Protect Forests, Biodiversity, and Communities
- Statement on Genetically Modified Organisms
- Statement on Animal Testing

In a world that is becoming increasingly interconnected and transparent, we strive to match that clarity and provide means to facilitate conversation and feedback. We invite all stakeholders who have concerns related to the implementation of our policies to email us at responsibility@adm.com or use The ADM Way Helpline, which is available in more than 30 languages and accessible using a QR code. Our Human Rights Policy protects human rights defenders, whistleblowers, complainants, and community spokespersons from any form of retaliation. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 12 Protect Nature 14 Environmental Strategy 15 Carbon Footprint 17 Energy 18 Freshwater 19 Waste 20 Biodiversity Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 13 Environmental Strategy ADM depends on farmers and productive agricultural systems and the availability of natural resources. Our environmental strategy is based on actions we take to enhance the resiliency of farms in our supply chains, improve the efficiency of our operations, and meet the sustainability expectations of our customers. This ensures that ADM can continue playing a critical role in helping billions of people access the fundamental nutrition they need. For our sourcing regions, we have established programs and commitments aimed at mitigating potential climate- and nature-related pressures, such as extreme weather events, biodiversity loss, and deforestation or native vegetation conversion. Within our operations, we focus on the efficient use of water and energy resources while promoting the beneficial reuse of waste. Our decarbonization efforts also enable the production of low-carbon-intensity product offerings, creating opportunities throughout our businesses and strengthening partnerships with our customers by supporting their own climate-related targets. In addition to ADM's existing policies that articulate our environmental commitments, we also established a series of targets, known collectively as "Strive 35." First published in 2020, these targets measure our progress towards achieving our environmental strategy. Our Strive 35 environmental

targets cover issues relevant to our stakeholders and operations, addressing those where we have the ability to mitigate our impacts. We report progress against these targets annually.

Strive 35 KEY TOPIC	PROGRESS	2025 INTERIM GOAL	2035 GOAL	TARGET DATE
GHG Emissions Scope 1 + 2	GHG emissions over 2019 baseline by 2035 14.5% reduction	1.5% absolute reduction	25% absolute reduction	12/31/2035
Scope 3 GHG emissions	over 2021 baseline by 2035 2.1% reduction	- 25% absolute reduction		12/31/2035
Energy	Energy intensity over 2019 baseline by 2035 6.6% reduction	6% reduction	15% reduction	12/31/2035
Renewable and low-carbon energy	out of total energy use 7.5% usage	-25% usage		12/31/2035
Water	Water withdrawal over 2019 baseline by 2035 3.6% reduction	5% reduction	10% absolute reduction	12/31/2035
Waste	Diverted from landfill 88.4% diverted	87% diverted	90% diverted	12/31/2035

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 14

Carbon Footprint ADM calculates its GHG inventory annually using an operational control consolidation approach, in accordance with the GHG Protocol. Primary sources of Scope 1 emissions include cogeneration, agricultural commodity drying and processing, and fuel consumption for ADM's fleet assets. Our Scope 2 emissions include those from purchased electricity and steam, with the inclusion of market-based instruments associated with renewable energy procurement. The current Scope 3 inventory includes Categories 1-5 and 10, with the majority of those emissions coming from Category 1: Purchased Goods and Services through ADM's sourcing of agricultural commodities.

Scope 1	Scope 2	Scope 3	Scope 1 + 2 Emissions
We calculate and disclose both location-based and market-based Scope 2 emissions, using the market-based approach to measure progress for our Strive 35 reduction target. We also report the amount of CO ₂ that is captured from our ethanol fermentation process in Decatur, Illinois, and permanently sequestered underground through our Carbon Capture and Storage (CCS) operations.	0 14.1M 12.6M 12.3M — 2.94M 2.03M 2.15M -520K -544K -332K 16.5M 14.1M 14.1M	2019 (Baseline) 2023 2024 0 5 10 15 20	Scope 1 Scope 2 CCS Scope 3 Emissions

Our annual Scope 3 inventory includes Categories 1-5 and 10: Purchased Goods and Services, Capital Goods, Fuel-and-energy-related Activities, Upstream Transportation and Distribution, Waste from Operations, and Processing of Sold Products. We also disclose the portion of our emissions in Category 1: Purchased Goods and Services, that are considered Forest, Land, and Agriculture (FLAG). This category is the largest share of our Scope 3 inventory and includes farm-level emissions from fertilizers, fuels, and other direct emission sources, as well as emissions from land-use change (LUC).

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 15

14.5% Reduction over baseline 2.1% Reduction over baseline Total 2024 Emissions 128.6M MT

Scope 1 + 2 Carbon Reduction Reducing emissions associated with our operations can reduce operating costs and translates to reductions in the carbon footprint of our products, an outcome that leads to further opportunities with new and existing customers. We are committed to achieving an absolute reduction in Scope 1 + 2 GHG emissions and are doing so through a combination of energy efficiency initiatives, low-carbon energy usage, and carbon capture and storage projects. To align our carbon reduction strategy with industry standards, we publicly communicated our intent to have targets approved by the Science Based Target initiative (SBTi). Our commitment was published in April 2022, and in 2024, we submitted our near-term targets to SBTi and began the validation process. We continue to engage with SBTi, including through their net-zero standard consultation process, and remain committed to our reduction goals. We are assessing options and alternatives, and continue to work closely with our customers and partners to effectively communicate progress in this area.

GOAL GHG Emissions 25%

Absolute reduction in Scope 1 + 2 GHG emissions over 2019 baseline by 2035 In pursuit of our Strive 35 reduction target, our 2024 efforts included the completion of several projects and continued progress on additional projects that will help us reach our goals. Highlights include: ADM completed an agreement to install solar panels at our Global Research Center in Decatur, Illinois. The new solar installation is expected to be online in 2025 and will reduce Scope 1 + 2 GHG emissions by approximately 3,000 metric tons of CO₂e per year. Project work continued to advance for the capture of biogenic CO₂ emissions from our Columbus ethanol plant operations. With implementation slated for 2026, the project will collect and deliver nearly 800,000 metric tons of CO₂ annually to an offsite permanent sequestration operation. Permitting and engineering activities commenced for the development of Broadwing, the planned low-carbon steam and electricity plant in Decatur. Announced in 2023, this steam and power plant will supply low-carbon energy to ADM's Decatur Complex and is expected to be operational by 2029 with the potential to reduce upwards of 2,700,000 metric tons of CO₂e once fully operational. Scope 3 Carbon Reduction ADM's decarbonization strategy includes reducing Scope 3 emissions across our value chain and annually disclosing our inventory. Scope 3 emissions have been subject to evolving accounting methodologies and we continue to evaluate industry best practices, such as those in the GHG Protocol's Land Sector and Removals Guidance, which is expected to be published in Q4 2025. The majority of our Scope 3 emissions are related to our purchases of agricultural commodities, including emissions resulting from on-farm activities and land-use change. To achieve our Scope 3 reduction goal, we are implementing our no-deforestation program, which will reduce land use change emissions, and we continue to expand our regenerative agriculture program, which provides incentives and support for farmers to adopt practices that can reduce on-farm emissions and sequester carbon in the soil. In 2024, our regenerative agriculture efforts reduced on-farm emissions by more than 1 million metric tons of CO₂e when compared to regional benchmarks, and models show sequestration of more than 363,000 metric tons of CO₂. To allow for changes over time and potential reversals of carbon sequestering practices, we maintain a buffer of participating acres that are calculated but not included in our reported totals. We also use satellite monitoring and traceability programs to achieve our no-deforestation objectives, reducing emissions resulting from land-use change. Because these emissions occur outside of our operational control, we will continue to engage our suppliers, customers, and industry organizations to improve data quality, guide sector-specific accounting guidance, and drive reductions through mutually beneficial programs. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 16 Energy Our Strive 35 program includes goals of improving the energy efficiency of our operations and increasing the usage of renewable and low-carbon energy. Renewable energy includes sources such as wind, hydro, and solar. Low-carbon energy includes zero- or low-emission sources such as biofuels, nuclear, natural gas with carbon capture and storage (CCS), and low-carbon hydrogen and ammonia. Improving energy efficiency across our facilities brings cost savings, while increasing the usage of low-carbon or renewable energy allows us to meet the sustainability expectations of our customers. Together, these objectives further contribute to our sustainability strategy by driving Scope 1 + 2 GHG emissions reductions, leading to a less-carbon-intensive product portfolio. Energy-related projects implemented in 2024 are expected to save more than 600,000 MWh per year. Key initiatives include:

- Completed upgrades at both our dry milling and wet milling operations at our Cedar Rapids corn complex, leading to projected facility-wide energy reductions of 150,000 MWh.
- Replaced desolventizer toaster dryer cooler (DTDC) systems at our oilseeds sites in Erith, UK, and Campo Grande, Brazil, leading to savings of 17,000 MWh and 3,300 MWh, respectively.
- Implemented heat recovery opportunities at our corn

processing facility in Razgrad, Bulgaria, which is expected to reduce energy consumption by 25,000 MWh. • Procured more than 681,000 MWh of renewable electricity. Energy Treasure Hunts Each year, ADM performs “Energy Treasure Hunts” to identify energy reduction opportunities within our facilities that will enable cost savings and feature short payback periods. In 2024, ADM held 13 of these events on-site at ADM locations and identified opportunities that could potentially yield over 850,000 MWh in energy reductions and \$11.3M in cost savings with 75% of the opportunities having a payback period of less than two years. Previous Energy Treasure Hunts led to the implementation of projects in 2024 that are projected to save 114,000 MWh and \$2.7M, demonstrating the effectiveness of the program and our team’s ability to execute on identified opportunities. Building on the success of the internal program, ADM’s team has recently begun offering Energy Treasure Hunts as a service to our customers and their facilities. ADM’s Decarbonization Technical Centre in the EMEA-APAC region partnered with a key customer of our UK Milling business in 2024, resulting in the discovery of potential reductions in energy consumption and GHG emissions of almost 7% and 9%, respectively. More than 20 different energy-saving opportunities were uncovered with an average payback period less than three years. By extending our expertise to customers, we are strengthening and expanding existing relationships with key accounts while delivering real value to their operations.

GOAL Energy Increase low-carbon energy use to 25% of total energy usage by 2035 Low-Carbon Energy (% of total energy usage) 7.7% 6.4% 7.5% 2019 (Baseline) 2023 2024 0% 3% 6% 9% Energy Intensity (MWh/ton of product produced) 1.06 1.02 0.99 2019 (Baseline) 2023 2024 0.0 0.3 0.6 0.9 1.2 Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 17 0.2% Reduction over baseline 6.6% Reduction over baseline Freshwater ADM set a goal to achieve absolute water withdrawal reductions in our Major Water Users Group (MWUG), a collection of 41 of our largest sites that account for more than 95% of our global water usage. Our water withdrawal consists of municipal water, surface water, well water, and rain water. We exclude once-through cooling water from our water withdrawal disclosures and target because we return the water to its original location with only a change in temperature. Water is a crucial resource for our facilities and for the communities in which we operate. We are committed to reducing our freshwater intake and improving our sites’ water use efficiency through a strategy of reduction, reuse, and reclamation technologies and processes. As a global company, we have assets in water-stressed regions and continue to develop our strategy to address stewardship of these watersheds. As part of our objective to develop a water strategy focused on improving community well-being in priority watersheds in 2025, we will be engaging an external water science and engineering firm to review and confirm the sites in scope for the strategy; develop and review project quantification methodologies and targets; and identify actions that we can take in support of these watersheds. Water-related projects implemented in 2024 are expected to save more than 1,340,000 m³ per year. Key initiatives include: • Completed two major projects at our Cedar Rapids complex aimed at recapturing lost productivity in its reuse membrane system and repurposing flows for internal reuse, enabling potential savings upwards of 1,000,000 m³ per year. • Implemented operations improvements at our oilseeds plants in Valdosta, Georgia; Rondonópolis, Brazil; and Uberlândia, Brazil, that are expected to yield cumulative water savings of 58,000 m³ per year. • Made improvements to the boiler make-up water treatment system at our oilseeds facility in Windsor, Ontario, which could reduce water usage by approximately 14,000 m³.

TARGET Water absolute reduction 10% in water withdrawal over 2019 baseline by 2035 Water Withdrawal (million cubic meters) 115.4 110.6 111.3 — 2019 (Baseline) 2023 2024 0 30 60 90 120 Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 18 3.6% Reduction over baseline Waste Focusing on reducing the amount of operational waste we

generate and increasing the waste diversion rate has spurred innovative resource efficiency improvements and strategic partnerships that promote beneficial reuse. Uncovering opportunities for internal reuse of waste streams enables value creation for ADM. For materials that ADM cannot repurpose internally, our colleagues work to identify local organizations that can utilize these waste streams for further applications such as composting, animal feed, or energy recovery. These efforts promote circularity in our value chain while contributing to Scope 3 GHG reductions related to operational waste. Our efforts in 2024 include the following highlights:

- Our biodiesel plant in Joaçaba, Brazil, implemented process improvements to reduce contaminants in filter cake and effluent treatment plant sludge, allowing the materials to be reclassified for use as soil amendment and a source of bioenergy, diverting 350 metric tons per year from landfill.
- ADM's wheat milling facility in Cleveland, Tennessee, installed a new railcar vacuum system to collect waste flour, which can be blended with ADM's animal feed products. As a result, the site received ADM's internal Strive Award for this innovative practice that diverts approximately 2,000 metric tons per year from landfill.
- ADM's North American waste vendor management company helped assist our Fostoria, Ohio, oilseeds plant in locating a composting partner that can process the site's organic waste. Their operation now processes 600 metric tons of ADM's waste, such as scrap soybean pods, hulls, and meal, per year.

Investment Recovery Program ADM's Global Procurement organization continued to yield cost savings, reduce waste, and promote reuse across the company through our best-in-class investment recovery program. The program, originally launched in 2020 and now deployed globally, provides our network of manufacturing locations, crop procurement facilities, and corporate offices a structured and standardized process coupled with enabling technologies to identify surplus and idle assets; create internal visibility to those assets to transfer and reuse wherever possible; recycle those assets if appropriate; or monetize the surplus assets. Since 2020, the program has facilitated approximately 9,400 internal transfers, and in 2024, it generated \$2.7M through the external sale of assets. By redirecting assets that would otherwise be disposed of, the investment recovery program creates financial value for ADM while supporting our Strive 35 goal of a 90% landfill diversion rate. The reduction in waste also reduces our Scope 3 GHG emissions that would result from operational waste and avoids additional Scope 3 GHG emissions that would be associated with the procurement of new assets.

TARGET Waste diverted from landfill 90% Landfill Diversion 81.2% 86.1% 88.4% —% 2019 (Baseline) 2023 2024 .0% 25.0% 50.0% 75.0% 100.0%

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 19 7.2% Increase over baseline Biodiversity

The protection of biodiversity is a crucial component of maintaining resilient and productive agricultural systems. When farmers have the time and resources to focus beyond daily operational demands, they can prioritize enhancing biodiversity across their land. With fewer constraints, they can thoughtfully design more diverse crop systems, establish habitats for pollinators, improve soil health, and integrate practices like cover cropping and agroforestry that foster ecological balance. What once seemed like an ideal becomes practical and actionable when farmers are empowered to focus on the land's long-term vitality. That's why our regenerative agriculture program, small holder engagement, and no-deforestation efforts are a key way for ADM to support biodiversity.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 20

Supporting local economic development Protecting farmer health and safety Maximizing biodiversity Protecting forests Protecting water quality Conserving biodiversity Improving soil health Continuously covering soil Using cover crops Responsibly managing inputs like nutrients and pesticides Using Integrated Pest Management Providing farmers with education, technical support, financial incentives, and more Reducing food insecurity Minimizing soil disturbance and maintaining living roots in soil Practicing

reduced or no tillage No-Deforestation Preserving existing habitats through the avoidance of deforestation in agricultural supply chains helps protect biodiversity and high-carbon-value landscapes. We created our first no-deforestation policy in 2015. In 2021, we announced our aim to eliminate deforestation from all of our supply chains by 2030, aligned with the United Nations' New York Declaration on Forests. The following year, we announced an accelerated target date of December 31, 2025, which is included in our Policy to Protect Forests, Biodiversity, and Communities. Our approach to achieving this goal is grounded in a robust due diligence process, informed by the Accountability Framework initiative (AFI) operational guidance and sectoral and industry standards. We are working to establish a robust due diligence plan that identifies high risk supply sheds, quantifies sourcing volumes in those areas, and monitors land use change in those areas for deforestation, and in 2024, we engaged a consulting firm to conduct a desktop assessment of deforestation risks in our supply chains. This assessment utilized satellite data and quantitative analysis to identify additional areas at high risk of deforestation. For high-risk supply chains, our no-deforestation program includes training, traceability, mapping, monitoring, verification and reporting. Training Throughout 2024, we worked with our sourcing teams to ensure full awareness and understanding of our policy and potential supply chain risks. Traceability For high-risk supply chains, we worked to establish traceability to the mill, silo, or collection point and/or the village, district, sourcing region or port. Mapping Beginning in 2024 and continuing in 2025, we are working to map the crop production areas alongside published databases of known deforestation events from the USDA, FAO, and National Geographic. Monitoring In 2025, we will continue to develop monitoring systems to ensure visibility in high-risk sourcing areas. Satellite monitoring will play a key role in ongoing due diligence, which will allow us to ensure we are not contributing to deforestation through our sourcing. As concerns are raised within our sourcing areas, we will maintain close alignment and collaboration with our supply chain partners. Verification In 2025, we will engage a third-party certification body to verify our methodology and results to confirm the risk of deforestation in our supply chains is negligible. Reporting To maintain transparency, we will publish updates on our due diligence program and progress against our goals on an annual basis. We continue to implement our no-deforestation action plans and programs to address our palm oil and South American soy supply chains. Please find our annual progress updates for these supply chains on our Sustainability Policies & Reports page on our website. Non-Compliance While we work to establish this robust due diligence process to ensure we are not sourcing from deforested areas, instances of non-compliance could be possible. All incidences will be investigated in accordance with our Grievances and Resolutions Protocol and any supplier found to be out of compliance with our policy will addressed through our Managing Supplier Non-Compliance Procedure. EUDR In preparation for the European Union Deforestation Regulation (EUDR), we have taken significant steps to ensure compliance and maintain our suppliers' access to important global markets. We continue to work with stakeholders, including farmers, suppliers and governments across supply chains and regions. Our capabilities, powered by our relationships with farmers and suppliers around the globe, will ensure we can continue to give farmers the choice and the opportunity to add value by supplying global markets, while meeting our customers' needs. No-Conversion In 2023, ADM commissioned an assessment of potential climate impacts related to the conversion of primary native vegetation linked to our commodity supply chains in South America. This assessment led to the development of our no-conversion commitment: we aim to have all our direct supply chains free of conversion of primary native vegetation by the end of 2025, and indirect supply chains by the end of 2027. This commitment is applicable to the defined high-risk areas of the Brazilian Amazon, Cerrado, and Pantanal, as well as the Paraguayan and Argentinian

Chaco. We have adopted December 31, 2025 as our cut-off date for conversion, and we aim to have systems in place to demonstrate compliance by the target dates. As we approach the cut-off date, we will continue to expand monitoring efforts and will engage and educate our suppliers on our sourcing requirements in order to achieve these commitments. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 21

Regenerative Agriculture Regenerative agriculture is an outcome-based farming approach that protects and improves soil health, biodiversity, climate, and water resources while supporting market opportunities and increased value for farmers. Regenerative agriculture is adaptive to local physical conditions and culture and is based on five principles of land management: • Minimizing soil disturbance • Maintaining living roots in soil • Continuously covering soil • Maximizing biodiversity — crops, soil microbes, pollinators • Responsibly managing inputs — nutrients, pesticides, etc. At ADM, we often say that everything starts with the farmer. That is certainly true for successful implementation of regenerative agriculture programs. We meet farmers where they live, both figuratively and literally. We focus on supporting their efforts through flexibility, ease of entry, third-party expertise, and community support. We work with partners spanning the value chain, connecting farmers to end customers, technology providers, and technical experts. All of our partners have a role to play, and all come together with an understanding that this work benefits all stakeholders. In 2024, our regenerative agriculture efforts focused on retaining participating farmers, expanding practice adoption, and rolling out projects in additional geographies. For 2024, we had a goal to engage 3.5 million acres. We are proud to announce we engaged more than 5 million acres, surpassing our 2024 goal and achieving our 2025 goal a year early. North America In 2024, we expanded to more than 4.7 million acres covering corn, soy, wheat, canola, sorghum, cotton, and peanuts. We also expanded the program to include edible beans. EMEA In EMEA, we have expanded our program to more than 80,000 acres, including wheat and canola in Poland, soy in Serbia, and wheat, barley, and canola in the United Kingdom. South America In 2024, we continued efforts with peanut farmers on more than 24,000 acres in Argentina and soy farmers in Brazil covering more than 61,000 acres. APAC In 2024, we continued our smallholder program in India, engaging farmers across 90,000 acres. We also launched a new project in Australia for cotton that will have its first harvest in 2025. Outcomes In 2024, our regenerative agriculture projects: Reduced our Scope 3 GHG footprint by more than 1,000,000 metric tons of CO₂e. Sequestered more than 363,000 metric tons of CO₂e. More information can be found in our Regenerative Agriculture Report on our website. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 22

Responsible Pesticide Management We recognize that pesticide use in the agricultural sector has led to concerns regarding the potential for unintended environmental and health impacts. We also recognize that an estimated 45% of crop production worldwide is lost to pests annually. While we do not own farms and generally cannot mandate practices, we do strive to work with farmers across our diverse global supply chains to support sustainable practices that substitute natural controls for some agrochemicals, foster ecosystem balance, reduce GHG emissions, and mitigate crop losses. We engage with farmers around the world on implementing sustainable and regenerative agricultural practices, including Integrated Pest Management (IPM) principles, cover crops, and companion crops. IPM is designed to reduce risks to health and the environment through the design and implementation of a plan to prevent and manage pest damage by the most economical means with the least possible hazard to people, property, and the environment. Cover crops and companion crops can help protect crops from pests by supporting improvements in soil health and increasing beneficial predatory insects. We source commodities from several programs with components that specifically impact pesticide usage, such as regenerative agriculture, ADM Responsible Soy, International Sustainability

and Carbon Certification (ISCC), Roundtable on Sustainable Palm Oil (RSPO), and Round Table on Responsible Soy (RTRS) programs. We are also supporting the adoption of cover crops, companion crops, and/or the development, implementation, and monitoring of IPM plans. In 2024, we sourced volumes from programs that specifically focus on pesticide management techniques and practices as follows: METRIC TONS Canola 3,810,000 Corn 10,700,000 Cotton 54,700 Palm 236,000 Peanuts 309,000 Sorghum 34,900 Soybeans 4,760,000 Sunflower 37,000 Wheat 1,560,000 Other 52,900 In addition to this global sourcing effort, we are taking steps to identify pesticide usage in our key supply regions. Because pesticides vary in intensity, we need a more robust measurement than application volume to adequately evaluate pesticide usage. The Environmental Impact Quotient (EIQ) calculator, developed by Cornell University, provides data regarding the environmental and health impacts of pesticide options. In 2024, we gathered pesticide data from over 3,000 farmers in the U.S., and in 2025, we will use the EIQ tool to develop insights into pesticide usage in this region.

Community Engagement & Global Impact Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 24 Culture, Engagement, & Inclusion ADM is a truly global company of 44,000 employees working together to achieve extraordinary results connected to our purpose of unlocking nature and enriching life. Our talented colleagues can be found in a wide variety of roles - including front-line employees who enable the production of ADM's products, R&D; professionals who innovate to deliver science-backed solutions from nature, supply chain experts who deliver to customers all over the world, engineering teams who continuously improve our manufacturing operations, sales and commercial teams who work closely with customers, and so many more. Our culture is grounded in the values of integrity, respect, excellence, resourcefulness, teamwork, and responsibility. We believe that cultivating an inclusive culture of care and continuous learning for our colleagues is a critical lever to help ADM to continue innovating, driving growth through customer focus, and delivering outstanding performance for shareholders. ADM provides opportunities for all members of our diverse, global workforce to make meaningful contributions to the company's success. We continually provide development opportunities to our colleagues to build skills and experiences that help to deliver our strategy. This is done through formal learning programs, on-the-job development, as well as structured mentoring and coaching programs available globally. In 2024, ADM conducted an all-colleague listening survey to measure colleague perspectives on engagement, enablement, and inclusion. The insights from this survey served as an input to a new quarterly cultural scorecard that tracks various measures - including new joiner sentiment, employer brand sentiment, employer brand reputation, and attrition. These efforts support our ability to effectively measure the impact of culture on business results. ADM's Global Week of Understanding is a signature week-long investment focused on continuous learning and strengthening our culture. The week features keynote presentations, training programs, roundtable sessions, and onsite activities that foster an environment where all can thrive, and diversity of perspectives are harnessed to fuel innovation and growth. ADM's Employee Resource Groups (ERGs) are voluntary, employee-led groups where colleagues with shared experiences or interests can come together to build a sense of community and engage in personal and professional development. Our ERGs are open to all employees and offer forums that foster collaboration, connection, and learning.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 25 Health and Safety Employee Safety ADM is committed to a safe and reliable culture that protects our people and processes. By fostering a highly engaged workforce that is proactive and relentlessly focused on risk

reduction, we aim to ensure that every colleague returns home safely to their families and the things that matter most. In 2024, 75% of our sites completed the year with zero injuries and approximately 89% with no lost-workday injuries. Our colleagues delivered a year-over-year reduction of 31% in tier 1 and 2 process safety incidents. In addition, our Decatur complex achieved significant safety improvements in 2024 with no serious injuries. Globally, we had one ADM colleague fatality and nine serious injuries. We continue to take steps to further enhance our workplaces through occupational safety and process safety improvements with a goal of zero fatalities. Through the guidance of the Environmental, Health, and Safety Technology Center, we are advancing impactful safety initiatives, including:

- Driving excellence in Life-Critical Standards
- Encouraging proactive use of Stop Work Authority
- Expanding Total Process Safety training at all organizational levels
- Providing focused support to our highest-risk sites

As defined by OSHA, we track and report our annual Total Recordable Incident Rate (TRIR) and Lost Workday Incident Rate (LWIR), based upon the number of incidents per 100 employees (or per 200,000 work hours). In 2024, the TRIR and LWIR values were 0.69 and 0.23, respectively, excluding unsupervised contractors. Looking ahead to 2025, ADM is focused on efforts to reduce serious injuries and total recordable injury rate. We are no longer tracking safety performance against a 2020 baseline. Instead, we are exploring new targets that are aligned with industry best practices and that support actions and behaviors that will allow us to continue to improve. We are also developing an incident severity index that will allow for a meaningful comparison of incidents across geographies and over time. Employee Health Programs ADM continues to provide access to several virtual health support programs for our colleagues. In 2025, our digital health partner, Hinge Health, will begin offering Women's Pelvic Health Programs at no cost to our colleagues and/or their spouses who are enrolled in an ADM medical plan. Additionally, access to Hinge Health can help employees suffering from muscle or joint pain. Participating colleagues can work with a virtual care team to assess and develop a personalized exercise plan, reduce pain, and find physical therapists. We also provide mental health support through TELUS Health, weight management support through Wondr Health, hypertension and diabetes care through Teledoc Health, and a smoking cessation program in partnership with the American Cancer Society Quit for Life® program.

Introduction Sustainability at ADM

Protect Nature	Enrich Lives	Governance	Data Tables and Indices
26	75%	89%	Sites with Zero Injuries
			Sites with Zero Lost-Workday Injuries

Food Safety and Quality We believe food is fundamental to quality of life, and expanding access to nutrition is a foundational piece of how we fulfill our purpose. The safety and security of our world's food and feed supply chains are of critical importance to that work. That's why at ADM, we continually review and improve our food safety systems and procedures, including good manufacturing practices for human and animal food. We also develop and implement risk-based preventive controls and critical control points for human food based on hazard analysis. Our facilities, processes, and procedures undergo regular evaluation to assess the risk of product contamination, and we implement a variety of safeguards and security concepts to reduce those risks. We built our Food Safety and Quality program to continually drive toward safety, center on customers and focus on quality. Food Safety Driven Customer Centered Quality Focused Food Safety Driven Utilizing our customized "Integrated Risk Management" application, we are able to proactively monitor and provide focused support across the organization through subject matter expertise, resources, and global verification procedures to ensure conformity to strict food safety standards. In 2024, ADM increased our number of sites certified under Global Food Safety Initiative (GFSI) schemes to a total of 330. Customer Centered Our Quality and Food Safety Center of Excellence keeps the customer at the center of all we do. Whether an internal or external customer, we strive to provide the highest quality product and service. Tools such as our Quality

Management System (QMS) help to align everyone on best practices to ultimately satisfy all of our customers. Quality Focused In September 2024, we held our fifth annual Global Food Safety Week for our colleagues around the globe to provide a dedicated time to refresh knowledge of best practices and refocus on the program. The theme this year was “Quality in Customer Excellence” to highlight the fact that quality is truly the key to achieving excellence in serving our customers. We hosted activities to reinforce and educate our team on the critical role that quality plays when it comes to our customers and to reinforce ADM's culture of Food Safety and Quality. In 2024, we continued to create dynamic and engaging training targeted to our colleagues in various departments to highlight the link between all roles and Food Safety and Quality outcomes. Safety and Quality Drive Innovation in Rapid Mineral Testing The “Method Tool for Mineral Control” project, based in Tepatitlán, Mexico, has made significant strides thanks to an internal cross-functional team. This initiative focused on developing a rapid mineral testing method to enhance quality control and consistency in premixes. This project is crucial to ADM's commitment to enhancing the quality and safety of our products. The new rapid testing method advances our goals of safety and quality, focusing on people, food, and feed. The new method is faster and more efficient than traditional approaches, with reduced preparation and analysis times; delivers reproducible, constant values; can analyze up to 90 minerals on the periodic table; and requires no chemical reagents. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 27 Human Rights Salient Risks ADM engaged with a third-party organization to conduct a formal salience assessment, evaluating human rights risks across our entire value chain, regardless of the scale or the far-reaching nature of the issue. Open dialogue among ADM teams, affected communities, and NGOs helped determine the salient risks within our supply chain based on the likelihood of occurrence and severity of the potential impacts on people and their communities. Child Labor Forced Labor Gender Discrimination Health & Safety Impacts on Communities Just Transition in Agriculture Living Wages Recently, we incorporated the findings of the salience assessment into our supply chain due diligence process to enhance the accuracy of our risk assessment. The integration allows a systematic identification of high-risk geographies, commodities, and suppliers, helping to mitigate potential negative impacts. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 28 Supply Chain Due Diligence ADM's Human Rights Due Diligence Framework provides a clear guide for identifying, preventing, resolving, and mitigating the negative impacts on people and the environment within our supply chains. It is based on the United Nations Global Compact (UNGC) Framework and the United Nations Guiding Principles on Business and Human Rights. In 2024, we performed a human rights risk assessment based on the social risks associated with sourced commodities and the salient risks in the country of origin of the commodities. Our Supply Chain Due Diligence Report summarizes our efforts and highlights case studies that illustrate some of the many actions that we take to prevent and mitigate identified risks. Our actions work to improve the livelihood of communities, promote fair labor conditions, and unlock the potential of local suppliers. Grievance Mechanism ADM offers two channels for reporting human rights concerns regarding noncompliance with ADM's policies, local laws, and regulations. Interested stakeholders can contact the ADM Way Helpline and anonymously submit questions or concerns regarding our Code of Conduct and business ethical standards. Additionally, we welcome external parties, including individuals, government organizations, and non-governmental organizations to send any concerns regarding the Policy to Protect Forests, Biodiversity, and Communities and our Human Rights Policy through email to responsibility@adm.com. SEDEX & EcoVadis We invest in our people and strive to create a workplace where they can thrive. For over a decade, we have been evaluating the environmental, health and

safety, and labor conditions of our facilities through internal and external audit programs. Our company uses Sedex and EcoVadis to identify risks within our operations and supply chains related to labor standards, environmental, health, and safety conditions, and business ethics. We have more than 115 sites registered on Sedex, and currently link to more than 900 suppliers on the platform. Additionally, more than 30 ADM entities have been evaluated through EcoVadis assessments. At the ADM facilities audited in 2024, there were no fees charged to jobseekers in exchange for employment, and no collateral was taken in the form of money, identification, or other personal belongings without the workers' consent as a condition of employment by ADM or contracted companies. No human trafficking or forced labor of any kind was observed. Our sites' performance in these responsible sourcing assessments and audits demonstrates the alignment of our facilities with our environmental, health, and safety commitments. By leveraging these platforms, we not only uphold our commitment to ethical sourcing but also foster stronger partnerships with our suppliers, creating a more transparent value chain.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 29 Community Engagement & Global Impact ADM Cares At ADM, we believe in the concept of shared value creation. Our corporate social investment program, ADM Cares, aligns corporate giving with our business strategies and sustainability objectives. Through the program, we work to sustain and strengthen our commitment to communities where we work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic, and environmental progress. Our goal is to bolster the communities where ADM employees reside and work by allocating resources, volunteer efforts, and industry expertise to projects and organizations that drive meaningful progress. ADM Cares maximizes our societal impact across the globe, and by collaborating with partners, we magnify the effect of our philanthropic endeavors, making a difference in the lives of individuals worldwide. In 2024, ADM Cares grants were focused on three key areas in line with our mission of unlocking nature to enrich lives: sustainability, food security, and health and well-being. The ADM Cares team assesses potential projects to ensure they meet specific criteria and contribute to our objectives in these focal areas. The impact of projects supported by ADM Cares is evaluated through annual reports to continually assess community needs and address pressing issues. Colleague Volunteering Colleague engagement plays a vital role as well, fostering a sense of pride and purpose among ADM employees who are directly involved in supporting and implementing these initiatives. Together, in 2024, colleagues volunteered close to 8,500 hours in ADM communities around the world. In our EMEA region, our teams participate in a regional Volunteer Week, encouraging teams and individuals to volunteer with local causes, with plans to expand activities to the entire global ADM team in the future. Colleagues band together across regions to address food insecurity by supporting local food banks through collections and onsite packing events. Environmentally focused volunteer events include tree planting, river cleanups, and wildlife restoration projects. Through these collaborative efforts, ADM Cares not only enriches lives in our communities, but also cultivates a sustainable and prosperous future for people across regions.

2024 ADM Cares Spending | Sustainability | Colleague Giving | Food Security | Other | Health & Well-Being Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 30

Category	Percentage

Health & Well-Being	34%

2024 ADM Cares Spending \$15.6 million ADM Institute for the Prevention of Postharvest Loss In 2011, the ADM Institute for the Prevention of Postharvest Loss (ADMI) was established by the University of Illinois after receiving \$10 million in funding from ADM Cares. ADMI was created to alleviate poverty and hunger among smallholder farmers through improved postharvest management of grains and oilseeds. ADM Cares has since continued to partner with ADMI and supported various projects aimed at promoting research, community outreach, education, and

capacity building to reduce postharvest losses. In 2024, with support from ADM Cares, the ADMI team worked with colleagues at IPB University in Indonesia to design and pilot a training program for extension workers. The goal of this engagement was to enhance the extension workers' support of income-generating activities of female farmer groups. ADMI designed an online training program for 51 extension workers that covered topics such as participatory extension practices, gender equity in extension, and writing a business plan. After six months, the project impacted 1,950 female farmers through improved extension services with 76% of farmer groups starting new income-generating activities and 92% of the extension workers facilitating goal-setting activities with farmer groups. ADMI received additional funding from ADM Cares to scale up this training to reach more extension workers in 2025. ADM Cares also supported a second ADMI-led project that was initiated to engage women who participate in oil palm production in three regions across Indonesia. The oil palm sector provides economic opportunities for rural women, but working in this sector may also expose these women to harassment and dangerous work conditions. ADMI's project surveyed 600 women working in the industry in various capacities, following up with focus group discussions and interviews. The feedback collected was used to prepare multiple policy briefs that will be presented to policy makers. The policy briefs outline ways to support women in the oil palm industry, reduce harassment, and elevate women's voices in the decision-making process.

Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 31 Governance 33 Strategy and Oversight 34 Compliance and Ethics Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 32 Strategy and Oversight Our commitment to change and growth goes beyond our products and services. At ADM, sustainable practices and a focus on healthy soil, water and air are not separate from our primary business: they are integral to the work we do every day to serve customers, create value for shareholders, create market opportunities for farmers and ensure the long-term resilience of agriculture. We are committed to being a force for change in developing innovative, sustainable solutions in agriculture, food and nutrition, industrial and consumer products, energy, and packaging materials while pursuing ways to continually improve our efforts in both protecting the environment and enhancing environmental and social sustainability. We believe sustainability is critical to our future growth strategy. Our strategic plan of sustainable growth leverages the trends and technologies in sustainability to help us grow and create value for our stakeholders. Our Agricultural Services and Oilseeds business unit is focused on traceability of sourcing and differentiation, and working with growers on low-carbon agricultural practices and products. Carbohydrate Solutions is focused on decarbonization efforts that increasingly position the business to offer low-carbon-intensity feedstocks for biosolutions and biomaterials, including fuel solutions, to replace petroleum-based products. Nutrition is working with suppliers and customers to identify nature-positive solutions that can reduce environmental impact in supply chains. The growth of these projects and businesses will be integral to supporting the objective of helping the planet limit total global warming to the 1.5°C threshold indicated by the United Nations. Additionally, ADM includes achievement of GHG emission goals and water reuse goals in executive performance measurement to reflect the strategic importance of ESG to our business. Our sustainability efforts are overseen by our Board of Directors, including a dedicated Sustainability and Technology Committee, supported by our management sustainability team. The Sustainability and Technology Committee maintains detailed oversight of our sustainability strategies and initiatives, monitoring short, intermediate, and long-term objectives with regular management updates on key sustainability issues and progress. The Executive Council of ADM, our highest strategic and operational body, provides close supervision of our ESG efforts and in-depth review of sustainability issues. Furthermore, regional

sustainability teams, along with the corporate sustainability team, support the CSO to drive sustainability efforts in our facilities and supply chains around the world. Our sustainability efforts are also supported by functional expertise throughout the company, including Operations and Utilities; Supply Chain and Procurement; Agricultural Services and Oilseeds; and Environmental, Health, and Safety. Sustainability and Technology Committee of the Board • Has direct oversight responsibility of objectives, goals, strategies, risks, and activities related to sustainability Executive Council of ADM • Highest strategic and operational body • Provides close supervision of our ESG efforts and an in-depth review of sustainability issues Vice President, Chief Sustainability Officer (CSO) • Leads ADM's sustainability efforts • Reports metrics quarterly to ADM's Board of Directors • Meets quarterly with ADM Sustainability and Technology Committee of the Board • Reports regularly to ADM leadership Regional and Corporate Sustainability Teams • Support business units to drive transformation and help create value across the supply chain • Support sustainability initiatives and implementation on the ground • Engage and interact with stakeholders • Located in North America, South America, and EMEA Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 33 Compliance and Ethics At ADM, we strive to meet the highest standards of ethical behavior. We have developed key policies and programs to work toward this aim. In March 2025, we were recognized by Ethisphere, a global leader in advancing the standards of ethical business practices, as one of the World's Most Ethical Companies™ and one of only 10 honorees in the Food, Beverage, & Agriculture category. This honor marks the sixth consecutive year we have received this recognition for our deep commitment to ethical business practices, transparency, and corporate citizenship. In 2024, we published a modernized and more accessible version of our Code of Conduct. We shared this Code with colleagues globally through various channels, including email announcements on our ADM Inside News intranet site, regional communication campaigns featuring videos, newsletters, and training sessions, as well as computer screen savers and leadership messages. The modernized Code includes a new style and structure, along with an expansive set of examples to help colleagues in applying its principles. The Code also includes links and references to relevant policies and resource centers, which provide easy access to a wide range of helpful tools and job aids, such as our "Food for Thought" guide, which answers common questions about the Code, related policies, and programs, and provides an extensive set of solutions to various scenarios that colleagues may face. In 2024, following an assessment of our compliance program by external consultants, we began implementing enhancements to our compliance environment to improve the effectiveness of our compliance program and to promote a speak-up culture. This initiative involves strategic executive actions, improved management communication, and employee input to strengthen the tone at the top and foster a culture of compliance, enhance our investigation processes to ensure consistency, and improve communication and awareness training. Our SVP, general counsel, and secretary conducted compliance training for our most senior leaders, focusing on integrity and ways to strengthen our compliance culture. In 2025, each of these senior leaders cascaded this training throughout the organization, transparently explaining the company's expectations around compliance. We prohibit all forms of corruption, including bribery, and we abide by all anti-corruption laws in every country we do business. We have a robust anti-corruption program that includes a global Anti-Corruption Policy and other compliance procedures and controls, such as enhanced due diligence, screening, monitoring of high-risk third parties, and pre-approvals before hosting or entertaining government officials, designed to minimize the potential for corruption in ADM's global business dealings. We train colleagues and third parties to raise awareness of corruption risks and applicable anti-corruption laws in order to both avoid inadvertent violations of the law and enable early recognition and handling of

potential issues. Our Anti-Corruption Program and Policy are updated periodically to address new risks and incorporate continuous enhancements. In 2024, we enhanced our expense report procedures to prevent fraud. The Compliance team collaborated with our Global Technology colleagues to develop an interactive AI module with direct hyperlinks and citations and relevant policies. Introduction Sustainability at ADM Protect Nature Enrich Lives Governance Data Tables and Indices 34 Our helpline is available by phone or online in more than 30 languages. At ADM, we have developed a comprehensive third-party due diligence program alongside our innovative Third-Party Risk Management (TPRM) initiative, which includes our unique Vendor Compliance Day events. Launched in 2017, we host these events annually around the world to communicate our expectations to higher-risk vendors regarding fair and honest business practices, and compliance with the law. These events reinforce a strong “tone from the top,” with senior country and commercial leaders co-leading the events. They emphasize the importance of adhering to the high standards that ADM expects of its own employees. Vendor Compliance Day events offer resources designed to help vendors understand and meet ADM’s standards for responsible and ethical business practices. They also reaffirm our third parties’ commitment to comply with ADM policies, applicable laws, and the terms of our agreements. Furthermore, these sessions provide an opportunity to collaborate on navigating complex regulatory and operational challenges, improving responsible business practices and strengthening the overall program. In 2024, we received a total of 1,632 reports concerning topics such as employee relations; environmental, health, and safety (EHS); diversity; equal opportunity; respect in the workplace; and misuse or misappropriation of assets or information. We log and track all reports we receive. Each is classified by type and then assigned to an investigator to conduct an independent and objective review into the concerns raised. If an allegation is substantiated, we implement corrective and disciplinary actions that can include coaching and counseling, process or control improvement, verbal or written warnings, financial penalties, or termination. We assess the effectiveness of our compliance controls through enhanced reporting and automation. We are able to monitor trends and identify compliance risks with the use of an interactive compliance application, which enables us to assess information from our databases on various topics such as conflicts of interest, government hosting and gifting, expense reporting, and training. Training is a key component of our compliance program. In 2024, 99% of all colleagues completed annual required training. Training included coverage and certification of our modernized Code of Conduct, our commitment to integrity, the importance of speaking up, and our policy of no retaliation. Training was also provided on the acceptable use of ADM assets, travel and expenses, supporting an environment of respect, and psychological health and safety. Above and beyond our global annual required training, Compliance held 216 facilitator-led training sessions for nearly 8,000 colleagues in 16 countries around the world. These training sessions covered the following topics: anti-corruption, Code of Conduct, conflicts of interest, donations and contributions, government hosting and gifting, anti-money laundering, fraud, harassment, trade sanctions and antiboycott, internal investigations, dawn raid and antitrust/competition, confidentiality, compliance integration, third-party due diligence and screenings, data privacy, data classification, election guide, and JV board members. Consistent with our commitment to managing risk related to our third-party relationships around the world, 2024 marked the tenth consecutive year of ongoing compliance monitoring and training of third-party service providers acting on our behalf. This year we completed 15 compliance audits of third parties, including port agents, customs brokers, law firms, consultants, and distributors. We also hosted 12 virtual compliance training sessions globally, with more than 400 attendees from nine countries.  We are thrilled to unveil the **2025 Halo Award Finalists**, celebrating the most outstanding partnerships between for-profit companies and nonprofit organizations that are driving meaningful impact on the cause and the business. These awards honor innovative, purpose-driven initiatives that go beyond traditional corporate philanthropy, demonstrating the power of collaboration in solving some of society's most pressing challenges. This year's finalists represent groundbreaking work across **16 categories**, showcasing efforts in advocacy, disaster relief, employee engagement, sustainability, and more. Each finalist exemplifies the best in corporate social impact—proving what is possible when businesses and nonprofits join forces to create lasting change. # 2025 Halo Award Finalists by Category These awards spotlight exceptional initiatives born from the collaboration of for-profit and nonprofit organizations. They celebrate programs that weave together business goals and resources with social purpose, resulting in measurable positive change for people and/or the planet. Across 16 distinct categories and one "Best-of-the-Best" winner, these initiatives exemplify the power of partnership and innovation to address critical social issues.
 Recognizes initiatives where a product or service is intrinsically linked to a social cause. This includes products specifically designed to generate social impact (e.g., a clothing line made from recycled materials that provides fair-wage jobs), or where a portion of proceeds is directly donated to support a cause (e.g., a percentage of sales from a coffee blend goes to support rainforest conservation). Recognizes initiatives that leverage the power of marketing and communications to drive positive social change. This includes campaigns that creatively integrate cause-related messaging into marketing strategies, build strong partnerships between brands and nonprofits to amplify their message, and engage consumers in social impact through compelling storytelling, activations, and calls to action. Recognizes initiatives that empower consumers to contribute to a social cause. This includes campaigns that facilitate donations at the point of sale (e.g., rounding up purchases), through online platforms, text-to-give campaigns, or by encouraging actions that trigger donations (e.g., donating a set amount for every social media share). This award celebrates initiatives that make giving easy and accessible, mobilizing consumer generosity to create meaningful social impact. Recognizes initiatives focused on a social issue such as sheltering the houseless, providing food for children, mental health support, or training rescue dogs in a manner consistent with the company's business goals. Recognizes initiatives that focus on the lives of people within the disability community. This includes campaigns that increase access to resources, raise visibility for challenges the community faces, change policies and systems to serve people with disabilities better, and more. Recognizes initiatives that incorporate DEIB

values into their company, campaign, and partnerships. This includes DEIB programs that offer opportunities and resources to equity-seeking communities, internal process/policy changes for equity and inclusion, or an innovative DEIB approach to an old problem or cause. Recognizes initiatives that strive to improve educational outcomes for individuals and communities. This includes campaigns that increase access to quality education, support innovative learning approaches, address educational inequities, and empower learners of all ages. Recognizes initiatives that respond to an immediate emergency, crisis, or disaster, develop a long-term initiative to support a disaster-affected community, or efforts to prevent emergencies from happening. Recognizes initiatives that meaningfully and measurably engage a company's employees in a cause-focused initiative to achieve both social and business impact, whether that be through volunteerism or other employee engagement activities. Recognizes initiatives that address hunger and food access challenges. This includes campaigns that provide meals or resources to those experiencing food insecurity, raise awareness about the issue, advocate for policy changes, or support sustainable solutions to combat hunger. Recognizes initiatives that champion equity and inclusion for people of all genders and sexual orientations by promoting equal access to resources and opportunities, breaking down barriers like stereotypes and bias, and fostering safe and inclusive environments where everyone feels respected, valued, and empowered. Recognizes initiatives that take an intersectional approach to their social impact strategy. This includes campaigns that target multiple causes and communities. For example, a campaign that addresses climate change and immigration or a campaign that targets young people of color and parents. This award recognizes initiatives that prioritize the health and wellbeing of individuals and communities by addressing mental or physical health challenges. This includes providing access to care, supporting research and innovation, addressing health disparities, and developing innovative solutions to improve overall health outcomes. Recognizes initiatives that champion environmental stewardship by promoting sustainable practices across operations and supply chains, conserving natural resources through ecosystem protection and responsible consumption, and raising awareness to inspire collective action toward a more sustainable future. Recognizes initiatives that demonstrate impactful and innovative use of technology to address social challenges, scale NPO programs and impact, driving positive change and sustainable solutions. Recognizes initiatives that demonstrate excellence in advocacy or policy work, driving positive change by influencing public opinion, legislation, or systematic change. Chosen from across the full spectrum of Halo Award winners and voted on by The Halo Award judges, this award is category-agnostic and recognizes an initiative that best demonstrates outstanding execution of an initiative that engages multiple stakeholders, has a clear impact on business and community, and is innovative in its approach. These awards spotlight exceptional initiatives born from the collaboration of for-profit and nonprofit organizations. They celebrate programs that weave together business goals and resources with social purpose, resulting in measurable positive change for people and/or the planet. Across 16 distinct categories and one "Best-of-the-Best" winner, these initiatives exemplify the power of partnership and innovation to address critical social issues. ## Join Us at #EFG2025 to Celebrate the Winners The Gold and Silver winners will be announced at the The Halo Awards Gala at the 2025 **[Engage for Good Conference](https://engageforgood.com/conference/) in April in Palm Springs**. Stay tuned for the full list of winners and more details on their groundbreaking initiatives. **Congratulations to all the finalists—your work is shaping the future of corporate social impact!** **![https://px.ads.linkedin.com/collect/?pid=5847338&fmt=gif]

ADM Cares ADM's corporate social investment program, ADM Cares, aligns our corporate giving with our business strategies and sustainability objectives. ## Advancing Sustainable Agriculture, Increasing Food Security, Investing in Education Through the program, ADM works to sustain and strengthen our commitment to communities where our colleagues work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic and environmental progress. The ADM Cares team evaluates potential projects submitted for funding to ensure they meet eligibility criteria, such as initiatives that support food security, health and well-being, and sustainability around the world. Grants given by ADM Cares target three particular areas that align with our purpose: ## Areas of Focus [Advancing Sustainable Agriculture]/(en-us/sustainability/goals-and-programs/adm-cares/advancing-sustainable-agriculture/"Advancing Sustainable Agriculture - Advancing Sustainable Agriculture") [Increasing Food Security]/(en-us/sustainability/goals-and-programs/adm-cares/increasing-food-security/"Increasing Food Security - Increasing Food Security") [Investing in Education]/(en-us/sustainability/goals-and-programs/adm-cares/promoting-health-and-well-being/"Investing in Education - Investing in Education") ## ADM Cares At ADM, we believe in the concept of shared value creation. ADM's corporate social investment program, ADM Cares, aligns corporate giving with our business strategies and sustainability objectives. Through the program, we work to sustain and strengthen our commitment to communities where we work, live, and operate by directing funding to initiatives and organizations driving meaningful social, economic, and environmental progress. The ADM Cares team evaluates potential projects submitted for funding to ensure they meet eligibility criteria, such as initiatives that support education, food security and hunger relief, or safe, responsible, and environmentally sound agricultural practices in critical growing regions around the world. The impacts from projects receiving ADM Cares support are measured through biannual outcome reports to allow for ongoing community needs assessments and to ensure critical issues are addressed. ADM Cares grants target three focus areas that align with ADM's mission of feeding the world: sustainability, hunger relief, and education, with a focus on agricultural education and science, technology, engineering and math (STEM) disciplines. In addition to these focus areas, ADM Cares programs advance ADM's sustainability goals, with special attention to partnerships that advance. The United Nations Sustainable Development Goals (SDGs) aligned with ADM's sustainability and business objectives. Specifically, ADM Cares partnerships will support Goal 2: Zero

Hunger; Goal 6: Clean Water and Sanitation; Goal 8: Decent Work and Economic Growth; Goal 13: Climate Action, and Goal 15: Life on Land, sustaining and strengthening communities where ADM colleagues work, live and operate by directing funding, volunteerism, and industry knowledge to initiatives and organizations that are driving meaningful social, economic and environmental progress worldwide. ADM Cares optimizes our social impacts around the world through partnerships that advance multiple ADM Cares focus areas, while advancing several of the United Nation's Sustainable Development Goals. Through these partnerships, we are able to exponentially leverage our philanthropy to make a meaningful impact in the lives of many around the world. *ADM Cares' matching gifts are contributions that are made on behalf of the company to support employees' personal contributions. Contributions matched from ADM do not necessarily represent ADM's corporate social investment strategy or viewpoint. However, all ADM contributions, including matching gifts, must support organizations that uphold ADM's key values, as expressed in The ADM Way.* Partner with us now!
